CATALOGUES RECEIVED.

Bobbink & Atkins, Rutherford, N. J.
—Price list of Vines and Climbers in pots. Very useful stock which can be planted at any season.

Thomas J. Grey Co., Boston, Mass.—
Bulb Catalogue, 1909. Price list of bulbs for fall planting and miscellaneous horticultural sundries.

Hjalmar Hartmann & Co., Copenhagen, Denmark.—Prospectus of Danish lily of the valley, and Comtesse Knuth carnation for September delivery.

Dingee & Conard Co., West Grove, Pa.—New Guide to Rose Culture and Bulb Growing, Fall, 1909. Colored illustrations of hyacinths and Charles Dingee rose adorn the covers.

Conard & Jones Co., West Grove, Pa.—New Floral Guide, Autumn, 1909. The usual enticing contents. Cover shows peony Marie Lemoine on front and standard single early tulips on rear.

J. M. Thorburn & Co., New York City—Bulb Catalogue for 1909. Compares favorably with past publications issuing from this old reliable house. The cover is rich but unobtrusive in color and design.

Eastern Nurseries, Jamaica Plain, Mass. Henry S. Dawson, Mgr.—Early Autumn List. This includes a special price list of evergreens for early fall shipment and hardy herbaceous plants of the choicer sorts.

Burbank's Experiment Farms, Santa Rosa, Cal.—Descriptive List of the New Burbank Giant Amaryllis; 136 varieties are listed with brief descriptions. The present stock of each is given and each variety is offered outright. The illustrations which are given show a very fine type of flower.

ROYAL HORTICULTURAL SOCIETY.

The hall in Vincent Square was again, on August 17, ablaze with color, the tables being filled with a profusion of shrubby phloxes, gladioli, gloxinias, cut sprays of flowering shrubs, clematises, cannas, hardy fuchsias, herbaceous perennials and a good assortment of orchids, including many fine cattleyas and hybrid laelio-cattleyas from the trading houses, and a capital display of codiaeums (crotons).

Orchids.

Messrs. Sander & Sons came out strongly with these plants in much variety. The more remarkable were the following: *Cypripedium Uitor*, a cross of *C. Lawrenceianum* and *C. Sanderianum*. The flower has the long, drooping petals of the *Selenipediums*, and a brown pouch of constricted shape, a dorsal sepal of a greenish color with erect lines on it, of a black-brown tint; the petals twisted and narrow and furnished with dark colored spots. *Cypripedium Olga* Bagshaw possesses likewise a dorsal sepal of fine proportions, white, with a purplish tinge about the central area, the petals of a varnished brown color. *Dendrobium Regium* has flowers of a pleasing, rosy purple tint, and a throat of a shade of yellow; and is very free to flower. *Laelio cattleya Digbyanas* were many and the more striking were *L. c. Digbyana Mossiae*, a light purple flower, of a deeper tint in the sepals and petals and a lip gracefully fringed in the *Digbyana* manner; *L. c. Blechleyensis*, a very fine variety having a labellum of rich purple; *L. c. Berthe Fournier*, a cross of *L. c. elegans* and *C. Dowiana aurea*. The flower possesses rosy purple petals and sepals and a purple lip, the petals and sepals being folded inwards, rather spoiling their effect. *L. c. Digbyana gigas* was a striking variety with the *Digbyana* fringed lip. A splendid spike of *Odontoglossum crispum Harryanum* was remarked, with much brown spotting on a milk-white ground; also *Odontioda Bradshawiae*, with sepals and petals of a pinkish orange, and the tips pale flesh color. *L. c. Nysa* is a flower with a lip of an intense purple shade, sepals voluted, and petals outspread, wavy at the edges and of a light purple tint. *Brasso-cattleya Pluto* excels in a strikingly pale brown as regards the petals and sepals, the lip fringed as in *Brassia*, purplish at the base, merging into cerise at the margin.

Messrs. Charlesworth & Co. exhibited some fine orchids, notable being *Cattleya Venus*, the lip of which is of rich purple with lines of orange running down the tube; sepals and petals lemon yellow. *Trichopilia Turialon* has flowers of canary yellow, with a green tinge on the sepals and petals, the throat colored orange. *Angraecum Rothschildianum* is a dwarf species with depressed white blossoms, with some green color in the throat.

Messrs. Stuart Low & Co. showed a very splendidly bloomed plant of *Odontoglossum Rolfae*, the individual flowers measuring 3 inches in diameter; *Cattleya Pittiana* is a variety with creamy white sepals and petals, a lip reticulated with purple, and a bright yellow throat; *Cypripedium gigas Cordean* variety is a robust growing

plant, having a dark brown pouch and sepals, the dorsal one being white with a green central area.

H. S. Goodson exhibited *Laelio-cattleya Black Prince*, a flower having a fine purple colored lip, and rosy purple sepals and petals (award of merit). He likewise showed *Odontoglossum Goodsoni*, a cupped flower, white, with spots of rich brown and eight of the flowers on one spike (first-class certificate).

Messrs. Moore, Ltd., showed *Dendrobium acuminatum*, having a flower stalk one foot high, surmounted with a number of closely set, rosy-red flowers, the central parts being the deeper in color (first-class certificate). This firm were likewise exhibitors of *L. c. Jason*, the flower of which has a rich purple labellum waved at the edge, the sepals and petals being lemon yellow (award of merit).

Two dozen plants of *Disa grandiflora*, in flower, from Mrs. Bischoffsheim created quite a sensation among the visitors. A very interesting exhibit consisting of hardy flowering shrubs and climbing plants was contributed by Messrs. J. Veitch & Sons. This included several forms of *Buddleia variabilis*; *Clematis Countesse de Brouhard*, rosy purple; *C. Colette Deville*, rich purple; *C. La France*, bright blue; several species of *Hydrangeas*, including *H. Japonica tricolor*; very finely flowered growths of *Eucryphia pinnatifolia*, numerous species of *Hypericum*; *Clethra canescens*, a plant with white, terminal flower spikes, eight inches in length, showy and striking in appearance; *Amygdalus dulcis pupurea* with reddish-purple foliage; several distinct looking *Spiraeas*, *Coriaria terminalia* bearing semi-transparent yellow berries, etc. This firm were exhibitors also of a nice lot of small plants of *Amphicome Emodi* in bloom; of a pretty, very dwarf and floriferous *Begonia* with closely double, scarlet flowers, named *Washington*; of *Canna indica* in fine bloom, the variety *King Humbert* obtaining an award of merit; and a batch of *Primula obconica rubra* improved, finely bloomed, the color being a lively pink.

Mr. E. Patten showed a double flowered *Pelargonium Paul Crampel*. It was sure to come. Hardy herbaceous perennials were most abundantly shown in the cut state by the trade, also phloxes, gladioli, *Fuchsia riccartoni* in variety, hollyhocks, etc.

Messrs. H. B. May made a creditable display with crotons, nicely grown and colored highly.

FREDERICK MOORE.

BUSINESS CHANGES.

Vancouver, B. C.—Swires & Fatkin have purchased the Hazlewood Nursery.

Jacksonville, Fla.—The newly incorporated company, Mills, the Florist, met on August 18 and elected C. D. Mills president and C. L. Whipp, secretary and treasurer. The general offices of the company will be on Forsyth street.

Chicago.—A sad accident occurred at the J. A. Budlong place on the north side of the city, Aug. 27th, during a severe storm that passed over the city at that time. Three laborers took shelter under a tree which was struck by lightning and all were killed.

During Recess

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The Association's Second Annual Clam Bake will be held at Duer's Whitestone Pavilion, Whitestone Landing, L. I., on Thursday, September 9th, 1909.

The members and their friends will meet at the Long Island Depot in Long Island City, and there take the 10.31 train to which the Association's special cars will be attached. A breakfast will be served at noon time, and the clam bake will be served at 5.30 p. m. The Committee has arranged many kinds of amusements, and expects to make this the pleasantest event of the year. There will be a large number of prizes to be contested for by both gentlemen and ladies.

The price of tickets is \$3.50 for ladies and \$4.00 for gentlemen, and the same includes transportation charges, breakfast, clam bake, etc. If you desire to attend, kindly forward your check to the secretary, Mr. Wm. H. Siebrecht, Jr., 277 Broadway, New York City, and state what kind of tickets you wish, and he will immediately mail you same. An early response will enable the committee to greatly facilitate matters.

The committee consists of A. L. Miller, Herman Schoelzel and Alfred L. Zeller.

HARDWOODED PLANTS.

The usual custom of placing all hardwooded plants outdoors for the summer, placing them under the shade of adjacent trees that are sometimes insect infested, and where the plants do not get fresh air in nearly sufficient amounts, is not always the best that could happen. Growers who practice this look on the summer as a troublesome period in the life of their Azaleas, Genistas, Heaths, Boronias, and similar stock that has to be bridged over somehow, and lumping them all together with Oleanders, Orange trees, and other stock equally misused seems the easiest way out of it. Heaths and Boronias treated this way never flower satisfactorily as the wood is soft and immature. They should be plunged outside in the sun with their roots and pots safe from the scorching heat in plunging material kept moist by occasionally spraying and keeping the top loose. During the very hottest part of the summer these plants can be kept right this way, though a light shade from the midday sun at such times is an advantage. Azaleas need more shade than Heaths, and as the flower buds are already set in the growth the ripening process need not be so severe. The tree shade may do all right for them provided the position is one in which the air can circulate freely among them. Rhododendrons may be similarly treated.—Journal of Horticulture, London.

Springfield, Ill.—Mr. L. F. Swift is remodelling the extensive grounds of his summer home at Lake Forest, Ill., and will greatly improve them. He has secured a gardener from England who will assume his duties in the near future.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

WANTED—Experienced grower for commercial place near Boston; must be good grower of carnations especially. Good salary to the right party. Address, with references, Carnations, care of HORTICULTURE, 11 Hamilton Place, Boston.

WANTED—Plantsman with experience in growing choice pot plants. Wages, to start, \$12.00 per week. Address, with copy of references, experience, etc., "Horticulturist," Hamilton Place, Boston.

SITUATIONS WANTED

WANTED—Position as superintendent of a country estate or farm. Long experience in the culture of fruits, flowers, vegetables, and general farm crops; also in the care of trees, shrubs, lawns, avenues, cattle and poultry. Highest references. Address Experience, care of HORTICULTURE.

GARDENER wants position. No children; age 36; first class lawnsman, hedge trimmer, vegetable grower and care of grounds. Everything to make a place beautiful. Can furnish best of references. State wages when writing. W. H. M., 113 W. Florida Ave., Atlantic City, N. J.

SITUATION WANTED as Florist by young man with 10 years' practical experience; thoroughly capable. 25 years old. Good references. Address Stephen Burton, care Dr. Givens, Stamford, Conn.

Situation wanted by Gardener, private or commercial; employed now and for past 12 years with a leading New England nursery. At liberty November 1. Address, James Ganley, 5 Winthrop Ave., Reading, Mass.

A young lady who is unable to continue her studies because of financial difficulties, wishes to obtain employment as a florist. Address L. M. D., J. Raeburn Terrace, Newton Highlands, Mass.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 50 Montrose Ave., Brooklyn, N. Y.

BOILER FOR SALE: 3 ft. diameter, 11 ft. long. Good bargain for greenhouse boiler. For particulars address "Engineer," 11 Humphreys St., Dorchester, Boston, Mass.

FOR SALE—At Southampton, L. I., ½ acre, 8-room house, hot house, 100 ft. long, and barn. All newly painted and in good condition. Easy terms. Inquire Pacific Paint Co., 27 Sixth Ave., Brooklyn, N. Y.

Buffalo.—J. B. Wiese, the market florist, and daughters, also Wm. Sievers and family have returned from their trip abroad.—J. Rowland Cloudsley is making extensive improvements in his up-to-date flower shop.

DESTROYING THE CABBAGE WORM.

A number of Pennsylvania cabbage growers wrote to Prof. H. A. Surface, the State Zoologist, for instructions in regard to destroying the cabbage worm, which has become quite a serious pest of the cabbage crop. For the benefit of all growers, State Zoologist Surface has given out the following information:

"The cabbage worm is most easily destroyed by the use of an arsenical application. Most of our successful cabbage growers use about two pounds of arsenate of lead in 50 gallons of water, or one pound of paris green in the same amount of water. The arsenate of lead sticks better than the paris green, especially on cabbage leaves, and is to be preferred. The liquid bearing the poison should be blown well around the cabbage leaves with a good fine spray nozzle, applying it as a fine mist but not in drops. It sticks much better when put on in a fine mist than when poured on from a sprinkling can or otherwise applied in drops.

"If it be not convenient to apply the poison as a spray it can be mixed with thirty times its bulk of paris green or air-slaked lime, and applied as a dust. The best results from this will come from making the application in the evening, or in the morning while the dew is on. The use of arsenites in the dust or powdered form is recommended, especially on small premises where the owner does not have a spray pump.

"There is no need to fear poisoning consumers by applying arsenical poisons to cabbage for the cabbage worms. The heads form from the inside and the constant tendency of the growth is to spread or open the poisoned leaves, and thus they are gradually removed. Also a few of the outer leaves are removed in preparing cabbage for the table, and thus whatever poison may adhere to it is taken away.

"I have never known of a case of a person being poisoned by the spraying or dusting of cabbage, and, indeed, it is estimated that it would take two or three hundred heads to carry enough poison to have any serious effect on a person. The extensive growers all over this state resort to poison to keep the chewing pests in check, and especially apply this for the green cabbage worm, the same as for the potato beetle."

WOOD CONCRETE AND XYLOLITH.

Under "Questions and Answers" in Die Gartenwelt for August 14, the reader is introduced to materials for the construction of dung bed frames, which have as yet not been greatly employed for this purpose.

Wood concrete (Hobzeton) or Xylolith is to be highly recommended for forcing frames and pits built partially under ground. It is of unproved durability, since it is unaffected by moisture or acids. Edges and corners liable to be damaged by blows must be protected by having sheet zinc or other metal nailed over the surface. Finished Xylolith can be purchased of the manufacturers of various sizes of plates. The home manufacture of these plates is not to be recommended, as few persons have the necessary high power presses. With the so-called wood cement now much employed in the construction of roofs in Germany upon which roof gardens

CHICAGO—Monadnock Block

ATLANTA—Candler Building

may be laid down, the matter is different. This wood cement is a black pitch-like mass which readily melts when heated and is very tough and plastic. The floor is constructed in the following manner: Coal tar is heated in a boiler, and by means of a sieve 500 gr. sulphur and 50 kilog. cement are added until the mass can be used with a brush. To 50 kilog. tar are added 80-90 kilog. cement. The roof that is to be covered is then thinly strewn with sand, and covered with tough paper, upon which is placed the first coat of the wood cement, then follow one, two, three and four layers of paper, and each gets its coat of wood cement. As a finish a layer of coal ashes is sifted over the surface and lastly a layer several centimetres thick of sifted, broken granite, flint or fine gravel.

NEWS NOTES.

Allentown, Pa.—Kroninger Bros have installed a new 150 h. p. boiler.

Spokane, Wash.—J. Reshoft has started in the greenhouse business at the foot of Five Mile Prairie.

New York, N. Y.—H. J. Hoffmeier, florist at 2297 Broadway, has filed a petition in bankruptcy: Liabilities, \$8,018; assets, \$583. Wm. Lesser has been appointed receiver.

Green Bay, Wis.—Carl Meier has equipped his greenhouses with hot water heating apparatus and is extending his down town salesroom in order to secure more space for display.

New Bedford, Mass.—The Bates greenhouses leased by Napoleon Lemay were nearly destroyed by fire on August 26. Mr. Lemay's loss will be about \$500. He was asleep in one of the houses and saved only the clothes he was able to throw on in escaping.

We hear some splendid reports concerning the new insecticide, Aphine, which is being advertised in these columns. Eminent gardeners and entomologists have already been quoted in strong approval of its efficiency, and now comes Charles H. Totty with an exhaustive report of the highest en-

dorsement of its effect on mealy bug and red spider in the grapery, scale on cattleyas and calanthes and black, green and white flies generally.

ALL APHINE CAN DO Is Yet Unknown

Latest Discovery: That it is an effective insecticide for the destruction of the Aster Bug and Honey Dew.

IT DESTROYS

almost instantaneously such pests as Aphids, Thrips, Red Spider, Mealy Bug, Caterpillars, Slugs and Scale.

Mr. Charles H. Totty's report of an exhaustive test, concluding with

"To sum up, Aphine will do all you claim for it and more; and so long as you can maintain a uniform product, you have my hearty support in the sale of your insecticide."

will be published in full in these columns as soon as increased facilities under way are completed for the manufacture of Aphine, to promptly supply the demand which is exceeding the present capacity of production.

One part Aphine to forty parts water.

\$2.50 per gallon; \$1 per quart.

FOR FLORISTS' AND GARDENERS' USE

30 YEARS OF PRACTICAL TEST OF THESE IN THE U. S.

GRAPE DUST is excellent to check Spot on Chrysanthemums and Black Fly, also all sorts of Mildew on Roses, Vegetables under glass, etc. It is put up 5, 10 and 25 lb. bags, in kegs and barrels. It is extensively used at the present time in the United States. Sold by the Seedsmen of America.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4 1/2 inches wide, nozzle 6 1/2 inches long; 3/4 inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

E. H. Hunt, 76-78 Wabash Ave., Chicago, Ill.

Which Spray Pump

shall you buy? Buy the Spray Pump that fully meets the demands of the Government Agricultural Scientists and all practical Fruit Growers. These pumps are widely known as

DEMING SPRAYERS
and are made in 23 styles for use in small gardens or immense orchards. Write for our 1909 catalog with Spraying Chart. Add 4 cents postage and receive "Spraying for Profit," a useful guide book.

PUBLICATIONS RECEIVED.

Missouri State Board of Horticulture. Second Annual Report.—Contains the proceedings of the Summer Institute held at Mountain Grove, June 2, 3 and 4, 1908, and of the Winter Institute held at Columbia, January 5, 6, 7 and 8, 1909, in connection with "Farmers' Week." Edited by W. L. Howard, secretary. The western fruit grower will find in this volume of 330 pages much valuable information. Many half-tone illustrations are included.

The Iris Manual, by C. S. Harrison, York, Neb., is a pamphlet the 32 pages of which sparkle with the enthusiasm of this inspired lover of fruits and flowers who has done more, probably, than any other writer to preach the gospel of Nature's beauty among the people of the bleak northern prairies. The book is concise, practical and worth much more than the price (25c.) to any garden patron. Order from the office of HORTICULTURE.

The Year Book of the Department of Agriculture for 1908, the most important document published by the department, has been sent out. As usual, it covers a wide scope and diversified topics included under the general work of the department, a review of the activities of the year as reported by the secretary, a series of papers by scientists and experts in the main branches of the department, up-

GREENHOUSE CONSTRUCTION LUMBER

John C. Moninger Co.
117 E. Blackhawk St., CHICAGO.

Distinctive Greenhouses

To most people a greenhouse is just a greenhouse—a long, low, glass covered building, unimportant except for what it contains. They all look alike. But ours are made with a beauty of design and a conformity to their surroundings—it is just this, (next to utility), to which we devote great care.

This one we built at Chestnut Hill, Pa.—a simple, well designed, attractive layout, in every way practical. Steel frame construction.

Our circular shows numerous others just as attractive—send for it.

Hitchings & Company

Designing & Sales Offices General Offices & Factory
1170 Broadway, N. Y. Elizabeth, N. J.

WE ADMIT IT

WE don't mind admitting having been a bit slow in adopting the Curved Eave House, but we had our reasons. There were certain rather serious construction defects in other curved eave houses, which we were bound to completely overcome before we sold a single house.

Even the houses we sell you now are a great improvement over the first ones we built. And that's our way of doing business; first we are sure of a thing—and then we go ahead—and after that, keep on improving it.

LORD AND BURNHAM COMPANY
Irvington, N. Y.

New York — Boston — Philadelphia — Chicago

FROM THE INSIDE—OUT

You know there is not a house built today, no matter what the construction, that has the extreme lightness, beauty and practicalness of our U-Bar Curved Eave.

Just look at this side view! You never saw anything like it in any other house! It is the patented U-Bar Construction that makes such an interior possible. At no points are there heavier roof supporting members than you see right in this interior, and all these are galvanized steel, aluminum finished.

If you want a house that you can show to your friends with the satisfaction of knowing it is the lightest and most attractive, "the best there is," then the U-Bar is the house for you.

It might be well to drop us a line at once.

The Horseshoe Brand

You are in business to make money — so are we. Perhaps it has not occurred to you that the relation between the importer and consumer is such that it is to the importer's interest to help the consumer make more money. Whether the reason be selfish or not matters little. It does not in any way affect the sincerity of our purpose in rendering efficient service to our customers by careful and prompt execution of their orders, thereby advancing the value of our goods to our clients and promoting their sale.

We do not aspire to sell cheaper than others, but to furnish the best bulbs the various growers can produce. We honestly believe if you would **buy some of our best bulbs** you would be so impressed with their superior quality, that you would insist upon getting the same brand in future. Horseshoe Brand bulbs are produced by the very best growers in their respective sphere and they will average the highest returns. **Ask the man who grows them.**

It is about time for Japan lily bulbs and if you have not already bought some of our Horseshoe Brand bulbs, it will pay you to try a case or so of our best. They are not cheap but they are good. There is as much difference in some bulbs as between a buzzard and a bird of paradise. **DO YOU WANT BUZZARDS?**

Promising Shrub Introductions at the Arnold Arboretum

While the well-known Bladder Senna, *Colutea arborescens*, is out of bloom or bears only a few flowers together with its peculiar bladder-like pods, the *Colutea cilicica*, a species from Asia Minor recently introduced shows its numerous clusters of yellow flowers. The *C. cilicica* was brought into cultivation some years ago under the name of *C. melanocalyx* which, however, belongs to a different species; afterwards it was called *C. longialata*, but quite recently it was found out that it is the previously described *C. cilicica*. It is a bushy shrub, resembling *C. arborescens*, but apparently lower and with the foliage of a distinctly pale bluish green color. The flowers are clear yellow and appear when the other species of *Colutea* are out of bloom.

A very late flowering shrub which just now begins to open its first flowers is *Elsholtzia Stauntonii* recently introduced from northern China by Mr. J. G. Jack of the Arnold Arboretum. It is a bushy plant, more half-shrubby than really shrubby, from three to five feet high with numerous upright stems bearing at the end many dense lilac spikes from four to seven inches long; the small and slender individual flowers are two-lipped with long protruding stamens and styles. The lanceolate leaves are from four to six inches long, glabrous and coarsely serrate; when bruised they exhale an agreeable mint-like odor, which betrays at once the fact that it belongs to the same family, viz., the Labiatae. Though the shrub is not very showy, it makes a pleasing effect, when covered with its lilac flowers and its late flowering time renders it the more valuable. It has proved perfectly hardy at the Arboretum.

Though not new the little known *Vitex incisa* from Northern China may be mentioned here as another late flowering shrub. It is of loose and open habit and reaches six feet in height or more. The graceful deeply cut foliage adds to its light and loose appearance and so do the loosely branched large flower clusters with their small violet flowers. The bruised leaves emit a spicy odor. At the Arboretum it suffers only during severe winters, but even when part of the plant is killed, the young growth flowers the same year.

A new *Lespedeza* allied to *L. bicolor* which is now in full bloom and very pretty with its large and loose panicles of purple flowers, is *L. cyrtobotrys*, a native of Corea and Japan. It differs from the former in its short and dense flower spikes which are much shorter than the leaves and partly hidden by them. The shrub is therefore less handsome and hardly of any horticultural value.

Alfred Rehder.

The Cyclamen

(See cover illustration.)

No more serviceable winter flowering plant than the cyclamen can be named for house decoration, its value being due greatly to its durability under the varied atmospheric conditions in the room and its flowering season, which extends from November until March and often April. If we take the beautiful Lorraine begonia, or the geranium and many others and try them under the same conditions, in a few days the flowers begin to drop and the foliage turns yellow, but the cyclamen has no equal either for market or private use.

As regards strain it is immaterial as all the named varieties from a reliable firm are good under a skilful grower. Seed purchased from any of the special advertisers of cyclamen seed in this paper will give good results if handled as indicated below. Mr. Donnellan, who is so successful as a grower of cyclamens for R. & J. Farquhar & Co., recommends the following method of cultivation.

The seed should be sown not later than October. The skilful grower attaches greater importance to the way in which this is sown than does the average gardener, to avoid crowding the plants. Press the seed singly into the soil about 1½ inches apart. The general rule is to cover the seed lightly and this is the greatest initial mistake. The seed should be covered to such a depth that when the small corms are formed they will be under the soil, not on the surface as is too frequently the case, and should the corms appear on the surface before they are large enough for potting they should be covered with moss to prevent their becoming dry, as the most important item in the cultivation of the cyclamen is to keep the corm elastic throughout all stages of its growth. The most common and the most unnatural method to accomplish this is to plant your corm on the surface and grow in a humid atmosphere; the other method is to bury the corm and give abundance of ventilation. Your results from the former method would be spindly leaves with flowers too high above the foliage and the plants from 6 to 25 per cent good. The results of the later method are stocky leaves, the flower just a little above the foliage and the plants 95 per cent good. When they have made four or five leaves shift them into 2½ inch pots taking care not to break any roots and remembering always to put the corms a little further down in the soil with each successive potting. A little below the crown will invariably give better results than a little above.

The plants which are intended for Christmas will be large enough for their final potting by the second or third week in July. These should not be moved into too large pots as a small plant well covered with flowers will give more satisfaction than a large plant with few flowers. Pans are preferable to pots for house decoration; if too much of the pot is seen it is unsightly and is really not necessary as just as good cyclamen can be grown in pans as in pots. The crown of the corm after

the final potting should be high enough to allow the water to run off. This is very important.

The most suitable soil is three parts loam, one of leaf-mold, and one of manure from an exhausted hot bed. This should be kept always moderately moist; if allowed to become dry or neglected for a day or two the skin of the corm will harden and as soon as water is applied, instead of swelling the corm will split open and decay will follow. As a general rule it has been recommended that cyclamens be grown near the glass but if given abundance of ventilation, which is indispensable at all times, they will grow much better on the benches where it is cooler than when grown on shelves near the glass. Frequent syringing is beneficial and a little shade is recommended in July and August.

Cyclamens, like all other plants, are liable to become infested with red spider, thrips, and green aphides. Syringing them as previously recommended is a good prevention for red spider. Paris green with a little brown sugar diluted in a sufficient quantity of water will keep down thrips if the plant is syringed at weekly intervals. The cyclamen mite is claimed to be the most troublesome of all insects and it is blamed for deforming the flowers. This is very doubtful as plants bearing perfect flowers have been grown with what was claimed to be the mite running all over them.

European Horticulture

SHROPSHIRE HORTICULTURAL SOCIETY

The exhibitions of the above which have been held for 35 years past are events of considerable importance, and are well patronized by all classes in Shropshire and the adjoining counties. The best of garden productions may be seen at them, exhibitors being drawn from far and near, induced to enter the lists by the large amounts of the prizes offered by the society. The grape class is always well filled, but this year the exhibits were not so fine as usual, excepting those of Madresfield Court variety. In the class for twelve bunches in four or more distinct varieties, the winner of the first prize was J. H. Goodacre, gardener to Earl of Harrington, Elvaston Castle. This gardener was likewise the winner of the first prize for a decorated fruit table, viz., a champion cup of the value of 25 guineas, 20 pounds in cash and the gold medal of the society. Mr. Gibson, gardener to the Duke of Portland, with an almost equally excellent display was awarded the second prize.

Plants at this show are divided in miscellaneous plants in or out of flower, and plants possessing foliage of an ornamental character. The space allotted to each exhibitor was 250 sq. feet. In the flowering plant section Messrs. J. Cypher & Sons took the first prize. The finest group of decorative foliage plants was shown by Sir G. Kenrick. The highest prize for a specimen plant was awarded to J. Cypher & Son for a remarkable *Statice profusa* of an extra large size, and well furnished with flowers. Sweet peas were to be arranged in

glasses on a space of $3\frac{1}{2} \times 4$ ft. There were twelve competitors. Henry Eckford's class for eighteen varieties of his raising, the groups to occupy $3\frac{1}{2} \times 6$ ft. brought much competition; and Mr. Aitken, gardener at Erddig Park, was first, his collection including King Edward VII, Queen Victoria, Etta Dyke, H. Eckford, Evelyn Hemus, St. George, Mid Blue, Othello, Bobby K., etc., roses, carnations, dahlias, miscellaneous border flowers and vegetables, formed a considerable portion of the show and were not those least thought of by the country folk who flocked to the show ground.

A SPECIAL ROSE SHOW

The firm of Messrs. A. Weber & Co., Wiesbaden, instituted a display of roses which for artistic effect would be difficult to exceed; and for the benefit of the readers of HORTICULTURE is certainly very worthy of being briefly described. The main features consisted of two domed pavilions of light construction in wood, and standing on a raised base or platform, apparently about 30 yards apart, but connected by a wooden pergola for that distance. A pleasing and distinct feature in regard to these pavilions was that strong plants of climbing roses in tubs were trained over the exteriors of the domes so as to completely cover them with foliage and flowers. The varieties consisted of *Leuchtstern* in the lower parts, and *Thalia* and *Schneewitchen* at the top. At breast-height *Madame Norbert Levasseur* planted in tubs was trained at the back, an arrangement which gave an admirable finish and background to the whole. In the middle stood a charmingly arranged breakfast table with glasses filled with flowering sprays of *William Allen Richardson*. The pavilions also contained artistic objects of the florist's art, there being in one of them a great vase embedded in moss and filled with Enchantress carnations; and in the other pavilion cut flower spikes of delphiniums with Kaiserin roses. The exhibition tables standing between the pavilions were filled with an abundant assortment of cut blooms of all classes of roses. Each exhibition glass contained 8 to 12 choice blooms. The design of the wooden pergola which gave such a harmonious tone to the whole originated with the architect Herrn Kurt Hoppe. As so seldom happens, gardener and artist in this case understood how to work in ideal harmony with each other.—*Die Gartenwelt*.

ESSEN

A memorial to the late town garden director Stefen has been erected by numbers of the friends of the deceased in a retired spot, on the banks of the grand lake in the town garden at Essen. The memorial consists of a large block of granite to which a bronze plate with a successful portrait of Stefen has been fixed. The monument is flanked by prettily grouped smaller blocks of stone.

PRAGUE

The Central Confederation of Bohemian Gardeners has stated that in 1910 an agricultural, horticultural and fruit exhibition will be held in Prague. The exhibition will surround the upper portion of the Prague exhibition area with buildings; and a good picture will be presented of the present condition of gardening and fruit culture in Bohemia. Special sections will be set apart for Art, Science and Instruction. The estimate of cost comes to 105,000 kronen; and the disposable area is about 40,000 sq. metres.

Frederick Moore

Floral Decorations at the Alaska-Yukon-Pacific Exhibition

The two pictures of the floral decorations at the Alaska-Yukon-Pacific Exhibition which accompany these lines are excellent examples of what impressed me as one of the most finished pieces of decorative work I have ever seen. One of the views, that showing the vases along the Vista, is especially good. These vases were filled with *Dracaena indivisa* and ivy geraniums. It seemed to me that the flowers were much brighter in color than they are with us in the East. The foliage and growth were also very luxuriant.

The plantings along the Alaska building, with the slopes covered with hardy pinks and canterbury bells and foxgloves were a little past their prime at the time of my visit but still beautiful. They were being replanted with petunias and Phlox Drummondii. *Calceolaria rugosa* varieties were particularly effective around the big statues near the Alaskan building. The series of waterfalls illuminated at night, the splendid rose gardens, and the formal garden were all extremely beautiful—in fact, the whole Exposition was a thing of beauty. I have never seen anything more cleverly

Vases along one side of Main Vista filled with *Dracaena indivisa* and Ivy Leaved *Geranium Roycroft Surprise*.

Slopes covered with Hardy Pinks (*Dianthus plumarius*), Canterbury Bells (*Campanula Media*) and Fox Gloves (*Digitalis purpurea*).

planned or tastefully carried out. Loveliest and most reposeful of all the floral embellishment was *Viola cornuta hybrida* in its many new forms, which was planted by millions. It is a wonder that we have not used them more heretofore. The dahlias were just coming into bloom when I left and no doubt are in fine shape by this time.

JACKSON DAWSON.

GRANDFATHER AND THE NEWS.

Grandpa was reading his paper,
Grandmother knitting by,
The gentle purr of the kettle
Stirred the silence pleasantly.
"Found any news yet, Father?"
Softly Grandmother said,
At that moment, excited, he found it
"Abe Sawyer is shingling his shed."

Knitting-work was forgotten;
Grandmother's face was aglow,
"Land, you don't tell me, Father!"
"Abe Sawyer! I want to know!"
Grandfather's tremulous finger
Pointed, "Right there!" he said,
Both old heads bent above it,
"Abe Sawyer is shingling his shed."

Tumults of man and of nature,
Crashing of nations at war,
Weighty political issues,
Perils in wait at our door
Grandfather passes them over
Hunting for news, instead,
Yes, sir, right here we have it!
"Abe Sawyer is shingling his shed."

Talk about fraud and corruption!
Tell us that newspapers lie!
Grandfather's faith is implicit,
Grandmother smiles trustingly,
This age is an age of progress,
The Golden Age, when all's said,
We're marching upward, I tell you,
"Abe Sawyer is shingling his shed."
Annie Hamilton Donnell, in *the Country Gentleman*.

Where is that great revival of business
 Ours for that so many people have been confidently
 the taking predicting for the past few months? Is
 it a proven reality or does it still exist
 only as a fond hope—a batch of chickens yet to be
 hatched? The replies to our query would probably be as
 diverse as the character and circumstances of the indi-
 viduals replying. Many have shut off the pressure and

allowed their affairs to smoulder along, sluggishly await-
 ing the hour when "good times" shall have arrived once
 more. These men will tell you they have seen nothing
 to indicate a business revival. For others the depres-
 sion of the past has acted as an impelling force, inciting
 them to redoubled exertion with a determination blind
 and deaf to all that the grumblers have to present.
 These will tell you that there's nothing the matter with
 business. A lesson we should learn from them is that
 our success or failure for the coming season depends
 upon ourselves.

Modern business ways

Let the man of naturally timid dis-
 position and conservative policy take
 a lesson in courage from his hus-
 tling neighbor. Instead of criticis-
 ing him, imitate him and then "go him one better."
 That time has gone when a man must carry a lot of
 unsold stock on his benches and finally throw it away for
 lack of a buyer. The grower with a knowledge of mod-
 ern methods and the enterprise to adopt them, doesn't
 do things that way. When you see a little mountain be-
 hind the greenhouse, of stock which had occupied bench
 room, time, heat and labor for months, dumped because
 "nobody wants it," you can conclude that the owner
 "couldn't afford to advertise" or there was something
 radically wrong with his method of advertising, the
 price or the goods themselves. With the means of pub-
 licity which is now within the reach of everyone through
 the trade papers—**HORTICULTURE** especially—there is
 seldom any need for surpluses to accumulate or excuse
 for dumpheaps to eat up the profits of a season's labor.
 There are buyers somewhere for all of it as things exist
 today, perhaps a thousand miles away, but very likely
 just around the next corner. Reach out and you'll get
 'em.

How to "get there"

The business of the florist, nurseryman,
 seedsman, landscape gardener and allied
 industries has made an enormous growth
 within the past few years; everybody can
 see that. It will undoubtedly make a much greater pro-
 portionate growth in the immediate future; everyone
 should see that. Conservatism in reasonable proportion
 is a good safeguard in any enterprise but there is no ele-
 ment of recklessness in the presumption that there is at
 present a practically unlimited field for the extension
 and enlargement of every department of horticultural
 industry. Eighty million of the most active, ambitious
 and progressive people on earth are at our service and
 their wear and tear of the goods we produce will make
 a constant and ever increasing demand. For him who
 is awake to the opportunity and will make a bold reach
 to get his full share there is abundant prosperity ahead.
 Build more greenhouses and better ones, plant bigger
 nurseries, open new flower stores and seed stores in
 every community; read the trade papers, text matter and
 advertisements—particularly **HORTICULTURE**—and so
 hive knowledge, inspiration, ambition and method, de-
 velop your resources, advertise liberally and continuous-
 ly—especially in **HORTICULTURE**—join the club or soci-
 ety nearest to you and give them loyal support in their
 meetings and exhibitions; use every means to get posted
 on what is going on and what others are accomplishing,
 "stay on your job" and see what the next few years will
 do for you. The much lauded development of the past
 will not be a circumstance to the record of the next
 decade when it has been written.

A TRIP THROUGH BELGIUM AND FRANCE.

A VISIT TO COURTLAND.

On arriving in Antwerp, Belgium, I at once took a train for Brussels and Ghent, the home of horticulture. In the city and surrounding towns of Ghent one can find close on to twelve hundred establishments consisting of from three to two hundred and fifty greenhouses each, all growing about the same kind of stock, such as azaleas, araucarias, begonias, gloxinias, palms, rubbers, bay trees and many other miscellaneous stove and greenhouse plants.

Azaleas Higher.

Immense fields of azaleas can be seen everywhere and no one would think that they could dispose of such large quantities, but still upon going around and inquiring you will find that there is plenty of demand for them and they are asking higher prices this year than last, stating that there is a much larger demand from Germany this year on account of their stocks being frozen in May. The plants this season are hardly up to last year's stock. Most of the plants are not budded yet and many of them have been cut back too late which will make them unfit for market, but I suppose many of them will be sold just the same. Madame Petrick is very scarce this season and high prices are asked for this desirable azalea. Good early white azaleas are not plentiful. The white *vervaeneana* will be the coming variety but they are not plentiful as yet and can only be had in small sizes.

Some Good Things Coming.

Palms are about the same as last year, but certain sizes are scarce and in many places the plants are damaged, which will make them unfit for sale as first class stock. Bay trees seem to be abundant and at reasonable prices. *Acacias* in popular varieties are very scarce. In novelties there is not a large list. A *Dracaena Bruanti* variegated, promises to be of great merit but we have to prove this yet on this side of the water. A few varieties of azaleas will be seen for the first time this season; one a variety introduced by Messrs. J. B. Haerens and H. Wille is of a very pleasing color.

In Paris.

After leaving Belgium, Paris is the next in order. A visit to the trial grounds of Vilmorin, Andrieux & Co. is of great interest to any one interested in horticulture. The establishment of G. Truffault at Versailles is also a place to be visited. Here you will find a very fine collection of crotons, azaleas, begonias, orchids and many other rare stove and greenhouse plants.

The parks in and around Paris are just now looking at their best, making one feel sorry to leave. From here you take a train which carries you

"COURTLAND," POMFRET, CONN.

Among the estates recently inspected by the Garden Committee of the Massachusetts Horticultural Society, is "Courtland," the beautiful estate of Mrs. Hoppin at Pomfret, Conn., Robert Rust superintendent. The grounds consist of about sixteen acres. There is a gentle slope overlooking a beautiful ravine well wooded with fine specimens of oak, maple, spruce and pine. One broad bank of one thousand rhododendrons and five hundred azaleas, well protected with conifers, presents a beautiful appearance. The lawn is adorned with fine specimens of oak, maple, elm, beech and a number of pines. At the foot of the lawn is a tennis court, and in process of construction is a swimming pool, 60 by 30, well shaded by trees in the valley. A wide avenue winds from

the main road to the mansion, bordered with beds of rare design. One of the most unique things to be observed about the mansion itself is the method of growing English ivy on trellises fitted in between the windows. These large plants of ivy are in boxes and are removed in winter to the cold storage, and kept in readiness to be replaced in the position in the spring.

Separated from the mansion and grounds are the gardener's cottage, greenhouses, vegetable and flower and fruit gardens. The greenhouses for roses, carnations, melons, etc., are in fine condition, and the stock far advanced for this season of the year. On the whole, it is as finely kept an estate as there is in this section of the country, reflecting much credit upon Superintendent Rust.

through France, Germany, Switzerland and Italy to the Mediterranean Sea, then to Marseilles in the southern part of France. From here I went to Toulon and Hyeres. Hyeres is one of the prettiest places along the coast, abounding in palms and with a semi-tropical climate. From here are shipped large quantities of roses, carnations, violets, gardenias, and many other flowers to all parts of Europe from the open ground during winter. Palm growing is carried on here to a large extent and the plants are sold and shipped all over Europe and also to America.

After visiting a few places along the Mediterranean I took a train for Boulogne, connecting with steamer for New York, which I reached after nine days of pleasant sailing.

A. LEUTHY.

Roslindale, Mass.

Ef' yu see yer nayber turnin' th' hoz on er pil uv dishus in th' bak yard yeh kin bet hiz wif iz komin home frum hur vakashun.—Ex.

GALEGA HARTLANDII.

William Baylor Hartland writes in "The Garden" for August 28, concerning this plant, as follows:

"I am glad to notice that this beautiful plant has been brought before the floral committee of the Royal Horticultural Society quite recently, and this without any recent effort on my part, but through the head of the department at Wisley, to whom I sent a plant some years since. Now that it has obtained the award of merit, the history of its recognition here at Ard Cairn should be accredited to the late F. W. Burbidge, a man with a keen eye for anything good, from a daffodil to an orchid. He, when on a visit to Cork, pronounced it as one of the best summer border plants for color in existence. This praise was well deserved. This summer it has been very fine, and we have had it in flower since the end of April under glass, as it forms a splendid show in the large conservatory in conjunction with the beautiful new *Spirea*s Peach Blossom and Alexandria.

NEWS OF THE CLUBS AND SOCIETIES

FLORISTS' CLUB OF WASHINGTON.

One of the most pleasant and largely attended meetings of the club was held on September 7th at Eagles' Hall, Edward S. Schmid acting as host of the occasion and all the florists congratulated themselves that Mr. Schmid was "one of them." There were speakers, vaudeville features and last, but by no means least, a feast for the gods. The principal topics under discussion were the forthcoming auto-flower parade, Sept. 30th, and the fall flower show during the week of Nov. 7th. Philip Breitmeyer, of Detroit, has been selected as judge of the auto parade, and is coming accompanied by his wife. Isaac Gaus, chairman of the flower parade, is greatly pleased at the interest taken by the florists and that there will be an entry of autos decorated only in natural flowers. It will, however, be imperative to use artificial flowers too to a large extent. Many handsome prizes including the sweepstake, are on exhibition. The final schedule has been completed. All the city papers are offering prizes and the public generally is deeply interested. There are already more than 60 cars entered. The prize offered by the Florists' Club, for a car decorated in natural flowers only, is a \$50 silver cup. The committees have been appointed by President Kramer to serve both on the auto parade and the fall flower show.

The annual invitation to the club from R. Vincent, Jr. & Sons, of White Marsh, Md., was this year given for Sept. 30th, but owing to the auto parade falling on the same date it had to be declined.

FLORISTS' CLUB OF PHILADELPHIA.

Nominations for officers to serve during the ensuing year, and a review of the recent convention at Cincinnati were the features of the monthly meeting of the above club held on the 7th inst. Joseph Heacock was nominated for president; Alfred Burton for vice-president; George Craig for treasurer; and David Rust for secretary. As there is no opposition these nominations are equivalent to election. Leo Niessen gave a brief but witty account of the convention, and was followed in more serious vein by John Westcott and Robert Kift. A vote of thanks was passed to the local club in Cincinnati for courtesies extended. Mr. Kift reported that he had something very good in store for the October meeting, but was not quite ready to give particulars. A. Leuthy of Boston was a visitor.

NEWPORT HORTICULTURAL SOCIETY.

The autumn exhibition of this Society will be held at Masonic Hall, Newport, R. I., on September 18, 19 and 20. As heretofore, the schedule provides liberal premiums for group and specimen plant displays, cut flowers, baskets and center pieces, table decorations, dahlias, fruits and vegetables, and in addition to the seventy-five regular classes there are special premiums offered by Julius Roehrs Co. and a number of lady patrons in the summer colony.

NORTH SHORE HORTICULTURAL SOCIETY.

This society met on the first Friday of the month and as usual discussed incorporation, with this variation, that the society voted to become an incorporated body. W. B. Jackson was given a vote of thanks for assistance rendered the Show Committee. Julius Rhabardy was elected an honorary member.

At the meeting on the 17th of this month the subject will be "Gladioli." B. Hammond Tracy of Cedar Acres, Wrenham, will be one of the speakers.

The special prize offered by W. W. Rawson & Co., of Boston, for the winner of the greatest number of points at the recent show of the society was captured by William Swan, who had 76 points to 72 by Eric H. Wetterlow, gardener to Mrs. Lester Leland. The points were awarded on the following: Firsts to count three, seconds as two, thirds as one. R. A. MITCHELL.

NURSERYMEN IN IRELAND.

A very useful organization, the Horticultural Trades' Association, which comprises many of the leading members of the trade, has lately held its annual meeting at Belfast, Ireland. Besides the election of officers and the passing of the accounts, the members discussed several matters of moment to the trade, including the effect the proposals of the Chancellor of the Exchequer will have upon the nursery and seed trade. Under the budget proposals which have been the burning question of the hour, it is intended to place additional burdens on the land to meet the increasing demands on the nation's finances. The Trades Federation has also passed a resolution protesting against the suggested land taxes, and pointing out to the Government how the market growing industry will be prejudicially affected. The gathering at Belfast was not entirely devoted to the dry details of business. Time was found to visit the nurseries of Messrs. Alex. Dickson & Sons, Mr. Hugh Dickson, and Messrs. McGredy & Son, who have gained renown for their roses. From this part of Ireland some of the most famous roses have been raised. That their reputation in raising novelties in the future will be maintained was evidenced by the many promising seedlings which were inspected. These will undoubtedly secure additional honors for the firms in the future. Another nursery visited was that of Messrs. Smith, at Newry, where there is a remarkably fine stock of plants and shrubs, including some very rare and interesting specimens. In the three days' sojourn in the sister isle the visitors found much that was instructive, and needless to say, the hospitality of their Irish colleagues upheld the traditions of the country.

W. H. ADSETT.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Regular meetings of this club will be resumed on Tuesday evening, September 21. J. W. Duncan, who has recently returned from a tour through the far west, will address the meeting on the topic, "Some Facts About the West."

JOINT EXHIBITION IN WINNIPEG.

The provincial exhibition under the joint auspices of the Western Horticultural Society and the Winnipeg Florists' Association, was held on Aug. 25, 26 and 27, in the horse show amphitheatre. It was a huge display there being numerous entries both amateur and professional in the 275 classes comprised in the prize list. About \$1,000 was offered in premiums. The show enjoyed great popularity and was a pronounced success. The arrangement of the exhibits and the general decoration of the hall were excellent. John Monson, of Minneapolis, Minn., served as judge in the floral section and gave good satisfaction.

MINNESOTA STATE FLORISTS' ASSOCIATION.

The annual meeting was held September 2 at Holm & Olson's store in St. Paul. Officers for the ensuing year are as follows: President, Theo. Wirth; vice-president, A. Swanson; secretary, J. Jorgenson; treasurer, A. Nagel; executive committee, H. Smith, J. Olson, E. Dysinger, Prof. Le Roy Cady. Mr. Dysinger's resignation as secretary was received with regret.

The treasurer reported a balance of \$49.96 on hand. The dues of the society were reduced from \$5.00 to \$2.00 in order to induce the employees to join the Association.

CLUB AND SOCIETY NOTES.

The Palos Park Improvement Club of Chicago held a successful flower show on September 4. Many prizes were awarded.

The New Bedford (Mass.) Horticultural Society will hold their seventh annual fall exhibition in Dominique Hall, September 16, 17, 18.

A new feature at the County Fair to be held at Amesbury, Mass., will be an exhibit of dahlias for which premiums will be awarded. R. A. Amend of Danvers, W. W. Hawkes and C. H. Tucker of Amesbury, are the committee.

The exhibition committee of the New York Horticultural Society, who have charge of the fall show at the Museum of Natural History, held a meeting at the office of John Young, 51 West 28th street, on September 8th to further perfect workings, etc., and make preparations for the exhibition. Some of the members of the committee are: F. R. Pierson, chairman; Geo. V. Nash, secretary; Patrick O'Mara, John E. Lager, Joseph Manda, J. H. Troy, F. H. Traendly, Peter Duff, John Young.

The Society of Iowa Florists held the seventh annual meeting at the State House, Des Moines, on September 1. Included in the program were papers as follows: "Gladioli," by Henry Field; "Begonias," by C. W. Davison, Des Moines; "Irises," by J. T. Temple; "Dahlias," by W. M. Bomberger, Harlan; "Annual and Tender Vines for Outdoor Planting," by G. A. Heyne; "Bedding Plants in Parks," by J. T. D. Fulmer; "Plants of Recent Introduction that are of Value to the Trade," by J. S. Wilson.

84 Hawley St., BOSTON, MASS.

A SUMMER OUTING.

The lover of suburban scenery could hardly choose a place for a more pleasing morning walk than over what is known as Milton Hill, in the suburbs of Boston. From the hill, which rises abruptly from the rocky bed of the picturesque Neponset river a magnificent view opens before you. The river winds in pleasing turns on its way to Dorchester Bay, and when the tide is in the lookout towards the Atlantic is grand. History lends a little romance to the scene, for here in Revolutionary days the British general and the fleet lying in the bay are said to have exchanged signals. As one proceeds down the other side of the hill glimpses of the residences of the wealthy of this neighborhood are had. Toward the East Milton end there is a fine piece of rural scenery—one of those old wayside watering places with large, overhanging willow trees where one can drive the animal right into the water and out at the other side. To me it seems to have been once the middle of the road with a brook running through, in other words a ford, but when modern traffic demanded a

wider street they swung a little to the east and bridged the brook leaving the watering place as it was. The engineer who laid out this street deserves great praise for not only leaving this fine piece of wayside scenery intact, but for the fine natural turns the road takes as one approaches it from either side.

Our destination on this day, however, was the estate of N. T. Kidder, where that famous plantsman, William Martin, has charge. During the past twelve years this place has been entirely remodelled. The herbaceous collection, which is one of the finest in the neighborhood of Boston, is planted in a rambling, informal way. Formalism seems to be avoided in everything on this estate; the shrubs are planted in irregular clumps opening up into distant vistas. Coming to the greenhouses, one finds a collection of plants rarely seen nowadays, when so many private plant houses are getting to be more like commercial places. Small pieces of all the old-time favorites that this place used to be noted for are in evidence. Mr. Martin said he would like to grow large specimens as in times past, but having to keep up the collection he cannot devote the space that they require, since he has not the amount of glass at his command he used to have. I am proud to say I spent four years under Mr. Martin's strict discipline in plant growing in the days he had to be reckoned with at the exhibitions of the Massachusetts Horticultural Society.

Leaving Milton after a profitable visit, we came to Brookline to Professor Sargent's place, where we found the veteran Charles Sander, as full of enthusiasm as ever. He showed us a new way of growing Lorraine begonias planted out in cold frame. They seemed to enjoy that mode of culture, being nice large plants with plenty of vigor and Mr. Sander says they lift well in the fall, taking hardly any notice of the shift from the frame to the pot or pan. Hippeastrums, imantophyllum and nerine are grown here in large quantities, and of course, begonias and gloxinias. At the present time Mr.

Sander has a batch of gesnera-looking plants, which I think would be valuable for the florists' trade. The leaves have a leathery substance that allows them to be tied up for shipping in a manner one cannot do with the common hybrids. In a frame, planted out, were a new strain of these bulbous plants, with enormous large, dark scarlet flowers, certainly the largest individual I have ever seen.

Outdoors, the famous azaleas were doing well, planted out in a bed. Large beds of gladiolus and phlox were in full flower. Mr. Sander thinks the American varieties of gladiolus are away ahead of the foreign ones. He had a bed of seedling phlox, many of them the equal of the named varieties. Quite a piece of ground is devoted to the Wilson introductions from North China. I should think there were thousands of seedling azaleas, and rhododendrons growing in flats in their first and second years' growth. We certainly ought to get some valuable additions from these.

GEORGE F. STEWART.

West Medford, Mass.

OVER FIFTY ACRES IN CHOICE EVERGREENS

The Framingham Nurseries offer a large and select stock of the following varieties of

EVERGREENS

Abies Balsamea, Concolor, and Fraseri; Junipers of various varieties; Picea Alba, Engelmanni, Excelsa, Pungens glauca, and Pungens Kosteri; Pinus Excelsa, Mugho, and Strobus; Pseudo-Tsuga Douglasii; Retinosporas, assorted; hardy Taxus, such as Canadensis, Cuspidata, and Brevifolia; Thuja Occidentalis, Globosa, Peabody's Golden, Pyramidalis, and Siberica; Tsuga Canadensis, Hemlock Spruce, a large and fine lot.

We have some fine specimens of Abies concolor, Picea pungens, and Pinus Strobus. Most of the above varieties can be safely planted from the middle of August until the middle of September. A personal selection is always a desirable. Boston and Worcester Electricians pass our grounds.

A WONDERFUL NEW NEPHROLEPIS NEPHROLEPIS SUPERBISSIMA INTRODUCTION OF 1908

We desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a very unique and distinct novelty, — as distinct from Piersoni and Elegantisima as they were from Bostoniensis. It is, in fact, a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It was awarded a FIRST-CLASS CERTIFICATE by the Royal Horticultural Society, at Crystal Palace, London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of this fern as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities.

Fine, strong plants, 2½-in. pots, \$15.00 per 100; 4-in. pots, \$25.00 per 100;
6-in. pans, \$9.00 per dozen; 8-in. pans, \$18.00 per dozen

BOUND BROOK, - - - N. J.

Seed Trade

The Pea Seed Crop.

The first preliminary estimates of deliveries of the 1909 pea seed crop are out. Four of the principal growers are on record, and their estimates average considerably under 50 per cent. One grower's average is but little above 25 per cent, and on a number of varieties he is down to 5 and 10 per cent, while the highest thus far on record strikes an average not above 50 per cent. Of course, it must be borne in mind that these preliminary estimates are really little better than guesses, and are not final, but it is seldom that actual deliveries are materially above first estimates, while not infrequently they drop much below. This may or may not be suggestive. There have been no new developments affecting other crops since last reports, only it is well to remind the trade again that Europe cannot relieve the situation on peas as their exportable surplus will be very small, and in fact, they are inclined to make importations themselves.

Shortages Difficult to Cover.

The bulb trade now occupies the center of the stage, and will for the next two months or more, and many seedsmen are liable to forget seeds to a considerable extent, or at least their interest will be of the academic kind. Those who wish to cover shortages this

year in peas, should lose no time in getting busy, as they will find it not easy of accomplishment. In fact, shortages are so general and so large, that they can not be covered, and the recent prediction that prices would reach new high levels this year on peas, will assuredly be realized. Here is where the shortage is so great as to constitute a real hardship.

A Nebraska Report.

Just as this is being written a letter from Nebraska states that there is no room for doubt that the sugar corn crop has suffered heavily, and estimates the shortage at nearly or quite 50 per cent. This is given for what it is worth.

Trans-Atlantic Items of Interest.

The annual meeting of the British Pteridological Society has been held at Kendal; Mr. Alexander Cowan, of Penicuik, was elected President, and a publication committee has been appointed.—At a recent meeting of the Royal Horticultural Society a number of new dwarf French beans from the Society's trials at Wisley were shown. Awards of merit were granted to the following: Cholet, a long green-podded variety from Messrs. Vilmorin, Paris; Evergreen, a smooth-podded green variety from Messrs. Sutton & Sons, Reading; Excelsior, long green pods, from Messrs. Barr & Sons, King street, Covent Garden, London; and The Belfast, a dark green variety from Messrs. Dickson & Sons, Belfast. A new tomato, Young's Mercury, was shown; it is the result of a cross between Hillside Comet and Carter's Sun-

rise.—Experts from France and Belgium have lately visited the seed farms of Messrs. J. K. King & Sons, of Coggeshall, Essex. Winter blooming sweet peas are being offered by an enthusiast who has secured a great success with them in on the Riviera. They will flower in the open in April, or in a sunny greenhouse in the dull month of December.—The Yokohama Nursery Co. are arranging to lay out some of the grounds in the Japan-British exhibition, where various phases of Japanese gardening will be displayed. This is likely to prove a very attractive feature, and instructive to western visitors unacquainted with the methods of the "Land of the Chrysanthemum."

W. H. ADSETT.

Sluis & Groot, Enkhuizen, Holland, have sent out a crop report indicating satisfactory prospects for cauliflower, late carrot, summer radish, onion, peas, English beans, antirrhinum, candytuft, lobelia, nasturtium, pansy, petunia, ten-week stock and other miscellaneous vegetable and flower seeds. Many other important crops have suffered to a greater or less extent from severe winter and other climatic reverses. Among these are cabbages, turnips, sugar beets, parsley, spinach, cucumbers, campanulas, centaurea, myosotis and verbenas.

CABBAGE. Succession, Flat Dutch and Savoy \$1.00 per 1000. \$8.50 per 10,000.

CELERY. White Plume and Golden Self Blanching. \$1.00 per 1000. \$8.50 per 10,000.

PARSLEY. 25 cts. per 100. \$1.25 per 1000.

CHICAGO NOTES.

Among the Plant Growers.

Fall work is well under way. Lilies Formosa and Harrisii are either potted or are ready for immediate attention. The early French bulbs and freesia have been in for some time and growers using them for early blooming have them potted up. A few of the Dutch bulbs are now here and the balance will come soon. Boston ferns are a subject of great interest as the market has not been well supplied with these popular plants for a year. Growers are now potting them so they will be nicely established before the dark days. They are also busy getting in good batches of cuttings of geraniums, lantanas and other bedding stock for another spring.

Some of the florists' windows are showing fine potted plants of Celosia Thompsoni magnifica. This variety of coxcomb in pyramid shape makes a showy plant and is especially desirable, for it comes at a time when there is comparatively nothing else in the market. Florists will remember the fine plants exhibited by Howard Gould at the big flower show last fall. They last a long time and are not difficult to grow. Their showy color and graceful form make them very desirable as fall plants.

Samuelson's New Store.

Chas. A. Samuelson, who has had one of Chicago's leading retail stores at 2129 Michigan avenue for the past fifteen years, has moved across the street to 2132-34. The interior furnishings are not all completed, but enough is finished to show that it will be a fine double store. One part is devoted to art pottery suitable for florists' use and has a fine conservatory in the rear. The other part is fitted up handsomely for his retail trade, with a salesroom in front and two model workrooms in the rear. These are lighted by skylights and separated from the salesrooms by a large refrigerator.

New Wholesale Rooms.

The rooms in the north end of the Atlas block are nearing completion. Hoerber Bros. will have fine light and convenient rooms for their wholesale business. This company has erected an extension greenhouse plant at Des Plaines, and now with their large salesrooms will be well equipped for fall business. Kyle & Foerster will have the rear rooms, which are well lighted and will be thoroughly equipped with facilities for handling the business of a wholesale commission house.

Personal.

C. M. Dickinson is confined to his home by sickness.

Leesley Bros. are taking an automobile trip into Wisconsin.

E. B. Washburn has returned from a brief visit in New York.

O. P. Bassett is on an auto trip to Niagara Falls and New York City.

Mr. and Mrs. Chas. McKellar are home from a two weeks' trip to Ohio.

Visitors.

Adolph Bruyssens, Professor of Horticulture at Vilvorde, France, is in this country making a study of the cultivation of the carnation. From here the Professor will go to Cornell University, Ithaca, N. Y. Other visitors were: E. J. Fancourt, representing Pennock-Meehan Co., Philadelphia; A. H. Bush,

Denver, Colo.; J. W. Worth, Parsons, Kan.

Anna Grace Sawyer has just placed a fine illuminated sign on her Madison street store and otherwise added to her equipment, making her place one of the finest of the smaller florists' stores in Chicago. It is known as the Pansy Store.

PHILADELPHIA NEWS NOTES.

J. Otto Thilow sailed August 24th on the Kaiser Wilhelm for a brief vacation.

Edward Reid left Sept. 5th on a four weeks' trip to North Dakota and other points west.

Visitors last week: Daniel E. Gorman, Williamsport, Pa.; F. W. Emerson, Omaha, Neb.

W. Paul Binder, late with Shellem, is now gardener for Theodore Presser, Chestnut Hill, Philadelphia.

James E. Mapes, Clayton, N. J., a dealer in florists' greens, had his buildings badly damaged by fire, Sept. 1st.

Jno. Berger of Berger Bros. has returned from a month's sojourn in the Maine woods looking 'sunburned and hearty.

Paul Klingsporn, late with McKisick, has returned from Alabama and is now in the electrical business at 2220 North Hancock street, this city.

George Faulkner has opened his new store on 15th street, below Sansom, with greatly enlarged facilities and good prospects for a prosperous fall trade.

W. Atlee Burpee has returned from his European trip loaded with interesting reminiscences and full of knowledge about novelties in the horticultural and floricultural line.

Henry Hughes, late gardener for H. O. Wilbur, Devon, has taken a position with Mrs. Fannie D. Stout, Dubuque, Iowa, for which point he left Philadelphia on the 7th inst. with the best wishes of his many friends.

It is reported that E. C. Dungan has resigned from his position as manager for W. Henry Maule and entered the newly organized Noll Corporation at Newark, N. J. (See Hort. page 346, Sept. 4.)

A prominent Camden florist was hunting for violets last week. He seemed very much surprised that the big Philadelphia flower markets could not supply a common item like that. At last accounts he was still hunting.

OBITUARY.

John W. Dunlop.

John W. Dunlop, Milwaukee's first professional florist, died in that city on September 1 in his ninety-seventh year. He was a native of Scotland. A widow, a daughter and four sons survive him.

Edward O. Graham.

The death is announced of Mr. Edward Oliver Graham of the Graham Nursery Co., of Rochester, at his home in Cazenovia, N. Y., on Monday, September 6th.

The funeral took place from the Universalist Chapel, Thursday, at 2.30 p. m. Deceased was born April 24th, 1858, in Whitby, Ontario, Can.

Wholesale Flower Trade

Flower Market Reports.

BOSTON This market is still heavily overloaded with asters, gladioli, and other material from outdoor sources and the greenhouse-grown material is almost overwhelmed for the time being. American Beauty and white roses are in good demand if of presentable quality. Orchids are still scarce and the demand exceeds the supply. Lily of the valley is good and selling better than in former years. Longiflorum lilies are unusually good, but in excess of the present need. Never before have asters been so good. The trouble is that they are offered in quantities that are absolutely unmanageable. The inferior asters—which are also plentiful—cannot be disposed of; many shipments fail to even realize express charges.

Improvements are shown **BUFFALO** daily in the cut flower market and the past week trade was on the upward course. Roses have not been too plentiful and the demand has been good, especially for white. New crops are coming on, among them being White Killarney, which are good, though of short stems. Beauties and Richmonds have moved freely, also lily of the valley has had its share in demand. Asters and gladioli still continue to be plentiful; the select stock cleans up but there are too many ordinary which have little or no value. Carnations are to be seen but in small quantity; Enchantress is coming in quite good and with fair stems. Other material moved fairly well throughout the week.

Business is starting up **CHICAGO** well for so early in the season. No one is anxious to see too many orders come in while stock is so scarce. At last some really good asters are to be had and they do not stand long in the vases waiting for customers. Shipping trade is also good and a lively skirmish for flowers follows the arrival of the mail each morning. The closing of the Chicago Post Office on Labor Day made a considerable number of disappointed customers who had written in their orders which were not delivered till Tuesday. Carnations are decidedly poor, but little blooms that would be despised later in the season are now eagerly bought up at top prices. Celosia of the old-fashioned kind, as well as the new, is to be had and makes a showy window flower. There are few lilies and they bring any price the seller chooses to ask. Golden Glow chrysanthemums are coming in quite freely, also a few of October Frost. Fall openings and fall weddings are doing much to start things moving and the season may now be said to be fairly opened.

As per previous reports, **DETROIT** the month of August has showed up much better than other years. Some large floral orders in its last days gave almost all the trade an opportunity to put a good finish to the August ledger sheet.

PHILADELPHIA.

The tide continues to rise slowly. Last report noted an improvement and the present shows business holding its own—and perhaps a little better. General conditions are all that can be expected for this season of the year. The feature now is the dahlia. This flower has forged to the front wonderfully of late years, and with the new and improved forms in the decorative and cactus classes, may now be considered a cut flower staple during September and October. The best of the new dahlias seen this season are undoubtedly Jack Rose and Delice. Both are bright, pure colors, with excellent stems and form. Delice is said to be the best keeper of any dahlia ever introduced. Asters continue very fine—only too many for the demand.

Some special blooms of under-glass culture appeared last week which were certainly magnificent. Cosmos is more plentiful but not yet overdone. Gladioli are on the wane. Roses continue to show some improvement as to quality consequent on recent cool weather. American Beauties have been in excellent demand and a sharp advance in quotations has resulted. Among pink varieties My Maryland is undoubtedly in first place—with Killarney a close second. White Killarney is rather a

disappointment so far—the general trade seeming to be just as well satisfied with good Kaisersins.

Business was rather **WINNIPEG** dull throughout the latter part of August. Roses and carnations have been of rather poor quality. Asters excellent but supply in excess of the market requirements. Prospects are regarded as good for fall flower trade.

Flower Market Reports.

(Continued from page 383)

INDIANAPOLIS

There has been a marked improvement in trade since September 1st. It has required hustling to get enough high grade stock to fill orders. Asters are in abundance, the later ones being of much better quality than the early crop. Gladioli are of exceptional quality and are being moved in large numbers. Roses sell moderately well. Some good new-crop Beauties are arriving and bring good figures. Kaiserin remains the best white summer rose. The new crop of tea roses is scarcely worth picking. Golden Glow chrysanthemums bring fair prices considering quality. Plenty of cosmos, dahlias and other outdoor stock are available, but there is no great demand for them. Some outdoor carnations of fair quality are seen.

NEW YORK

Business continues quiet. There is little high grade stock in roses, but enough to meet the demand. The supply of carnations is gradually increasing but the stems are short and consequently they are of little value and remain practically untouched. The supply of lily of the valley is decreasing. Callas appear in limited quantity. There is no lack of asters, however, the market is full of them and they sell at all kinds of prices.

DETROIT NEWS.

Frank Holznagel is erecting a new office building. The steady growth of the city is placing him rapidly amongst up-to-date residences and he is changing from a wholesale grower to a prosperous retailer.

Thomas Brown has added a Ford roadster which in the future will daily deliver his product at the Michigan Cut Flower Exchange. In the past he was dependent on the courtesy of the Suburban line conductors who, perhaps rightly, objected many times to carrying his large telescope boxes.

INDIANAPOLIS PERSONALS.

The town was visited by a hail storm on August 27, the damage done being very light.

Visitors: C. A. Kuehn, of St. Louis; Mr. Cohen, of Wertheimer Bros., New York; Mr. Dykes, of Ed. Jansen's, New York; S. S. Skidelsky, Philadelphia.

Alfred Pahud, the Crown Hill florist, who was injured by falling from a street car on his return from the convention, is getting along nicely and expects to be out soon.

Hamilton, O.—By strenuous efforts of the firemen, the greenhouse on the estate of Col. J. C. Hooven was saved in the recent fire which destroyed his residence.

BUSINESS CHANGES.

Marshall, Ind.—H. G. Hershey has leased the Corey Bryan greenhouses.

Columbus City, Ind.—Lancaster & Simpson have purchased the greenhouse plant of D. C. Noble.

Fenton, Mich.—George Bridson has erected a new boiler house, a 50-ft. stack and cold storage sheds.

Baldwinsville, Mass.—C. C. Speare has bought the greenhouse of E. J. Richmond on Columbus avenue.

Rockford, Ill.—C. H. Woolsey has taken over the Dempsey greenhouses on Corbin street, and will put M. H. Smith in charge.

Ashtabula, O.—William Regner has secured a controlling interest in the Ashtabula Greenhouse Co. and will have charge of the business hereafter.

Carthage, Mo.—The Finn greenhouses will be carried on hereafter by Frank Finn, who has purchased his mother's interest in the business.

Muskegon, Mich.—The greenhouses of L. D. Squires of Whitehall have been purchased by Louis Wasserman and will be removed here and used in his business.

Council Bluffs, Ia.—L. H. Reams has this season added two large greenhouses, a boiler house and smoke stack fifty feet high and six feet square, which will bring his plant easily into the up-to-date class.

Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

BOSTON FLOWER MARKET.

The necessity for more room in the Park Street Market is to be relieved by an excavation under the sidewalk which the Church committee will recommend at the next parish meeting and which will undoubtedly be approved. This will give approximately 500 square feet more room, which will be utilized for storage vaults and leave room for more stalls in the rear. It is understood that all thought of moving elsewhere is now dropped and the market will occupy its present quarters indefinitely.

NEWS NOTES.

Morristown, N. J.—John Grunnewald has leased the Waller greenhouses and will open a retail store on Speedwell avenue.

Laurium, Mich.—The A. M. York store has been handsomely decorated during the summer and Mrs. Nordquist is now in charge.

Springfield, Mo.—J. S. Farrington, receiver for the Planters Seed Co., has closed the place and will dispose of the stock at auction. The liabilities are in the vicinity of \$12,000.

Grafton, Mass.—The Norcross & Stratton greenhouse, together with dwelling house and land, has been bought by Lyman F. Gordon, but he has not definitely decided to what use he will put the property.

PEONIES AT CORNELL.

PEONY TRIAL PLOT AT CORNELL

The picture on this page shows the test plot of the American Peony Society this year, with President Farr of the American Peony Society and Prof. Batchelor at work. This snap shot was taken by Prof. John Craig, and is a good view of the appearance and condition of the original collection. In the distance is seen the tent, used as headquarters, and a distant view of the new plot. The object of this plot as distinct from the original one is to determine the best one hundred varieties. With a view to do this a number of firms have sent collections, which embrace, in their opinion, only the very best varieties for general purposes. A new planting will be made this fall, and adjoining these

two plots, wherein the net results of the work so far accomplished will be concentrated by planting specimens by themselves of all varieties of which official descriptions have been taken. Each year additional varieties passed upon by the committee on Nomenclature will be added to this new plot.

The officers of the American Peony Society are: Bertrand H. Farr, Reading, Pa., president; C. J. Malloy, Rochester, N. Y., vice-president; J. H. Humphreys, Andorra Nurseries, Chestnut Hill, Penna., treasurer; A. H. Fewkes, Newton Highlands, Mass., secretary, and Prof. John Craig, Cornell University, chairman of the committee on nomenclature.

LANDSCAPE GARDENERS.

The profession of landscape gardening, as practiced by the best exponents, is a high art, also combining much of the purely scientific. Sir Uvedale Price, and Humphrey Repton, and Loudon each had the highest respect for the dignity of their calling as landscape gardeners. They were men of the best education, taste and refinement. But they each had their satellites and pretenders to the art. The same holds good at the present day. It is no unusual thing—in fact, quite the rule—to see the title "Landscape Gardener" upon the sign-board of humble nurserymen who lay out suburban front gardens. These men have no more claim to the title than the surfacemen on a railway. But why is the profession not regulated so that none but registered practitioners can pursue it? We ask the question very seriously, since heavy expenditure and bad results often go hand in hand when inexperienced, ill-trained "landscape gardeners" undertake the execution of commissions. Yet these men succeed in inducing owners of estates to spend thousands on so-called improvements, and their original estimates are nowhere near the mark, and their work appals the trained artist, and begets a horror of the whole fraternity of designers in the mind of the client. More of this anon.—Journal of Horticulture, August 26, 1909.

CHILDREN'S EXHIBITION AT BOSTON.

Last Saturday was a gala day with the children at Horticultural Hall, Boston, for that was the day of their annual exhibition under the auspices of the Massachusetts Horticultural Society and they came by hundreds from far and near, and spread out the products of their industry in school and home garden, the display practically filling the large hall and the small one adjoining. The collections of fruit and flowers and vegetables was exceedingly creditable to the little gardeners and well-won prizes were lavishly distributed. Altogether, it was one of the most impressive events of the year horticulturally and well worth a visit.

A plot of about 1200 square feet with a portable house in the centre was laid out under the supervision of Miss Julia H. Bradley to show how a small home plot may be arranged with tasteful surroundings—lawn, flower garden, hedge, window boxes, climbing vines, rockery and vegetable garden in full glory.

Detroit, Mich.—The State Fair seems to have lost all power of attraction for florists, which is a bad feature for many reasons. It is to be hoped that the local Florist Club officers and the State Fair managers will get together and arrange a schedule which will bring out a good live competition.

THE EFFECTS OF CROSS POLLINATION IN HORTICULTURAL PLANTS.

(A Paper read before the Georgia Horticultural Society by Prof. R. J. H. DeLoach.)

Thomas Andrew Knight (1759-1838) an English Horticulturist and physiological Botanist was the first to show the value of cross pollination of fruits. As early as 1806 he said: "New varieties of species of fruits will generally be better obtained by introducing the farina of the variety of fruit into the blossoms of another than by propagating any from a single kind." He holds the same place in relation to improvement by crossing that Van Mons holds with reference to selection. A. J. Downing a writer of considerable note on fruits and fruit trees, said in 1836: "Assuming Professor Van Mons to be strictly correct, we would suggest that a great saving of time and a considerable improvement, in quality and vigor, might be gained by calling in cross-pollination to the aid of the cultivator as soon as the fruit of the trees (say the second generation) begins to show symptoms of amelioration. By impregnating them with pollen of the finest varieties we conceive that the next generation would produce excellent fruit and at a saving of twenty or thirty years."

In 1844 Hovey, famous as a plant breeder said: "The results will be obtained in a shorter period by cross fertilization and, we believe, equally as favorable as by the method of successive generations alone."

Knight, Hovey, Allen and Downing succeeded well in establishing confidence among horticulturists in the possibilities of cross pollination, and it came to be a general practice, but very little fundamental knowledge was added to the subject till biological students of modern times began to apply laboratory methods to plant-breeding investigations, and investigators combined cytology with field experiments. It is rather interesting that the early hybridizers mixed pollen from different sources to pollinate with, contending that in this way the ovary would be strengthened. Variation in fruits and other plants as we know it is comparatively a new subject, because new conditions and new environment, better methods of cultivation, and more liberal applications of fertilizers, as well as almost unlimited crossing, have rendered variation far more conspicuous. The number of professional and commercial plant breeders has grown to such enormous proportions within the last decade, especially since Mendel's laws of heredity and work in hybridization have been rejuvenated, and as a consequence so many ideals set up that we naturally have a great many new varieties from time to time of all the cultivated or artificial plants. Each new creation seems to have inspired breeders to make greater efforts to create and name still other new fruits, etc., and this eagerness to get something new has caused us to neglect to give an account of our methods of breeding and the history of the new varieties produced.

Technique of Crossing.

This phase of the subject needs very little discussion in the present paper. Most horticultural plants have

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

WANTED—Experienced grower for commercial place near Boston; must be good grower of carnations especially. Good salary to the right party. Address, with references, Carnations, care of HORTICULTURE, 11 Hamilton Place, Boston.

WANTED—Plantsman with experience in growing choice pot plants. Wages, to start, \$12.00 per week. Address, with copy of references, experience, etc., "Horticulturist," 11 Hamilton Place, Boston.

WANTED—Good all around carnation, rose and chrysanthemum grower. Address, giving experience and other particulars, Mc., care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED as Florist by young man with 10 years' practical experience; thoroughly capable. 25 years old. Good references. Address Stephen Burton, care Dr. Givens, Stamford, Conn.

Situation wanted by Gardener, private or commercial; employed now and for past 12 years with a leading New England nursery At liberty November 1. Address, James Ganley, 5 Winthrop Ave., Reading, Mass.

A young lady who is unable to continue her studies because of financial difficulties, wishes to obtain employment with a florist. Address L. M. D., 1 Raeburn Terrace, Newton Highlands, Mass.

Lady wishes situation in flower store. Thoroughly competent and experienced, with good record for business management. Address Maine, care HORTICULTURE.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 58 Montrose Ave., Brooklyn, N. Y.

BOILER FOR SALE: 3 ft. diameter, 11 ft. long. Good Bargain for greenhouse boiler. For particulars address "Engineer," 11 Humphreys St., Dorchester, Boston, Mass.

perfect flowers. To cross pollinate, the flowers must be emasculated before any of their own pollen grains are ripe, in order to be sure of not having self-fertilization. Authorities differ as to when pollination should take place after emasculation. Some say that pollination should be at the time of emasculation, while others say that a day or two later is better. Price found a considerable advantage in pollinating at the time of emasculation. To emasculate, one must carefully remove the partially unfolded corolla, down near the base of the calyx, and trim the stamens with a small pair of scissors, it being absolutely necessary to get every anther from the flower in order to avoid the possibility of self-pollination above referred to. If pollinated at the time of emasculation, the pollen should now be brought from the flower to be crossed and applied to the pistil of

IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

the newly emasculated flower. There are as many methods of applying pollen as there are plant breeders, but the usual way is to apply the collected pollen with a camel's hair brush. I have obtained fine results by dipping the stigma into the pollen that has been collected on soft paper. In case that the pollen is to be applied one or two days later than the emasculation, the stigma should be securely covered with a small paper or linen bag, in order to keep insects away. Then when the pollen has been applied cover again as before for a day or two. Then remove bags and the work is done. The pollen grains will be dissolved by the pistil and the male nucleus follow the channel of the style down to the ovary and fertilize the ovules. Until this is done the young fruit will not set. If the pollen has been applied in sufficient quantities, and the cross not too radical, most or quite all the seeds will develop, in which case the fruit will be better, and the breeder will have a much better chance to get seedlings. Apparently, a few fruits have been developed that need no fertilization of flowers,—for instance the seedless orange. I have not studied the morphology of this fruit, and cannot discuss it. Generally, the fruit depends upon the development of the seed, and the development of the seed depends upon the fertilization of the ovary with pollen, and this depends in turn on the successful fusion of the nuclei of the ovule with the pollen grains.

Effects of Crossing.

One can say without fear of successful contradiction that crossing when properly applied will be found a means of combining desirable qualities in two or more fruits sufficiently related to admit of crossing at all. If the Russet apple is to a great extent disease resistant, and the Baldwin a large, beautiful red apple, but somewhat susceptible to certain diseases, we may combine these two qualities by crossing. This of course will entail upon the breeder a great deal of detail, for the dominant and recessive characters must be studied and the strength and breadth of the allelomorph pairs known. For instance, if red and the lack of red or green constitute one of the allelomorph pairs in a cross between the Baldwin and the Russet apples, the breeder must take careful notes as to which one of these pairs dominate in the first generation of crosses, and he must further calculate what percent of the total area of the apples in the second generation or F_2 generation will be red, if he would secure the desired results in the minimum time.

Another good effect in crossing, is the infusion of new life into the offsprings. They seem to be more vigorous and hardy. An illustration of this is found in the cross between the Newton apple and several other varieties. In every case the offspring was far more vigorous and a more salable fruit. It might be claimed that all the qualities were not improved in any specific case, but on the other hand, the size and appearance were greatly improved without exception. Where the apples were crossed, they showed increase in weight and in the number of seeds developed.

The Spitzbergen apple is almost self-sterile, being able to set only about 3 per cent. of its own fruit. When crossed with Ottley, Baldwin and other varieties it was much improved. The few self-fertilized Spitzbergens were small, ill-shapen, and otherwise objectionable. To what extent then are self-sterile apples improved by cross fertilization? In each of the above cases, they were greatly improved, and the conclusion among horticulturists is that this rule is almost if not quite universal, that where apples are found to be self-sterile, the few individual fruits that may prove self-fertile are not as good and strong as those on the same trees that are obtained by cross pollination.

Is self-sterility brought about by cross fertilization? There is some reason to believe that where plants are continually crossed for effect, they eventually come to depend for fertilization on foreign pollen. Many cases of self-sterile horticultural plants have been brought by crossing foreign on native fruits. However, in this way we have been able to produce much of our best fruit. As we come from the distant past when most of our varieties of fruits were foreign, to the present when most of them are native or American-produced and American-named, we cannot fail to notice the activity of growers and the eagerness of speculators to adopt the promising new fruits. The foreign element has continued to pour into most of our horticultural plants. Among the last of these is the 'New Hybrid Fruits' at the South Dakota Experiment Station published in bulletin 108, May 1908. Our native wild fruits seem to be susceptible to considerable development when crossed on good foreign fruits. The sand cherry on the Chinese apricot is a good illustration of this. Another is our native plum on the Chinese apricot. By means of these crosses, foreign fruits are easily adapted to our soil and environment, as well as climatic conditions and at the same time our native fruits are being greatly improved.

Limits of Crossing.

There are bad as well as good effects from cross pollination, and my paper would not be complete without devoting some space to this phase of the subject. Bailey has said: "Crossing is useful as a means of originating new forms adapted to man's special uses and also as a means of revitalizing the offspring by providing new combinations of characters which may better enable the individual to compete in the struggle for existence; but there are limits beyond which crossing is useful neither to the species nor to man." What are these limitations? To what extent may crossing be made to prove profitable, and when does it work injury to the plant? If the cross ceases to be useful to the plant shall we consider it wise to continue crossing for benefits to man? Artificial or cultivated plants have very few of the natural factors of limitation to work under. They have no struggle for existence. Man does their struggling. The weed is harder and would get the better of the cultivated plant, but man steps in and destroys the weed. In two ways, man aids cultivated plants: by selec-

tion and cultivation, and by destroying their enemies. Therefore the great consideration is improvement. Making something better, along definite lines and for specific purposes.

When selection is not sufficient to produce the required effect in the improvement of plants, crossing varieties is resorted to. When the end in view has been attained without too much sacrifice, the breeder is fortunate. Sometimes self-sterility is so pronounced that the desired fruit will have to be abandoned, the latter action dependent on accessibility to or our possibility of growing the desired pollen with which to fertilize the sterile varieties.

This leads to a consideration of the causes of self-sterility in orchards. One authority says that the cause of self-sterility is that the pollen of a variety is unable to fertilize the pistils of that same variety. But this is only half of the truth. The other part of the question might with propriety be asked: Why will the pollen not fertilize the pistils of the same variety? Cannon has come nearer the truth in his discussion—the cytological aspects of breeding. In order for the pollen to fertilize the ovules without a radical disturbance, there must be a common number of chromosomes and consequently a like reduction of chromosomes in the sperm and ovum. The spermatocyte must be the morphological equivalent of the oocyte. There is then a possibility that part of the offsprings of certain crosses—I might say radical crosses, are normal and part abnormal. The normal adhere to the original method of cell division, and the latter do not. In the normal development, the sperm and ovum had an equal number of chromosomes, in which case the spindle would be exactly like that in the parent types. In the abnormal development we may have direct nuclear multiplication, or amitosis, and consequently a general biological or morphological difference. The last or abnormal difference, Cannon says may be the cause of self-sterility, and the former or normal development the cause for fertility of self-fertility. In order to successfully answer the question, there must be a combined study of cytology and field experiments. The whole matter is a problem of morphology, and without making cytology the basis of an investigation of this problem, one cannot hope to unravel the fundamental truth.

Suggestions.

It is suggested that, in as much as there are so many institutions in the country that exist solely for research work and experimental investigations, horticulturists follow well tried methods, and refer new problems to such institutions. Practical crossing and not theoretical breeding is the only safe rule for the ordinary horticulturist. The work in cross pollination should be principally with self-sterile varieties, and the pollen used should be from some thoroughly tested varieties. Or, if foreign pollen is known to work well with self-fertile varieties, no risk will be run by such practice.

HOLMES' DELICIOUS EARLY SWEET CORN

An entirely new and distinct variety. Ready for market sixty-five days from date of planting. Without exception the most delicious early corn.

Fully equals our Premo in size—twelve rows to the ear, and among the first in the market. The stalks grow from five to six feet high and in the entire crop we grew, found the ears to be free from smut. It is evidently a drought proof corn as it did well throughout the entire past dry season.

We have made it a rule never to introduce a novelty in vegetables or flowers that did not have merit, and was not fully up to our representations. We can truthfully say in offering this corn, HOLMES' DELICIOUS, that we do so knowing that it will grow in public favor, the same as our many other novelties which we have introduced, such as HOLMES' PREMO CORN, HOUSER CABBAGE, etc. The mere fact that both these novelties are listed by the large majority of the best seed houses, not only in the United States, but in Germany and other parts of the world, substantiates our claims made in the past.

The private gardener is always on the lookout for something superior to anything he has had before. The HOLMES' DELICIOUS meets his requirements. The market gardener is also always on the lookout for something extremely early. This also meets his wants. The farmer, as well as the private and market gardener, is just as eager to secure a good article, and to him we can truly say the HOLMES' DELICIOUS meets his requirements.

William K. Harris, the noted florist of Philadelphia and the father of the Liliu Harrisii writes: "In my honest opinion it is the most delicious corn I have ever eaten. It is tender, juicy and sweet and has a flavor most pleasing to the palate. It ranks far ahead of any of the varieties that have yet come before my notice. I have given this corn to a great many of my friends, and they all pronounced it superior to anything they had ever eaten."

I desire to express to you the satisfaction I received from your Delicious Sweet Corn, which I ordered from you this past Spring. With me it was six days earlier than two other extra early varieties, and these latter two varieties are considered the earliest of all. Also it is harder than other early varieties, it withstands the wet and cold soil of a late spring, and can thus be planted a week or ten days ahead of any other corn. You have it named correctly, for in flavor it is delicious. Yours very truly, DAVID RUST

WE SHALL HAVE AMPLE TO SUPPLY THE TRADE THIS YEAR. WRITE FOR PRICES.

HOLMES' GREEN PROLIFIC POLE LIMA BEAN

Grows green, keeps green and dries green; the only LIMA BEAN that is absolutely green when dry.

The most productive POLE LIMA BEAN, as early as the EARLY JERSEY and unquestionably the most prolific of all Pole Limas. The large pods hang in clusters of from five to eight, which makes them easy to gather, each having from five to six beans in a pod. It is strictly one of the most remarkable novelties that has been offered for many years and one which every seedsman appreciates as well as the market gardener. There will be no disappointment in the crop. Although a very dry season, this bean has absolutely surprised the grower as to its prolificness, and its fine eating quality, etc.

Messrs. George R. Pedrick & Sons, who grew this bean for us this year write: "The HOLMES' GREEN PROLIFIC POLE LIMA BEAN which we grew for you this past season, was one of the most productive POLE LIMAS we have ever grown, bearing 1-2 clusters, six to eight pods containing from five to six perfect formed beans as large as the KING OF THE GARDEN or LARGE WHITE LIMAS, of true dark green color, which has long been sought by many seedsman, and we believe this is one of the novelties which has come to stay that has merit. In flavor they are delicious and tender."

We shall have sufficient to supply the trade with this bean this season. Write for prices.

Notes from the Arnold Arboretum

Several very ornamental species of our native Elders have recently been introduced into cultivation. The best of them is probably *Sambucus canadensis acutiloba*, a form with deeply and finely cut leaves which give the shrub a very graceful appearance. It is particularly beautiful in June when it is covered with its large clusters of white flowers and again in September, when the branches are weighted down by masses of purplish black berries. Another striking variety of the same species is *Sambucus canadensis maxima*, a strong grower with large foliage and exceedingly large flower clusters measuring often twenty inches in diameter. It is a very effective shrub especially for planting on the banks of brooks or ponds. A variety somewhat similar in foliage to the first named one is *Sambucus pubens dissecta* which is very handsome particularly when it is studded with its pyramidal dense clusters of scarlet berries ripening in June; the foliage is tinged purplish when unfolding. All three are of course perfectly hardy here and are of vigorous growth.

Besides the well known Trumpet Vine, *Tecoma radicans*, its hybrid with *T. chinensis* called *T. hybrida* merits attention; the orange and scarlet flowers surpass those of the first named parent in size and the inflorescence is larger and looser. It also climbs by aerial rootlets though it does not seem to grow as high as *T. radicans* and is slightly tenderer than that species, but hardier than *T. chinensis* which it almost equals in the size of its flowers.

Another little known late flowering climber is *Polygonum baldschuanicum* which bears from August until late in fall large clusters of pinkish white or nearly white flowers. The bright green leaves are ovate or oblong-ovate in outline, heart-shaped at the base and from two to four inches long. It grows to a height of about twenty feet and looks its best when climbing into loosely branched trees, as it bears its flowers chiefly on the upper part of the stems. Compared with other late flowering climbers as *Clematis paniculata* and the similar, but smaller and more graceful *C. apiifolia* it has the advantage of its flowering time extending over a much longer period.

The young plants of the Chinese Tulip tree, *Liriodendron chinense*, look promising and vigorous; the handsome foliage is very similar to that of the native species, but is somewhat larger, more glaucous on the underside and tinged purplish while young, the lobes are generally more pointed. The flowers are smaller and the tree in its native habitat seldom exceeds twenty feet. Its hardiness has not yet been tested here, but as it has been found in Central China at an altitude of six thousand feet, we may hope that it will be fairly hardy here. The discovery of a Tulip tree in Central China has been of great botanical interest, as until then *Liriodendron* had been considered a typical American tree. A similar case we have in *Sassafras* which was up to a few years ago considered as a tree peculiar to the American flora, until *Sassafras Tzumu*, which can hardly be distinguished from the native species in its general appearance, was discovered in Central China. It also has been introduced into cultivation and has proved hardy in England.

The Rose in South Africa

The following interesting information concerning the cultivation of roses is taken from a communication by E. Paetzold of the Nursery Tarkastad (South Africa), and given in *Die Gartenwelt* for August 28. "Wherever a valuable variety of a rose appears in Europe it soon gets to South Africa. We possess the best of the novelties to be found in Germany, England, and France. The raising of roses differs, owing to the mildness of the winter, from European practice. Seedlings as stocks are unknown; only cuttings are employed which in late summer, here, at an altitude of 1500 metres above sea level, as early as the beginning of February are set out in close lines. By the beginning of May they are fit for working. The worked plants remain till early in the spring undisturbed, and are then planted out at a sufficient distance apart, and allowed to grow as freely as they may before cutting the shoots back; and the method is found to work admirably. At lower levels the cuttings are set out in July—the winter season here—and are ready for budding in November. By the employment of strong buds these begin to grow in the course of fourteen days, and with weak buds in three to four weeks, and flowers appear from February till Whitsuntide at which season the temperature descends to 2 degs. C. At flowering time the nurseryman and gardener has the interesting opportunity of observing the old and the constantly developing novelties.

Although the latter are not always the finer, there are sure to be some that may prove desirable improvements on older varieties and worth preserving. It is not every variety that finds favor in Europe which is a success here, for it is not every variety that is equal to enduring the African sun and climate. Many varieties cannot withstand the vertically descending rays, the changeable temperature at great altitudes, and the attenuated parched air. There are a number of varieties which cause much labor and effort in keeping them partially free from mildew: The new Rose Reichs-Kanzler is one of the complete failures and the worst failure that has found its way to South Africa, and so it may turn out in the future in Germany. The reigning drought demands the most careful application of water by means of water channels and sluices, more especially when rose stocks are grown from cuttings; and in high summer the land requires to be laid under water every eighth day. As has been stated the flowering time for roses endures to the end of May, and beginning of June

South Africa offers a paying business field to experienced clever gardeners, although competition has greatly increased in recent years. The love of flowers is fostered by horticultural and agricultural exhibitions not alone in the towns but likewise in the country. The average farmer is a rose lover and a judge of roses, and for these reasons the good novelties soon get distributed over the entire country. Every owner of a garden knows the white hybrid perpetual Frau Karl Druschki; and notwithstanding that the plant cost in the first year £1 per plant there were plenty of purchasers. A house without a garden is unknown or a garden without a rose. At rose flowering time, the rose is the constant decorative material, and the rose bouquet is found without fail on the Englishman's table.

three-fifths fare, and the Southeastern Passenger Association a rate of one fare plus fifty cents for the round trip, when the Society of American Florists, a much larger organization, failed to get a "look in" for their convention at Cincinnati although they had received liberal concessions every year previous for nearly a quarter century? New York to Cincinnati and return, in 1885, \$16.00; ditto in 1909, \$31.50; and all other points got the same dose. If delegations of old-fashioned proportions are wanted for Rochester next year the transportation problem is one of the first things for consideration by the powers that be.

Exhibition essentials

Now that the season of exhibitions is at hand, problems connected with these affairs will demand attention from those upon whose shoulders the burden of management has been placed. Three things are essential to the full success of a show, viz., a satisfied public, satisfied exhibitors and a financial balance on the right side of the account. The latter depends largely upon the attainment of the first. The second depends upon neither of the others. It may be asserted by some, and with pretty good reason, that a full set of satisfied exhibitors is an impossibility; that the competitor who has failed to reach first place will rarely admit that the judges' decisions were right and that there always has been and always will be something for him to find fault with. Still, we can't have shows without him and too much wisdom and diplomacy cannot be exercised beforehand to provide against anything that may later on afford a basis for complaint. In other words the judges cannot be selected too carefully, the schedules and rules cannot be too explicit in their wording and all sources of past dissension should be removed as far as possible.

It is unfortunate that some more general standard—something in the way of a more uniform system of judging, is not in existence. A good start has been made in that direction by the chrysanthemum,

rose and carnation societies and it should be followed up and worked out until a universally accepted set of scales for all classes of exhibits has been assembled for the use of judges. The Society of American Florists should take up this work and is in a better position than any other existing body to formulate rules and regulations and bases for judging that will be generally recognized and gladly submitted to by exhibitors who, hitherto, have had to take all kinds of chances if desiring to show at divers places and to accept the dictum of judges of varying experience and widely dissimilar viewpoints. Nothing in the above should be construed as reflecting on the ability or integrity of those who have heretofore served as judges or on their decisions. So far as our experience extends we know that judges are carefully chosen, their decisions impartially made and verdicts that have been questioned have generally been found able to stand analysis. Yet the duty of judging is not, under present conditions and possible contingencies, one that many care to assume. The best men are none too good, however, for such a service and everything possible should be done to remove existing sources of misunderstanding and consequent heart burnings so that able men who have heretofore been inclined to avoid the responsibility may become willing to serve on judging committees.

A convention handicap

We are in receipt of a prospectus for the meeting of the National Nut Growers' Association to be held at Poulan, Ga. By what strategic and subtle influence has the energetic secretary of that society been enabled to manoeuvre the Trunk Line Association, Central Passenger Association and Western Canadian Passenger Association into granting a rate of one and

A Great Pornologist

In Northeastern Iowa near the beautiful town of Charles City there lives a quiet man who has given forty years of his life to the improvement of the apple. Few men have done so much with so little assistance and accomplished such results as Chas. G. Patten. Unfortunately like many others who have performed wonders for horticulture he has reaped but a meagre reward.

He found himself in a bleak cold region where the fruits raised in the East could not grow. Orchards after orchards were planted only to be killed by old Boreas. A hardier race must be provided. He set himself to this task with unwearied patience. His first success was Patten's Greening which proved to be next if not superior to the Wealthy in hardiness and productiveness. I think today it takes the lead of all. He showed me the original tree now forty years old and laden with fruit, some times producing twenty-five to thirty bushels a year. And yet with all this drain it is very robust and is in thriving condition. This tree of itself is worth millions to the people of the great prairies. He received but little from it. It has now, in a measure, gone out of his hands and is enriching nurserymen and planters all over the West.

It is not a shapely nursery tree. Here let me say a word for homely things; they may be good for all that. Some of our very best apples grow on unshapely trees. Tolman's Sweeting is one of our best and yet it is the meanest tree in the nursery. Jonathan is a poor grower and not very handsome. It is next to impossible to get a Patten's Greening up to be a nursery dude. But it is there for business and a great deal of it.

The next tree which has been a success is the Iowa Beauty. This was branched low—a very sturdy tree and a prolific bearer. Mr. Patten has hundreds of very choice trees from carefully hybridized seeds which promise well for the future.

I suppose the two best apples of the finest flavor are Jonathan and Grimes' Golden Pippin. These are not hardy in the North. They must have a hardier stock. In making experiments it is found that scions of a tender tree are made hardier by grafting them on ironclad stocks. So with care these choice apples were started in protected places. Then when they blossomed they were crossed with the hardiest kinds to be had and the problem was solved. The most luscious apples now grow on the hardiest of trees. But how much time and patience this requires. Mr. Patten and the writer are of the same age—both born in 1832. His work is now in a critical stage. If he is taken away who will carry it on? Burbank is doing a great work for the Pacific coast, but nothing in comparison to the work of Iowa's grand old man who wants to see the great bleak prairie states filled with orchards of hardy trees which will pour millions of luscious fruits into the homes of the people.

Mr. Patten is also having phenomenal success with plums. He found none that were satisfactory and so he is building up a new race. He shows his faith by his works and he and his sons are planting good sized orchards with his new productions. One in this work must be conservative. A tree may do well where it is born and when moved to a different locality it may not succeed. So it takes time, research, infinite patience and a good deal of cash to produce results. The strangest thing is that the State and General Government do not take this enterprise so successfully launched and carry it to its fullest development.

C. S. Hammon

Garden Leaves

Lord Rosebery's recent eulogium of garden literature at a Scottish flower show is a timely reminder of the important part played by horticulture in the world of letters. A whole library is at the disposal of the novice to enhance his enjoyment of the "purest of all human pleasures." A dozen weekly journals in Britain keep his cultural knowledge in line with the season's changes. One marvels that the amateur tiller of the soil is able to do justice to his garden and the numerous writers who desire to instruct or enthuse him. The hesitant amateur has but to follow the daily practise lucidly set forth in Mr. Rider Haggard's "A Gardener's Year," and all the difficulties and dangers vanish, whilst one gains an added zest in the enjoyment of the necessary toil. The result of the daily labors is appraised at a greater value when viewed in the light of the Poet Laureate's well known work, "The garden that I love." The reader returns to his flower beds with an extended knowledge obtained from a close observer of the limitless delights of garden life. Many recruits to the gardening army have been attracted by the charming pen pictures in Mrs. Earle's "Potpourri from a Surrey Garden." The gifted authoress is as skilled in raising plants as in depicting garden scenes with a facile pen.

A STANDARD WORK

One of the most popular gardening works is the late Dean Hole's "A Book About Roses." The genial Dean wrote with the full belief that "The happiness of mankind may be increased by encouraging that love of a garden—that love of the beautiful which is innate in all of us." This book was first published in 1859; it ran through twelve editions in as many months and has been translated into nearly every European tongue. It is to the gardener what Izaak Walton's "Compleat Angler," is to the fishing fraternity. Not only is it a standard work on rose culture, but it is full of the versatile Dean's humor and broad-minded toleration. One of the lessons inculcated is that "He who would have beautiful roses in his garden must have beautiful roses in his heart." He put into practice his precepts, for at the time of his death there were over 5,000 rose trees in the Deanery garden at Rochester.

The works of several novelists reveal the practical knowledge of their authors in gardening matters. For example R. D. Blackmore had a market nursery in the Teddington district, and was very successful in fruit culture. George Meredith, in his robust years, was a keen gardener. Eden Phillpotts has given ample evidence of his intimate knowledge of gardening in the horticultural work he has published. The great fascination of gardening to the literary worker has been summed up by Mrs. Loudon, who in one of her books, states: "The great secret of being happy is to be able to occupy ourselves with the objects around us so as to feel an interest in watching their changes."

The love of gardening creates a sympathetic feeling between the author and his readers. Mr. Alfred Austin has commented on this freemasonry. "The apron of the gardener, like the apron of a freemason," Dean Hole once wrote, "means not only honest work but a brotherhood."

London.

W. H. Adsett.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The opening meeting for the fall season was held at the club rooms on 23rd street, New York, on Wednesday evening, September 13. The attendance was about fifty, a fair number for a starter. President Turner occupied the chair. Many and various matters were disposed of. S. S. Butterfield, who has removed to Oklahoma, was elected an associate member, and incidental thereto "Bobby" Schultz expounded parliamentary law so ably that even Patrick O'Mara might have been jealous had he been a man of jealous proclivity. After routine business had been disposed of, President-elect Pierson of the S. A. F. was called upon for remarks and was received with great acclaim. He spoke of the convention at Cincinnati as very successful and referred appreciatively to the honor which had been conferred on the N. Y. Club and himself in his election. He asked for earnest co-operation so that a record might be made at Rochester of which all might be proud. The national society must look for much of its strength to the support of such bodies as the New York Florists' Club. It is now time for concentration. It is in the air, and the special organizations now operating independently will soon find their best interests served in a broad union under the National Charter. The charter is a power for good and can be used to do much more for the trade than hitherto. He urged the advisability of a general horticultural exhibition in connection with every convention hereafter, to interest the public and develop horticulture. The opportunity is too good to be lost.

F. H. Traendly spoke enthusiastically concerning the national flower show to be held in Boston in 1911. He hoped that the Carnation and Rose Societies would agree on a joint meeting next season, which would be the first practical step towards federation.

Patrick O'Mara said that Mr. Pierson's task would be the unifying of apparently conflicting interests which must always run parallel, and there is no man in the S. A. F. better fitted to deal with such a concrete question. Mr. O'Mara's address was serious, eloquent and full of loyal devotion to the S. A. F. He was followed by Wm. J. Stewart, who seconded Mr. O'Mara's views and said that the two greatest problems for the National Society are those of closer relations with existing organizations and the creating of a greater interest in the convention sessions. John Young also made remarks in felicitous vein.

The fall show to be held at the Museum of Natural History under the auspices of the Club was discussed, and Mr. Pierson impressed upon the members how much depends on the result of this initial exhibition. W. E. Marshall seconded Mr. Pierson's views, as did also C. H. Totty and others.

Robert E. Berry, eloquent and forcible as always, explained the difficulties which operated to prevent his

bowling team from securing the coveted prizes at Cincinnati, and registered a vow that he would be present at Rochester with a winning team, and at every convention thereafter, whether held in Oklahoma or at the North Pole.

A letter was received from H. A. Bunyard, who is out of town, expressing gratitude to the club members for their support at Cincinnati in his candidacy for secretary and extending congratulations to President-elect Pierson.

A unanimous vote of thanks was passed to the Cincinnati Florists' Society for the kind reception and hospitality extended to members of the New York Florists' Club.

The exhibits of the evening comprised some fine chrysanthemums from C. H. Totty, seedling hardy carnation from A. C. Zvolanek, Maman Cochet roses and white dahlias from A. L. Miller.

MORRIS COUNTY (N. J.) GARDENERS' AND FLORISTS' SOCIETY.

The Morris County Gardeners' and Florists' Society is again in harness after a two months' vacation. The monthly meeting of September 8th, brought together some thirty members.

The arrangements for the fourteenth annual Flower Show are about completed. It will be held in the assembly rooms, Madison, N. J., Wednesday and Thursday, October 27th and 28th. Wm. Duckham, Arthur Herrington, Chas. H. Totty and Robt. M. Schultz are the committee. Over \$500 in cash prizes are offered this time, besides several valuable silver cups. No society in the country has broader views; no strings on the prizes nor fences around them. They are free for all. The reason of this is, that above all, it is desired to give the public a good show, and the more entries we have the better the show will be, of course.

The Robt. D. Foote prize of \$25 for one vase of carnations, any variety in commerce, ought to bring out something good in carnations. Dr. D. H. McAlpin's prize of \$25 for 6 plants in 6-inch pots, suitable for table decoration is a new class and ought to be well filled, and so on down the line prizes are equally attractive. As the world knows there is no pecuniary profit in flower shows in this country, but they are being patronized better year after year and they may be self-supporting sometime, anyhow we hope so. So far as this society goes, however, it has a lot of substantial admirers who are always ready to stand in the breach when need be.

Wm. E. Tricker, foreman in Chas. H. Totty's Afton greenhouses was elected a member. Samuel Wyatt, gardener to A. C. Van Gaasbeck, had a very fine exhibit of branching asters and C. J. W. Ottolander, of Springfield Nurseries, had some new phloxes on exhibition.

Flower Show schedules may be had of E. Reagan, secretary, Box 334, Morristown, N. J.

NEW ENGLAND DAHLIA SOCIETY.

Lovers of the dahlia could find every conceivable form of it and every variation of color at the second annual exhibition of the New England Dahlia Society, which was held at Horticultural Hall, Boston, on September 10-12. The exhibit was the largest of the kind ever held in this country, and despite unfavorable weather, the blooms shown were of surpassing size and quality.

Many exhibitors showed from five hundred to one thousand blooms each. Of 126 classes provided in the schedule about one-half were entered for. In the center of the hall the largest exhibitor, W. W. Rawson & Co., was represented by a conventional arrangement in the form of a garden plot in which the flowers were displayed. The loggia was beautifully arranged with an exhibit from R. & J. Farquhar & Co., comprising dahlias and speciosum lilies, the walls being draped with *Clematis paniculata*.

The special prizes were awarded as follows:

The Dreer prize for six blooms of Dreer's White, first to W. F. Turner & Co., second to W. W. Rawson & Co. The silver medal of the New Bedford Horticultural Society for twenty-five cactus dahlias of twenty-five distinct varieties, introduced subsequent to 1905, went to Joseph Thorpe of Taunton. A New Bedford man, W. H. Richardson, took the Newport Horticultural Society's silver medal for the best collection cut blooms, from plants raised from seed in the United States since Jan. 1, 1905. A silver gilt medal, given by Cayeux et Le Clerc of Paris, France, for the best vase of twenty-five flowers of Madame Henri Careux, went to James Robertson of Newport. W. G. F. Turner took the prizes for the best vase of the Rawson dahlia and the best specimen flower of the same variety.

Awards of recognition for new seedlings were given to W. W. Rawson & Co., Boston; Frank R. Tuttle, Salem; A. E. Johnson, Montello; Mary C. Caswell, Concord, N. H.; Wm. F. Hall, Brockton; James Robertson and Colin Robertson, Newport, R. I.

The certificate of the Society was awarded to W. W. Rawson & Co. for cactus dahlia "Marblehead."

The regular prize list for cactus, decorative, show, pompon, anemone, peony-flowered, collarette, single and various other types calling for numbers from single specimen up to hundreds was divided into open and amateur classes. In the open classes the exhibitors and their awards were as follows:

W. F. Turner & Co., New Bedford, 7 first, 6 second, 1 each third and fourth; Jas. Robertson, Newport, R. I., 4 first, 1 each second and third; E. W. Ela, Woburn, 3 first, 4 second, 1 third; Sisson & Thurston, Newport, 3 first, 1 each second and fourth; C. Miller, Newport, 3 first, 1 each second and fourth; A. E. Johnson, Montello, 3 first, 1 third; Lindval & Delury, Dorchester, 2 first, 1 second, 3 third; W. A. Riggs, Jamaica Plain, 2 first, 1 each second and third; W. W. Rawson & Co., Boston, 2 first, 1 third; W. H. Richardson, New Bedford, 2 first, 2 second; D. W. Babcock, Berlin, Md., 1 first, 2 second, 1 third; Mrs. L. M. Towle, Reading, 1 first, 1 sec-

end, 2 third; Mrs. E. M. Gild, Medford, 1 first, 1 second; E. S. Manuel, Newport, 1 first; W. H. Symonds, Marblehead, 2 second, 3 fourth; F. L. Tinkham, Brockton, 1 second, 2 third; J. K. Alexander, E. Bridgewater, 1 second, 1 third; W. F. Hall, Brockton, 1 second; Joseph Thorpe, Taunton, 1 fourth.

On the second day a number of displays of miscellaneous material were put up under the auspices of the Massachusetts Horticultural Society. The group by Messrs. Farquhar, above referred to, was one of these. Others were Mrs. J. L. Gardner who showed specimen ferns, Clerodendron Fallax, Begonia The Rajah and Cypripedium Fairrianum; E. J. Mitton, a seedling cattleya, and James Garthley seedling melons.

CONNECTICUT HORTICULTURAL SOCIETY.

Our first September meeting was held on the 10th inst., in the County building, Hartford, President Huss presiding. Much routine business was transacted; and, after a long and interesting discussion, led by James M. Adams, of Hartford, it was voted that the secretary write to the managers of the recent Connecticut Fair, which was lately held at Charter Oak Park, gently protesting against their not offering any prizes for amateurs in the floricultural department. Very likely this matter will be considered and acted upon another year by the managers. J. A. Weber, one of our members, had charge of the floral display at Charter Oak, and considers it the best one ever seen in this vicinity.

Peter Zuger, head gardener at Elizabeth Park, exhibited thirty-six varieties of asters, and President Huss some blooms of several hardy perennials, and T. B. Brown of Windsor eight varieties of tuberous begonias, at this meeting; all of much merit and interest.

The proposed excursion to Amherst, Mass., jointly with the horticultural societies of New Haven and New London counties, has been abandoned.

Arrangements are now about complete for our dahlia exhibition, Sept. 23 and 24, at Unity Hall, Hartford. The schedules are now in circulation.

The next meeting will be held on the 22nd inst., at Unity Hall, the night previous to the opening of the dahlia show.

GEORGE W. SMITH,
Melrose, Ct. Secretary.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

About sixty members and ladies, of this club, enjoyed a visit on invitation of Mr. Wyman, to the Bay State Nurseries at North Abington, Mass., on Saturday, September 11. On arrival they were escorted by Mr. Wyman to the hotel where a substantial dinner had been prepared. The party was then conveyed to the various nurseries in autos. The herbaceous perennials were first inspected. The deciduous shrubs were next seen and the extent and completeness of the collection was commented upon. The Weymouth line nursery and the evergreens came next and the immense quantity grown was a revelation. The storage and packing sheds were inspected, giving an idea of the magnitude of this firm's business. Everyone voted it an exceptionally interesting and pleasant trip.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

There was interest and enthusiasm in plenty at the meeting of this club on September 7th. It was Gladiolus Night, and a fine exhibition was expected from the outside specialists, but Cowee wired a storm had prevented his shipment, Betscher that it was too late in the season, while Matthew Crawford of Cuyahoga Falls, through some error, sent in his shipment a week too early. The latter were exhibited for some days at one of the commission houses and drew the highest praise for the quality of the flowers.

Banning of Kinsman, Ohio, sent a stock among which were noted a pink seedling of America, a red seedling, not named, Sunset and Niagara; the latter is becoming quite a factor in the Pittsburgh markets and is well liked.

The Private Gardeners' schedule for September was carried out in good exhibits. The judges, John Bader and P. S. Randolph, awarded first prize for collection of herbaceous flowers to Fred Wissenbach; first for collection of annual flowers to Fred Wissenbach, second for same to Jas. Wiseman; first for gladioli to Fred Wissenbach. (This prize was taken with some magnificent spikes of variety Mrs. Francis King; first for vegetables to Frank Crook. A liberal sum of money for prizes, not all of which was expended, was donated by W. C. Beckert, the North Side seedsman.

The picnic committee reported expenses in excess of receipts of \$22.23 for the July picnic, which was ordered paid from the funds of the club. The various committees having in charge the arrangements for the coming Carnation Convention reported satisfactory progress, and that they would be ready to make some definite announcements at the next meeting.

Since spring the meetings of the club have been held with the different commission houses, owing to the fact that the building where the club has had its quarters for many years has been torn down. Permanent quarters have now been secured on the second floor of the Fort Pitt Hotel, one of the leading hotels of Pittsburgh, and the one that will be the headquarters of the Carnation Convention in January next.

Quite a number of the members had attended the Cincinnati Convention of the S. A. F., and were a unit in giving praise to the arrangements and hospitality of the Cincinnati florists. The work done by them seemed the more remarkable from the fact that apparently Cincinnati was not a flower town in the sense that some others of our large cities are, and consequently the Cincinnati florists would be lacking the stimulus and backing that the florists in some other more distinctively flower towns would have, so the more praise to them for their successful efforts.

Five names were proposed for membership and one new member was elected.

Subject for October meeting, which will be held in the Fort Pitt Hotel, "Dahlias and Seasonable Flowers," with an exhibition of orchids by the private gardeners.

H. P. JOSLIN, Secy.

AMERICAN ROSE SOCIETY.

Some More Special Prizes to Be Awarded.

President August F. Poehlmann wishes to ask particular attention of all intending exhibitors to the amended rule which is to be observed by exhibitors. This cuts out the requirement for a single growth of the current season. The rule Section 6 now reads as follows: "Any article manifestly unfit to show may be excluded by the management and the judges shall withhold any premium when the entries are unworthy of awards. The management may at any time order the removal of an exhibit which is in bad condition."

Since issuing the Preliminary Schedule there has been filed the following prizes:

H. F. Michell & Co., of Philadelphia, Pa., offer a Silver Cup valued at \$25 for fifty blooms of Killarney roses.

The Waban Rose Conservatories of Natick, Mass., offer a Silver Cup valued at \$50 for the best fifty blooms of White Killarney, Waban variety. Alexander Montgomery of Natick, Mass., offers a Silver Cup valued at \$25 for the best new rose of American origin of the year 1909-1910. For the prettiest exhibit of roses in the exhibition, to be decided by the ladies' vote, \$10 gold piece given by Miss Marian I. Hammond of Fishkill-on-Hudson, N. Y.

The happiest woman in the County of Dutchess and the State of New York was Mrs. Amelia Lefevere, who received a recognition of a medal from the American Rose Society for a dooryard of roses, so well kept that it was the admiration of the neighborhood. This award has excited considerable interest and is one of the ways to build up the American Rose Society in popular esteem and estimation. Let one person in a neighborhood set an example like this and others are sure to follow. The good work grows and the result is in a practical way a benefit to the commercial flower growers, aside from the pleasure which a well-kept dooryard gives to every passerby.

BENJAMIN HAMMOND, Sec'y.
Fishkill-on-Hudson, N. Y.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Berberis.

Public notice is hereby given that Mr. M. J. Van Leeuwen of The Continental Nurseries, Franklin, Mass., offers for registration the plant described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Description—Originated in the spring of 1908 when it made its appearance in a batch of seedlings of Berberis Thunbergii. In manner of growth it closely resembles a compact form of the Berberis Thunbergii, making a strong lateral growth from the new wood of the same season. Development in spring from the dormant wood shows a mass of waxy white tinted with pink branches, which in turn develop into foliage of the same hue and color, which coming to maturity shows

a pencilling of emerald green becoming somewhat deeper and stronger during the latter part of August and September, then turning to a decided purplish green of the color of the *Berberis purpurea*. Its berries are of a coral red when ripe and often nearly round. Name—*Berberis Thunbergii*, var. *Silver Beauty*.

W. N. RUDD, Secretary.

September 10, 1909.

CLUB AND SOCIETY NOTES.

The Improvement Society of No. Andover, Mass., held a flower show on Sept. 10, 11, with choice exhibits.

The Autumn Exhibition of the Massachusetts Horticultural Society will be held on September 17, 18, 19, in Horticultural Hall, Boston.

There was a meeting of the Society of Indiana Florists September 9, and arrangements were made to hold a spring show on a large scale at Indianapolis.

The State Horticultural Society of Oregon has compromised with the heirs of Cyrus Hoskins, and will receive \$2500. in lieu of getting half of the estate.

The Toledo (O.) Florists' Club elected officers as follows at their last meeting: President, E. Kuhnke; vice-president, N. Nusbaum; secretary and treasurer, J. L. Schiller.

There will be a Dahlia show in connection with the next monthly meeting of the Pennsylvania Horticultural Society, Horticultural Hall, Broad and Locust streets, Philadelphia, Tuesday, Sept. 21st.

There was quite a creditable display in the floral department of the Indiana State Fair, held September 6th to 11th at Indianapolis. The premiums were pretty well divided among the dozen florists competing for same.

The annual exhibition of the Melrose (Mass.) Horticultural and Improvement Society was held in the City Auditorium September 9, and in point of quality and quantity the exhibit was the finest ever given by the society.

The show of the Montreal Horticultural Society was held on September

8 and 9 with well arranged and extensive exhibits from the various estates. Among the commercial prize winners the name of W. J. Wilshire is prominent in many classes.

September 8 was dahlia night at the rooms of the New Haven County Horticultural Society. George L. Stillman of Westerly, R. I.; Nathan A. Miller, of Branford; W. W. Rawson & Co., of Boston and John H. Slocombe, of New Haven, received awards of merit.

The Agricultural and Horticultural fair at Marshfield, Mass., on August 25, 26 and 27, was a success as usual. Fred Cole of Scituate took the first prize on vegetables also the Lawson prize; Patrick Kane was a close second. The MacMulkin display of vegetables was very artistically arranged and was a center of interest.

The floral exhibit at the State Fair at Hartford, Conn. was in charge of J. A. Weber, gardener for W. L. Goodwin, and the extent of the display and the artistic arrangement were superior to anything before attempted. Jas. Chambers and H. L. Metcalf were the judges and prizes were awarded as follows:—For stove and greenhouse plants: J. F. Huss, 1st; Edward Welch, 2d. Group of evergreens: Jas. W. Scott, 1st; W. W. Hunt & Co., 2d; C. R. Burr & Co. 3rd. John Coombs was first on palms, funeral pieces and bridal bouquets; Nelson Nelson, gardener at the Hartford Retreat, was first on cyclamens, tuberous begonias, geraniums; Whiting Greenhouses, first on carnations and fuchsias; and Mills & Co. had several first and second prizes.

DENDROBIUM NOBILE VIRGINALE.

The sight of the house full of pure white orchids which is illustrated on our cover page this week ought to make a florists' mouth water. What a gold mine it would be to have at one's disposal in wedding-bell time! The view is in the establishment of Messrs. Armstrong & Brown, orchid growers of Tunbridge Wells, Kent, England. The plants were raised from seed and grown in the house in which they are shown. The photograph was taken after they had been returned from the exhibition of the Royal Horticultural Society. This is unquestionably the finest lot of white *Dendrobium nobile* in Europe.

HONOR TO A CHICAGO NURSERY-MAN.

W. A. Peterson, of the Peterson's Nurseries, has been created a Knight of the Order of Vasa by the King of Sweden in recognition of his high standing among the Swedish people of America. The presentation was made by Vice-Consul Henry S. Henschel. Mr. Peterson is a trustee of Beloit College, McCormick Theological Seminary and other institutions of education and philanthropy. His father settled in Chicago in 1855 and the original home at Peterson and Lincoln avenues is now the home of W. A. Peterson, who greatly appreciates the honor conferred upon him.

Manetti rose stock is reported as short and several large dealers are refusing orders.

George E. Talmadge, Inc.
MADISON, N. J.

NOW YOU ARE TALKING

Of placing that order of Fall Bulbs. Why not send it to a concern which buys the best imported stock regardless of cost? Our bulbs come from a grower who has furnished us good stock year after year. Not a single complaint was made to us about the quality of our regular wholesale stock last year. Isn't that worth considering?

MOREOVER YOU WANT TO SAVE MONEY

The new Tariff Bill established lower duties on nearly all kinds of Bulbs. We have so adjusted prices as to give you the benefit of every cent of the decrease. Isn't that an advantage worth taking?

Don't delay. Send your order before the most popular kinds are sold out. Mention this paper when you write.

JAMES VICK'S SONS, - - ROCHESTER, N. Y.

THE LILY BULB SITUATION.

Advices from one of the largest Japan bulb shippers, dated August 1, have reached us from Yokohama. He says that Formosums, multiflorums and particularly giganteums were still much too green to be dug and that shipments on the average would be from two to three weeks later than was the case the last few seasons. He continues: "Really it is a shame to dig and ship multiflorums before September 15 from Yokohama to get good bulbs that are mature and full of vitality. Giganteums should not be dug before October 1 at the best. I know this would mean September-October delivery for Formosa, October 15 to November 1 for multiflorum and November 1 to December 1 for giganteum, but I fully believe the bulbs would flower in the greenhouse just as early as if they had been shipped a month sooner from Yokohama. I am also convinced that the seedsmen would have no such claims for diseases and 'curly tops' as they now have; there is not over 5 per cent curly tops noticeable in the multiflorum fields and no disease at all in the giganteum districts. I think the kicks one has from the United States florists on giganteums being diseased are entirely due to the fact that the bulbs are dug too green. I propose using my own judgment in a large degree as to when all bulbs will be shipped this season, for I know the late deliveries will give flowers just as early as the first shipments and not contain near as many causes for kicks on disease, from the florists who purchase these bulbs from our customers."

We learn that several large shipments of Formosa longiflorum bulbs have been received in Chicago and New York in rotten condition, due probably to their having been stored too close to the boiler in the steamship.

THE VIOLET OUTLOOK.

Reports from the Rhinebeck district and other Hudson River points all indicate very satisfactory conditions and promising outlook. The plants are fine and healthy as a rule. There has been a moderate increase in glass during the year. The first pickings were made last week by several of the growers who take pride in being among the first to appear in the market with their product, but of course it will be some time yet before any

attempt at regular shipments is made.

Many representatives of wholesale houses in New York and Chicago have been on the ground looking over their prospects, the latter being the more aggressive and willing to take chances on values, etc., on which the New Yorkers after their experience of the past two years are more conservative. A conspicuous feature of the situation is the growing practice of sending violets by mail direct to small retail florists in quantities up to, say five hundred. Considerable quantities were thus disposed of last year.

Vonder Linden, now running the White place at Staatsburg, is building four violet houses, about 200 ft. in length at Rhinebeck. The Feeter houses in Rhinebeck have been sold to Madden of Jersey City and Ley, who

ran them last year, now has the Moore place.

MOVEMENTS OF GARDENERS.

Arthur Griffin has resigned his position as gardener for Ellridge T. Gerry at Newport, R. I.

James Sharkey has resigned from his position as gardener for Mrs. E. H. G. Slater at Newport, R. I.

Arthur Urquhart of Bar Harbor, Me., has taken a position on the S. P. Blake estate, Manchester, Mass.

Alex Nielson of Oconomowoc, Wis., has succeeded John Reardon as gardener to Martin A. Ryerson, Chicago.

Percy Herbert of Florham Farms, Madison, N. J., has taken a position with the Yuess Gardens Co., Newburgh, N. Y.

THOMAS ROLAND, NAHANT, MASS.

Seed Trade

The Attitude of the Department.

Some writers would have us believe that the Agricultural Department officials are kindly and friendly disposed towards the seedsmen. This reminds one of the story of the Boston policeman who had escaped from the Emerald Isle only a few months before, and who began beating a man whom he had arrested. When the unfortunate protested this was the answer: "Sure Oim your frind, and Oim not bating yez because Oi hate yez, but because Oi have authority." To the writer it looks as if the Department has manifested the same sort of friendship for the seedsmen.

If there is a single instance where the Department through any of its officials has publicly championed the cause of the seedsmen, the writer has not heard of it. On the contrary there are many instances of quite opposite sentiments, and a decided undercurrent of hostility due, it would seem, to the efforts of the seedsmen to secure the abolition of the free seed distribution. In all their efforts in this direction they have not received at any time either the active or passive aid of the Department. On the contrary most of the officials have appeared to resent these efforts as though it were a personal matter between them and the seedsmen. Many instances could be given to show the "friendliness" of the present regime, but its attitude is so well known to the trade at large that such proof is quite unnecessary.

Notes.

Cincinnati, O.—Walter Gray, Jr., has opened a seed and flower store at 151 N. 3rd St.

Howard M. Earl, of Burpee's, left for California on the 13th inst. on a seed crop inspection tour.

European advices indicate another short year in fancy grasses. Very few items will show lower prices, and most of them will be as high, if not higher, than the stiff figures of the past two seasons.

We have direct information from an absolutely reliable source that the shipments of French hyacinths and narcissi have been considerably in excess of what they were last year at this time.

A seed trade correspondent writes as follows: "The report in last week's HORTICULTURE of the seed pea crop has struck terror to the hearts of the seed trade. HORTICULTURE'S record for fairness and accuracy in its seed trade notes has never been questioned, hence the stampe—although many of the big houses were slowly coming to the same conclusion. But all are now convinced that the situation is really serious and every one who is wide awake is taking prompt action to have at least some stock of the leading varieties for their regular customers."

Mr. Kerr, of Burpee's, has just returned to Philadelphia from an inspection of the aster crops around

Rochester, N. Y., and reports an unprecedented shortage on account of the dry summer. The aster seed crop from this locality will be very short indeed. As everybody knows, Rochester has become quite a factor in this line of recent years. No doubt we will hear from Mr. Vick on the subject soon. He is recognized as one of the big factors in the situation, and his offers will be eagerly looked for. There will be a scramble for aster seed all along the line, as the foreign crops are reported to be none too good. The haggler and the outsider will have very little show under present conditions.

An Enterprising Seed House.

The Holmes Seed Co., although located in Harrisburg, is practically a Philadelphia concern; the founder Harry L. Holmes having graduated from Burpee's. Charles H. McKubbin, now with Dreer, was originally a member of the firm. The Holmes Seed Co. was incorporated in 1902.

HENRY L. HOLMES

The seed business is very complex, difficult and far reaching. Very few have such a good grip on it as Henry L. Holmes. He has introduced some genuine novelties—universally recognized as great improvements today, of which we need only mention such sterling acquisitions as the Houser Cabbage and the Premo Corn. Their present debutantes are Holmes' Prolific Green Pole Lima and Holmes' Delicious Sweet Corn. We have had the privilege of examining the former recently, and as far as we can judge it fully bears out every claim made for it—a first class pole lima in every respect—and in addition—it dries green and cooks green. We congratulate Messrs. Holmes on the possession of these sterling novelties, and have no doubt they will be widely offered by the general seed trade in 1910—as we understand there is enough to offer at wholesale this fall to warrant cataloguing.

A good situation in a wholesale and retail seed house is offered in our "Help Wanted" Column, page 423.

CYCLAMEN SEED

NEW CROP

"GREEN GOODS."

It is quite interesting to look through
the stock which is carried nowadays
by the wholesale dealer in florists'
"greens." Besides the main stock of
"spray" and "dagger" ferns, galax,
wild smilax, leucothoe, laurel and
sphagnum there are several other va-
rieties of ferns, mosses in a number
of species, cycas leaves and a variety
of palm leaves, and several kinds of
material used in the make-up of arti-
ficial palm trees, etc., such as cocoa fibre
which comes in sheets and is wrapped
around the make-believe trunks to
simulate natural palm growth. We no-
ticed at Kervan's, in New York recent-
ly, large coils of wild grapevine canes,
which can be had in almost any length,
and are used in the making of arti-
ficial grape or wistaria festooning.
When the decorating florist finds him-
self confronted with any sort of a puz-
zling proposition he will do well to
consult the resourceful green goods
man.

CHICAGO NOTES.

The opening of the new La Salle Hotel this week has called for the use of many flowers, especially Beauties. The spacious parlors and dining room, balconies, etc., were decorated by O. J. Friedman with palms and bay trees and hung with laurel. On the opening days there were two panels about 16 x 20 ft. covered with oak leaves and golden rod and in the center of the room was a fountain, the basin of which contained night blooming pond lilies. The decorations called for immense quantities of material and the decorators replenished their vases each day.

Hoerber Bros. place at Des Plaines is practically finished. The matter of obtaining sufficient water is an important one. A well has been driven nearly 200 ft., without success as yet.

The Auditorium was elaborately decorated by The Geo. Wittbold Co. for the Taft Banquet on Thursday night.

Scheiden & Schoos have closed their stand in the market following the dissolving of the partnership.

Personal.

Mamie Reinberg, daughter of Geo. Reinberg, was married Wednesday, Sept. 8, to Paul Graben Kreuger.

T. J. McComb of 416 N. Hayne Ave., is in charge of the Department of Horticulture and Robert Dwyer of 110 Des Plaines street is superintendent of Floriculture at the coming State Fair in Springfield.

Wm. J. Smyth is able to be in the store again after an absence of thirteen weeks as the result of an auto accident. Mr. Smyth is able to walk with the aid of crutches and his entire recovery is now near at hand.

Clyde Leesley, senior member of Leesley Bros., nurserymen, has the sympathy of the trade in the loss of his eldest child, a little son two years old. The little fellow was named after the grandfather John Leesley who was the founder of the business and his untimely death on the 7th is a sad blow to his parents.

Visitors: Mrs. R. P. Anderson, Selma, Ala.; Paul M. Paley, manager for Chas. Vestal & Son, Little Rock, Ark.

INCORPORATED.

Dover, Del.—Huston, Darbee & Co., to produce, buy and sell fertilizers; G. H. Huston, H. C. Darbee, L. W. Culver, James Miller; capital, \$25,000.

Stamford, Conn.—The Frost & Bartlett Co., to conduct a general nursery business; H. L. Frost, Arlington, Mass.; F. A. Bartlett, C. A. Lockwood, Stamford; capital, \$25,000.

Glastonbury, Conn.—J. R. Morgan & Son, to conduct a florist, nursery and market gardening business; O. R. Morgan, S. J. Stevens, Glastonbury; H. B. Freeman, Jr., Hartford; capital, \$30,000.

Oakland, Cal.—The florist store of H. M. Sanborn, at 517 Fourteenth street, has been burglarized three times this year.

PERSONAL.

Visitor in New York: F. Gomer Waterer, London, Eng.

F. J. Schoen of Toledo has taken a position with the J. M. Gasser Co., of Cleveland.

Julius Roehrs is due to arrive at New York next Tuesday on the steamship Bluecher.

Robert O'Connor of So. Boston, Mass., an employe of M. Tuohy, is spending his vacation at Lake Cobosseecontee, Me.

D. C. Woodman of Whitefield, N. H., announces through the local paper that he has taken the agency for Julius A. Zinn, of Boston.

Jas. P. Brooks, who has been for the past four years with the Owatonna Nursery Co., Owatonna, Minn., has taken a position with the E. G. Hill Co. of Richmond, Ind.

Visitors in Boston: E. A. Moseley, Washington, D. C.; J. Muller, representing Julius Roehrs Co., Rutherford, N. J.; Prof. Adolpho Buyssens, School of Horticulture, Vilvorde, Belgium.

H. A. Barnard, representing Stuart Low & Co., Enfield, Eng., arrived in New York on Thursday, Sept. 9, and will visit the trade in different sections of the United States. His address is Hotel Albert, New York City.

Mr. E. H. Wilson, who recently returned from an exploring expedition in China, sails from England for Boston on September 17, accompanied by his family. He will be occupied at the Arnold Arboretum herbarium for several months, classifying his dried specimens, arranging his notes, etc.

J. K. M. L. Farquhar is nearing the end of his European tour and expects to reach Boston by Mediterranean steamer on September 27. He has assurances from several orchid people in Germany and England of special exhibits at the orchid show of the Massachusetts Horticultural Society next year.

Frank A. Koerner.

Frank A. Koerner, who followed the business of florist in Manchester, N. H., for many years, died Sept. 12 at his home, 228 North Main street, aged 70 years. He was a native of Saxony, but lived in Manchester since his youth. He enjoyed the distinction of being the senior member of the Manchester turnverein. He is survived by his wife, two daughters, Mrs. Annie Babel and Mrs. Augustus Smith, and two sons, Frank C. and Robert Koerner.

T. M. Waters.

T. M. Waters, of Eaton, Ind., died Sept. 6, at his home on North Barron street, after an illness of several months' duration. He was a victim of tuberculosis. Mr. Waters was 56 years of age and is survived by his wife.

 Wholesale Flower Trade

Flower Market Reports.

Some who have kept BOSTON records and made comparisons say that business this month is fully up to last year's limit but the impression one gets from seeing the accumulations of some things, especially asters, is that things are unprecedentedly quiet. Nothing like the present blockade of asters has ever been experienced here and they cannot be sold even at prices per 1000 which would have been considered too low per 100 two years ago. Roses of the special summer crop hold their own as to quality and value but the cut from young plants is increasing faster than the market can absorb. Lilies are rather scarce at present. Carnations are improving; some quite decent blooms are coming in and the quantity begins to make a little show. Plenty of dahlias are available but the commercial florist trade finds very little use for them and they cannot be said to fill any important place in the market movements.

Flowers of all kinds BUFFALO were plentiful the past week and trade was quite active. Aster's and gladioli too plentiful to feel comfortable though select stock moved quite well. Carnations are coming in more plentiful each day, but with short stems. Lily of the valley was in good demand, also white roses and Beauties. Plenty of greens and lilies.

Chicago market conditions are very favorable for the middle of September. While there is no decided advance there is a gradual quickening along all lines. Orders are coming in as fast as stock can be secured and stock is gaining in quality each week. Already it is stated by leading wholesale growers that the trade this fall is ahead of that of last year. As is well known, an unusual number of new houses have been erected during the past year. The increase is looked upon, as normal, being the florists' share in the general prosperity of the times. There is no especial shortage in anything now as the warm weather is bringing everything on at a lively rate. Good asters are in at last, but so are carnations which latter fact always checks the aster grower's returns from his summer's outlay of time and money. Lilies are more plentiful but this fact has not caused a letting down of the price which is high for the season. Roses are being hurried on by the warm weather. The demand and supply of Beauties are both on the increase and the quality is very good. Tuberoses, cosmos and other fall and late summer flowers are in, in quantity. Altogether the market has its dull days but even their fall trade is very satisfactory. The weather on Monday of this week reached a temperature of 89 degrees and the flower stock suffered accordingly. Tuesday the temperature was still very warm and trade was nearly at a standstill.

FIELD GROWN Carnation Plants

We offer, subject to prior sale, the following:

These are extra strong, healthy plants, the product of the most successful Eastern Growers, stock that has been carefully selected and handled under the best possible methods, thus insuring results that will place the plants in our customers' hands in the very best condition.

The WHOLESALE FLORISTS Philadelphia

1608-1620 Ludlow St. Store closes 6 p.m. Washington Store, 1212 N. Y. Ave

September is starting in DETROIT nicely, fall weddings keeping us quite busy. Boston ferns still maintain their supremacy and are selling very well as are also kentias. Carnations are still too poor to be counted upon. Asters are in good quality and good demand. The new rose, My Maryland, with three to four-foot stems, has captured the buyers of choice stock.

The flower business has brightened up considerably with the advent of cooler weather and September weddings. Many small decorations are also being called for. A much better grade of stock is coming in with no advance in

price which gives customers a good value for their money. Roses of all kinds are plentiful enough. American Beauties are a trifle stronger; the demand still continues spasmodic. Carnations are arriving in better shape but in no great quantity. Field flowers are about over for this season with the exception of asters and dahlias. Gladioli have dropped off and from appearances the public seem to be tired of them. All kinds of lilies continue plentiful. Chrysanthemums are still in supply but no enormous quantity. Lily of the valley and orchids have been on the scarce side up to the present time. The aster crop has been a complete failure in this vicinity. The florists who grow asters extensively didn't cut enough blooms to pay for seed or labor.

Flower Market Reports.

(Continued from page 415)

The wholesale district is still in a state of extreme dullness. There have been a few spurts but of short duration and very mild in force, and the amount of material disposed of to proper advantage is very small. Asters continue to block the way for anything else. They are of fine quality in some instances but there are lots of them that are of low grade and on such it is not often that express charges are realized. Some dealers do not handle asters at all, and these appear to have the best of the situation. Roses from young stock are still very diminutive as to size, but they show evidences of care and attention and as a rule are clean and of good color. Tritomas are being received in large quantities and the dahlia receipts are increasing. Gladioli are in lighter supply. Confidence in the future and a willingness to forget the past if only the immediate future will make amends, seems to be a prevalent sentiment among all classes of the trade.

Towards the end of the week business picked up considerably; but on the average trading was slow, and no marked improvement on previous conditions. This week starts out rather briskly and the

market at this writing has a distinctly better tone, with prospects fairly good. Dahlias are much better both as to quality and quantity, the recent rains having done them a lot of good. They are selling well, at medium prices mostly, although certain fancy sorts bring good figures. There are many lots of extra fine asters arriving, and an avalanche of those that are not so good, with a few wagon loads daily of the castaway brand, the latter being, of course, unsalable at any price. Chrysanthemums are in, the harbiners being October Frost and Golden Glow. The quality is nothing to brag about so far as we have seen, and there is no mad rush among the buyers to bag these early beauties apparently. American Beauty roses are still the only scarce thing on the list, but these will be over the hump in a few days and will be more plentiful and better before this appears in print. My Maryland is in demand and plentiful. Little change to be noted in other varieties. Carnations are hardly worth talking about; they are miserable looking lot just now—faint, famished and few. We are sorry for them. Lily of the valley continues scarce, and Easter lilies are again on the short side for the time being. Orchids are almost a negligible quantity; a few Cattleya Harrisoniae and Dendrobium formosum being about all. Gardenias are good and selling well. Many poor gladioli are coming in and there is no sale for such. Tri-

tomas are good but go slowly as yet. Their time will come when autumn foliage effects are in order. Plenty of tuberose this week and going all right at fair quotations.

B. S. Slinn, Jr., is having a large store fitted up on the street floor of 55-57 West 26th street, New York, for his wholesale cut flower business. The store has a very wide and light front and will be one of the best in the wholesale district when completed. A new ice box, 8 x 15 ft., has been installed. As heretofore, violets will be the main stock handled by Mr. Slinn.

The north side nurseries of Leesley Bros. at Chicago, up to six years ago, were fields of onion sets owned by the senior Leesley who died about that time, and the present business has been built up by his sons. The two cuts show what well directed effort will do in a very few years in changing the looks of a place and in building up a business. Clyde, the elder, is in charge of the 110 acres comprising the nurseries on 40th and Peterson avenues. Robert, superintends the 200 acres on the west side where various products are grown, the most extensive being onion sets, which Mr. Leesley reports as being in short crop this year.

Leesley Bros. make a specialty of ornamental shrubs, with the exception of cherry trees of which they grow

about fifty thousand. Viburnums, spiraeas, honeysuckles and other leading popular lawn and garden favorites are grown in immense quantities and especial attention is given to ornamental fruit bearing shrubs and those with bright colored bark for planting for winter effect.

Regarding peonies, which they grow extensively, Mr. Leesley names as his favorites, Marie Lemoine and Mdse. De Verneville in white, Delachei in red and Edulis Superba in pink.

Worthy of especial note is Tamarix hispida aestivalis imported last year from France. The effect in groups is unusually fine. The foliage is light sage green and the flower is silvery pink. It is more hardy than other tamarix and last winter, its first here, stood a temperature of 18 degrees below zero.

BRITISH NEWS JOTTINGS.

Owing to the prevalence of black scab in this country, the Jersey Government have prohibited the importation of potatoes in that island from Britain.

A new dahlia named Coronata has attracted some notice in a Kentish nursery. The single bloom is of a salmon red, and in the evening the broad petals close up, forming a floral ball.

At the fortnightly meeting of the Royal Horticultural Society, on Aug. 31st, Prof. Sargent, and the President and Fellows of Harvard University, Mass., U. S. A., exhibited a collection of 150 photographs illustrating the flora, fauna, of Central and Western China, obtained by Mr. E. H. Wilson, the well-known plant collector, during his travels. A gold medal was awarded.

The National Rose Society has arranged to hold an autumn show on Sept. 16.

There was an interesting display at the annual show on Sept. 1st, 2nd and 3rd, of the National Dahlia Society, which is now amalgamated with the London Dahlia Union. There was not room for two organizations, and the unity should prove advantageous.

W. H. ADSETT.

STREATOR (ILL.) WINTER VEGETABLE GROWERS.

Leslie Mason, who is in charge of the Rudolph Kline greenhouses on the West Side, raising lettuce and mushrooms, is now enlarging his place, and will have about 25,000 square feet of glass in all.

Next to Whitcomb and Hills' houses with the proposed addition taken into account, Edward Kline probably has the largest area under glass. His houses are on the West Side and some of them are portable so that they may be moved from one part of his place to another. His specialty is asparagus.

Omar Fanning is one of the newcomers. His houses are located in the Coal Run creek bottoms and just west of Bloomington street. He raises cucumbers.

Fred Muson has his house on East Broadway. There he grows tomatoes.

Vincent Kangley is in the north-western section, just south of the Vulcan Works, cultivating lettuce and tomatoes.

Thomas Johns is probably the latest to join the ranks of the winter vegetable men. He gives his whole attention to cucumbers. His houses are out on East Main street.

BASE BALL AT CHICAGO.

Employees of Bassett & Washburn played Poehlmann Bros. ball team last Sunday and lost the game, 11 to 3. Excitement is at white heat now that each side has one game. The "rubber" will be played in two weeks. Many ladies accompanied the Hinsdale team and after the game Poehlmann Bros. royally entertained the players and visitors.

PHILADELPHIA NOTES.

W. F. Gude, Washington, D. C., was a visitor on the 13th.

Jno. H. Dodds arrived home from his European trip on the 13th inst.

Morris Hoffman, assistant in A. M. Campbell's commission house, was married recently.

E. C. Dungan entered on his new duties with J. F. Noll & Co., Newark, N. J., on Sept. 15th.

Paul Huebner, who has been on the sick list since August 1st is convalescing at The Strand, Atlantic City.

Bruce Griffin of Griffin B. os., Frankford, reports their orchids doing well. They are shipping now a few *Cattleya labiata*. *C. Trianae* will be in soon in quantity.

Planting at Craig's new place at Norwood is well under way, and they expect to have same practically finished within the next two weeks. William P. Craig is now in charge and will move his family to Norwood in the near future.

John McIntyre says he has the finest asters ever seen in the Philadel-

phia market and has had them photographed to prove it. They are of the Semple strain and are said to have stems 42 inches long and flowers 4 to 5 inches in diameter. Grown under glass.

COLORADO FRUIT SHOW, JANUARY, 1910.

There has been no year in the history of the State of Colorado when the apple and peach crop has been what it has been this season. Every section of the state, almost without exception, is reporting that they never enjoyed such an output as they have this year.

Growers in every section are preparing for the big apple show that is to be held in Denver the first week in January, 1910. They are taking special care of certain varieties, thinning and irrigating carefully so that they may obtain the very best results.

There will be no less than twelve entries in the carload exhibits besides the thousands of boxes that will be offered for display in the one to ten-box classes.

The Colorado Exposition is unusual in one thing and that is that it is positively not for profit. Admissions will be charged and space rates collected for concessions, but should there be any sum left it is pledged to a fund to be used in advertising the fruit growing possibilities of the country.

Exhibits are wanted from anywhere in the world.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

WANTED—A young or middle-aged man with experience in the seed business, by wholesale and retail seed house, located in New York City. One with experience in selling the country trade preferred, as he could be on the road six months of the year. State present employment, age, salary and references. The Batchelor Seed Store, 36 Lafayette St., Utica, N. Y.

IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

During Recess

N. Y. AND N. J. ASSOCIATION OF PLANT GROWERS.

The plant growers whose establishments fringe the metropolis, and whose products are so essential a factor in the Christmas and Easter observances and the home and social activities of the best horticultural patrons on the American continent, are believers in the truth of the old adage, "All work and no play makes Jack a dull boy." So they periodically break loose, as it were, and, forgetting for the time being all worries and responsibilities about benching and potting and green fly and cut worm, lily disease and cattleya fly, and all the other torments of the plant growers' life, they turn out with wives and children and sweethearts and have a glorious old time—and "never mind the expense."

The "Clam Bake" at Duer's White-stone Pavilion, Thursday, September 9, was one of these halcyon times and fully up to the reputation of any one of its predecessors.

The inner man was well provided for; that's one of the fundamental principles of the Association. Soon after arrival at noon a substantial breakfast was served. Julius Roehrs, Jr., the president, extended a hearty welcome to all and told them to pitch in. The caterer did the rest, while the band played the songs of all nations, and A. L. Miller with beaming countenance and voice that needed no megaphone announced the details of the program arranged by the committees. An hour and a half later "coffee and cakes" and at 5.30 the "clam bake." In the meantime, the games.

J. Miesem and A. Zeller were the committee on men's bowling; H. Schoelzel and F. Dressel, ladies' bowling; J. Roehrs, Jr., and W. H. Siebrecht, Jr., shooting; L. Dupuy and F. Marquardt, men's flower pot game; H. C. Steinhoff, ladies' flower-pot game; Miss Eliz. Mills, bureau of

GROUP OF FLORISTS, VISITORS AT THE VOLKSFEST

credit; H. Schoelzel, floor manager; Louis Schmutz, sergeant-at-arms. Thirty-eight gentlemen and thirty-five ladies lined up at the bowling alleys, and the scores ran all the way from 40 up to 161 in a ten-frame game for the men and from 0 up to 71 in a five-frame game for the ladies.

The prizes were presented after the clam bake in the evening by A. L. Miller, who officiated most gracefully, especially in rewarding the winning ladies. The lucky recipients were as follows:

Ladies' Bowling—First prize, Mrs. Aichmann, 71; second, Mrs. Brodsky, 65; third, Mrs. Bruhn, 60.

Gentlemen's Bowling—First, Patrick Smith, 161; second, H. B. Siebrecht, 160; third, C. K. Drury, 147.

Ladies' Flower-Pot Game. First, Mrs. A. L. Miller; second, Mrs. Steinhoff; third, Mrs. William H. Siebrecht, Jr.

Each lady present was presented with a handsome tea-pot and cup and saucer, the tea-pots having been donated by Mr. C. K. Drury of A. H. Hews & Co.

A LONG ISLAND FESTIVAL.

Over 10,000 people were in attendance on both Sundays and on Labor Day at Das Schwaepische Volksfest, the annual gala event of the German people of Brooklyn, N. Y., and vicinity at Middle Village. This was the 33d celebration, and although the location this year at the new Coliseum Park was not so favorable for the floral displays as that occupied in previous years, it was exceedingly creditable to all concerned.

According to custom, the central feature was a great column of fruits

NEW YORK AND NEW JERSEY PLANT GROWERS' ANNUAL OUTING

and vegetables, arranged in ingenious Mosaic pattern, fifty feet in height. This was erected by F. Marquardt and was awarded the \$400 prize.

The flower beds, which were round, about 10 ft. in diameter and raised a little above the level of the lawn, were placed at regular distances from the central monument, and all did credit to those who arranged them. The prizes, which were all the way from \$75 down to \$5, were won as follows:

John Baumann, Middle Village, 1st and 2nd on carpet beds, both very well executed pieces of mosaic work; 1st on foliage plants and on salmon geraniums and 2nd on scarlet and on white geraniums. John Dreier, Middle Village, 1st on conifers and on model landscape and home grounds in miniature, 3rd and 4th on carpet beds. Fred Marquardt, Middle Village, special on carpet design in form of a lyre, 1st on geraniums, on heliotrope, on ficus, on begonias, and 2nd on cannas. Hermann Maenner, Maspeth, 1st on coleus. Charles Koch, Flatbush, 1st on cannas and on salvia, 2nd on foliage plants and on begonias. A. F. Schrader, Elmhurst, 1st on sedum and on golden privet.

The choral singing, band music accompanying the various visiting societies, brilliant illuminations and general rejoicing last Sunday afternoon and evening, made an occasion long to be remembered. A goodly representation of the New York and New Jersey Association of Plant Growers was among the visitors, and they were received and escorted about the grounds, headed by the band, amid great enthusiasm. Our illustration shows a few of them.

A. F. Schrader of Elmhurst has served as superintendent ever since 1894. The next event will be an exhibition of pot plants and cut flowers on November 7.

Make Your Orchard Pay

or clear the ground at once and get a profit out of the ground in some other crop.

Investigation, however, will show you that old stock can be made to pay well and young stock pay better by using **Potash**.

It produces more fruit and better fruit—you have more to sell and at better prices.

Potash Pays

as can be shown in hundreds of cases. Commercial fertilizers often lack sufficient **Potash**. See that yours contains at least 10 to 12 per cent. of it.

NEWS NOTES.

Northampton, Mass.—Work has been started on an Italian garden on the property of A. McCallum.

Rock Island, Ill.—Henry Meyer, who gave up his interest in the Long View greenhouse a year ago, has started in business in the Elks' building.

Athol, Mass.—J. B. Sutherland, who has been in the employ of his brother, Geo. W. Sutherland, for the past two years, has started a store at 322 Main street.

Wichita, Kan.—The Chas. P. Mueller Company intend to use their new houses and storage plant at 143 N. Main St., for emergency orders and will keep them supplied with desirable stock.

Spokane, Wash.—George E. Brown, orchardist and truck gardener at Spokane Bridge, has succeeded in growing what he proudly terms a "lemon cucumber." The lemon cucumber is almost spherical, but larger than a lemon, and, besides having a thick skin and unusually sweet meat, it is said to be entirely free from the qualities of producing ill effects upon the stomach. Mr. Brown allows the cucumber to reach only a certain size, saying that an additional day's growth would spoil the value of the product as to taste and nutrition. He will plant 10 acres to the product next spring.

Salisbury, Md.—George H. Benedict has located here lately, having bought a nicely situated place of eighty acres on the river front, about 2 1-2 miles from the city. A house and barn are now being built and a small range of glass is also under way, mainly for experimental purposes at present, as no extensive specialties will be handled until local conditions and shipping facilities are thoroughly studied. Mr. Benedict is well known in the florist trade, having owned and operated the Yorkville greenhouses at Utica, N. Y., a place of 60,000 sq. ft. of glass which he sold out because he wanted a change of climate. Salisbury is on the peninsula, a few miles inland from the Chesapeake Bay, and about 60 miles below Baltimore. Suggestions or advice from any reader of HORTICULTURE as to what to grow in this favored locality, so well situated for the Richmond, Washington, Baltimore and Philadelphia markets, will be much appreciated by Mr. Benedict.

BUSINESS CHANGES.

Foxcroft, Me.—Josef L. Brockway has purchased the business of B. T. Gentner conducted as the Park Street Greenhouse.

Fond Du Lac, Wis.—A. L. Bush & Co. have purchased the Boulay greenhouses and A. V. Broome of Stevens Point will be in charge of the growing.

Last spring the 20th Century Club, of Detroit, distributed a large number of seed packages among local schools and this week those competing will show the results of their labor in the various schoolrooms. The same club offered a number of prizes from \$5 to \$10, and Messrs. M. Bloy, J. F. Sullivan, Albert Pouchelon and Herm. Knope will act as judges. Hon. Phil. Breitmeyer will present a plant to each competing school.

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

You Can't Form Any Conception of What A U-Bar is by Seeing It from the Outside

IT is the inside that shows up the bubble-like U-Bar construction. At first you may wonder how so light a construction can be so durable and so rigid. It is because of the steel casing of the roof-bar which gives both strength to the frame and a perfect protection to the bar. No house is as free from exposed parts of wood, none so thoroughly takes care of all condensation. To cap the climax there is no house can equal it for growing. Don't take our say so about it, ask any gardener who has worked or is working in a U-Bar house. Glad to send you our catalog.

New Davidias at Arnold Arboretum

One of the most beautiful and remarkable trees recently introduced is without doubt *Davidia involucrata* from Western China, a handsome tree reaching in its native habitat a height of sixty to seventy feet and resembling in foliage and habit a Linden tree. Some pronounce it the most beautiful and striking object in the vegetable kingdom, when during its flowering time it is studded with its large white floral bracts interspersed between the bright green foliage. These bracts are the chief ornamental feature of the tree and attain a length of seven inches. The foliage also is handsome; the bright green leaves are ovate in outline, from three to six inches long, sharply serrate and long pointed and borne on slender stalks. The flowers appear shortly after the young leaves about the middle or end of May at the end of short branchlets; they consist of a globular head of small individual flowers with long exserted stamens bearing red anthers, similar to the flower heads of our Buttonwood and are borne on a short stalk above the two or sometimes three unequally large white bracts oblong-ovate in outline, long pointed and usually more or less serrate at the margin; the largest of the bracts is from four to seven inches long and from two and a half to four and a half inch broad, the second bract is usually only half as long and the third if present still smaller. The larger bract which is the lower one is usually hanging straight down while the smaller and upper one is bending over. The whole flower is borne on a slender nodding stalk about two inches long. The fruit presents no ornamental qualities; it is an ovoid drupe, a little more than one inch in diameter with a somewhat ridged surface, greenish, slightly tinged purplish and somewhat bloomy. The tree itself is of broad pyramidal habit and of comparatively rapid growth averaging about two feet each year. Our plant at the Arboretum has only been injured by the frost while young, but during the last winter it has stood perfectly uninjured even to the tips of the branches. We may therefore hope that this splendid tree will be hardy even in the neighborhood of Boston, if planted in the right situation, where the wood can be expected to ripen thoroughly before winter sets in. Propagation is effected by cuttings.

Recently three species have been distinguished; the original *D. involucrata* has the leaves covered with a silky pubescence on the under surface, *D. Vilmoriniana* has the leaves glabrous and glaucous beneath and in *D. laeta* the leaves are yellowish green on the under side and have shorter teeth. Our large plant belongs to *D. Vilmoriniana* and is a cutting of the original plant raised from seed in 1897 by M. L. de Vilmorin; this plant which I saw in 1906 at Les Barres, France, a few weeks after it had flowered for the first time in cultivation, was then about fifteen feet high and a healthy and vigorous looking tree. Of *D. laeta* we have only small plants raised from seed collected recently by E. H. Wilson; they have not yet been tried out of doors. The true *D. involucrata* which is supposed to be the hardiest of the three species is said to be in cultivation at the Veitchian nurseries, but not yet represented at the Arboretum. There seems to be no difference in regard to the flowers between the three species, but their distinction will be of importance for horticultural purposes, if they really should be of different hardiness.

Among our native trees *Davidia* has its nearest relation in the Tupelo tree and belongs therefore to the family of Cornaceae where *Cornus florida* presents a similar case regarding the prominent development of bracts.

The Avenue

Without having any wish to substitute the essential irregularity of modern landscape for the style of Le Notre, which became the fashion over the whole of Europe in the eighteenth century, when, as Pope satirically wrote in a couplet, so often quoted:

"Grove nods at grove, each alley has a brother,
And half the platform just reflects the other."

When every villa and suburban house had its small symmetrical garden it is not to be wondered at that universal monotony of this kind of design should create a feeling of aversion in the beholder, and at length, that,

"Tired of the scenes parterres and fountains yield,
We find at last he better likes a field,"

and it was only natural that the formal style should have given place to one more in consonance with nature. Much of this ancient style in garden laying out remains to the present day as seen at Versailles, Schoubrunn and Kensington Gardens, Ashridge, and many other places in the British Isles. In old times the drive to the house was an avenue through the park surrounding the same. Sometimes the double or single line of trees was adopted; with the object of forming a better kind of shelter trees were planted "quincunx" fashion.

As the eagerness to adopt this mode of planting could not always wait for the slow growth of trees, where old woods were in existence, these were cut through in straight lines, and in the form of stars and *pates d'oie* (goose feet). Tired of the uniformity of straight lines, serpentine methods of planting the trees and forming *rondeaux* at widely separated points in the avenue were next in fashion; and sometimes trees were planted in groups with the roadway at some distance away on either hand. This last is not a bad method in climates with a heavy rainfall as it allows the sun to reach the road, and it is thereby kept fairly dry, and the shade from the nearest row of trees is very grateful to the pedestrian in hot weather, whilst the multiple rows of trees afford shelter from the wind. And a drive thus formed may serve as a screen of some objectionable feature in the landscape. On some large estates in England and Scotland, where timber is cultivated for use as such, and not for the preservation of game, the planting is so arranged for the production of straight timber—that is, by what is called close cover overhead—that the formation of avenues is a matter of necessity, and it usually consists of the same kind of trees as those of which the forest is formed. It may be oak, beech, hornbeam—a favorite wood used for fuel in parts where coal is dear, and peat not obtainable; ash, elm, chestnut (sweet), maple, limes and willow; or it may be that conifers are planted. All or any of these, if at the sides of an avenue, by reason of the absence of crowding at the sides become furnished with branches down at the ground level, forming more presentable objects, if less commercially valuable than the rest of the trees composing the forest. Sometimes a proprietor of woodland will plant the sides of an avenue with trees of a distinctly ornamental character; and for this purpose his choice is a wide one. He would do wisely to plant the fine foliaged *Quercus palustris*, *Q. rubra*, *Q. tinctoria*, etc. Other species of trees which might be planted at the sides of forest or woodland avenues and drives are *Acer Colchicum rubrum*, *A. dasycarpum*, *A. plantanoides*, and *A. rubrum*, trees in all cases of symmetrical growth and moderate height. The Pavia with handsome spikes of flowers, *Aesculus Hippocastaneum*, *Ailanthus glandulosa*, *Betula* of species, *Catalpa speciosa*, *Ulmus montana*, *U. m. vegeta* and several more.

another's edification the products of garden and flower bed and distribute prizes for best kept premises, children's home gardens, potted plants and vases of flowers. HORTICULTURE believes in these affairs and only lack of space prevents our making extended record of their doings—not for the public, as we do not reach them, but for the purpose of indicating to our florist, nurseryman and seedsman readers a field which they might, with substantial benefit to their business, cultivate much more assiduously than they do. It is not the custom of the trade to give much serious attention to such occasions but a little reflection must quickly make manifest the splendid immediate advertising value they contain as well as their indirect but still greater advantage to the commercial horticulturist in awakening a popular appreciation and interest in the goods he produces and stimulating a rivalry in their possession. We know of no more promising avenue for the local florist or seedsman, to extend his acquaintance and expand his business and it is most surprising to note how little he seems to realize it.

Those of our readers who have been familiar with the flower business for a decade or longer can all recall the condition and quality of the roses that were available

for market at this season of the year and cannot well avoid making comparisons now, much to the discredit of the former. After an inspection of the stock being received at the wholesale flower markets the conviction is forced upon one that in a strictly cultural direction the rose grower has made a remarkable advancement unexcelled by any other special department of floriculture. The effect of the specialization of the growers' occupation in the large establishments has been to produce a limited class of very highly developed experts who have turned to good account their opportunities and have so familiarized themselves with the most minute details of their work that they have become masters of their art. Even in the tiny buds cut from the young plants there is a pleasing uniformity in color and other conditions and a healthy cleanness that one likes to see and if there are in evidence any lots that are weakened, scrubby and crippled in the manner once so prevalent it will usually be found, on investigation, that they are not the product of the establishments and the particular class of men we have in mind. These men are being sifted out constantly from among their fellows as fitted for positions of important responsibility. The finished product of their skill and industry fills us with admiration when we see it in the market and yet the name or identity of the workman is rarely in evidence and, unfortunately, his return for his accomplishment is in many cases much below what would in many other industries be considered a reasonable compensation. Among these men we find a large proportion who take pride in their work and a thoughtful interest in every detail not alone from a commercial point of view but from higher motives and a distinct purpose to turn out something that will bring credit to the place with which they are connected. Hardly a day passes at this season of the year that inquiry is not made at this office for such men—specialists skilled in their profession who can take charge of establishments of large extent and be entrusted with weighty responsibility but the salary mentioned as awaiting "the right man" is, in many instances, so inadequate that we are almost ashamed to repeat it.

The florists' interest in local flower shows

Now is the season when the village improvement associations, garden clubs and neighborhood horticultural societies get together and old and young display for one

Fuchsias

To those interested in growing Fuchsias (and considering their great value as a decorative plant, I think more should be than there has been, for a good many years) this is a good time of the year to root cuttings, if specimens of from three to four feet high are desired by the early part of next summer. As a bedding plant for a shady spot under trees they are in the opinion of some, ahead of the begonia. Quite recently at Harvard Botanic Garden, I saw a well arranged fuchsia bed of plants which Mr. Cameron told me had done duty for Class Day decoration at the University, previous to being planted under the trees, where they are, at the time of writing, Sept. 6, covered with flowers, the colors blending well together. Authorities such as Nicholson tell us that there are about fifty species in the genus, and I suppose the garden hybrids can be reckoned by the thousand. As with other plants that have been much hybridized the nomenclature has become sadly mixed, the same variety going under many names.

Cuttings taken now will root in about three weeks in a temperature around seventy degrees. The best at this time of year are procured from plants growing outdoors. Select a sucker if possible and cut under a good strong joint; as I find that the stronger the joint is, one is more liable to get plenty of suckers, which furnishes the bottom of the plant in a way that, if one trusted to the breaks from the main stem, could not be done so well, especially the first year. A fall cutting, as far as my experience goes does not form a good leader, being always liable to run to flower, and having a sort of stunted appearance, therefore we select the first sucker for a leader if a pyramid or conical shaped plant is desired. I have seen good, well furnished plants, five to six feet high, grown in nine months, but many varieties will not do this and, if exhibition plants are desired, two year olds are none too young as one can cover many defects in shape, the second year, that were almost impossible to overcome the first.

In keeping the plants in shape while growing we find a good method is to stop the leader, about every fourth joint. This encourages side breaks, which requires more judgment in stopping, so as to have the side of the plant evenly balanced. One has to allow the weak ones to grow out to get some vigor into them and pinch the strong ones quite hard, trying at the same time to cover the thin parts. I am aware that some varieties break naturally of themselves, but a great many do not, and one has to know them by experience for, as I said above, the names are quite often misleading. Small plants grow rapidly in a compost of equal parts of loam, leaf mold, well decayed cow manure, and sand, but as they increase in size, and vigor, a gradual increase in loam, and less of leafmold, and sand, should be used. When being potted into the pots one intends to flower them in, the loam used should be rough and fibrous, and when well established in these pots the formulas described by A. Pengel, for flowering plants, in your paper of Sept. 4, I can heartily endorse. Sixty during the night, with a rise of ten or fifteen degrees, during the day, is about the right temperature to grow fuchsias in. Old plants may be wintered, in anything above freezing, giving enough water to keep the wood from shriveling.

Advice as to varieties to grow, for the reasons assigned above, is hard to give. I do not say that the following

are perfectly correct, but they are known around here by the names as given. Abilene Faber, Alfred Daudet, Arabella improved, Charming, Countess of Aberdeen, Champion of the World, Duke of Edinburgh, Earl of Beaconsfield, Hector, Lucy Finnis, Lesette, Rose of Castile, Puritan. Trailing Queen is very useful for baskets, and a good centre for the basket is a variety known here as Black Prince, the two harmonizing well together, both in foliage and flower, and I would recommend these two varieties for that purpose to florists and others who have a use for baskets for hanging out doors during the summer.

I think an epoch of revival in interest in these beautiful plants would not be amiss. We have great tubs of hydrangeas and laurels for scattering around the lawns in summer. A few large tubs of Fuchsias, I think, would relieve the monotony somewhat, and give a little more range of color. Their winter treatment is about the same and I don't think they would entail any more work than either of the above referred to.

George F. Stewart.

West Medford, Mass.

Trained Gooseberry Plants

Some gardeners and amateurs owing to lack of space in their gardens are unable to cultivate as many gooseberries as they would like; but with a little practice in rearing shaped plants or by purchasing the plants already furnished with the leading shoots it is an easy matter to find situations for a number of columnar, fan trained, vase formed, etc., where space would be too limited for the ordinary bushes, which may produce a crown in a few years of 4—5 ft. in diameter. I observed some capital specimens under a variety of shapes at the last meeting of the Royal Horticultural Society, exactly suited for small gardens. Some of these were furnished with leading branches which were made to radiate from the top of stems about a foot high, and formed, as it were, the ribs of a fan trained tree. Others formed vases with 8 to 10 main shoots fixed to as many stakes, or to circular wires held in position by inserting a few thin stakes; cordons consisting of several leading branches, generally arranged in the erect manner in order to keep the fruit from being befouled by soil during heavy rain fall. These erect cordons and fans make gathering the fruit an easy matter, and its protection by means of close netting from wasps and birds similarly easy. The cupola or umbrella forms are likewise useful, but they are more difficult of protection, as well as costing more in the purchase of netting.

In this connection I allude specially to the fine flavored dessert varieties usually grown in private gardens in limited numbers. I may fittingly make mention of the names of varieties of this kind noticed in Messrs. J. Veitch & Sons' exhibit, viz., Langley Beauty, Gipsy Queen, Forester, Brown Girl, Bright Venus, Langley Gage, and Lady Hamilton.

Frederick Moore

NEWS OF THE CLUBS AND SOCIETIES

NEWPORT HORTICULTURAL SOCIETY.

This society held its autumn exhibition September 18, 19 and 20, and although its many predecessors have been famed for their excellent exhibits this was generally admitted to be far ahead of anything previously held, both in quality and quantity, also in variety. Several new features were added this year which proved to be a great success as they provided an opportunity for displaying various skillful methods of growing and arranging plants and cut flowers, with the result that more of the Newport estates were represented than ever before, making it more satisfactory to the society and the public. The only regret was that a larger hall could not be secured so that the fine exhibits could have more room and be shown to more advantage.

The following is a digest of the awards: Class 1, group of palms, ferns, foliage and flowering plants—first, J. J. Astor; James Boyd, gardener. Class 2, which calls for a smaller group, was not filled; but Class 3, which calls for a table of plants, each one to be fit for a table and has always been a feature of the show, proved to be the hardest table the judges had to decide, there being five exhibits and each one seeming to be as good as the other, and it was finally agreed to give the first to the M. L. Fish estate, Charles D. Stark, gardener; second, J. J. Astor; third, Mrs. T. O. Richardson, James Robertson, gardener.

A new class for six specimen plants shown in jardinières was also keenly contested, and James Boyd won out on the merits of good finish. Mr. Boyd was also first in the classes for *Kentia* in 12-inch pot, six vases of cut flowers, six *dracaenas* and six indoor-grown peaches. In the class for specimen palm of any size or variety, Mrs. C. Vanderbilt, Andrew Pow, gardener, was first with a very fine *Kentia Belmoreana*. Mr. Pow also came out ahead in the class for six named specimen geraniums, some of them being over five feet in diameter and well furnished with flowers. Mrs. Delancey Kane, gardener John Barron, was second with six smaller but beautiful plants.

The specimen Fern class was won by E. J. Berwind, gardener Bruce Butter-ton, with a handsome plant of *Angiopteris evicta*, which is sometimes confused with *Marattia elegans*. For best six ferns, R. L. Beechman, gardener John B. Urquhart, was first, getting ahead of the old champion, James G. Kyle, who showed himself still hard to beat. Mr. Urquhart is also the winner of a handsome prize offered by Mrs. Goellet for table of green plants. Some excellent exhibits were in this class, but as Mr. Urquhart had his well-grown *Farleyense* ferns and palms faultlessly arranged he had to win. Another good prize offered by Mrs. Goellet for a table of *Begonias* was easily won by Mrs. W. G. Weld, gardener Paul Volquardsen.

Dahlias were numerous enough to make competition very keen, and the quality averaged better than in other years. Several exhibits were staged from New Bedford, Brockton, and other places, but mostly all met with defeat when placed against those from Miss Fanny Foster's estate. The W. W. Rawson Co. staged a choice collection of cactus varieties which were very much admired and awarded a Certificate of Merit. It may be worthy of note that the Newport red decorative *dahlia* Catherine Duer when in competition with several vases of 'excellent' cactus *dahlias* was justly awarded the first prize. This was grown by Colin Robertson, gardener for Mrs. Goellet. A vase of the "Boston Yellow" was also in competition with any type of yellow and came out ahead with very fine Mrs. Edward Mawleys against it. "Boston Yellow" is the variety awarded the W. W. Rawson silver cup at the recent *dahlia* show in Boston as being the vase which was the freshest at the end of the exhibition and is a seedling of 1908 raised by James Robertson of Newport.

The table decorations which came in on the third day of the exhibition were pronounced to be the best ever seen here, and that is saying a good deal. There were four classes of these which brought in eleven tables, all handsomely equipped; one class of four tables was in competition for a beautiful silver cup offered by Rickards Bros. of New York, and this was won by A. J. Dorward, gardener for Mrs. Emery, with a pretty floral arrangement of Killarney roses. Mr. Dorward was also the winner of the E. J. Berwind prize for decoration to show originality, and he was probably the most successful all-round competitor. The first prize offered by the society for table decoration of outdoor flowers other than roses and *dahlias*, was won by Charles Newton, gardener for Mr. I. T. Burden. Mr. Newton was a winner in many other classes and a cheerful loser in others. The main table decoration called for expensive glass, silver, gold and other material suitable for a table, and grand displays were put up on three tables. The bric-a-brac of one of these—the second—was said to be worth \$7,000. The first prize was awarded to C. E. Gunther, the second to James Boyd, the third to Herbert Coles. These prizes of \$25, \$15, and \$10 were provided by Mr. R. L. Beechman.

A group of rare and choice stove and greenhouse plants and orchids was staged by Julius Roehrs Co., and in charge of J. Muller.

The exhibition was free to the public Sunday, and a large number of people took advantage of this opportunity to see it. Among the many visitors from away were William Keith of New Bedford, Wm. J. Stewart and Robert Laurie of Boston, R. M. Bowen and J. Johnson of Providence, and Mr. and Mrs. A. J. Rickards of New York.

The judges were Richard Gardner, Andrew S. Meikle and Alex. Meikle.

Joseph A. Greenbacker, of Meriden, Conn., had on exhibition two very fine floral pieces at the Berlin (Conn.) Fair and was awarded first prize, a diploma.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Refreshed and invigorated by their summer's respite the members of this club showed their appreciation of its advantages by appearing, to the number of one hundred and fifty or more, at the opening meeting of the new season, Tuesday evening, 21st inst., at Horticultural Hall and listening to a very interesting talk by their fellow-member and club vice-president, J. W. Duncan, on the incidents of his recent trip across the continent via the Yellowstone Park to the Alaska-Yukon-Pacific Exposition.

Mr. Duncan referred briefly to his stop in Chicago, where the substantial construction of the boulevards was noted, and Minneapolis where the splendid growth and promise of the parks, with the flower plantations and rose garden were favorably commented upon. From Minneapolis the party going to the Park Superintendents' meeting at Seattle traveled together. They spent some days in the Yellowstone Park and Mr. Duncan's description of the geysers, hot springs and canyons, with the gorgeous display of wild flowers, and the stately forests of evergreens was listened to with close attention. Spokane, Seattle, Tacoma and Portland were successively visited. The parks and estates of Spokane were described and a message delivered to the club from an old member, William Donald, now engaged in landscape work at Spokane. Seattle's beautiful gardens, salubrious climate, the great show of roses in the parks and the fine planting of the Exposition grounds, the extensive park system, interesting trees and local hospitality of Tacoma, also Mt. Rainier, Portland, Golden Gate Park, San Francisco, Pasadena, Los Angeles, Salt Lake City and Arkansas Hot Springs, all came in for notice and an enthusiastic vote of thanks was accorded the speaker.

On the exhibition table were some interesting things. William Sim showed a handsome pink snap-dragon. Mrs. S. V. A. Crosby, a vase of Malope roseum Carter's strain, a very showy flower; seeds sown July 4, now blooming profusely, 2 1-2 feet high. A. Roper showed a new scarlet carnation, No. 1021, which he said was excelled by no variety on his place for vigor and freedom and the flowers certainly looked it. He received an award of merit for it. An award of merit was also conferred on W. G. Postings of Newport for a glorious crimson *dahlia* quite similar to Catherine Duer but more glowing. S. J. Goddard sent carnations Helen Goddard, White Perfection and Pink Delight, and Ed. Winkler several vases of *monbretias* and border perennials.

It was announced that at the October meeting, which will be held one week later than usual on account of the New England Fruit Show occurring on the regular night, J. K. M. L. Farquhar will present a stereopticon lecture on Bulbous Plants.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual September exhibition was held at Horticultural Hall, Boston, on Friday, Saturday and Sunday, 17th, 18th and 19th inst. The gem of the show and, indeed, one of the most artistic and beautiful examples of flower grouping ever seen here, was the display by R. & J. Farquhar & Co., the arrangement being the work of James Farquhar. This exhibit, which is partially depicted in the cover illustration of this issue, was the fifth in the series staged in competition for the gold medal which it worthily won. It occupied half of one side of the large hall and comprised hardy asters, lilies, montbretias, tritomas, larkspurs, phloxes, grasses, ferns and other garden material grouped in resplendent masses of color, with a central grotto and fountain (not appearing in the photograph) around which alpine garden plants were disposed. The color effect was superb. The same exhibitor put up a gorgeous arrangement of dahlias in vases showing the decorative possibilities of this flower in a manner seldom equalled. A portion of this group is seen in the accompanying illustration. It was awarded a silver medal. B. Hammond Tracy was on hand with an extensive collection of gladioli of the most modern and improved types; which received honorable mention. A grand display of hardy garden flowers was made by Bellevue Nurseries and by Old Town Nurseries, also by Walter Hunnewell, the latter being the fifth in the series from June to September and winning the silver medal.

The dahlia enthusiasts were out in force with thousands upon thousands of blooms, which were outspread in a riot of color, filling many long tables in both halls. Nothing more finished and handsome in the dahlia line has been seen here than the display of cactus varieties by J. K. Alexander. This was awarded a bronze medal. H. F. Burt was also the recipient of a bronze medal for his display. First class certificates were given to R. & J. Farquhar & Co., for peony-flowered Dahlia Bertha Van Suttoner and to W. D. Hathaway for general display of dahlias. Honorable mention was given to Messrs. Farquhar for peony-flowered Dahlia Geisha, W. A. Riggs for display of peony-flowered dahlias and H. L. Winter for dahlia display. Other exhibitors of distinction were William Whitman, Mrs. L. A. Towle, A. E. Johnson, J. H. Flint, George B. Gill, Mrs. E. M. Gill, Joseph Thorpe and Mrs. J. L. Gardner, the latter showing tropical plants.

The display of fruit and vegetables was of very high quality, hardly ever before equalled here. The varieties shown comprised a large part of the entire list given in a seedsman's catalogue. Honorable mention was given to F. H. Evans for seedling peach Herbert and to W. Heustis & Son for unnamed seedling peach. The collection of foreign grapes from Mrs. J. C. Whitin were excellent.

The attendance was very large for a summer exhibition, over 5000 being present on one day.

The Boston Mycological Club had a big display of mushrooms and fungi in the side hall.

PARTIAL VIEW OF FARQUHAR DAHLIA GROUP, MASS. HORTICULTURAL SOCIETY.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The Dahlia and Herbaceous Perennial Show of this society was held on Tuesday, September 21st. David Herbert & Son sent a splendid collection of over 150 vases, which were easily the feature of the show. Richard Vincent, Jr., & Son also had a good collection of nearly 100 varieties, and Mr. Vincent was there in person with his niece. W. Atlee Burpee & Co. sent a fine exhibit of gladioli, celosia, tagetes, zinnias and tropaeolum. These were well staged, and were in that respect, as well as in their superior quality, something of a revelation to our local exhibitors. Lemon Ball, among the African marigolds in this collection, was one of the finest of its class ever seen. Tall nasturtium Midnight also attracted much attention. The collections of seedling gladioli were magnificent for this season of the year, and will be heard from later. Messrs. Dreer staged a fine lot of hardy perennials including phlox, delphinium, hardy asters, etc. A very attractive display. Two collections of vegetables were a conspicuous feature—the first prize going to Mrs. Penfield; the second to C. E. Newbold. W. Robertson took first for collection of outdoor flowers; Mrs. Penfield first on asters; J. G. Cassatt on double dahlias. W. A. Dick, Chestnut Hill, was also a prize winner in the latter class (C. B. Bustard, gardener). The other prizes were mostly of a routine nature.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The schedule of exhibits by private gardeners for the coming season comprises the following:

October—3 Orchid plants in flower.

November—12 blooms Chrysanthemums in twelve varieties; 1 specimen plant of Chrysanthemum, not over 8-inch pot.

December—3 plants suitable for Christmas decoration. 3 Cypripediums; plants in flower.

February—6 Primula plants; 2 Sinensis, 2 Stellata, 2 Obconica. 3 Cyclamens, 3 colors, not over 6-inch pots. 25 blooms Carnations; any variety or mixed.

March—2 plants of Gardenias in flower, 6-inch pots; 6 pots Forced Bulbs, six varieties, 6-inch pots.

April—3 single plants, Easter Lilies. 4 Cinerarias.

May—2 Foliage plants. 2 Ferns.

NEW ENGLAND DAHLIA SOCIETY.

"At the annual meeting of the New England Dahlia Society at Horticultural Hall, Friday afternoon, September 17, the following officers were elected: H. F. Burt, Taunton, president; G. L. Stillman, Westerly, R. I., vice-president; L. M. Bates, West Bridgewater, secretary; J. K. Alexander, East Bridgewater, treasurer, and L. B. R. Priggs, Cambridge; F. S. Davis, West Roxbury; F. W. Eaton, Middleboro; Mrs. L. M. Towle, Reading, and J. H. Flint, Salem, executive committee."—Boston Globe.

HORTICULTURAL SOCIETY OF NEW YORK.

The Horticultural Society of New York is now entering upon a new era in its history, dating from the successful exhibition held last November, and it is hoped that a greatly increased membership will result, and hence a greater usefulness of the society to the cause of horticulture. Other cities have flourishing societies of this kind (those of Boston, Philadelphia and Chicago being conspicuous in this respect), and it is certainly very desirable that horticulture in New York should attain as prominent a position as it holds elsewhere.

The Horticultural Society of New York is working toward this end, and it regards successful exhibitions of plants and flowers as of especial value in this work. Previous to last fall the society had not at its disposal in the lower part of the city a suitable place of easy access in which to hold its exhibitions. This want has now been filled, for an arrangement has been made whereby the society may hold its exhibitions and meetings at the American Museum of Natural History. This institution occupies the area lying between 77th street, on which is located

this city have affiliated themselves with the New York Academy of Sciences, and this affiliation has the use of a room at the American Museum of Natural History. The members of each society receive the weekly bulletins of the Academy, issued between the months of October and May, inclusive, announcing the meetings of all the societies. Members of any society are welcome to attend the meetings of all the others. In the early part of the present year this society was received as a member of this affiliation, and the Horticultural Society now enjoys equal privileges with the seven other societies. This entitles it to the use of the Academy room at the American Museum of Natural History. This room is equipped with a lantern, so that illustrated lectures may be given. Facilities are also placed at the disposal of the society for holding small flower shows at its monthly meetings, if so desired. This affiliation is a most important step in the history of the Horticultural Society.

The exhibition given last fall at the American Museum of Natural History attracted a large attendance. It was highly successful, and it is hoped to make the coming exhibition in Novem-

NEW BEDFORD HORTICULTURAL SOCIETY.

There was a splendid array of dahlias and other flowers in Dominique Hall Sept. 18-19, when the New Bedford Horticultural Society opened its seventh annual fall exhibit. The attendance was much larger than on previous occasions and fully justified the change of place from the location formerly occupied. The list of entries was the largest on record and the quality was also the best ever seen here.

Awards of prizes were made by the judges, James Garthley, Richard Parkinson, and George H. Walker, in all classes except the cup presented by Mrs. H. A. Jahn as a prize for the best exhibit. The intention of Mrs. Jahn was to award the cup to the best exhibit, allowing all exhibitors to compete, but on the announcement card this contest was open only to amateurs. As each of the judges had an exhibit at the show, they declined to make any award until the question is settled.

Conspicuous among the winners of important blue ribbons were W. D. Hathaway, W. F. Turner & Co., Mrs. H. A. Jahn and J. P. Bodge.

Special premiums were awarded as

AMERICAN MUSEUM OF NATURAL HISTORY, NEW YORK CITY

Where the Horticultural Society of New York will hold its exhibition on November 3 to 7, 1909

the main entrance, and 81st street, on the south and north, and 8th and 9th avenues on the east and west, a site readily accessible by subway, elevated and surface lines. It is the largest and finest building devoted to natural history in this country and one of the greatest in the world. It is supplied with large and small lecture rooms, where societies may meet and conduct their proceedings, and there are spacious well-lighted halls which lend themselves admirably to the purposes of an exhibition. Such an institution, it is needless to say, by its location and equipment, furnishes excellent facilities for the conduct of an exhibition, and the Horticultural Society is to be congratulated upon securing such facilities for its exhibition, and for the welcome extended to it by the officers of the institution. The location of the institution in the center of one of the finest residential sections of the city insures an attendance quite out of the ordinary. Invitations to the exhibition will be sent to all members of the affiliated societies and to the large membership of the Museum itself.

The "affiliated societies" have been referred to above, and a word of explanation is necessary. A number of the leading natural history societies of

ber larger and better. That this hope may be realized, all interested are urged to enter into the competition. A schedule, carrying with it over \$1,600 in prizes has been arranged, and the secretary will gladly send a copy of this to any one on application. To advance the cause of horticulture in this city it is necessary that all interested do their share for its development, and one of the best means to accomplish this is by making the exhibitions of the society large and eminently successful.

A friend of the society, much interested in the *Oncocyclus* or *Regelia* irises, which include the well-known *Iris Susiana*, or "mourning iris," has offered a special prize of \$25.00 for these flowers, to be awarded at the exhibition next spring or early summer. The prize is for the best collection of cut flowers from plants grown out-of-doors, not less than ten species of hybrids, or both. Announcement is made of this prize now, so that those who may desire to compete for it shall have opportunity to secure the plants, as it is necessary to plant them this fall. These flowers are little cultivated, and it is hoped that this prize may stimulate an interest in their cultivation.

follows: For three Dreer White—W. F. Turner & Co., first; W. D. Hathaway, second; Mrs. H. A. Jahn, third.

W. W. Rawson silver medal for cactus seedling—W. F. Turner & Co.

W. W. Rawson bronze medal for best specimen W. W. Rawson show dahlia—W. F. Turner & Co.

R. & J. Farquhar & Co., special for 12 blooms peony flowered, not less than three varieties—W. F. Turner & Co., first; Mrs. H. A. Jahn, second; W. D. Hathaway.

Silver cup from Richard Parkinson, for best 25 blooms, amateur class—M. McCarthy.

Silver cup from Richard Parkinson, for best 12 blooms, amateur class—James McVicar.

Society's silver medal, for best seedling—Mrs. H. A. Jahn.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the above society was held on Thursday, September 16, at 8 p. m. It was a well attended meeting and it was followed by a supper served by the recently elected officers at Kolb's Cafe, in St. Charles street. Many things of interest to the Association and the general public

were discussed, and the prospects for the organization were never brighter.

Antoine Alost, president of the society, addressed the members at the supper, giving in detail the incidents of his trip to the S. A. F. convention in Cincinnati. He suggested the erection of a clubhouse by the society at West End, and this matter will be considered at the next meeting of the organization, many members seeming to favor the project.

Several members broached the question of inviting the S. A. F. convention to New Orleans in 1911. Henry Cook announced if the movement was seriously considered at any time, he would pledge himself to contribute \$100 to the fund which might be started. Many informal talks were made on the question, but no definite action was taken, as members wanted to give the matter serious thought.

C. R. Panter gave the members some ideas as to the costs of conventions. Charles Eble spoke in favor of bringing the gathering to New Orleans, expressing the belief that it would be a good thing for the city, as well as the entire South.

P. A. Chopin made a forceful talk, impressing the members with the importance of going after northern trade more vigorously than they had in the past. He said from his experience the local florists could compete with the European markets in selling to Chicago and other large cities in certain lines.

Other members who attended the convention made short, interesting talks which were listened to with attention.

The officers are: A. Alost, president; H. Doeschner, vice-president; C. R. Panter, secretary; John Eble, treasurer.

GREENHOUSE VEGETABLE GROWERS' AND MARKET GARDENERS' ASSOCIATION OF AMERICA.

The second annual convention of the Greenhouse Vegetable Growers' and Market Gardeners' Association of America will be held at Ashtabula, Ohio, Tuesday, Wednesday and Thursday, October 12, 13, and 14, 1909. This Association was organized in Cleveland, Ohio, last year and numbers in its membership vegetable forcers in the states of Massachusetts, Maryland, Pennsylvania, Ohio, Kentucky, Michigan, Illinois, Indiana, Missouri and Kansas.

The meeting at Ashtabula promises to be largely attended. An interesting program is being prepared, which will include addresses and papers by prominent authorities on vegetable forcing and discussions by practical growers from all sections of the country. In addition, there will be an exhibit of greenhouse supplies and materials and of greenhouse products. One feature that will draw many to the convention will be the opportunity afforded visitors to see the famous greenhouse establishments at Ashtabula, where many acres of glass are devoted to vegetable culture.

All who are interested in greenhouse vegetable growing or market gardening will be welcomed at the meeting. Those who wish programs and additional information should write to the secretary, S. W. Severance, 508 Walker Building, Louisville, Ky.

A Test of "Aphine"

The "AMERICAN FLORIST" says (September 18, 1909):

"So many 'killers' have from time to time been heard from that you are led to having developed a strong disposition to know just what they will do. A representative of the American Florist had an opportunity of witnessing a number of interesting tests with 'Aphine' at Chas. A. Totty's greenhouses, Madison, N. J. The tests were made by Geo. E. Talmadge in the presence of Mr. Totty, Wm. E. Tricker, his foreman, and the writer. Orchids affected with scale, grape vines in which mealy bug had obtained a hold, and black and green aphids on chrysanthemums and roses were all treated. The solution was applied with a small sprayer. We can say for this preparation that, 'it does the work,' and it is so far from doing any damage to the plants that the foliage soon takes on a better color after it has been applied. The results of these tests show that there is an insecticide on the market that is effective and that is easily and quickly applied, at a comparatively small cost."

The day after these tests were made, Mr. Totty, whose reputation for fair dealing is unquestioned, said: "I have nothing but praise for the new insecticide, 'Aphine,' that we tested yesterday. The scale on the calanthes and cattleyas was all dead when examined through a glass this morning, and the plants are not injured in the least. The mealy bug was likewise wiped out where the mixture touched it. If Mr. Talmadge will maintain a uniform quality in his product, he will have an enormous sale, for it is unquestionably right every way."

A Spray—Average 1 Part Aphine to 40 Parts Water

— Two Dollars Fifty Cents the Gallon —

GEORGE E. TALMADGE, Inc., Manufacturers
MADISON, N. J.

NATIONAL DAHLIA SOCIETY OF ENGLAND.

The first show of the season was held by the above named society at the Crystal Palace, Sydenham on September 2 and 3. The weather of late has been unfavorable for dahlia growing, but the display generally was a fairly good one, all things considered. A second show will be held by the same society at the Royal Botanical Gardens in about three weeks' time. Hobbies, Limited, had a gold medal for a handsomely arranged display of roses and dahlias. Among the latter were many good examples of cactus and peony-flowered varieties, mostly of Dutch origin. Hardy flowers also formed a feature of this very large exhibit.

Cannell & Sons also received a gold medal. They had a fine lot of cactus varieties set up in their usual attractive style. Very effective were some of the modern giant singles and peony-flowered sorts, Red and White Douzon, Phenomene, White Cloud, Gloire de Baarn, King Leopold, Marie Corelli, Hall Caine, Jeune Charmet, Crimson King being especially good. Cactus varieties were shown in large numbers. A gold medal was also awarded to J. T. West, who had an excellent display. This was chiefly composed of cactus and pompons.

John E. Knight staged a mixed collection of dahlias and early chrysanthemums. He was awarded a silver medal for a very prettily arranged exhibit.

The competitive classes were numerous and provided for exhibits from growers of every capacity—6, 12, 18, 24 and 48 cut blooms in various sections were scheduled and in some of the classes all the prizes offered were awarded. The methods of staging were as varied as the exhibits; some were shown in bunches, others in the old green show board, others in vases, so that much of the old formality has

been abolished. There were several good table decorations and a number of baskets filled with dahlia blooms and artistic foliage for effect.

The old show and fancy dahlias, the admiration of the old school of growers, called forth an interesting display from some well-known growers.

Cactus dahlias were also finely staged by many noted specialists. Singles and pompons also had a good many representatives and many of the flowers were dainty and well chosen, but any enumeration of the many varieties staged is practically out of the question.

C. HARMAN PAYNE.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Rose.

The application of Mr. Alex. Montgomery, of the Waban Rose Conservatories, Natick, Mass., for the registration of rose described below, having according to the rules of this Society been submitted to the American Rose Society on August 23, 1909, and no reply having been received from them within the required time, the registration becomes complete and is hereby made public, as follows:

Name—Climbing Killarney.

Description—A sport from Killarney with strong climbing habit making growths 12 to 15 feet in length, clothed with strong, heavy foliage; flowers identical with the parent plant and come all along the cane as wood matures.

W. N. RUDD, Secretary.

September 18, 1909.

THE AMERICAN CARNATION SOCIETY.

A. C. Brown, Springfield, Ill., registers the following new carnations:

Sangamo. (Mrs. E. A. Nelson X Enchantress). Brilliant pink, size 3 to 3 1-2 inches. Strong, healthy, upright

and rapid growth. Breaks easily from base of plant. Flowers produced very freely on extra long stems; calyx never bursts.

Superba—Uncertain of parentage. Pure soft pink. Size 3 1-2 to 4 inches. Strong, healthy, rapid growth. More slender than Sangamo; strengthens quickly after benching. Flowers are fringed and slightly whorled. Very free; extra long stems; calyx rarely bursts. A. F. J. BAUR, Sec'y.

CLUB AND SOCIETY NOTES.

The committee of arrangements consists of C. Wilson, Manager; H. Kastberg, Secretary; J. Dunbar, Treasurer.

The Dobbs Ferry Horticultural Association will hold its ninth annual flower show at Village Hall, Dobbs Ferry, N. Y., on Friday and Saturday, November 5-6. There are 48 classes for flowers, plants, fruit and vegetables in the schedule. It is stated that on account of limited space, no exhibits will be received for competition excepting from residents of the villages of Dobbs Ferry, Hastings, Irvington and Ardsley, unless from members of the Association.

The Intertown Dahlia Association held their third annual show at Ansonia, Conn., on September 18, which was opened by Mayor Stephen Charters in a congratulatory speech. The advance sale of tickets was very large and the rooms were thronged both afternoon and evening. Peter Zuger of Hartford, was judge. There were three prizes in each class from 1 to 23—first, a blue ribbon; second, a red ribbon; third, a yellow ribbon. In the special classes a white ribbon was used. The officers of the association are as follows: President, John Lewis of Derby; vice-president, D. H. Palmer, Ansonia; secretary, J. B. Baylis, Seymour; treasurer, A. W. Davidson; chairman of show committee, P. E. Carmody, Ansonia.

BY WIRELESS FROM CONNECTICUT.

E. J. Taylor.

Famous up to within a few years ago as an onion-growing centre, the district around Southport and Greens Farms, Conn., is now a summer residence section of high degree, and beautiful estates with well-kept lawns and charming vistas over the waters of Long Island Sound fringe the elm-shaded drives. Southport is a part of Fairfield and Greens Farms is the money end of Westport. Turkey Hill is the most sightly section of Greens Farms and here three generations of Taylors have held sway and a fourth is well on the way to follow in their footsteps.

E. J. Taylor is pretty generally known to the wholesale trade of New York City, where the product of his thirty-two houses finds a market through John I. Raynor. The place is well worth a visit by any grower looking to improve his output through inspecting and making comparisons with the methods of other successful growers. There is a house of two-year-old Richmond roses, tied down and well started along, which is a model in its regularity and finish. Carnations are a leading crop. Enchantress is selected for the largest crop. Victory is the scarlet which has made the best record. White Perfection leads in white. There is something very appetizing for carnations in the soil and pure air of Turkey Hill, no doubt, but there's every evidence of close attention to minute details and that counts for much in the making of such plants as are to be seen there. Chrysanthemums fill the houses which, later on, will be devoted to lilies, also the Manetti grafting house. A side issue with Mr. Taylor is a patch of hardy perennials, four acres in extent. There is a big and rapidly growing call for this class of material for the adornment of the gardens and borders which stretch for many miles along the shores of Long Island Sound.

R. G. Hanford.

"Croweanum doesn't like to be disturbed. It is very slow to move after dividing and re-potting, and stimulant should not be given until it gets to growing. Then it needs it in liberal quantity." That's the word of R. G. Hanford, of Norwalk, Conn., one of the cleverest plantsmen engaged in the florist business. Like all successful gardeners, Mr. Hanford is as ready to learn as he is to impart advice and now he'd like to get a few practical pointers on propagating *Ficus pandurata* of which he has a quantity of single-eye cuttings which have been well-rooted for a year but refuse to make a sprout. One of the handsomest carnations houses imaginable is to be seen here. It is of Lord & Burnham construction, cement benches, with tile bottoms, planted with carnations July 31, which have not been permitted to form a bud, so far. The adaptability of the house and efficacy of the treatment are well in evidence. Here is also a house of crotons that even Robert Craig would doff his hat to—up-to-date varieties and grown to perfection. A series of frames filled with jardiniere ferns supplements the range of greenhouses and a fine garden invites attention from the passer-by.

Cottage Gardens Company, Inc.

QUEENS, LONG ISLAND, NEW YORK

This is one of the best kept retail establishments in Connecticut and we think its owner is making money.

Fillow Cut Flower Company.

This firm, successors to Fillow & Banks, at Westport, Conn., are re-erecting a rose house 29 x 160, which has been moved from another location. My Maryland appears to be very happy in the soil of Westport and Killarney is also looking luscious. Stanley Fillow, who is the active ingredient in the company, is very enthusiastic about his scarlet carnation Juanita, which after six years of testing, he will send out this season. They will plant 10,000 of this variety for their own use. Carnations are grown here principally on shallow benches. One house, 35 x 200, looks particularly well. A somewhat unusual crop planted in this place to succeed chrysanthemums is pansies. They are grown and marketed in straight colors and Mr. Fillow asserts that they are a good paying crop.

ROSES AT AUBURN, R. I.

The Budlong establishment at Auburn, R. I., has been enlarged this season by the addition of about 40,000 sq. ft. of glass devoted to roses My Maryland and Richmond. My Maryland has been looking extra good up to the present time. Stock planted the 10th of May has yielded up to the present time 80,000 flowers from 5,000 plants, and these have run extra good quality. Mr. Pritchard says that if this house will keep going at the rate it has been it will not owe anything after the 1st of January. Kaiserins have also done extra well and are still looking fine. A house that they planted out of pots last year gave so good results that they are trying the same this year. They have dropped some Brides and Bridesmaids and have increased Killarney half as much more, including White Killarney. Three new ice boxes have been built

which are capable of taking care of 150,000 cut roses, and a reserve main steam pipe has been put through the houses to use in case of emergency.

John Pritchard is still at the helm in charge of the rose-growing department of this big place and it appears in even finer condition than at a corresponding date last year. The daily shipments are from 15,000 to 25,000 roses. This represents only about half the capacity of the place as Mr. Pritchard's system is to start the season with the houses cut back at varying dates so as to bring them into crop in rotation.

PINUS STROBUS

White Pine

		Per 100.

Seed Trade

A Philadelphia Outing.

A pleasant outing for the employees of Messrs. Burpee and Maule took place on the 18th inst. at Briar Crest, the country home of Wm. Henry Maule. The visitors were hospitably entertained and had an interesting time noting the tests of many beautiful plants, flowers and vegetables in the gardens, grounds and greenhouses. As a fitting wind-up to the festivities, and an outlet for young and lightsome feelings a game of ball was indulged in. We have been asked to suppress the score, but a stern sense of public duty compels us to announce that same was 13 to 0 in favor of the Maule team.

Notes.

European advices just received by a local seed house would indicate that the annual offerings of fancy grasses will be three weeks later than usual this year on account of the backward season.

At a meeting of the board of directors of J. F. Noll & Co., Inc., Newark, N. J., on September 15th, Edward C. Juangan, for over thirty years with Wm. Hy. Maule, Philadelphia, Pa., was elected president and general manager of the company.

Mr. Alfred Emerich, representing Messrs. Vilmorin, Andrieux & Co., Paris, France, will arrive in New York about September 25th, and will make his usual visits to the American seed trade. Any communications for him should be addressed care H. Frank Darrow, P. O. Box 1250, New York.

CATALOGUES RECEIVED.

Vincent Lebreton, Trelaze, France.—Wholesale Trade List of Nursery Stock.

Weeber & Don, New York.—1909 Catalogues of Bulbs, Roots and Seeds. Attractive in contents and illustrations. Cover ornaments in blue.

Stumpp & Walter Co., New York.—Fall List, 1909. Narcissus Sir Watkin, Golden Spur and Victoria are beautifully shown on the cover pages.

Schlegel & Fottler Co., Boston, Mass.—Bulbs and Plants, 1909. As usual, a well-arranged and useful list with attractive garden scene on cover.

Peter Henderson & Co., Autumn Catalogue, 1909.—Finely illustrated throughout and on the covers are shown tulips in colors, superbly done.

Bay State Nurseries, North Abington, Mass.—Price List of Hardy New England-Grown Plants. An excellent catalogue of trees, shrubs, roses and herbaceous perennials.

New England Nurseries, Bedford, Mass.—Fall Planting Book, 1909. Fully illustrated. Some of the finest gardens in New England have been designed and planted by this company.

The Connon Floral Co., Ltd., Hamilton, Ont.—Wholesale Price List, Fall 1909. Bedding and house plants, roses, vines, shrubs and perennials are listed in quantity and good variety.

H. E. Fiske Co., Boston, Mass.—Autumn Catalogue of Bulbs and Plants. Creditable in illustrations and text contents. Darwin tulips and Emperor daffodils adorn the cover.

Wm. Elliott & Sons, New York.—

Flowering Bulbs, 64th Edition. Cover in bright colors depicting a garden scene. Also folder of pot grown strawberry and vegetable plants.

Eastern Nurseries, Jamaica Plain, Mass.—Wholesale Trade List, 1909-1910. This is a business publication pure and simple, without adornment but neat, educational and reliable.

W. B. Whittier & Co., South Framingham, Mass.—Wholesale Trade List of Framingham Nurseries for Autumn, 1909. Bears the official certificate of the Inspector of the State Board of Agriculture.

W. W. Rawson & Co., Boston.—Bulb Hand Book for 1909. Colored portraits of frezias and narcissi form the cover illustrations. The book throughout is a good addition to the list of attractive fall catalogues.

Wagner Park Conservatories, Sidney, Ohio.—A. Catalogue of Some Beautiful Flowers—Fall Edition. This pamphlet is just what it purports to be. A quaint conventionalized cover in black and red ink commands attention.

A. T. Boddington, New York.—Florists' Bulbs and Seeds for Forcing and Planting. This is a wholesale list bearing the assurance that "the seal of quality," which ornaments the title page, can be relied upon. It looks very inviting.

F. & F. Nurseries Department of the American Nursery Co., Springfield, N. J.—Fall Trade List, 1909. A compact, well arranged list of hardy ornamentals and fruit trees. A telegraph code for use in ordering at short notice is supplied.

R. & J. Farquhar & Co., Boston.—Autumn Catalogue, 1909. This is a book of 75 pages superbly illustrated with half-tones of great beauty. The covers are in sepia tint and a cluster of handsome Darwin tulips forms an appropriate frontispiece.

Winterson's Seed Store, Chicago.—Autumn Catalogue of Bulbs, Plants, Shrubs, etc. "Make your garden glad" is the "Trade Mark" maxim on the cover page. We hope the people of Chicago will take this good advice and that Winterson will be called in to assist.

Thomas Meehan & Sons, Inc., Germantown, Pa.—49th Edition, Autumn, 1909. Garden views in sunset tints adorn the covers of this handsome publication. Accompanying it is the first number of the "Garden Bulletin" magazine which the publishers announce is to be issued monthly from their office. It bears on the title page a fine portrait of the late Thomas Meehan and among the illustrations is a colored plate of Meehan's Mallow Marvels.

R. Vincent Jr., & Sons Co. have opened their extensive greenhouses and grounds at White Marsh, for the annual dahlia show and harvest home festival of the M. E. Church of Chase, Md., on Sept. 28, 29, 30 and Oct. 1. This is the third event of the kind and it is much more than a local event, as guests from long distances take advantage of the Messrs. Vincent's hospitality to feast their eyes upon the bewildering array of geraniums, dahlias, etc., so generously spread before them.

PUBLICATIONS RECEIVED.

McHutchison & Co., wholesale horticultural importers, New York City, are sending out a card, as a wall hanger, giving in full the new official tariff rates on horticultural products which went into effect on August 5, 1909. This includes fruit stocks, bulbs, seeds and general horticultural list. This will prove a very handy and convenient reference guide for anyone interested in the importation of dutiable stock.

Pamphlet No. 3 prepared by the Special Park Commission of the City of Chicago, is now ready for distribution. It points out the causes destructive of tree life, preventive remedies and directions for removal of dead trees and trimming of unsightly ones. Pamphlet No. 4 will treat on "Trees to Plant and How to Plant Them." Copies may be had, free, by addressing J. H. Frost, City Forester, Chicago.

THE BEST GREEN THREAD.

John C. Meyer & Co., the sole manufacturers of Silkaline, the first and still the best green thread for florists' use, report a larger call for this specialty this year than heretofore. In a large manufacturing plant such as The Meyer Thread Mills an article of limited demand such as Silkaline counts as a very small item, but notwithstanding this fact, Silkaline has been kept up to the exact standard of excellence from the beginning and its qualities of strength, permanent color, number of yards on spool, and uniform finish never vary as is frequently the case with the cheaper green threads which have been put on the market since Silkaline came into use. If the latter costs a little more it is the most economical in the end for tying plants, stringing smilax, etc., and the increasing call for it seems to indicate that florists and gardeners, for whose use it is specially made, are finding this out.

CHICAGO NOTES.

General Business Topics.

John Breede has rented the space formerly occupied by Scheiden & Schons in the Flower Growers' Market.

F. C. Mendoza, for seventeen years a retail florist at 4254 Grand Blvd., has moved to 356 E. 43rd St. Mr. Mendoza thinks his new location a more favorable one.

Leesley Bros. have commenced work on the 160-acre tract they recently rented near Riverside. They are thoroughly draining it, laying tile every four rods the entire length. They will grow onion sets and other products.

The effect of the new tariff laws is being taken into account by the men who grow bulbous stock for Easter and spring trade. The change from an ad valorem to a specific duty requires a little different figuring of cost to make the profits come out right when the margin is close. The duty is much less on large bulbs than formerly and more on the small and cheaper bulbs which makes it necessary for the florist to brush up his arithmetic a little if he wants to make his bookkeeping come out right.

The question of fertilizers is getting more and more of a problem to the growers in Chicago and vicinity. The

Board of Health no longer allows the shipping of natural fertilizers by the car load and this year for the first time many have had to depend upon the prepared fertilizers exclusively. The natural manure is specially prepared, then shredded and pulverized and delivered in bags and is practically odorless. This is certainly more agreeable to the residents in the vicinity of the various growing districts but, rather more expensive to the plant men.

One of the events in the wholesale market this week was the opening of the Hoerber Bros.' place of business in the Atlas Block, at 51 Wabash avenue. The main room, 40x60 feet, fronts on Wabash avenue, and is well lighted by seven large windows. A well appointed office occupies one side and white enameled tables fill the space between office and ice box. A new elevator is being put in which will make the north end of the Atlas Block, which is practically a florists' block, as easily accessible as the south end. This firm consists of Wm. F. Hoerber, sales manager, and Fred C. Hoerber, who will be in charge of the greenhouses. They are energetic young men and HORTICULTURE wishes them success in their new undertaking.

Personal.

Miss Elsie Wiggins of the E. H. Hunt Co. is having an extended trip West, stopping at Denver, Salt Lake City and other points.

E. B. Washburn, son of C. L. Washburn and grandson of O. P. Bassett, is to be married on October 27th to Miss Belle Story of Riverside, Ill. "Ned" is usually to be found at the desk in the office of Bassett & Washburn. He graduated from the University of Wisconsin and immediately entered business with his father and grandfather.

Visitors: Mrs. E. L. Sawyer, Creston, Iowa; Chas. Hughes, Hillsdale, Ill.; Lena McCoy, Seattle, Wash.; Harry Bock, Burlington, Iowa; E. A. Beaven, Evergreen, Ala.; Mr. Brinkman, of Brinkman Bros., Michigan City, Mich.; Mrs. Henry Clay Eckenberger, Portland, Ore.; S. S. Skidelsky, of Skidelsky & Irwin Co., Philadelphia, Pa.

Wholesale Flower Trade

Flower Market Reports.

"The same old story," BOSTON said the man we interviewed on the cut flower situation. Looking over the field we cannot contradict him. Business is really dull and backward for this date. As to the material in market it may be stated that asters are still the lion in the path. They are overloading every wholesaler and it is a pity that such good stock should meet such a fate. Chrysanthemums increase with every sunrise, Polly Rose and Golden Glow holding the stage at present. Roses are excellent in quality, but entirely too common and actually in the way. American Beauty holds its position at \$25 for the best, but they ought to bring more, for they are elegant. Violets are seen on all sides now—single varieties only—but they are not up to "concert pitch" and have to struggle hard for recognition. There is a good call for lily of the valley and it is not remiss as to quality. Carnations are increasing but they have to face the asters, and unless they are of extra quality with good long stems they get little encouragement. Lilies are scarce. New York lily handlers might look to Boston to help them out advantageously on the lily proposition.

A decided improvement in the volume of trade each week is evident and if the supply of flowers were larger no doubt everything would sell. The demand has practically been ahead of the supply all the month. The extreme hot weather during the middle of the month hurried on the stock, but left the quality poor and the sales for a few days diminished accordingly. Quantities of asters are still coming in from the East. A few dahlias are now in but with very short stems. Carnations are improving daily and the stems are gradually lengthening out. Gladioli and other outdoor flowers are not so much in evidence as in other years. The shortage of good asters throughout the greater portion of their regular season is attributed to the unusual rainfall of the spring followed by an unbroken drouth of several weeks. The government report shows at the present time that 1909 has so far been treated to over seven inches of rainfall above the normal. The dahlias have not done at all well under these conditions. Growers who have cultivated this flower successfully for twenty-five or more years are cutting dozens where they usually get hundreds. Roses are very good for the fall season and the various growers are saying all sorts of good things of their favorite varieties. One thing is certain the dull season is past and the busy season is fairly under way in Chicago.

The extremely warm DETROIT spell of last week prevented a full development of the counter trade, still the total volume of business was satisfactory. Chrysanthemum Golden Glow is very disappointing as a seller. Carnations are much improved in quality. The outlook for violets is splendid; plants are in very good shape with many buds showing already. In about ten days we may expect the beginning of the chrysanthemum harvest. With some snappy weather they should go with a rush.

FIELD GROWN Carnation Plants

We offer, subject to prior sale, the following:

These are extra strong, healthy plants, the product of the most successful Eastern Growers, stock that has been carefully selected and handled under the best possible methods, thus insuring results that will place the plants in our customers' hands in the very best condition.

The WHOLESALE FLORISTS Philadelphia

1608-1620 Ludlow St. Store closes 6 p.m. Washington Store, 1212 N. Y. Ave

Business the past week exceeded by far any previous week in September and everyone is looking for a steady increase from now on. There has been an exceptionally good supply of stock. Beauties and tea roses of all kinds have been plentiful enough to compete with the demand. My Maryland is fast becoming a favorite with the florists in this vicinity. Carnations are improving daily and are arriving with some degree of regularity. Dahlias are in their glory now

and afford the buyers good value for their money in the way of display. Lily of the valley is somewhat short in supply with little or no market for it. Asters are about over for this season. Gladioli have shortened up considerably. There are some chrysanthemums, but buyers are not anxious to pay stiff prices. Adiantum and asparagus are more in demand while sales of smilax are irregular. Cattleyas have been scarce so far. Stock with all the growers is in a most healthy condition, with prospects brighter than ever for a very successful season.

(Continued from page 447)

PHILADELPHIA

The improvement noted in our last week's report still continues—with supplies fully equal in most lines—which accounts for the price equilibrium. The only items that have hardened up are American Beauty roses, lily of the valley, and orchids. All the other staples have so increased in quantity that prices have remained stable. Good judges claim that on an average prices are not nearly as good as they were this time a year ago. We have not compared them; but are inclined to believe that is correct. A spurt in the demand for American Beauty roses was in evidence last Thursday—the Jewish new year. When the sons of Israel can jimmy-coggle the flower market of the Quaker city during the slack season, it is a sign of the times, and compels us all to take notice of changing social conditions. Dahlias are in very large supply and of splendid quality. There is a noticeable improvement in these as the days go by and they are now astonishing as to quality and variety. The early chrysanthemums have a hard row to hoe against the dahlias. Asters are yet very fine—in spots—but there is an immense influx of medium to poor flowers. On the whole, we think the asters do not size up to last year's record for quality—probably on account of the dry summer. We have seen no such Cregos this season as we did last

year. One of the best lately seen is Violet King, a variety of the late-branching type; a lovely shade of soft violet, with large, very double, perfectly formed flowers. Pink roses are too plentiful. White roses are a healthier proposition and sell up fairly well. Meteors are fair. Nothing good in Richmond yet. Carnations few and far between—ill-clad, wistful and solitary—they ought to stay home until feathers are grown. Enchantress, White Perfection, Pink Enchantress, and Crocker are the boldest. Very few reds have dared to show their heads. Sweet peas from the nearby mountain districts are a charming addition—in lavender, pink and white—to the local market. They are good stuff and are apparently exclusive with one house; but they are there in ten thousand lots daily. A few violets have made their appearance—small but fragrant. Cattleyas and dendrobiums more plentiful, but not yet enough for the demand. There is a good call for hydrangea heads for store decoration. Cosmos, tritoma, gladiolus, tuberose, water lily, and dozens of other minor subjects, make up the weekly symphony and find more or less favor. Polly Rose and many other new chrysanthemums will add to the gaiety in a few days.

NEW YORK

Other than an occasional spasmodic scurry which awakens hope of more permanent activity but little has yet transpired to indicate that summer is past and that it is time

to "get a move on." Wholesalers are touring the country looking after their fences all the way from Hoboken to Rhinebeck and growers with unsettled ideas but alert faculties are slyly around the wholesale district in the city, so it is evident that, as they say in the club meetings, things will eventually "take the usual course," but it requires patience at the present time. Some things have shortened up in supply and thus relieved the market somewhat and the quality of greenhouse product has greatly improved. Roses are being shipped in large quantities to the wholesalers now and selling rates are very low.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

NEWS NOTES.

Boulder, Colo.—The H. M. Teller ranch has been purchased by Bernard Beers, florist, of this city.

Brattleboro, Vt.—R. H. Messenger will have charge of the new greenhouse recently erected by C. W. Dunham.

New Haven, Conn.—Alfred T. Ostermann, florist at 123 Church street, will open a new nursery on land recently purchased.

So. Hadley Falls, Mass.—Gallivan Bros. of Holyoke have leased the Bates' greenhouses for a year. Herbert Bennett will remain in charge.

Greenfield, Mass.—Charles P. MacDonald, undertaker and florist, has filed a voluntary petition in bankruptcy. Liabilities \$2034, assets \$1020.

Provo, Utah.—The Stark Bros. Nursery & Orchard Co. has brought suit against the Utah Lake, Land, Water & Power Co. to collect \$579 alleged to be due for nursery plants.

Lenox, Mass.—Henry J. Lamke, who has been in charge of the Cold Brook greenhouses, has bought the Reynolds farm of 100 acres at Richmond and will start in the nursery business.

Kansas City, Mo.—William L. Rock has devoted a tract of eighteen acres to a public garden to be laid out this fall and opened next spring. The garden, exclusive of the land, will cost about \$15,000 when completed.

Montreal, Can.—A meeting of vegetable growers was held at the MacDonald College on September 8 with a view to organizing an association for the advancement of their interests in the province. After being shown over the horticultural department by Prof. W. S. Blair, lunch was taken at the college and an address given by the Principal, Dr. J. W. Robertson. About thirty growers were present and officers were elected. The executive committee will meet shortly to complete details. The organization will be known as the Vegetable Growers' Association of the Province of Quebec. It is proposed to hold annual exhibitions in Montreal similar to those of the Ontario Association at Toronto.

BUSINESS CHANGES.

Paris, Tex.—J. W. Goree of White-twright has moved his plant to this town and is making additions thereto.

San Rafael, Cal.—Richard Lohrmann, formerly gardener for A. W. Foster, has started in the florist and nursery business.

Colchicum speciosum album, bearing snow-white blooms of enormous size in autumn, is among the specialties being offered by J. Backhouse & Son of York, England. The variety has been developed from stock originally found in Asia Minor. It has brought a very high price in the past, but is in now sufficient supply to be listed at a figure which will bring it within reach of everybody.

See the advertisement of the Broadway Iron Foundry Company in this issue. The most durable grate bars at the lowest price is a proposition the majority of greenhouse owners ought to be interested in at this particular season.

Obituary

Aaron W. Morgan.

Aaron W. Morgan, for many years a florist in Danville, Ill., and who bought the Iralson store on 43rd St., last May, was found dead in bed on Sept. 10th. The gas was found turned on but no one thinks it was intentional as Mr. Morgan's hands were badly crippled with rheumatism and were consequently unsteady.

The remains were taken to Danville on the 12th.

Mr. Morgan was 71 years old and leaves a son and two daughters, and though his stay in Chicago has been brief he had made many friends. He was a member of the Chicago Florists' Club.

Alexander Bogie.

Alexander Bogie, an aged florist, died at his home, 506 Summit avenue, Jersey City, N. J., on the 12th inst.

In Memoriam.

The funeral of Mr. T. M. Waters, whose death was recorded in our last week's issue, was attended by the florists of Richmond, Ind., who acted as pall-bearers. We have received the following tribute to his character, which we gladly accord a place in our columns:

Thomas Marion Waters, son of John and Mary Waters, was born on a farm in Preble County, Ohio, almost 54 years ago, and practically all his life was passed in this county. Graduating from the college at Ladoga, Indiana, in early manhood, he spent several years teaching in our public schools, laboring between terms on the farm and at various other callings, until his brother, Will Waters, was elected sheriff of this county, and under him he served as Deputy Sheriff for four years to the satisfaction of the public and with honor to himself.

On July 21, 1889, he united in marriage with Ida May Bell, who survives him.

Uniting with the Presbyterian Church at Eaton, Ohio, in 1894, he was and continued to be until his death, an earnest, consistent and faithful Christian. He was one of the best known men in our community and being of a kind, gentle and retiring disposition, he was loved, honored and respected by all with whom he came in contact. Gifted with a loving nature that admired and followed the good and true and beautiful, he was so soft spoken with voice and words, that although the writer knew him closely and well for more than a quarter of a century he was never heard to raise his voice in anger or bitter words or excitement even when danger threatened. On every moral question he only asked which side is right, and there he took his stand.

Engaging in the business of florist at Eaton, Ohio, in 1892, he continued therein honoring his business; he admired his flowers, handling them with the caressing tenderness of one who loved their beauty and fragrance, and talked of them as though they were things of life. Winning by his gentleness, he held the love and esteem of his associates in business, and it seems proper and fitting that those who spend their lives and time decorating every phase and walk of life with the most beautiful tokens of God's love for man should lay away their brother worker amid the emblems that typify Heaven's Eternal bloom.

A loving husband, a good and kind brother, a gentle Christian, a faithful friend and neighbor, and a good citizen has gone to his rest.

Berkeley, Cal.—Otto C. Dorrier, who had been employed by A. Hutchinson, florist, at 2315 Telegraph avenue, was arrested in San Francisco, Sept. 11, charged with having robbed his employer.

IS YOUR NAME IN THE ABOVE LIST? IF NOT, WHY NOT?

PHILADELPHIA NOTES.

A. B. Scott, of Alexander Scott & Sons, has returned from his Canadian trip.

D. T. Connor is organizing a Philadelphia party to attend the Vincent Dahlia Show at White Marsh, Md., September 28th.

Samuel S. Pennock has returned from his Canadian trip. Montreal, Quebec, and points beyond were thoroughly investigated during the visit.

Philadelphia on the 20th inst. had the pleasure of gazing on the rotund and vigorous personality of Daniel MacRorie of the MacRorie-McLaren Co., San Francisco.

William Didden's asters with forty-two-inch stems and flowers four to five inches in diameter have made the wholesalers sit up and take notice this season. A new Furman boiler is being installed.

Some beautiful phloxes were shown by Dreer at the Dahlia show, Sept. 20th. Here is George D. Clark's list of the best six out of hundreds: Pantheon, R. P. Struthers, Selma, Seibold, Mrs. Jenkins, Eclairer.

William Kleinheinz, president of the National Gardener's Association, has announced the list of prizes to be awarded at the annual convention of that society, to be held in Philadelphia next spring under the sheltering wing of the P. H. S.

Daniel Baird, the popular janitor of the Florists' Club room at Horticultural Hall for many years, will join the forces of Pennock Bros. on the 27th inst. A. Campbell, assistant janitor, will succeed Mr. Baird as major domo of the club room.

George Anderson is gathering about him a fine collection of sons-in-law. It is reported that he was seen driving through Lansdowne last Sunday with four of them in his auto. There is still room for a few more. The Anderson suffragette crop was one of the finest on record in these parts.

Sweet peas for early winter crop at E. F. Hoehl's are now about three inches high in the benches. Mignonette is also under way. New York market is the variety grown. It is a very choice strain and brings the highest price in this market. Marguerites are grown in pots and plunged. This prevents too tall a growth and encourages flower production. Asparagus plumosus has proved a profitable crop the past season and promises well for next winter. This is one of the best kept places we have had the pleasure of visiting for some time. A new house has been added the past summer.

Visitors this week: Richard Vincent and niece, White Marsh, Md.; Mr. and Mrs. John A. Beck, Milton, Pa.; Mr. Breitenstein, Pittsburg, Pa.; Lloyd Swarthout, Washington, Pa.; the Misses Moore and Ware, Wilkesbarre, Pa.; Hugo Kind, Hammonton, N. J.; Daniel MacRorie, of San Francisco.

The Lowthorpe School of Landscape Gardening and Horticulture for Women at Groton, Mass., opened on September 15. The course covers three years and fits the student for any phase of landscape work. Prominent among the lecturers are J. F. Dawson and among the instructors Miss Laura Blanchard Dawson, son and daughter, respectively, of Jackson Dawson of the Arnold Arboretum.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

MISCELLANEOUS WANTS

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

During Recess

RETAIL FLORISTS' ASSOCIATION OF NEW YORK.

This young organization had its "First Annual Smoker and Stag" on Friday evening, September 17, at Reisenweber's, 58th street and 8th ave., New York City. About seventy-five gentlemen were in attendance and they enjoyed themselves up to the limit. A fine musical program was furnished by vaudeville managers, including dancing and songs and stirring addresses were made by Mr. Nicholas and others. A fine collation was served. A telegram was read from Wm. J. Stewart, Boston, expressing regret at inability to be present.

ROCHESTER NEVER TIRES.

The local association, last Wednesday, held a clambake at Salmon's Grove, which was well attended. In spite of the many guests the clams, under W. Keller's able management, went all round, while Messrs. Stringer and Vick, as dispensers of good cheer, made one think they had missed their vocation. Our well-known friend, G. Kramer, had charge of the games, which brought out unexpected abilities in many of our florists. The afternoon was voted a most successful one, and now we look forward to a grand supper a couple of weeks hence.

A. P.

CHICAGO PREPARES FOR ROCHESTER.

Allie Zeck, one of the most enthusiastic leaders in the Chicago Florists' Bowling Club, has succeeded in arousing sufficient enthusiasm in the game to warrant the forming of a league of four teams. A final meeting for choosing the teams will be held at Zeck & Mann's on the 21st, after which time they expect to play regularly each Thursday at Bessinger's.

ASTORIA FLORISTS' BOWLING CLUB.

The Astoria (N. Y.) Florists' Bowling Club, of which W. H. Siebrecht is president, Philip Einsman secretary and treasurer, and John Donaldson captain, have begun a regular series of games Tuesday evenings. The bowlers and scores on the evening of September 14, were as follows:

Lorenz	134	125	150
Miesem	146	142	125
Einsman	163	98	125
Smith	158	139	113

Shaw	108	118	111

COMING FLOWER SHOW AT ROCHESTER.

November 2, 3 and 4 are the dates for the first annual Flower Show of the Commercial Florists' Association of Rochester, N. Y. It will be held at Convention Hall and many novel features are contemplated. Charles H. Vick, 187 Main street East, Rochester, is General Director, and H. B. Stringer, 180 Meigs street, is Secretary.

A PROGRESSIVE BOSTON ESTABLISHMENT.

The accompanying views show exterior and interior of a new house just added to the range of Sidney Hoffman, opposite the entrance to Mount Auburn

Two other houses, one 24x100 and one 16x100, are devoted to Lorraine begonias and cyclamens. The output of these houses is used in Mr. Hoffman's

Cemetery at Cambridge. The house is iron frame, 36x212, and has been planted with carnations. The office building is 32x34, with basement and attic.

store on Commonwealth avenue, Boston. It is just six years since this hustling young man started business in Boston in a small way.

ST. LOUIS NOTES.

Coming Flower Show.

Preliminary arrangements for the annual flower show and pomological exhibition were perfected on Tuesday night, September 14th, at a meeting held by the executive board of the St. Louis Horticultural Society. The show will be held at the new Coliseum on November 9 to 12. F. W. Brockman, chairman of the committee, says it will be the Society's greatest effort.

Business and Personal.

Alexander Johnson's new range at Wellston is completed and the houses are being planted with roses and carnations.

Grimm & Gorley have opened a branch store at 702 Washington avenue. The place will be known as the American Beauty Store, with Walter Retzer in charge.

Visitors: G. M. Rayburn, Chicago; J. J. Karins of Dreer's, Philadelphia; H. Rackham, Denver, Colo.; J. D. Carmody, Evansville, Ind.; E. W. Guy, Belleville, J. F. Ammann, Edwardsville, Ill.

Walter Sanders, son of C. C. Sanders, was married on Thursday, September 9th, to Miss Eva Harper. No one in the trade has more friends than Walter and they are congratulating him on all sides.

VISITORS IN BOSTON.

H. L. Sawyer, Jacksonville, Fla.; E. H. Chamberlain, New Bedford, Mass.

Lieut.-Col. Prain, director of Kew Garden, London, England; J. Backhouse, York, England.

J. Featherstone, Superintendent H. J. Heinz estate and Wm. Allen, superintendent of Homewood Cemetery, Pittsburgh, Pa.; Prof. Wm. Trelease, Missouri Botanical Garden, St. Louis.

INDIANAPOLIS PERSONALS.

Mr. and Mrs. Anthony Wiegand returned September 18 from a three and one-half months' trip in Europe.

Visitors: E. G. Hill, Richmond; Walter Coles, Kokomo; Peter Weiland, New Castle; E. J. Brown, Shelbyville; E. T. Barnes, Spencer; Fred Dorner, Jr., Lafayette; J. J. Karins, representing H. A. Dreer, Philadelphia, Pa.

PERSONAL.

C. W. Reimers, of Onarga, Ill., is now located at Wellsville, N. Y.

Ed. Spielman, of Buffalo, has gone to Rochester, N. Y., and taken a position with H. E. Wilson.

Herman J. Miller of Terryville has accepted a position with W. W. Thomson, florist, of West Hartford, Conn.

The engagement is announced of W. W. Clark and Miss E. F. Vose, both connected with Schlegel & Fottler Co., Boston.

BOSTON AND MAINE R. R. GARDEN PRIZES.

The award of prizes to Boston and Maine Railroad station agents for flower displays at stations during the summer has been announced from the superintendent's office. The examining committee was R. W. Wallace and J. F. Judkins. The first prize, \$50, goes to the station at Brattle, Mass., and the second, \$40, to the Hill Crossing and Riverview stations, both in Massachusetts. Marlboro, Mass., Merimack, N. H., Pike, N. H., and Webb, N. H., came in for the third, \$25. Other stations named as winners are: Devereux, Mass.; Dummerston, Vt.; Hillsboro, N. H.; Lake Street, Mass.; Lebanon, N. H.; Meadowview, Mass.; Nashua, Main street, N. H.; Prescott, Mass.; Sanbornville, N. H., and Waltham Highlands, Mass. Prizes of \$20, \$15, \$10 and \$5 were also given.

CRATING FLOWER POTS.

Our Rochester (N. Y.) correspondent sends us the following pertinent communication:

"My attention has been drawn to the unwieldy and insecure crates, in which some potteries send their goods, and I must say that one firm here ought to take action to recover for pots smashed. Very few greenhouse plants are fitted with steam cranes, and nothing less could be used to lift some of the crates seen. If potteries, advertising in HORTICULTURE, were to guarantee secure and handleable crates, their orders would increase."

We hope our wise flower-pot manufacturers will take due notice.

Silver cups, sixty dollars in cash and several diplomas, were divided among the winners of the Winter Hill (Mass.) Improvement Association's third annual garden contest on September 17.

A QUESTION OF HEATING.

Editor of HORTICULTURE.

Dear Sir:—Please tell me how much two-inch pipe would be required for a greenhouse 12 ft. x 100 ft. and what size water heater, and oblige. D. K.

In reply to your inquiry of the 17th we would say the question is very vague, but, however, we will try to answer it.

We will presume that there is 1800 square feet of glass to be heated at a

temperature of sixty degrees zero weather. We would advise putting in ten runs of two-inch pipe and a boiler of 1000 square feet of radiation. This will be found to be an economical system in the use of fuel.

Yours respectfully,
WILLIAM W. CASTLE CO.

ROCHESTER FLOWER TRADE.

Trade is gradually turning from summer stagnation to fall activity, although nobody reports rushing. Outsiders have had a good lesson this year, and the many who grew asters as a side line will probably rather use their ground as tennis lawn than try to cut prices for legitimate growers next year. Outdoor cut flowers are plentiful, but the demand is getting better. Dutch bulbs are arriving in good condition and some consignments received are splendid for size and quality.

Grate Bars

For Horizontal and Upright Boilers

We have been in the foundry business for nearly half a century. Consequently we have a large variety of patterns for grate bars. We carry in stock a large number of regular parts and make a specialty of prompt deliveries. We use iron in our mixtures best suited for furnace work, and our grates last longer and give better satisfaction on that account.

Mahoney, Tupper, Double Bar and Circular

We carry stock sizes of the Mahoney and Tupper grates up to 50 in. long; these grates are all 6 in. wide, 2 1/2 in. bearing, 50 % air space, and weigh 50 lbs. to square foot.

The Double Bar Grate is 3 in. wide, single bars are 1 1/2 in. wide, 2 in. bearing, and weigh about 45 lbs. per square foot.

The Circular Grate is made in all diameters from 12 to 50 in.

No Poor Jobs

Be it large or small, every greenhouse we build combines such valuable structural details as can be derived only from long years of experience in greenhouse building.

Nothing is slighted—every part, even to the last stroke of the paint brush is the best, and of course, you are the kind of man who insists on having this best.

Let us send you a circular showing both large and small houses—you have probably seen some of these very houses, and wondered who built them.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern Originating with Us. To be introduced Fall, 1909.

Of all the valuable introductions in ferns that we have sent out, beginning with the **Pierson (Nephrolepis Piersoni)**, we consider **Elegantissima compacta** the most valuable of all, particularly from a commercial standpoint.

While this resembles **Elegantissima** in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with **Elegantissima** except in a general way, because it occupies a place by itself, and is as distinct from **Elegantissima** as that variety is from **Piersoni**, — in fact, it bears the same relation to **Elegantissima** that **Scottii** does to **Bostoniensis**.

Elegantissima compacta has an ideal habit. The fronds are considerably shorter than those of **Elegantissima**, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Pae. strong plants, 2 1/4-in. pots, \$5.00 per dozen, \$35.00 per 100; 4-in. pots, \$7.50 per dozen, \$30.00 per 100; 6-in. pots, \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of **Nephrolepis**, carrying a large stock of all sizes at all times, — **Piersoni, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmanii, Amerpohli, etc.**

Notes from the Arnold Arboretum

Besides the genus *Davidia* described in the last issue there have been recently introduced from China quite a number of other genera of trees and shrubs entirely new to cultivation. Our plants of these are of course still small and only very few have flowered and fruited as yet with us, but the herbarium specimens we have here together with descriptions give us a fairly good idea what they look like and whether they might be of horticultural value. Of their hardiness, however, we know but little; this is a matter to be learned from experience.

A remarkable and handsome genus is *Emmenopterys* of which only one species, *E. Henryi*, is known. It is a tree from thirty to forty feet high with opposite broadly elliptic leaves from four to six inches long. The funnel-form yellowish white fragrant flowers are about one inch long and are disposed in large terminal clusters bearing at the outside large white bracts about two inches long and persisting till the fruits, oblong capsules, are ripe. It belongs to the Rubiaceae and its hardiness is doubtful.

Paederia foetida belongs to the same family and is a climbing shrub with opposite slender-stalked elliptic leaves from three to four inches in length; they bear in their axils loose panicles without the stalk from five to seven inches long of tubular, white or pale pink flowers about one-half inch long and followed by light brown ovoid capsules. The hardiness is doubtful.

Leptodermis oblonga is another member of the same family from North China and probably perfectly hardy here. It forms a small shrub with opposite oblong leaves not exceeding one inch in length and with slender tubular violet flowers little over one-half inch long and borne in few-flowered clusters at the end of the branchlets. The fruit is a small capsule.

Carrieria calycina, a tree attaining fifty feet in height, belongs to the Flacourtiaceae and is related to *Idesia* which it also resembles in habit and in its handsome foliage. The alternate leaves borne on long and slender stalks are ovate to oblong-ovate or sometimes obovate in outline, from four to seven inches long, crenately serrate and perfectly glabrous. The white flowers appear in few-flowered racemes at the end of the branchlets; they are about three-quarter of an inch long and may be compared in shape to those of a tubular-flowered *Clematis* save that they are shorter and broader and have five sepals. The fruit is a long-pointed slender capsule from two to three inches long. It may probably be fairly hardy with us.

Another closely related new genus is *Poliothyrsis* with only one species, *P. chinensis*, which also recalls *Idesia* in foliage and habit. It is a tree attaining thirty feet in height with alternate slender-stalked leaves ovate to ovate-oblong in outline and long-pointed, slightly crenate at the margin and from four to seven inches long. The whitish flowers are small, only about one-third of an inch in diameter, but as they are borne in large and many-flowered panicles from four to six inches long, appearing with a few leaves at the base from axillary and terminal buds toward the end of last year's branches, they are quite conspicuous particularly in combination with the handsome foliage. The fruit is a capsule about three-quarters of an inch long.

A third genus of the same family is *Xylosma*, of which several species occur in China. They are small

trees with ovate to oblong leaves from two to four inches long and crenate at the margin. The insignificant flowers are borne in small axillary clusters and followed by purplish black small berries. It is apparently of little ornamental value.

Alfred Rehder.

Rambles in the Black Hills

The conformation of this region is much like the Rockies though not on so grand a scale. Custer has an elevation of about 5500 feet. The air is cool and bracing. Here you find the Bull or ponderosa pine, and also the Black Hills spruce, which is a variety of the white spruce and much sought after for the prairies of Nebraska.

We find in the West that we must be careful where we get our trees. White spruce from Maine and New Hampshire cannot stand our dry climate. Those from northern Minnesota and Wisconsin do better. But the belt of them which swings down in the Black Hills succeed finely. I stayed two days on the ranch of J. V. Vallenthime, a German who was formerly connected with the Prussian forestry department. He collects tons of evergreen seed for our forest service and others. There will be few if any seeds this year. Only the ponderosa pine seems to be common to the Rockies and the Black Hills. The *Berberis repens* or Oregon grape is also found in both sections. This is often used for making jams and jellies.

PROBABLY A NEW IRIS

I noticed a very hardy iris which grows on the dry hills among the rocks and stones. I saw from the seed pods that they had been flowering in July. Mr. Vallenthime says the blossom is of deep clear blue, charmingly veined with other tints. It seems to belong to the Siberian family, with tufted roots instead of rhizomes. The flowers are said to be three inches across. As these grow in exposed places where the mercury touches 40 below they must be very hardy. The foliage and seed pods resemble the Siberian type. I secured both plants and seeds and sent some also to B. H. Farr of Reading, Pa., for him to test, as he is the best expert along that line in America probably. I am really in hopes something will come of it, and we can probably cross it with other sorts and so add to our great iris collection. By the way a manual on the iris is now in preparation. This was much needed as there was no work at reasonable price within the reach of common people.

Mr. Vallenthime has about two hundred acres, fifty of which is fine fertile valley land. He now proposes to raise millions of evergreens, mostly spruce for which there is a great call and it is impossible to supply the demand. His home is in the valley where you hear the soothing lullaby of a stream of purest water which he can use for irrigation if need be. The charming valley is hemmed in by hills covered with evergreens and it is a quiet and charming place and a very congenial home for raising young conifers.

York, Neb.

C. S. Hammon

New Chinese Vines and Their Uses

A race of trailing plants is being introduced to British gardens by Messrs. J. Veitch & Sons, under the general name of *Vitis*, that are destined to become very valuable decoratively in the garden. Mostly they are the discoveries of Mr. Wilson in Western China and the borders of Thibet; and being natives of the mountainous regions of those parts of the globe, they are perfectly hardy in all temperate countries of both hemispheres. At the Coombewood nurseries of Messrs. Veitch they have been during the past six years without any protection successfully cultivated in the open air. Similarly with many other plants of a hardy nature, they are amenable to forcing of a gentle kind when grown in pots, thus extending the period during which their peculiar beauty of leaf can be enjoyed. They are plants of easy cultivation, well adapted to covering walls, pillars, rafters and principals in cool greenhouses, for filling hanging baskets and amphorae, and for uses as edgings to plant stages, groups of other plants, either under glass or out of doors. They form capital ornaments in the flower garden when grown as standards tied to poles, like pillar roses, or for forming garlands and suspending from chains, or as arches above beds filled with flowering plants, and several other purposes that will occur to the intelligent gardener. As hanging screens to porches with open arches, similarly to the *Ampelopsis quinquefolia* and *A. Veitchii*, they will be admirable substitutes for these species.

Vitis megalophylla is a remarkable species with bipinnate leaves 2-3 feet across, resembling individually those of *Koelreuteria paniculata*, glabrous in every part, dark green above, and pale green beneath. The plant makes growths of 8-10 feet in a season. *V. leeoides* is a distinct species having leaves resembling those of the genus *Leea* consisting of five ovate leaflets of a glossy green on the upper surface and claret colored beneath. It is also glabrous in all parts. The edges of the leaflets are serrate with an acuminate apex, and differ in form and contour from all other species. *V. Henryi* is a very ornamental vine having digitate leaves consisting of five lanceolate leaflets with serrate edges. The ground color is a dark velvety green, whilst the midrib and principal veins are silvery white. This variegation is more pronounced in autumn when the ground color becomes red, the midrib and veins remaining white. *V. armata* possesses dark green leaves in summer, changing to various bright reddish tints in autumn. *V. armata* var. *Veitchii* is a strong climber and the most decorative vine as yet distributed. It may be grown successfully in any situation. The tint of the leaves in the autumn is a rich crimson lake, and in the summer it is a shining bronzy green. *V. flexuosa* var. *Wilsonii* is a distinct form of the species, and highly ornamental. The neat foliage is of a deep bronzy tint with a metallic lustre, and the under surface of the young leaves is of a bright purple color. *V. repens* is another hardy ornamental vine, of vigorous growth and self-clinging, therefore makes a first-class wall plant. The leaves when young are of a red-brown tint on the upper surface and claret colored beneath. The older leaves are about 6 inches in length, slightly trilobed, deep green

with a peculiar velvety appearance. *V. Thomsonii* is a pretty species with stems and leaves of a purplish tint. The leaves consist of five leaflets, greenish purple above and bright claret beneath, changing in autumn to purplish red. The growths being slender, make the plant well adapted for situations in which stronger growing species would be unsuitable.

Fredrick Moore

Roses Under Glass

VENTILATION

With the advent of autumn the real importance of a thorough knowledge of the art of ventilation becomes apparent. Stock which has been properly ventilated "night and day" and otherwise carefully treated during the summer, should now be in a condition fit to undergo all the vicissitudes of fall and winter culture. But stock, even of the finest character, can soon be spoiled by careless or imprudent ventilation and when plants have thus been allowed to suffer the utmost care and skill is required to bring them back to good growing condition again.

Ventilation at night requires the same careful thought and judgment as is bestowed upon it during the day. It is a pitiful fact that some growers overlook or do not know this, and frequently the best efforts of the man in charge during the day are nullified by a few hours of misdirected work at night. If the night temperature required is 60 degrees this should be kept up at all hazards, but the proper way to do this is not to close the ventilators to exclude the cold air. The air must be kept in circulation and if this cannot be maintained without the aid of artificial heat, by all means start a fire in the boiler and supply the heat.

The practice of closing the ventilators and withholding heat is very conducive to fungous diseases and cannot but result in weakening the growth of the plants and making them susceptible to mildew and all the other troubles the rose is heir to.

INSECTS

Red-spider should not be allowed to make headway as it is one of the most insidious pests we have to contend with during the winter. Syringe thoroughly when the weather is favorable and give particular attention to those plants situated near to the pipes where the air is dry and warm, as there is where you are likely to have the most trouble.

The green-fly is now becoming troublesome and the houses should be fumigated regularly to keep them in check. Tobacco stems or tobacco extracts are usually effective for this purpose and can be obtained from any of the firms who advertise in these columns.

Advantage should be taken of the cold nights to paint the steam pipes with sulphur. If this is done, and the ventilation is properly attended to, there will be little trouble from mildew.

J. E. Simpson

Three Good Orchids

*Vanda Sanderiana.*

VANDA SANDERIANA

Vanda Sanderiana is no doubt one of the most beautiful orchids known, but owing to the high prices generally asked for imported plants it is still quite rare in collections and it certainly would not be a profitable plant for the commercial man to grow either as a flowering plant or for cut flowers. However, it is possible that plants could be raised from seeds and distributed amongst the different collections at a price within reach of all. Of course it would require a good deal of patience until the plants would be of flowering size, but the final reward would pay for all the trouble taken. Under ordinary circumstances plants ought to be big enough to flower in five to six years and perhaps sooner as orchids raised from seed grow away much faster after the first year or two than imported plants.

The flowers of this lovely *Vanda* measure about four inches across, the dorsal sepal and petals are pink, the two lower petals are pale nankeen outside, yellowish inside, veined and reticulated with dull crimson and bordered with the same color as the dorsal sepal and petals, and the lip is of a reddish-purple suffused with dull green at the base and of a bright chocolate purple toward the tip.

Being a native of Mindanao, Philippine Islands, it requires stove temperature to grow it well; broken potsherds covered with living sphagnum moss is all the compost required. A light shading during the hot summer months will keep the leaves from getting yellow, but too dense a shade will mean fewer flowers. Keep moderately dry in winter, else the roots are very apt to rot.

The photograph represents only a small spray. A fine specimen plant which carried 127 flowers was figured in the *Orchid Review*, Vol. IV; it must have been a beautiful sight, and if the plant is still alive it ought, by this time, to beat anything in existence in this line.

*Dendrobium formosum.*

TRICHOPELIA TORTILIS.

The subject of our cover illustration is a pretty little summer flowering orchid, native of Mexico. The large, solitary flowers have the sepals and petals spirally twisted, yellowish green with brownish blotches along the middle part: the lip pure white outside, the throat blotched within with yellow and rose. It is a very neat little plant, growing only about six inches high and gives a good deal of satisfaction for the small amount of room it takes up. Here it grows well suspended from the roof in a partly shady situation in the cattleya house.

DENDROBIUM FORMOSUM

Dendrobium formosum is a fine fall-flowering *Dendrobe* of the nigro-hirsute section. Its beautiful white flowers measure from 4 to 5 inches across and are very fragrant, reminding one of the odor of water lilies. For the commercial man it is one of the best paying orchids to grow for it flowers at a season when other white orchids are scarce and therefore a good market for them is easily found. New imported plants can be bought at a reasonable figure and if taken care of will well pay for themselves the first season. They should be watered very sparingly during the winter months, but in summer, after the young growths are well rooted until the flowers are open, plenty of water should be given and an occasional dose of weak liquid manure. They are best grown in full sun all the year with plenty of fresh air at all times. They do not require as much heat as other *Dendrobiums*; in winter from 50 to 55 degrees at night with a rise of 5 to 10 degrees through the day will be about right; in summer as near 60 degrees at night and 65 degrees through the day will suit them well. When potting use small pots and just a little osmunda fibre on top of the crocks.

the veteran auctioneer, never faced a more aristocratic audience. Vanda Sanderiana, the beautiful orchid illustrated in this issue, reached the highest price of the sale, H. A. Siebrecht paying \$900 for the plant which had originally cost Mrs. Morgan not far from \$2,000. Mr. Siebrecht had, as competing bidders, Louis Menand, Isaac Buchanan, William Court representing Veitch & Son, and John Bergman representing Sander & Co. Charles J. Osborn of Mamaroneck was said to be the party Mr. Siebrecht represented. There were other sensational sales recorded; *Cypripedium Morganianum* went to Veitch for \$750 and Vanda Lowii to the late W. S. Kimball for \$400. *Cattleya labiata*, now the great stand-by of the commercial florist, was a rare bird twenty-four years ago. G. W. McKenzie paid \$160 for a *C. labiata* with eight bulbs; Veitch paid \$90 for a *labiata* and \$200 for a *Cattleya Skinneri alba*.

Little did the orchid enthusiasts of that time think that within a couple of decades there would be tens of thousands of square feet of glass devoted to *Cattleya labiata*, *C. Mossiae*, *C. Trianae* and other rich and beautiful orchids for the every day use of the commercial florist. A few years later F. Sander visited this country and took occasion to make a prediction regarding the use of orchids in cut flower work which has been fully verified and there is every prospect that for many years to come the growing and the sale of orchids for such use will continue to increase. The scarcity of this class of flowers at certain periods will undoubtedly be eliminated in time through the cultural skill and ingenuity of our growers. There are many species not as yet grown for commercial purposes that will in time find favor. For the famine season of early fall more might be grown to advantage of the sorts which are responsive at that time of year such as *Cattleyas* *Bowringiana*, *Gaskelliana* and *Eldorado*, *Odontoglossum grande*, *Vanda cœrulea*, *Dendrobium formosum*, several of the *oncidiums*, etc., and we have no doubt the florist trade would absorb them. The irregularity of the supply and the disappointment of being unable to procure them sometimes when most needed has been the main damper upon the orchid's more general use by florists.

The twentieth century is conspicuous for many steps forward. Science and sociology have gone hand in hand and the business world has done its best to keep pace. One of the many ameliorating conditions brought about has been shorter hours for the workers. For many a day the florist, both wholesale and retail, has had no hours. Now all this is changing. In most of our big cities, the wholesaler at least, gets through early in the afternoon, and is in good shape to hustle by daylight of the next morning. Conservative Philadelphia is a laggard in this humane field; but at last comes the news from there, that the time-honored 8 P. M. closing hour of the commission houses has had its death knell sounded. One big house there (the Pennock-Meehan Co.) has had the courage to face the issue and announces that from now on their store will close at 6 P. M. the year round (holidays and such special occasions excepted). They may lose some trade at first, but eventually they will gain and get full credit for progressiveness and an aptitude to conform to the spirit of the age. We should not be surprised to see the idea of earlier closing gain favor with the retail dealers also. Once the public get accustomed to it they will accept the situation as they have in other lines of retail trade where a similar reform has been put in operation within a few years.

A memorable occasion

Just twenty-four years ago, September 30, 1884, an event of all-absorbing importance in the orchid world took place, for then the world-renowned collection made by the late Mrs. Mary J. Morgan was put on sale in New York. The buyers came from everywhere in this country and even from England. William Elliott,

ABOUT CONVENTION RATES.

EDITOR HORTICULTURE:

Dear Sir,—My attention has been called to an editorial in your paper regarding reduced rates for the convention and criticising by implication the undersigned for failure to get concessions for the S. A. F. convention, in view of the fact that the National Nut Growers' Association, which meets, I assume, in the territory of the South-eastern Passenger Association, was able to get special concessions.

It may not be known to all of your readers that the United States is divided up, one may say, into districts, so far as the railroad passenger traffic is concerned, each one presided over by a special association. Both Cincinnati and Niagara Falls are in the territory of the Central Passenger Association; Poulan, Ga., is in one of the Southern associations.

The method of obtaining a reduced rate is to first apply to the association controlling the territory in which the meeting is held and then to apply to all other traffic associations. The association in whose territory the meeting is held acts first and the other associations generally follow the lead of the one controlling the special territory affected. The Central Passenger Association refused, both last year and this year, to grant any concessions except on a requirement of an attendance of one thousand, and this year the other associations refused to make any rate for that reason. It is evident that the Southern Association in the case of the Nut Growers' meeting made a rate and the other two associations made the same rate, although it does not appear from the article in your paper that the Central Association has joined in the agreement or made any special rates.

If your article is meant as a criticism of the arbitrary actions of the various passenger associations, the writer has nothing but approval to express. If, however, it is intended as a criticism of the present officers of the S. A. F., the writer must most emphatically protest. Yours truly,

W. N. RUDD, Secretary.

The editorial in question was not inspired by a desire to criticise the officers of the S. A. F. but was written in the hope that it might help towards creating an agitation which might culminate in a sentiment among the S. A. F. members, aggressive enough to follow up the "arbitrary actions of the various passenger associations" and to insist that the S. A. F. gets at least as much consideration as any other organization of equal size and importance. The facts of the division of territory among the various passenger associations are as stated by Secretary Rudd and, we think, are generally understood, as they have been published annually in S. A. F. programs and in the trade papers for many years. The experience of the writer does not conform to Mr. Rudd's assertion that "the other associations generally follow the lead of the one controlling the special territory affected." On the contrary, they very often refuse and the further removed they are from the convention location the more reluctant they are to cooperate with the initial passenger

committee which, for obvious reasons, is the one most likely to be liberally disposed. Our understanding of the situation in the case of the Nut Growers is that the Central Passenger Association has agreed to a fare of one and three-fifths on the certificate plan in its territory for the round trip for those wishing to attend the Georgia meeting from points within its jurisdiction. If we are correct—and we have the printed statement of the secretary of the Nut Growers' Association to this effect—then it does seem that the discrimination in the case of the S. A. F. needs some other explanation than the one accepted by our Secretary Rudd. Not that any explanation is of any value now except possibly as a guide and basis on which to begin the campaign for a favorable rate next year. The experience of the writer in dealing with the chairmen of the various passenger committees for many years has shown these gentlemen to have very thick hides, due no doubt to the constant appeals from organizations of every stripe which they have to withstand, so it is well to begin early and watch every trick.

POLYGONUM LANIGERUM.

Plants having fine, large, grey foliage are rarities in the garden; at the same time they have their uses, contrasting as they do with the green and colored foliage of numerous decorative plants, sub-tropical and others; as for example with wigandias, cannas, musas, aralias, etc., and with such flowering plants as *Dahlia imperialis* and the florists' varieties, both single and double flowered, and several other species employed in sub-tropical groups.

The plant is not particular as to soil, but it needs a hot and sheltered position, and much moisture in warm weather; and the tall stems to be securely fastened to sufficiently strong stakes, in order to prevent wind waving, and these should be so arranged as to be concealed under the leaves. The pretty, tailed and waved leaves are narrow and run to a fine point, reaching a length of nearly two feet by a breadth of three-quarters inches. The flowers are terminal on the shoots, are pale pink, and only visible at close quarters. The plant should be left to its fate at the end of the summer and a fresh stock raised from seeds in early spring.

F. M.

SCARCITY OF AZALEAS AND PALMS.

We learn from several sources that the cold wet summer in Belgium has prevented azaleas from making their usual growth and for that reason plants will not be so liberal in size or so well budded as in former seasons. Deliveries now arriving bear out these statements.

Palms are as scarce as ever, principally owing to the large demand from Germany, Russia, England and France. Azaleas are up in price and will be higher by next fall. Dresden growers have taken over 500,000 more plants than usual from Ghent this fall. Araucarias are plentiful.

BY "WIRELESS" FROM "THE HEART OF THE COMMON-WEALTH."

H. F. A. Lange, of Worcester, Mass., who has been in rather poor health for some time past, is feeling much better of late, which will be pleasing news to a host of friends throughout New England and elsewhere. Mr. Lange has carried on the florist business in Worcester for 41 years and at his greenhouses may be found, now as always heretofore, everything worth trying among the new introductions in florists' material. Mr. Lange's two sons, Albert H. and Carl C., are in charge of the greenhouses and the store, respectively. It is especially gratifying to find *La Detroit* among the roses most highly prized here. Carl Lange pronounces it the best of all the summer roses, being a splendid bloomer with long stems, a good keeper in the warm weather and always popular. Suburban and country florists who do business all the year round should give *Detroit* a good space in their rose houses. Another rose that is prized here is *Mrs. Jardine*, the blooms of which are now beginning to come full and bright and the delicious fragrance of this rose wins for it every time. President Carnot and Kaiserin are indispensable for the summer trade. *Chrysanthemum* *October Frost* is now coming in with excellent flowers and both this variety and *Golden Glow* are in short supply for the daily demand.

Albert B. Knowlton, of North Grafton, is exclusively a carnation grower and has a range of considerable extent. It is a question if there is another place of equal size in which not a single vacancy or dead or sickly plant can be found. We heard a carnation grower of high repute recently referring with much pride to the fact that he had not lost an average of over half a dozen plants per house this season. Whatever may be the reason, it will be agreed that Mr. Knowlton's experience is very unusual. The varieties most largely grown are *Fair Maid*, *Boston Market*, *Winsor*, *Beacon*, *Lawson* and *White Perfection*. North Grafton is a suburb of Worcester, six miles out, and is in a very fertile region.

William Gardner, whose son has been caring for his place at Westboro, Mass., while he was running for the mortgagee the establishment formerly belonging to Coolidge Bros. at South Sudbury, has given up the latter and will give all his time to the Westboro place when he has erected an additional carnation house this fall.

Some of the aster growers in Central Massachusetts have adopted the plan of growing asters under cloth. This protects them against bad weather and at the present time when rain and fog have practically ruined the exposed aster crop these growers are able to market perfect blooms which, in the scarcity of salable flowers, bring a good price. Why shouldn't this method be more generally followed?

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

The annual dahlia exhibition of this society was held at Unity Hall, in the capital city, Hartford, Sep. 23-24; and, despite unfavorable weather on both days, which diminished the attendance, the consensus of opinion is that it was the largest and best show of dahlias ever seen hereabouts.

The stage in the hall was artistically arranged with palms and palmettos from the greenhouses of James J. Goodwin; and the walls were attractively covered with asparagus, eulalias and vari-colored grasses, interspersed with asters on the window sills. On the main floor, on long tables, were arranged, in vases and bottles, the various classes of dahlias, surpassing in form, color and richness, anything ever shown around here before. Besides the immense profusion of dahlias numerous other cut flowers were present, for exhibition only, lending an additional charm to the already delightful display. Among these latter were Crego asters, shown by Magee Pratt; helianthus, by Mrs. J. M. Adams; tea roses, phlox, gaillardia, coreopsis, desmodium and digitalis, by the Holcomb Street Nurseries, who also had a fine display of evergreens outside the front door; salpiglossis, by D. W. Mix, of Bristol; Japanese asters, by John Gerard, of New Britain; roses, by Neil Nelson; gladioli, by John H. Holcombe of New Haven, and by L. H. Robertson; anemones, by President John F. Huss; azaleas, by Mrs. W. Seliger ("Garden Notes"). Spear & McManus, and John Coombs, local florists, also made tasteful displays of cut flowers.

Peter Zuger, florist of the city parks of Hartford, showed 125 varieties of dahlias, not for competition, but received a special award, as did also George W. Smith, of Melrose, for a handsome exhibit of 18 varieties of fruit.

Among the largest exhibitors of dahlias, in the professional class, were President Huss; H. F. Burt, of Taunton, Mass., and J. H. Holcombe, all of whom received numerous awards in the various classes. Others in the professional class obtaining prizes were Neil Nelson; David Herbert & Son, of Atco, N. J.; W. W. Hunt; W. S. Mason, of Farmington, and James P. Ralph, of New Britain.

In the amateur classes, James M. Adams received first premium for the best collection, and Mrs. Adams took the first prize for the best floral piece of dahlias. A. Righenzi was awarded several premiums, including the silver medal offered by Stumpp & Walter, of New York city, for the best collection of cactus dahlias shown by an amateur. Others taking honors in the amateur class were C. J. Barbour, L. H. Robertson, C. A. Helfricht. The following special awards were also made: Diploma, E. F. Atwood, for best collection of dahlias not yet disseminated; honorable mention, Neil Nelson, for vases of roses; certificate of merit, James W. Scott, for collection of evergreens; vote of thanks, to John Gerard, for collection of asters.

The judges were A. H. Wingett and F. Heereman, both of Lenox, Mass.,

whose work was performed with efficiency and impartiality.

We are now looking forward to our chrysanthemum exhibition, which will take place in Hartford on Nov. 4-5.

GEORGE W. SMITH,
Secretary.

Melrose, Conn.

AMERICAN CARNATION SOCIETY.

We are now engaged in making up the premium list for the Carnation Exhibition, to be held at Pittsburg, Pa., January 26-27, 1910, in connection with the 19th annual convention of our society, and we are now taking advertising matter for this list. If you have ever tried this list as an advertising medium, you will know that it is one of the very best. If you have never tried it, we urge you to give it a trial this year. Every copy will be put into the hands of some live up-to-date grower, or dealer, who buys of any good article brought to his notice.

The proceeds from these "ads" are used to defray the expenses incidental to this convention, and when you consider the great good these exhibitions are doing for the trade, you will see that we give double value for the cost of the ad. You get the advertising, and then we spend the money on improving your trade. There is no better business proposition offered than this. The new list will be similar in size and general make-up to previous lists. Kindly send us copy as early as possible to insure good position.

Special premiums are also solicited for this exhibition, which will, without any doubt, be the best our society has ever held. State full particulars.

Pittsburg is centrally located, and you are urged to arrange to be present and bring a new member.

The dues are \$2.00 annually, with an additional entrance fee of \$1.00 for new members.

ALBERT M. HERR, President,
A. F. J. BAUR, Secretary.

Grimm & Gorley, St. Louis, Mo., register new carnation, Vincent's Pink—Guardian Angel x Enchantress; color Bridesmaid pink; size, 3 to 3 1-2 in. Compact and vigorous grower. No surplus grass. Five years' trial proven satisfactory.

A. F. J. BAUR,
Secretary.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registry of Berberis Thunbergii, Var. Silver Beauty.

Mr. M. J. Van Leeuwen advises that this variety originated in 1905 instead of 1908 as published, a mistake having been made by him in writing the date in his application.

W. N. RUDD, Sec'y.

BUFFALO FLORISTS' CLUB.

The next regular meeting of this club will be held on Tuesday, October 5th. A good attendance is looked for on account of the paper which will be read by W. A. Adams on the "Slaughter of Flowers."

MINNESOTA STATE FLORISTS' ASSOCIATION.

The September meeting of the Minnesota State Florists' Association took place on September 21 at St. Paul, President Wirth being in the chair. To induce more employees to join the association the dues were cut down to \$2.00 for the ensuing year.

Messrs. Smith, Dysinger and Swanson were appointed a committee to draw resolutions on the death of Governor Johnson.

An invitation from the State Horticultural Society to take part on their program at the annual meeting in December was accepted. The executive committee will decide the best way of participating; probably some papers of general interest will be read, and possibly some good house plants will be exhibited.

The executive committee is getting busy in forming the details for the fall flower show in 1910, to be held in the city which furnishes the largest guarantee fund.

Mr. Smith, Lakewood Cemetery, offered to read a paper at the next meeting on "The Employes' View of the Employer." A. Swanson will take the other side, "The Employers' View of the Employee." It is the intention of the executive committee to have a detail of police there in case the debate should get too interesting.

NEWPORT HORTICULTURAL SOCIETY.

At a regular and well attended meeting of this society held on the evening of Sept. 28, a large volume of business was transacted in connection with the recent exhibition and all being done in harmony with the report of the judges and the secretary. The silver cup offered by Rickards Bros. of New York, for the best table decoration was then presented to A. J. Dorward, the winner, Colonel A. K. McMahon making the presentation speech, which was of some length and in keeping with his reputation as a natural orator. Alex. MacLellan had on exhibition a very attractive table of seedling single dahlias, which were examined by a committee, and one vase of a crimson variety with yellow centre was awarded a first class certificate of merit. This variety was pronounced to be an improvement on the well known Newport Beauty, and is named "Kype." The business part of the meeting was followed by a discussion on how to improve the premium schedule for another year and many good suggestions were brought out.

AMERICAN ROSE SOCIETY.

The executive committee of the American Rose Society will meet at the office of Messrs. Traendly & Schenck, 44 West 28th street, New York City, on Wednesday afternoon, October 6th, at 3 o'clock, to take up matters of some importance relative to the preparation for the coming exhibition to be held in the American Museum of Natural History, New York City.

BENJ. HAMMOND, Sec'y.

ROYAL HORTICULTURAL SOCIETY.

The hall at Vincent Square, Westminster, was fairly well filled on August 31 with flowers in season such as shrubby phloxes, kniphofia, montbretias, Rhododendron Javanico-Jasminae-florum hybrids, including the variety *Clorinda*, new, and of a pink color; miscellaneous hardy herbaceous perennials, gladiolus, clematis, and from Messrs. J. Veitch & Sons a large collection of plants yet new to British gardens, introductions from China and Manchuria through Mr. Wilson; and several exhibits of miscellaneous species of orchids, many of which were of interest for their novelty and the beauty of their flowers, or some peculiarity of their shape or coloring.

Charlesworth & Co. were the exhibitors of the largest number of orchids, if not of the most novelties; and some beautiful species and varieties were remarked, of which I specify a few. *Laelio-cattleya Elva* is distinguished by a rich purple lip and a throat of a golden yellow decorated with purple lines; *L.-c. Dominiana*, a grand hybrid raised by the late John Dominy from a cross between *Cattleya Dowiana* and a *Laelia*, probably *L. elegans*; *Cattleya Mrs. Pitt*, *C. Venus*, *C. Rhoda*, a flower having a rich purple lip on which are lines of bright yellow, the sepals and petals being green shaded with purple.

Ed. V. Low showed *Cattleya Gaskelliana alba*, a Venezuela species, as are all *Gaskelliana*, which originated with the late B. S. Williams of Holloway. The flower has pure white sepals and petals 6 inches in width with but a slight yellow stain in the throat; and the rare *Bulbophyllum grandiflorum*. R. G. Thwaites received an Award of Merit for *Sophracattleya Blackii*, a hybrid between *Sophranitis grandiflora* and *Cattleya Hardyana*. The flower is of a rich crimson tint, having a yellow stain at the base of the lip, and is about 3 inches in width. This exhibitor showed another *Sophracattleya* in *S.-c. Warnamiense atro-purpurea*, a cross between *Sophranitis grandiflora* and *Cattleya amethystoglossa*; the flower is purplish crimson and the segments are less in width than the foregoing variety. He showed likewise plants of *Odontodia Thwaitesii*, of deep purple tint. Sir Trevor Lawrence showed a plant of *Zygopetalum Lindenii*, a beautiful species allied to *Warszewiczella velata*, but it has flowers larger in all their parts, and the color is white with a few lines of purple at the base of the lip—a very charming species. Sir Trevor received a Botanical Certificate for *Listrostachys (Angraecum) forcipata*, a plant with minute tubular semi-transparent white flowers. The plant has creeping rhizomes, and is of very dwarf habit.

Lieut.-Col. G. L. Holford was awarded a Silver Flora Medal for a group of orchids, and Award of Merit for *Laelio-cattleya Oriole*, a brilliantly colored flower of moderate size. He had a very beautiful *Brassacattleya Digbyana Warnerii*, a name that sufficiently indicates the parents of the hybrid. H. S. Goodson, was the recipient of the Silver Flora Medal for a group of orchids, as were Messrs. Sander & Sons, St. Albans, for cattleyas and laelio-cattleyas, most of which had been previously shown at the Hall.

Stuart Low & Co., Bush Hill Park,

Enfield, were awarded a Silver Bank-sian Medal for a mixed group of cattleyas, cypripediums, odontoglossums, etc., but nothing of outstanding merit.

F. W. Moore, curator, Dublin Botanical Garden, Glasnevin, received a Botanical Certificate for *Dendrobium muricatum*, a small plant having one spike of about a dozen brown-colored flowers, of merely botanical interest.

Miscellaneous Exhibits.

Much interest was manifested in Messrs. Veitch & Sons' new introductions from eastern Asia, not many of which were, however, in bloom. I may call attention to two *Acers*, viz., *A. Davidii* and *A. griseum*; *Lonicera Maackii*; several *Buddleias*; *Pinus Armandii*, a pine having fine needles of the *Cembra* section, oblong cones, and smooth bark of a dull yellow color—in its native habitat the tree attains a height of 40 to 50 feet; *Tilia Oliveri*; *Cotoneaster reflexa*, with crimson fruits of globular shape, and the size of marbles; *Ilex Perneyi*, a dense growing holly, leaves pale green when young, and becoming darker as they age—the plant obtained a First Class Certificate from the R. H. S. in 1908; *Viburnum rhytidophyllum*, an evergreen shrub having very fine foliage, the individual leaves about 8 inches in length and 2 inches in breadth, a dark green, the under side covered with a dense dun-colored felt—the flowers are of a yellowish white tint and come in corymbs at the ends of the shoots; *Viburnum Henryi* and several new species of *Vitis* of remarkable appearance, and highly decorative were noted as being suitable for a variety of purposes in the garden.

R. Wallace & Co., exhibitors of gladiolus, showed some varieties of *Le-moine's* hardy hybrids, mostly consisting of dark blue or purple tints. They had also *G. primulinum* hybrids in red and yellow colors, having good long flower spikes with numerous flowers; a very distinct race.

FREDERICK MOORE.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Examining Committee.

President Elmer D. Smith has announced the committees to examine seedlings and sports on the dates as follows: October 2nd, 9th, 16th, 23rd and 30th, and November 6th, 13th, 20th, and 27th. Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of \$2.00 should be forwarded to the secretary not later than Tuesday of the week preceding the examination or may accompany the blooms. Special attention is called to the rule requiring that sports, to receive a certificate, must pass three committees.

Boston, Mass.—E. A. Wood, Chairman; James Wheeler, Wm. Nicholson. Ship flowers to Boston Flower Market, care John Walsh.

New York.—Eugene Dailedouze, Chairman; Wm. Duckham, A. Herring-ton. Ship flowers to New York Cut Flower Co., 55 W. 26th street, care of chairman. All flowers to be on hand by 2 p. m. on day of examination.

Chicago.—J. B. Deamud, Chairman; Geo. Asmus, W. H. Kidwell. Flowers should be sent care of J. B. Deamud,

51 Wabash avenue, and should arrive by 2 p. m. on day of examination.

Philadelphia.—A. B. Cartledge, Chairman; John Westcott, W. K. Harris. Ship flowers to chairman, 1514 Chestnut street.

Cincinnati.—R. Witterstaetter, Chairman; James Allen, Henry Schwartz. Ship flowers to Jabez Elliott Flower Market, care of janitor.

NEW ENGLAND DAHLIA SOCIETY.

"Maurice Fuld, secretary of the New England Dahlia Society, in a letter to the *Globe*, says that the annual meeting of the society was not held last Friday at Horticultural hall. He adds that there is but one New England dahlia society, and that its bylaws require the annual meeting to be held in January.

The officers of the New England dahlia society, he says, are as follows: William F. Turner of New Bedford, pres.; Henry W. Kendal of Newton, vice-pres.; Maurice Fuld of Boston, sec.; N. Allen Lindsay of Marblehead, treas.; F. W. Ela of Woburn, J. P. Bodge of Fall River, W. D. Moon of Lynn, George H. Walker of North Dighton and T. H. Tyndale of Boston, ex. com."—Boston *Globe*.

CLUB AND SOCIETY NOTES.

The Berkeley County Horticultural Society are perfecting plans for a fruit exhibition and carnival at Martinsburg, W. Va., about the middle of November. Prizes to the value of \$1000 will be offered in the fruit section.

The executive committee of the New Bedford Horticultural Society has awarded the silver cup presented by Mrs. H. A. Jahn for the best exhibit in its flower show to James Garthly, gardener for the Rogers estate. This is the prize concerning which a misunderstanding developed, and which the judges declined to decide upon, because they were represented by exhibitors.

The New London County Horticultural Society dahlia show in Buckingham Memorial Hall, Norwich, Conn., on September 24 and 25 was a big event. Among the dahlia exhibitors of prominence were O. P. Chapman, Jr., John J. Kennedy, E. S. Manuel, W. W. Ives and C. A. Norcross. The table from Mrs. William Camp Lanman's estate, gardener C. T. Beasley, included some lily of the valley and magnificent roses. S. A. Gilbert showed gladioli; John Davy had a notable collection of tuberous begonias. The judges were Peter Zuger, John Malloney and Alex. MacLellan.

The annual meeting of the American Pomological Society was held at St. Catharines, Canada, September 14 to 17. Among the interesting addresses were those of Dean L. H. Bailey of Cornell; J. C. Van Lindley, Pomona, N. C., who shipped over 14,000 crates of peaches this year; and John S. Collins on "Oriental Pears and Their Hybrids." The officers were re-elected as follows: President, L. A. Goodman, Kansas City, Mo.; vice-president, T. V. Munson, Denison, Tex.; secretary, John Craig, Ithaca, N. Y.; treasurer, L. R. Taft, Agricultural College, Michigan; chairman executive committee, C. L. Watrous, Des Moines, Ia.

THE CULTURE OF LILIES.

I am particularly interested in the remarks of A., on p. 163, on the deplorable custom of the Japanese of denuding the bulbs of lilies of their roots prior to packing them for shipment to England. I have repeatedly called attention to the matter during the past 25 years. This practice appears almost universal among the lily exporters of Japan. During the past 40 years or so many consignments of *L. auratum* have been worthless, the bulbs being rotten or affected with fungus. Of the sound bulbs which are received, a large number quickly perish when placed in contact with the soil; whilst the few that flower fail to succeed in the following year. The reason of the failure is not far to seek. The lily makes but two sets of roots each year—the basal and the fibrous. The basal roots are formed when the flowers are fading, and are generally cut away with any old roots that remain. Hence, for any subsequent growth or flowering the plant is dependent upon the stem roots so abundantly produced above the bulb, and the latter usually collapses when the flower-stem is approaching its full height. This is the brief history of many thousands of lily bulbs that reach England each year, the great bulk of them failing to produce a basal root at all. Were it otherwise, there would be no difficulty whatever in establishing many kinds in large numbers. This state of things is extremely disappointing, and it is time that purchasers demanded that the bulbs be shipped with the full complement of their roots as dug from the soil. Such a proceeding would naturally do away with the existing system that obtains in Japan of moulding the bulbs in tempered clay, and, in place of the now plump-looking and rather heavy bulbs, with rootless base and fungus-affected core, we should see a less plump, fresh-looking bulb, somewhat shrivelled it may be, so far as the outer scales are concerned, but with roots intact and capable of immediate resuscitation when replanted in the soil. To what extent shrivelling would take place would largely depend on the system of packing, though, for *Liliums* generally in the dormant state, ordinary packing between thin layers of rather dry soil would suffice. In this connection, it is instructive to recall the fact that Mr. E. H. Wilson, when collecting lily bulbs in China, made a point of retaining all the root-fibres to the bulbs, and no trouble was subsequently experienced in establishing the plants. An alternative plan to importing bulbs would be the raising of seedlings on a large scale, and this, in conjunction with the raising of home-grown stocks of lilies from scales and bulbils, is well worth attempting in this country. An important point to remember in this work is that many species of lilies require to be treated not as perfectly hardy subjects, but rather as cool greenhouse plants during their two first seasons of growth. At first sight it may appear a little illogical to accord greenhouse treatment to a perfectly hardy subject, but the disappointments, failures and losses of either open-air or cold-frame treatment are known to all who have engaged in the propagation of the lily by these means. Frequently in the case of *L. auratum* and *L. speciosum* in all their forms, and, indeed, many

Have you followed the advertising running in these columns on

A-P-H-I-N-E

It has already explained much of the merits of this wonderful insecticide discovery, which effectually destroys plant lice of every species, without the slightest injury to the tenderest flower or foliage.

If you have not, send for the new descriptive circular.

GEORGE E. TALMADGE, Inc., Manufacturers
MADISON, N.J.

other species of lilies that do not produce bulbiferous growths on the more exposed parts of their stems, there will be found near the base and just below the ground level a number of bulbils that will furnish useful stock. Your correspondent speaks of *L. rubellum* as a comparatively free seeder from imported bulbs, and says "seed may readily be obtained and ripened" if the blooms be pollinated. That, however, is not my experience, inasmuch as a large percentage of the bulbs do not reach the flowering stage at all. But where flowers are produced, there is no better way of increasing this delightful plant. In the note on p. 169, referring to the home-raised lilies shown in the Supplementary Illustration, the concluding sentence is as follows: "Being a stem-rooting lily, the bulbs should be planted 3 to 4 inches deep." I believe, however, that all stem-rooting lilies may be buried much more deeply than this to their advantage. It is also important, too, that these stem-rooting kinds be given a rich food supply, renewed or augmented annually at the surface.—E. H. Jenkins., in *Gardeners' Chronicle*, London, September 18, 1909.

THE LILIUM LONGIFLORUM MULTIFLORUM CROP IN JAPAN.

The crop of large-sized multiflorums is reported to be a complete failure. The bulbs when taken up were hardly any larger than when planted out, although the plants looked finer in the fields than in any season before. The growers attribute this failure to the continuous rain during the month of June.

Lilium longiflorum giganteum, which is dug later, seems to have suffered also and the crop will not be as plentiful as expected, according to cable advices received by New York importing houses.

We are pleased to learn from James Vick's Sons, Rochester, N. Y., that while they have been looking for a good trade in bulbs this fall, they are actually surprised at the large number of orders they are receiving, and that their total sales thus far surpass all previous records. This is the legitimate and logical result of winning a reputation for sending out satisfactory goods.

NOW YOU ARE TALKING

Of placing that order of Fall Bulbs. Why not send it to a concern which buys the best imported stock regardless of cost? Our bulbs come from a grower who has furnished us good stock year after year. Not a single complaint was made to us about the quality of our regular wholesale stock last year. **Isn't that worth considering?**

MOREOVER YOU WANT TO SAVE MONEY

The new Tariff Bill established lower duties on nearly all kinds of Bulbs. We have so adjusted prices as to give you the benefit of every cent of the decrease. **Isn't that an advantage worth taking?**

Don't delay. Send your order before the most popular kinds are sold out. Mention this paper when you write.

JAMES VICK'S SONS, - - ROCHESTER, N. Y.

Seed Trade

Seed Corn.

Reports at this time about the corn crop are just a trifle conflicting, but a careful analysis of them leaves conditions much as last reported, though possibly showing a slight improvement in the grand total. Summing up the situation as nearly as it can be gauged at this writing, we should say corn will be short, but withal there will be enough to go around. Quality will not be as good as in some years, and it will not be easy to fill orders for ear corn to the satisfaction of the buyer, and only nubbins and generally imperfect ears will remain for shelling. Even in seasons when the corn crop is fine, the cream of the crop is sold on the ear by many dealers, and those buying the shelled article seldom or never get high grade seed, as a large percentage of it comes from the culls.

Seed Peas.

The anticipated scramble to cover on pea seed has commenced, but offerings are few, and if high class pedigree seed is offered, prices are quite high enough to cause a gasp from the buyer, who quite likely will consider them too high, and will lay low and wait for a break. If he waits long enough it may come, but not before March or April, and then only tag ends will be offered, and because every one will want to clean up on the high market by cutting slightly under prevailing prices. Those who want new high grade stocks must cherish no illusions as to prices. If they succeed in getting such stocks they must pay the prices demanded, and be thankful at that.

Pea Quotations.

Up to the past week no quotations had been made on spot seed peas, but within a few days the writer has seen figures from two sources prominent enough to establish the market for the general trade, and it may be no breach of confidence to mention a few of the leading items. One concern quoted Alaskas at \$5.50, Admirals at \$5.00, and Hartford Market Garden at \$5.00 for immediate acceptance. Another quoted American Wonders at \$5.50, Nott's Excelsior at \$5.00, Gems at \$4.75, First and Best at \$5.00, Thomas Laxton at \$6.00, Gradus at \$6.00, Telephone at \$5.00, Champion of England at \$4.50, Ameer at \$5.50, Duke of Albany at \$5.50, Yorkshire Hero at \$5.00, Canada Field

at \$1.60. These are staggering prices at the opening, but in sixty days they will not look so high, as there will probably be an advance on even these figures before the top is reached.

The Shortage in Vine Seeds.

Warnings of a probable shortage in vine seeds have been given several times in these columns, and while definite information is not obtainable at this writing, enough is known to confirm the fears of a short crop, and at this time it looks as if conditions would at least be as bad as last year, with much smaller reserves. This is certainly the case as regards cucumber seed, and indications are that melons are in no better condition, though it will require a week or two to get anything like exact information. Pumpkins and squashes, while far from satisfactory, are in much better shape than melons or cucumbers.

We Told You So.

Gentlemen, if you are on the short side, get to cover as quickly as possible. HORTICULTURE gave ample and timely warning of the shortage in the pea seed crop, but many doubting Thomases refused to be convinced, while ill-informed correspondents of other trade journals attempted to discredit these statements. How well-founded they were is probably pretty well understood by now. There are certain thickheads who pride themselves on their skepticism, and one is often reminded of a passage in holy writ beginning: "Seest thou a man wise in his own conceit," etc. The rest will be readily recalled, and duly appreciated. By the way, don't forget sugar corn; there will be no famine prices in all probability, but good seed will have a pronounced and definite value, and particularly eastern-grown stock. This admonition is worth repeating.

California Beans.

Barring damage by rain, the California bean crop is assured, and Limas, both bush and pole, will be a fair crop. Such varieties as Lazy Wife, Golden Cluster Wax, Kentucky Wonder, Southern Prolific, Golden Carmine, etc., are in doubt—that is, information to hand does not make it positively clear what the yields will be, though it is generally believed they will be up to average excepting Golden Cluster Wax, and exact information about that has not yet come to hand.

The Corn Pack.

The corn pack will be decidedly short, and New York state will have one of the lightest in its history. Jobbers who have been most persistent bears will wake up to the fact too late, and if the canner has an opportunity of "getting back" at the jobber, he should have no hesitation in doing so, as the course of the latter for the past two years has been one of cold-blooded selfishness, and he has not only made no effort to co-operate with the canner, but has taken merciless advantage of the latter's necessities and squeezed him to the last farthing he would bear. Yet the canner continues to delude himself with the idea that his and the jobbers' interests are identical. He tells the jobber all he knows, and then the latter proceeds to pluck him. A little co-operation would have relieved the congested condition of the canned goods market to a considerable extent. But what's the use? Its none of our funeral.

Notes.

Tomato seed will be short, but no one need worry, as barring a very few of the fancy varieties there will be no famine in tomato seed.

There is a strong probability of important changes in the personnel and management of one or two well-known seed houses within the next few months, but HORTICULTURE is not at liberty to disclose names or other details at this time.

A representative of one of the British seed houses, now on this side, is offering peas at a price, and reports the sale of a car of Alaskas to a canning concern at \$5.00 per bu. He did not state if this included duty of 40 cents per bu., or if duty was extra. In addition to Alaskas, he was offering several other varieties, but all at strong prices; still, if stocks are right they are good values.

The Henry F. Michell Co. were favored this week with a commission from the other side of the world from Capt. Jesse M. Baker, Iloilo, Panay, Philippine Islands, who writes: "Michell's seeds beat everything I have seen yet." In filling the new order for seeds and plants, Mr. Michell is modestly flattered, that a Philadelphia house should be selected in preference to the many great concerns that dot Uncle Sam's domains from the Atlantic to the Pacific.

ANOTHER SEED FARM FOR BURPEE.

A brief telegram from California to Philadelphia last week disclosed two important items of news which are of general interest to the trade. The telegram was from H. M. Earl, manager for W. Atlee Burpee & Co., the Philadelphia seedsmen, and ran:

"Have purchased Lonsdale Ranch. Lonsdale delighted. Suggest calling it Floradale."

There have been rumors of a new move of some kind in the atmosphere of the seed trade all summer, but there need no longer be any guessing about the matter, as this telegram announces an accomplished fact.

It also discloses the second interesting item of news, namely, the selection of Edwin Lonsdale to superintend the new venture. As everybody knows Mr. Lonsdale, it is almost superfluous to mention that he is a horticulturist of long experience and distinction. He was a graduate of the best kind of a gardening school—the big private es-

EDWIN LONSDALE

tates of the English nobility in his boyhood, and as a young man practiced his profession in the eastern states and in California, before finally going in to commercial rose growing and other specialties of the trade at Philadelphia. He retired from this some five years ago to take charge of the gardens, grounds and conservatories at Girard College. Messrs. Burpee are to be congratulated in being able to induce Mr. Lonsdale to again enter the field of strenuous business life. He is just the man for a seed farm where selection and improvement of seed stocks are to be a main object. His mind has always had the scientific and investigating bent and this, with long training and experience, a keen eye, and a tremendous memory, makes him the ideal for the new proposition.

While sweet peas will be a leading feature, all flowers and vegetables that reach their greatest perfection in California will be handled. To put it briefly, the policy will be, with some exceptions, the production of the enormously expensive "stock seeds" which have to be contracted out to other seed farmers in different parts of California. These "seed stocks" have to be

kept up to the utmost purity of type by extraordinary vigilance—so much so as to put them quite out of the question when compared with ordinary commercial prices which the farmer or gardener can afford to pay; but which are absolutely necessary as the antecedent of the reliable seeds a first-class house sends out.

G. C. WATSON.

A WEDDING AT CAMBRIDGE, N. Y.

The marriage of Miss Laura Josephine Rice, daughter of the well-known seedsman, Mr. Jerome B. Rice of Cambridge, N. Y., and Mr. Frederic Wallace of Fitchburg, Mass., was solemnized on September 21st in the Methodist church at Cambridge, which was beautifully decorated with palms, ferns and white asters. After the brief ceremony the bridal party and guests proceeded to the palatial home of her parents where a reception was held. A large platform had been built even with the front porch of the house and brightly decorated with Chinese lanterns lighted by electricity, which made an excellent floor for dancing.

The bride and groom left about midnight by automobile for New York, remaining at Albany en route until the following morning. They sailed for Europe on Saturday, the 25th, for an extended tour, and will be "at home" to their friends about February next.

The number of invited guests present was close to three hundred, while the presents received by the bride were numerous, costly and beautiful. Among those present may be mentioned, in addition to the relatives of the bride and groom, the principal employees of the Jerome B. Rice Seed Co., and leading residents of Cambridge.

CATALOGUES RECEIVED.

A. T. Boddington, New York.—Autumn Garden Guide, 1909. Very attractive in white cover in red, green and gold, designed by H. A. Bunyard. Abundantly illustrated.

Valdesian Nurseries, Bostic, N. C.—Wholesale Trade Price List for Nurserymen, Florists and Dealers only. Amoor River Privet is a specialty with this nursery and they have it in enormous quantity and every size, from 6 inches up to shapely specimens for tub planting.

Stuart Low & Co., Bush Hill Park, Enfield, England.—Special List of Orchids. This is a convenient little handbook printed in green and red and illustrated with several orchid portraits. It will be found useful to the florist wishing to get familiar with the different species and varieties of commercial orchids and their comparative cost. Send for a copy.

LILIUM FORMOSUM

The favorite new type of Easter Lily which has proved so very satisfactory in the past two years. Especially desirable for early forcing.

CHICAGO NOTES.

Controversy Over Garfield Park Greenhouses.

The subject of the Garfield Park Conservatories is again before the public and this time in a way that is likely to prove more than a controversy. According to the Chicago Tribune of September 27, suit may be brought for the cost of rebuilding the dome against the C. E. Carson Co. contractors, by the park commission. The building is said to be one of the greatest structures in America: was built only two years ago and its immense dome has been riddled with holes ever since its completion. Its cost was \$200,000, and the replacing of the dome will cost \$40,000. The contract called for copper, steel and lead for the construction and the park commission blames Jens Jensen, who was at that time superintendent of the Chicago Park System, for not seeing that these materials were used instead of wood and putty. Mr. Jensen says the park commission should have let the job to none but experts in greenhouse construction, and Chicago people in the florists' business are inclined to look at it in the same way. The framework of the glass is badly warped and allows the glass to fly out in the least wind. Certainly the Garfield Park Conservatories are in no condition to reflect honor upon anyone connected with their erection. Bids have been called for at various times for its reconstruction, but firms specializing in greenhouse construction have been a little slow in responding. The original contract was awarded to the lowest bidder, and this is not the first city to have had a somewhat similar experience.

Illinois State Fair.

The State Fair at Springfield, October 5th and 6th, is of interest to Chicago florists. It is expected that quite a number of local growers will be exhibitors, though the interest in the matter so far has not been so lively as the inducements in the way of premiums would warrant, to say nothing of the advertising their business would get. The premium list covers liberal offers to both professionals and amateurs. George Asmus has the matter

WHEN YOU WRITE

a formal note or a social letter, you are often forced to choose between a printed business letterhead, ladies' stationery, or some of the soft, flimsy paper so often offered men. Ask your dealer for "the stationery of a gentleman,"

in charge for the Chicago Florists' Club.

Chicago Horticultural Society.

The meeting of the executive committee of the Chicago Horticultural Society for the purpose of perfecting arrangements for the coming flower show took place on the 27th inst., and resulted in the appointment of J. H. Burdette as press agent. No definite action was taken on the place, nor the selection of a manager. The date is fixed at November 2-9.

Personal.

Percy Jones, manager of the Flower Growers' Market, is ill at his home in Austin.

T. Watase, president of the Tokio Plant, Seed and Implement Co. of Tokio, Japan, is in Chicago.

Frank Higgins, for many years with the selling force of George Reinberg's, is very ill at his home in Bowmanville.

Chicago Visitors: R. G. Schlotter, Keokuk, Ia.; H. F. Greve, Dallas, Tex.; Mr. Johnson of Johnson Floral Co., Kendallville, Ind.; E. L. Snyder, El Paso, Tex.; P. N. Obertin and wife, Kenosha, Wis.; E. Amerpohl, Janesville, Wis.; E. Haentze, Fond du Lac, Wis.; W. D. Reltic, So. Bend, Ind.; Milo Crozier son of J. G. Crozier, of Cedar Rapids, Ia.

NEWS NOTES.

Athens, Ga.—T. W. Dennington, of Lavonia, is to start a nursery business here.

Greenville, Miss.—The Delta Floral Co. have started in the florist business here.

Brooklyn, N. Y.—Dame Rumor saith that the Brooklyn Wholesale Cut Flower Market is to be opened at the corner of Red Hook lane and Fulton street.

Newport, R. I.—John P. Hammond, who for several years was gardener for Col. Delancey A. Kane, and more recently assistant at the E. J. Berwind estate at Newport, R. I., has accepted the position as gardener for Mrs. E. H. G. Slater; James Sharkey having resigned that position.

Wholesale Flower Trade

Flower Market Reports.

BOSTON The recent storm has put asters, gladioli, sweet peas and other garden products into "innocuous desuetude" and indoor flowers have already felt the benefit. A crisp demand has been enjoyed by the wholesale trade all through the present week, due in part to the above-mentioned cause and partially to the return of the buying public to their city haunts. The chances for any restoration of outdoor material to its recent prominence are very slim, as killing frosts cannot be very far off and the prospects for regular florists' stock are excellent. American Beauty roses are keeping fully up to our standard quotations and a few nice ones have found a market at the exceptional price of \$4 a dozen. There is a better call for lily of the valley, with a somewhat reduced supply. Carnations have moved upward within the past few days and are bringing a good price, considering the inferior grade of most of the flowers coming in. Dahlias, which exercise some influence on other flower markets, are not in the reckoning here and have, in fact, no commercial value in Boston market.

The "Music Hall Flower Market" has decided to move to Park street and now Boston will have two "Park Street Markets," separated by only one small building. While the floor area is smaller than that occupied in the past, it is a much lighter and better ventilated room and is likely to prove a more advantageous location in many respects.

BUFFALO Crisp air of autumn and coloring of foliage tell winter is on the way. A few days of heavy rain has shortened the life of the out door flower and from now on the indoor material will be more in demand though the past two weeks has found the market well supplied with good asters, gladioli and tuberose. With a few hot days in between the rose supply was heavy, especially in the line of Chateaux, Detroit, Killarney and White Killarney—all full blown when coming in to the market. Beauties are having an exceptionally good demand and at times not enough could be had. Richmond is in over supply. Lily of the valley and lilies have sold well. Short-stemmed carnations drag somewhat. Excellent Enchantress, both pink and white, are the best in the carnation line and select stock is picked up quickly. Plenty of greens.

CHICAGO The closing week in September was very satisfactory all along the line. It opened with a very busy Monday. The two days that followed found sales slower, but at no time was there any accumulation and as is always the case under these conditions, the closing days of the week were quite brisk. Sunday found the market the same and Monday everything cleaned up readily. The supply is decidedly shorter than two weeks ago. No killing frost has visited this vicinity at this writing, but the out door stuff is practically all gone and the plants in the houses not quite so advanced as in former years. Asters may be said now to be out of the market. A few stragglers are seen here and there but they are poor stock and the

florists will not be sorry to see the last one go. Gladioli have not been at their best this year and they might be put in the class with the asters. Dahlias are very scarce and on short stems. In fact the grower of out door stock in Chicago and vicinity this year has had his troubles. But he is not alone, for the same unfavorable weather conditions that ruined or damaged his plants, prevented the carnation plants from getting a good start. Some growers say their crop of fall blooms is several weeks behind the season. Enchantress, White Perfection, Victory

and Aristocrat are coming in but stems are rather short. Lawson and Winsor are later and the few ready to cut have very short stems. There are carnation blooms in plenty in the market with stems not exceeding six inches. White carnations are very scarce, as also are red; in fact, good carnations cannot be said to equal the demand in any color. In roses Killarney, Maryland and Marshall Field are the best to be had. White roses are scarce. There has been a good demand for American Beauty during the entire month of September.

Flower Market Reports.

(Continued from page 470)

Counter sales have been
DETROIT very encouraging during
the last week and dur-

ing the latter part stock became very
scarce. These are the weeks of trans-
formation which almost every year
cause a great deal of inconvenience
to the retailer. Garden flowers are
about passed and indoors are not far
enough advanced either in quality or
quantity to meet the increasing de-
mand. Elmer D. Smith shipped a very
fine lot of yellow chrysanthemums to
the Michigan Cut Flower Exchange,
but the real cut locally will not start
for a week or ten days. Some October
Frost are promised for the latter part
of this week. Very bright and crisp
weather has set in, causing those who
grow roses to start their furnaces.
This is three days later than last year.

A general and very
NEW YORK welcome improvement
is noted in the mar-

ket; cool weather and a cessation in
the aster supply has turned the atten-
tion of buyers more to the indoor stock.
There is a fair supply of chrysanthem-
ums of Golden Glow, October Frost
and Rosarie varieties, which move eas-
ily when quality is good. Carnations
are coming in sufficient quantity to
supply present needs. In roses the
situation is satisfactory. Very excel-

lent grades of Marylands and Killar-
neys are to be had and little difficulty
is found in disposing of them. Lily
of the valley is not plentiful, Cattle-
yas are growing more numerous and
quotations are lower. Lilies are stiffer
in price; green stock moves very slow-
ly. The Hudson-Fulton celebration
has not created any extra demand for
cut flowers, except in a few instances
where decorative stock such as chry-
santhemums and Beauties were wanted.

We are tired
PHILADELPHIA preaching the
same sermon ev-

ery week. Business keeps improving
right along with the season of course,
and the supplies of flowers ditto. Our
editor seems to think we all want the
particulars of the menu—week in and
week out. But soup, entree, roast
and pumpkin—says the cook. If you
want pate-de-foie-gras, mushrooms, and
sich, we will supply them, if you say
so. Pink chrysanthemums are in—
Montmore. For seven days nothing
has really happened in this market—
all humdrum—so this note is really a
waste of space.

Succeeding the
WASHINGTON heavy equinoctial
storm of the 24th
everything has taken on autumn tints
and dahlias and the earlier chrysanthem-
ums are in evidence, also good qual-
ity carnations—unusually good.

A HORTICULTURAL BUILDING WRECKED.

Beautiful Horticultural Hall, the pride of New Orleans, and without question containing the largest and finest collection of rare tropical plants in the United States, was partially destroyed by a cyclone yesterday forenoon (Sept. 20) about 9.30 o'clock. The swath cut by the tornado was perhaps about 500 yards wide, and included in its path the grove of magnificent live oaks extending from Magazine street to the entrance of the hall. Just one-half of the hall from the cupola, or steeple, in the center towards Magazine street was prostrated flat to the ground, not even the foundations remaining upright. The rare plants and flowers contained in this portion of the hall, were ruined as far as can be seen, although some may be saved, but this cannot be ascertained until after the debris is all cleared away. The glass was, of course, shattered and ground into dust, while the timbers were split and torn and reduced to kindling wood. The havoc wrought was terrible and almost beyond belief. Huge beams supporting the heavy glass roof were broken as though they were sticks, while the lighter crossbeams were twisted and broken into small pieces. Horticultural Hall was built in 1884 during the exposition or world's fair, which was given in Audubon Park. The cost of the structure was about \$60,000, and the appraisalment, when a value was set on the park property last year, was \$40,000.

Superintendent Jules Fonta, who takes a great interest in the hall, is almost in despair at the havoc wrought.—New Orleans Picayune.

BUSINESS CHANGES.

West Chester, Pa.—George Way, Jr., has moved to 131 East Gay street.

Cincinnati, O.—Betz & Ball, wire workers, have dissolved, and Mr. Ball will carry on the business alone.

New Bedford, Mass.—Ashley & Henberger have dissolved partnership. Mr. Henberger retiring from the firm.

Cairo, Ill.—H. H. Cade, of Greensburg, Pa., has purchased the business of the late W. M. Davidson on Eighth street.

Boston, Mass.—William J. Galvin, of Newport, R. I., has taken charge of the Back Bay establishment of Thomas F. Galvin.

Wollaston, Mass.—Geo. Robertson & Son have leased the Brown greenhouses recently occupied by Thomas Pegler.

Terre Haute, Ind.—Patrick Donnelly has leased the Hunt greenhouses and will grow general stock for the wholesale market.

Pontiac, Mich.—O. B. Miller, foreman for the Mosbaek Greenhouse Co., is to start in the florist business here with his father.

Montpelier, Vt.—Emslie & Co., of Barre, have purchased the business of Alex. Broadfoot, which gives them greatly enlarged business facilities.

Minneapolis, Minn.—Henry Kusik & Co. have opened a wholesale cut flower establishment on Fifth street, north of Hennepin avenue, and will move the Western avenue stock to the new location.

During Recess

CHICAGO SPORTS.

The Chicago Bowling League is now fully organized and the captains chosen at their last meeting are as follows: Victor Bergman of Weinhoeber's, captain of "The Violets"; Geo. Asmus of the Schiller Flower Store, captain of "The Orchids"; Otto Goerisch of the A. L. Randall Co., captain of "The Roses," and Allie Zeck of Zeck & Mann's, captain of "The Carnations." A schedule giving dates and prizes for the season, is now in the hands of the printers. Each team contains five regulars and three substitutes.

Announcements are out for the 4th annual reception and ball to be given by the Chicago Wholesale Florists' employes at Columbia Hall, 1527 North Clark street, on Wednesday evening, Oct. 27th.

The decisive ball game played Sunday at Hinsdale between the employes of Poehlmann Bros. and those of Bassett & Washburn, gave the victory to the Poehlmann team by a score of six to three. The first three points were quickly won but the last three meant real work and the battle was hard fought. The usual exchange of courtesies in the shape of refreshments followed, with Bassett & Washburn as hosts. The families of August and Adolph Poehlmann accompanied their men and were entertained at luncheon by C. L. Washburn.

A PRESENTATION.

A number of the friends and neighbors of James Crosby, gardener for Mrs. J. W. Tufts of Medford, Mass., on the evening of September 22 surprised him and Mrs. Crosby with a present of a beautiful buffet in token of the esteem they are held in this neighborhood. Mr. Stuart Miller of Medford made the presentation, voicing the sentiments of all present in a few well-chosen words. Mr. and Mrs. Crosby were so taken aback, that they could hardly find words to express their appreciation. Ice cream and cake were served and a very enjoyable evening was spent. Mr. Whitney and Mr. Miller added much to the occasion by their instrumental and vocal abilities.

BUFFALO BOWLERS.

President Neubeck, of the Bowling section of the Buffalo Florists' Club, reports a good attendance at the weekly roll last Monday night, and he looks forward to turn out a prize-winning team at the end of the season.

INDIANAPOLIS FLOWER MARKET.

The past week's business has been of such a volume for the season that trade along the line feel much encouraged. There is an increasing demand for all good stock; fancy Beauties, teas, lily of the valley, and orchids all short of the demand. Yellow and white chrysanthemums are having a good run and selling out clean. The cut of the two weeks previous, however, did not sell well. Carnations are much improved in quality and should sell well from now on, as asters are about over. Dahlias are to be had in great quantities and will be a factor in the medium priced stock till frost comes.

PERSONAL.

Miss Violet Rose has taken a position with J. J. Habermehl at the Bellevue-Stratford Flower Store, Philadelphia.

F. Gomer Waterer of Bagshot, England, sailed from New York on the Cunarder Lusitania, Wednesday, 29th inst.

Frank Edgar, of the firm of Edgar Bros., Waverley, Mass., was married on September 15 to Miss Margaret Burbeck.

Mr. Good, formerly with H. Hoffmeier, is now manager of John King Duer's store on Madison avenue, New York.

Samuel Lishman has taken charge of the recently completed greenhouses of Mrs. Mabel Barnes at Mansfield, Mass.

John T. Erickson, formerly head gardener on the Converse estate, Malden, has started in the florist business for himself at Swampscott, Mass.

Lawrence Cotter, manager of Lakeview Rose Gardens, Jamestown, N. Y., has been confined to the house for the past ten days with a serious attack of sciatic rheumatism.

Hugh Burch, gardener to Mrs. J. D. L. Layng, of Mt. Kisco, N. Y., was seriously injured in a boiler explosion on the estate and has been taken to the hospital. Workmen were making repairs on the boiler and had started a little fire, when the boiler burst, and the boiler-house was totally demolished. Mr. Burch fell among the debris.

Mr. Thomas Francis Dooner of Philadelphia, and Miss Alice Murray of Sea Bright, N. J., were married at Sea Bright on Tuesday, September 21. The many traveling members of the seed and flower fraternity who make Dooner's Hotel their base of operations in the Quaker City, will be interested in this announcement and extend sincere congratulations.

Among the passengers on the Canopic, which arrived at Boston from the Mediterranean last Monday morning, was Mr. J. K. M. L. Farquhar, returning from a two months' tour extending from northern Norway via Denmark, England and France to Italy. Mr. Farquhar was captured and surrounded by a little coterie of intimate friends at the Parker House on Wednesday evening and a rare "feast of reason and flow of soul" followed. Assurances have been given Mr. Farquhar by notable foreign cultivators of contributions to the great orchid show which is to take place in Boston next May. Mr. Farquhar is a keen observer, has an excellent memory and entertaining delivery and will, no doubt, be called upon to relate in a more public way some of his horticultural experiences, during the coming season.

New York visitor: John J. McManmon, Lowell, Mass.

Visitors in Philadelphia: R. Sawyer, Jacksonville Floral Co., Jacksonville, Fla.; Chas. Evenden, Evenden Bros., Williamsport, Pa.; Wm. A. Hammond, Richmond, Va.; Parker Thayer Barnes, Harrisburg, Pa.; P. Joseph Lynch, West Grove, Pa.; Miss Violet Rose, New York City; Alexander Cumming, Hartford, Conn.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

WANTED—Experienced grower for commercial place near Boston; must be good grower of carnations especially. Good salary to the right party. Address, with references, Carnations, care of HORTICULTURE, 11 Hamilton Place, Boston.

WANTED—Buyers and agents to sell our cement block and fence post machinery. Send for circulars and prices. Address W. L. Keller Cement Block Machine Co., Kearney, Neb.

WANTED—Experienced seed clerk. Wages \$15 a week. Address "E.," care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED as head gardener of a gentleman's estate in Massachusetts, 6 years experience in America. Best recommendations from present employer. Address "Gardener," care of HORTICULTURE, 11 Hamilton Place, Boston.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 89 Montrose Ave., Brooklyn, N. Y.

FOR SALE—1200 ft. of good 4 inch pipe; also large sectional Sunray boiler. Apply to Mrs. H. Baeppler, Teaneck, P. O. Bogota, N. J.

MISCELLANEOUS WANTS

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

NEW ENGLAND FRUIT SHOW.

The New England Fruit Show, which is to hold its exhibition in Horticultural Hall, Boston, Mass., October 19th to 24th, is organized wholly to promote better fruit growing in these states. All indications point to a tremendous exhibition and a very large attendance of those interested in fruit growing. The effect of this enterprise cannot be other than healthy, and it is believed that it will do much to stimulate a revival of interest locally in this branch of horticulture in which New England at one time held a leading position.

Landscape Gardeners

Now is your opportunity to get a lot of fine large shrubs and evergreens. I have a grand collection of shrubs suitable for this climate, grown here one plant of which will make as much show in a bed as three of the average stock that is put out. This is a rare opportunity to get such stock.

Obituary.

John Forbes.

The death of John Forbes of Hawick, England, one of the foremost men in the trade, who two years ago received the Royal Warrant as nurseryman to His Majesty the King, will recall to florists in this country his notable exhibit of phloxes, East Lothian stocks, etc., at the St. Louis Exposition in 1904, for which he received a gold medal. Mr. Forbes was a man of strict integrity and upright character.

Edward T. Alburger, Jr.

Died, September 22, 1909, Edward T. Alburger, Jr., son of Edward T. and Mary E. C. Alburger, in his 33rd year. The funeral services took place at the residence of his parents, Baker and Dupont streets, Manayunk, Pa. Interment at West Laurel Hill Cemetery. The deceased was a distinguished civil engineer and was connected with the local bridge building works near Manayunk. He was not connected with his father in the florist business, although he took a keen interest therein. The sympathy of the trade is freely extended to the family in its bereavement.

Thomas J. Johnson.

Thomas J. Johnson, colored, for three years a retail florist at 399 31st street, Chicago, died Sept. 26.

PETER BARR—A REMINISCENCE.

The writer's sketch and portrait of Peter Barr, whose death has just been reported, appeared in a contemporary, July 23rd, 1898—after spending an intimate week with him in Philadelphia and another three days' constant companionship at Atlantic City. The mellowing experience of eleven years has but confirmed the strong impressions the wonderful personality of this great man made on him at the time. Mr. Barr's passing away full of years and honors was not unexpected, and yet it seems but yesterday since one of his cheery letters from Scotland giv-

ing explicit directions for the pilgrim to reach his sylvan retreat came to hand, and was the basis of some plans for the near future that will now have to be modified.

Peter Barr was a seedsman from boyhood to the end of the chapter. But like many another celebrity in that profession, he was more than a mere merchant. He was an enthusiast in horticulture. Catholic in his sympathies and a keen observer, he had the helping hand and the encouraging word for every specialist and pioneer in that broad field. He even had hobbies himself—the three most conspicuous of which were, according to his own ad-

PETER BARR

mission, May Tulips, Peonies, and Dahodils. So much did his confreres and the general public in Great Britain appreciate his work in that connection, that he had the honor of being one of the "celebrated sixty" to receive the Victorian Medal for "distinguished services rendered to Horticulture" during Queen Victoria's reign. Mr. Barr was justly proud of this distinction and never failed to allude to it with pride in the course of conversation. A King crowned but yesterday could not have been more innocently flattered.

With all that, he was a very democratic gentleman, and it is now recalled with amusement how, being located in Philadelphia bag and baggage at a swell club he was in the course of an afternoon's ramble introduced to that wonderful personality, the late Peter S. Dooner (of Dooner's Hotel—a medium-sized but select caravansary) he was inside of five minutes powwowing over a table with the afore-said P. S. D. (also gone to his reward

some three years ago), completely ignoring the piloting committee for over three-quarters of an hour, and finally winding up by sending the porter for his lares and penates to be moved instantly to Dooner's. His naive explanation of this action was that he liked to see a little more than "silver and cold water on the table." The two Peters were great friends ever after. It was a case of love at first sight.

The writer is proud that he knew Peter Barr, proud of Mr. Barr's achievements in the same field in which he is a humble laborer, and proud of the privilege to drop this jonquil to his memory. To paraphrase one of the greatest of Scotland's national poets:—

"The latest throb that leaves our heart
While Death stands victor by;
That throb, O Peter, is thy part.
And thine the latest sigh."

Peter Barr had great gifts and he used them well for the benefit and pleasure of his fellow-men. A glorious record to leave behind.

McManmon of Lowell, Mass., reports an unusual demand for young American elms, especially from distant points. This is very reassuring as the ravages of the elm leaf beetle in recent years has hurt the call for this, the most graceful of all street trees. The beetle can be controlled by proper spraying. Mr. McManmon has in stock a fine lot of transplanted shapely evergreens for tub use.

PRATT'S
"SCALECIDE"
 Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than Lime Sulphur. Not an experiment. One gallon makes 16 to 20 gallons spray by simply adding water. Send for Booklet, "Orchard Insurance."
B. G. PRATT CO., 50 CHURCH ST., NEW YORK CITY.

POTASH

The market value of

APPLES

is determined by size, soundness, color and flavor—all of which are improved by the use of Potash. Potash not only improves and increases yield but produces new woody growth in orchard stock.

Grate Bars

For Horizontal and Upright Boilers

We have been in the foundry business for nearly half a century. Consequently we have a large variety of patterns for grate bars. We carry in stock a large number of regular parts and make a specialty of prompt deliveries. We use iron in our mixtures best suited for furnace work, and our grates last longer and give better satisfaction on that account.

Mahoney, Tupper, Double Bar and Circular

We carry stock sizes of the Mahoney and Tupper grates up to 50 in. long; these grates are all 6 in. wide, 2½ in. bearing, 50 % air space, and weigh 50 lbs. to square foot.

The Double Bar Grate is 3 in. wide, single bars are 1½ in. wide, 2 in. bearing, and weigh about 45 lbs. per square foot.

The Circular Grate is made in all diameters from 12 to 50 in.

The Up-to-Date Houses are Hitchings Curved Eave

They are as practical as they are ornamental, and certainly have gained great popularity with the gardeners.

Nothing overcomes the disadvantage and brings out all the advantages of the curved eave so well as our flat iron rafter construction. It makes a house, which, because of its extreme lightness, is wonderfully productive. It is strong, rigid and indestructible.

Are you interested in such a house? Then write and say so, and along will come our illustrated circular.

LORD AND BURNHAM COMPANY

Irvington-on-Hudson, N. Y.

New York — Boston — Philadelphia — Chicago

ITS TWO PHASES

We take it for granted that if you build a greenhouse you want it ornamental, for the days of utilitarian ugliness are past — but this ornamental side must not be sacrificed to the highest possible growing conditions.

The U-Bar with its curved eaves, wide glass and evident lightness makes a combination meeting both the lines of beauty and those of returns.

The catalog lines up the comparative merits of various constructions, and goes into the matter with numerous illustrations — an interesting and very instructive piece of catalog making. Let us send it.

A WONDERFUL NEW NEPHROLEPIS NEPHROLEPIS NEPHROLEPIS SUPERBISSIMA INTRODUCTION OF 1908

We desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a very unique and distinct novelty,—as distinct from Piersoni and Elegantisima as they were from Bostoniensis. It is, in fact, a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It was awarded a **FIRST-CLASS CERTIFICATE** by the Royal Horticultural Society, at Crystal Palace, London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of this fern as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities.

Fine, strong plants, 2½-in. pots, \$15.00 per 100; 4-in. pots, \$25.00 per 100;
6-in. pans, \$9.00 per dozen; 8-in. pans, \$18.00 per dozen

Notes from the Arnold Arboretum

Among the genera new to cultivation one of the most beautiful is *Dipelta* belonging to the Caprifoliaceae and allied to *Diervilla*. *Dipelta floribunda* is a shrub with opposite short-stalked leaves oblong or elliptic-oblong in outline, long-pointed and from two to three inches long. The white and pinkish, campanulate flowers are about one and one-third of an inch long and produced in great profusion along last year branches in three to seven-flowered clusters. The rather conspicuous dry fruit is with its large wings almost orbicular in outline and measures about three-quarters of an inch in diameter. A second species, *Dipelta ventricosa*, is similar to the preceding, but the flowers are wider and purplish red outside, while inside they are white with orange markings.

A very interesting new genus belonging to the Hamamelidaceae is *Sinowilsonia* named in honor of Mr. E. H. Wilson, one of the most successful collectors in the history of plant introductions. Its only species is *S. Henryi*, a small deciduous-leaved tree from ten to thirty feet high. The alternate short-stalked leaves are obovate to broadly elliptic, finely toothed at the margin, from three to six inches long and slightly stellate-pubescent on both sides. The small rather insignificant flowers are dioecious and are disposed in slender upright racemes about four inches long; this, however, refers only to the pistillate plants, the staminate ones being still unknown. The fruit is similar to that of our Witch hazel, but smaller. The tree will probably be hardy here.

To the same family as the preceding belongs *Sycopsis sinensis*, a small evergreen tree from fifteen to twenty feet high. The alternate stalked leaves are oblong to ovate-lanceolate in outline, pointed, entire or slightly and sparingly toothed and from two to three inches long. The dioecious flowers appear in small axillary stalked clusters, the staminate ones being rather conspicuous owing to their numerous exerted stamens. The fruit is a capsule similar to that of the preceding species. The tree will probably not be hardy in this region.

A new genus of climbing shrubs is *Clematoclethra* belonging to the Dilleniaceae and related to *Actinidia*. Several species of it are known from China; they are all high climbing shrubs with deciduous, alternate and slender-stalked leaves ovate to lanceolate in outline, pointed, finely toothed at the margin and from three to five inches long; they resemble somewhat those of *Clethra*. The white cup-shaped flowers are rather small and appear in few-flowered stalked clusters in the axils of the leaves. The berry-like fruit is scarcely more than half an inch long. The *Clematoclethras* resemble in their general appearance *Actinidia* and are probably of the same hardness.

Evodia rutaecarpa is a large shrub or small tree attaining to thirty feet in height and resembles *Phellodendron* in foliage, but differs markedly from that genus in its capsular fruits. It is also related to *Xanthoxylum* but easily distinguished by the opposite, not alternate, leaves which exhale when bruised a pungent odor. The large pinnate leaves are with the stalk eight to twelve inches long and are composed of seven or nine ovate to oblong, pointed leaflets. The insignificant flowers appear in large terminal corymbs from four to six inches across and are followed by the small capsular fruits dis-closing when opening glossy dark brown or nearly black

seeds. The tree will probably be as hardy as *Phellodendron*.

A very interesting genus is *Dipteronia* with only one species, *D. sinensis*, closely related to *Acer* and forming with that genus the family of *Aceraceae*. It is a small tree from fifteen to twenty feet high with large pinnate leaves composed of ovate coarsely toothed leaflets and with small white flowers in large conspicuous terminal panicles. The fruits consist like those of *Acer* of two winged seeds, but these are surrounded equally on all sides by the broad wing and oval in outline.

Alfred Rehder.

What 1909 Has Taught Us About Peonies

THE GLUT AND THE MIXTURES

There is a glut of common varieties. The rushing into the growing of peonies by every small nursery—the seedsmen—the cheap rose grower who caters for rose buyers at twelve for a dollar—and the amateurs who sign themselves as specialists—has brought it about.

There will be no further use in America's going to Holland to get peonies, or even to get them mixed to suit. How can growers who delegate the work to hired help ever know how badly the roots are mixed? And can seedsmen and such ever keep them straight? The past year has proven to me that eternal vigilance is the price of rows of true peonies. A small grower who does it well, will have his hands full with only a small patch.

NEW VARIETIES OF DISTINCTION

The newer varieties which have been noticeable, are all of the wide petal flowers. The blooms are extra large and the petals are wide and incurved, giving the flower a grand effect. Such varieties as *Rosa Bonheur*—*Therese*, *Germaine Bigot*, *James Kelway*, my seedling *Georgiana Shaylor* and the latest *Lady Alexandra Duff* are this class. There are no better peonies in existence, unless some of the newer introductions, such as *LeCygne*, *Soulangue*, *Mignon*, *Francois Rosseau* and *Mme. Jules Dessert* should develop in the next year or so to be better. These latter peonies are the latest French varieties, and I am impatiently waiting to see what they will become when well established.

DEMAND FOR COLLECTION

There is a growing demand for collections of peonies which are really of the first-class. Buyers are getting to be very critical. The grower who succeeds must be progressive, and be able to furnish the best. He cannot hope to meet this demand by making up ready-made collections. Such collections are very generally made up around one or two first-class varieties, and the rest as fillers. No matter if they are called the *Challenge of the World* or *Unapproached by Anything* in existence. Another thing noticeable is that the best peonies are not plentiful. It is hard to keep a stock ahead of such varieties as *Therese* and *Rosa Bonheur*. The very dry weather has caused some rust on certain varieties. The best way to do in this case is to cut off the stalks and burn them.

THE OUTLOOK

The outlook for peonies is good enough. The glutting

of the market by the influx from Holland was just what was needed to teach America to go slower and not buy peonies because they were cheap. They can now see that although cheap they are worthless. There will be piles of them to go on the dump to clear the land for something better. The lesson will be dear to some, but on the whole, it will be well deserved. I look for a steady and sound growth of the sale of choice varieties right along.

E. J. Shaylor.

Wellesley Hills, Mass.

The Lilac

The Lilac is so well known and highly valued that it seems almost idle to make an effort to increase its popularity, and yet so many desirable varieties have been

LILAC EMILIE LEMOINE

added to the collections during the last few years, that lovers of this flower should become acquainted with them and enjoy them.

The lilac is known and grown generally because of its hardiness, richness and freedom of bloom, its delicate fragrance, handsome foliage, good habit, vigor, healthfulness and easy culture.

Grown singly or in masses its effect upon the lawn is always pleasing and satisfactory, and every one who possesses a lilac bush or bushes feels that he has something valuable, that will give a good return regularly every year. The older the bush is, providing it has been taken proper care of, the better the yield of flowers. And this is a desideratum—all things do not improve with age. Oftentimes we see bushes flowering profusely under the most adverse conditions, having been neglected and even abused at times. So we can very properly conclude that the lilac is for the masses, those who

are without gardeners or whose places may not be the best for gardening purposes, as well as for those who are fortunate enough to own large properties, with ample help to take good care of everything.

In May when the lilac is in flower, admiration is expressed for it on every side; even the most indifferent observer cannot restrain himself from manifesting his appreciation of the flower, praising its beauty and expressing a wish that it might be employed more frequently than it is in garden work. The gardener realizes that in this shrub we have particularly valuable material for gardens and parks, and recently unusual interest has been taken in it. Great collections, embracing hundreds of varieties, have been planted at the Arnold Arboretum in Boston, and at Highland Park in Rochester. This year at Highland Park, when the lilacs were at their best, they were inspected by over 30,000 visitors in one day, who had only words of appreciation and admiration for them.

It certainly is very gratifying to note that this flowering shrub is growing in popular estimation. One reason for the new interest manifested in the lilac is that during the last ten or fifteen years many beautiful new sorts have been introduced. These varieties come principally from France, being the production of the celebrated horticulturist, M. Lemoine. Great credit is due him for the many choice sorts which he has originated and sent out. They are mostly doubles of rare beauty and excellence. Nearly every one is familiar

LILAC ABEL CARRIERE

with the single flowered lilac, but not so many know the double flowered. The individual flowers of the double sorts are perfect in their formation and the panicles are of the largest size, and the bushes flower as freely as do those of the singles.

President Grevy is one of the most beautiful, each individual flower is perfectly formed, the panicle is very large, and the color is a light blue. One who sees this charming sort for the first time will be surprised and delighted, and the question will naturally be asked—how was this accomplished? The answer will have to come from M. Lemoine.

Among the many varieties he has sent out it is diffi-

cult to choose those which can be called the best, each variety having peculiarities which distinguish it from the others, and yet, when all are placed together, there is perhaps a similarity or likeness; still there is enough variation to constitute a difference, and certainly they are all marvelously beautiful, and planted separately or in groups, they will be highly ornamental and interesting.

The lilac may be employed advantageously in a variety of ways; for hedges, screens, massing, for shutting out objectionable views and hiding unsightly buildings—or when planted alone, it makes a good bush, it grows rapidly, flowers profusely, has good thick foliage, is free from insects and always looks well.

In lilac time we should be able to keep the house continuously decorated with blooms placed in large, deep vases to hold the long stems. Lilac time should be celebrated in every home, and made a feature marking a period which can not only be looked forward to with delightful anticipation, but recurred to as an event with pleasant memories.

LILAC PRINCESS ALEXANDRA

Other remarkable double sorts of Lemoine's may be named as follows:

Belle de Nancy, delicate satiny rose color; Charles Joly, large panicle, flowers reddish purple; Comte de Kerchove, large, compact panicles—flowers ashy rose color; Madame Abel Chatenay, pure white—this is a gem. Emile Lemoine, beautiful lilac-rose; Louis Henry, violet-rose—distinct shade; Prince de Beauvan, very large panicles—flowers slaty color shaded with violet; Madame Casimir Perier, another double white—beautiful; Alphonse Lavalle, very large panicles, beautiful blue shaded violet; De Humboldt, flowers violet rosy purple; La Tour d'Auvergne, flowers very double and large, violet-purple; Marechal de Bassompierre, rose, velvety bud; President Carnot, pale lilac; Souvenir de L. Thibaut, flowers very large, round, regular, red, with reverse of petals white; Maxime Cornu, lilac-rose. I might enumerate several other doubles, all of them interesting and exceedingly beautiful, but it would make this list too long.

Coming to the singles, there is Princess Alexandra—

pure white, with large, long panicles. The plant is very vigorous, grows erect and flowers very freely. It is by far the best single white lilac. It originated in Canada and was sent out by Ellwanger & Barry some years ago. Marie Legrave is another white, quite well known and much prized, but it is a dwarf grower. *Cærulea superba*, introduced by Ellwanger & Barry many years ago, holds its own, and may still be regarded as one of the best of its color, which is a beautiful blue.

The Rouen Lilac—or *Rothmagensis*, is an old variety which should not be overlooked. It has reddish flowers in large panicles, and the habit of the shrub is singularly graceful. *Lovaniensis* is a beautiful pink sort, and Jacques Calot is another of a similar shade—both are distinct and charming. Ludwig Spaeth is a superb dark sort, as is Congo, of a vinous red color. Gloire de Lorraine, red in bud, lilac when open; Rouge de Trianon, reddish lilac; Geant des Batailles, lilac with red; Aline Mocquery, purplish red, very fine.

I could name a number of others of recent introduction which will be highly prized by flower lovers, but they are not yet to be obtained in the nurseries, so that it would not be advisable to refer to them at present.

Lovers of the lilac can have the flowering season considerably extended by planting *villosa* and *Japonica*, the former light purple, and the latter creamy white, but odorless. *Japonica* attains to the size of a small tree and bears great panicles of flowers in midsummer. Neither has the delicate perfume for which the lilac is so much esteemed, but flowering, as they do, some weeks after the others, they will be found very useful and ornamental.

As I have already stated the lilac improves with age, old bushes being literally covered with blooms. Some varieties are shy bloomers while young, and we occasionally hear of instances where planters have become impatient at the tardy flowering of the plants, while other varieties blossom freely even while young.

The lilac needs little pruning, except that occasionally the knife may be employed to keep the plant in good shape. It is a good plan to remove the faded blooms at the end of the flowering season.

As the lilac starts to grow early in the spring it is best to plant early, and fall planting may be strongly recommended where possible.

The lilac endures bad treatment but responds quickly to care, and the blooms are greatly improved on plants which have received proper attention.

I hope in the near future to submit a supplementary list containing many remarkable kinds which are sure to receive from the public prompt appreciation, when their beauties can be seen and their merits understood.

surance of \$10,000 against damage by wind, which we understand was in force, will go a long way towards rebuilding and we hope it will be found practicable to repair the building and restore the collection of rare and beautiful ferns and tropical vegetation to its former condition.

Mutual

relations of

wholesaler and retailer

The tone of our reports from flower trade centres seems to indicate that the wholesale and retail trade have not yet arrived at that period of peaceful harmony called the millennium. Each can still detect failings in the other for which he would be ready and willing to prescribe a remedy at any time. The protest by the retailer against the supplying by the wholesale dealer of any flowers to the consumer direct is an old one. It was "old enough to vote," long ago—in fact, is as old as the wholesale business itself, yet it bobs up today as nimbly as ever and "time, the wisest counsellor of all," seems not to have made any visible impression on either side. We don't think the wholesaler questions broadly the justice of the retailer's contention. In fact, any call for flowers by the public must be, in any well-ordered wholesale house, something very much in the nature of a nuisance but if they are to agree to comply with the demand of the retailer that they shall refuse all such business, then there does seem a compensating justice in the wholesaler's insistence that the retail dealer shall in turn support him loyally and not tamper with the latter's sources of supply by dealing direct. We do not doubt that every wholesaler in the country would be glad to sign off all his rights to supply flowers even for his own grandmother's funeral in exchange for legitimate protection against direct overtures to his growers. Of course, conditions vary greatly in different markets, but, under any circumstances, a middle ground on which all concerned could agree ought not to be an impossibility.

Now

get busy

Views as to the business situation and outlook, in horticultural lines, vary somewhat. Many see evidences of returning prosperity in the heavier orders for goods, others in the more prompt settlement of accounts, still others in higher values on whatever they have to sell. A glance through our advertising columns this week will go far to convince the reader that there are some houses—and very representative ones they are—that believe in the oft-quoted old adage that "the best way to resume is to resume." That the houses showing this enterprise at the present juncture will keep far in the van of their fellows who lack the courage to come forward in modern business fashion, nobody can doubt. The man who gets busy now on right lines is destined to come in for a good hustling trade during the season just starting and we can imagine no way in which one can better help towards the realization of a "bigger, better and busier" horticulture than by buying liberally from those advertisers who favor with their patronage and support a paper which so well represents the best men and the most advanced phases of the business as does this issue of HORTICULTURE. There is wisdom and inspiration in good measure to be drawn from the words of the able men who have so willingly given their best thought and advice for the benefit of our readers. In the credit for having thus given "a good push and a push all together" for the advancement of the general prosperity, correspondent and advertiser share equally and we hope our readers will take due notice thereof.

After the

cyclone

HORTICULTURE extends its sincere regret to New Orleans over the destruction of its horticultural building and contents in the memorable cyclone of last week. The in-

Cypripedium Sallieri maculatum or C. nitens

Cypripedium Sallieri maculatum or *C. nitens maculatum* as it should be called is a beautiful hybrid between some good variety of *C. insigne* and *C. villosum*. The center of the large dorsal sepal is a fine shade of green, spotted with almost black and surrounded by a broad band of pure white. The color of the petals and pouch are about the same as in ordinary forms of *C. insigne*. As to size and shape of the flowers the photograph speaks for itself, being a life-size reproduction of the flower. It is a very free grower and bloomer.

Our stock was obtained from Siebrecht & Sons of New Rochelle, N. Y., who claimed to be the raisers of the hybrid, but recently Lager & Hurrell of Summit, N. J. carry the same thing in stock.

M. J. Ope

Naugatuck, Conn.

Notes from Britain

THE LARCH APHIS IN SCOTLAND, ETC.

The members of the northern branch of the Royal Scottish Arboricultural Society of Scotland on their excursion to the estate of Fasque in Kincardineshire were conducted by Mr. A. Dewar, the factor on the estate for Sir J. Gladstone, Bt., to inspect the great damage done by Aphis to young larch trees—many of the latter being dead or nearly so. The Japanese larches were on the contrary quite free from the pest. Sir John Gladstone who accompanied the visitors drew attention to two magnificent larches, one on either side of a drive. These trees are about 80 feet in height, and perfectly straight in the bole. A fine specimen of the common beech, standing on the lawn in the front of the castle measures 15 feet, 6 inches in girth, at breast height. This tree was planted with others in 1707 to commemorate the union of England and Scotland.

ROYAL HORTICULTURAL SOCIETY'S SCIENTIFIC COMMITTEE

At a recent meeting of this body Mr. W. Cuthbertson made some observations on the Spencer type of sweet peas having been found a poor seed producer, showing flowers and photograph of flowers. The causes he considered to be the following. First—The keel is not constricted and consequently the stigma and anthers are not pressed together as in the older type of flower. Second—The keel being open, contributes to the dropping of the pollen to the bottom of the keel without

coming in contact with the stigmatic point. In the old type of flower this could scarcely happen. Third—In many of the waved forms the style grows beyond the anthers before these separate (dehisce), and the point is thus not brought into contact with the pollen. Fourth—In some, more especially salmon and orange colored varieties, the anthers are nearly sterile. Fifth—The waved standard does not, although large, act as an umbrella in bad weather. The Unwin, a moderately waved type of sweet peas is an abundant seed producer; the keel resembling in form that of the old form of keel.

ACTINIDIA CHINENSIS, ETC.

It is a woody climber belonging to the natural order *Ternstroemiaceae*, and a native of China, as *A. arguta* is of Japan, and also a climber possessed of much vigor and retaining its leaves till late in the autumn. *A. chinensis* has sub-orbicular leaves, and yellow flowers about 1 1/2 inches in diameter, borne freely on the mature growths in its native country. In order to obtain fruits it is advisable to plant male and female plants in near proximity to each other. The fruits are of a russet green color, ripening in October and are excellent for dessert and preserving. When planted out of doors a warm position for the plants should be chosen, such as suits the peach in Great Britain. The plant was figured in *Gardeners' Chronicle*, July 31, of the present year.

Frederick Moore

FLORISTS' CLUB OF PHILADELPHIA.

Joseph Heacock was elected president, Alfred Burton, vice-pres., Geo. Craig, treas., and D. Rust, secy., at the annual meeting held on the 5th inst.

Reports for the year were made by the retiring officers. The club seems to be in a reasonably prosperous condition, but the new officers are confident of being able to improve things inside of the next twelve months.

Joseph Heacock, the new president, is well known, both locally and all over the country, as a great grower of American Beauty roses and palms.

Alfred Burton, the vice-president, while a younger man, has already won his spurs in the arena, and is a worthy representative of the craft. He is a son of John Burton, and conducts a range of greenhouses nearby. Alfred Burton is a modest man and makes no

ALFRED BURTON
Vice-Pres. Florists' Club of Philadelphia.

promises, yet we know that he will make a good official and ably supplement the progressive Joseph Heacock in the handling of the reins of the pioneer Florists' Club of America.

David Rust and George Craig, the secretary and treasurer, are carry-overs, and we have given their pedigrees before, so there is no necessity of telling anything about them at this time. They are "all right" and will do their level best to help out the club in its laudable ambition to make the florists' trade "bigger and better" from now on. There's lots of room for improvement!

We missed Wm. K. Harris at this meeting and understand he is pretty low again. We trust his wonderful stamina will stand him in good stead once more.

John T. Gibson, who was on the sick list among convention delegates, was on hand, hale and hearty.

A discussion on carnation plants took place. Crops have been short. The consensus of opinion seemed to be in favor of pot-grown plants.

NORTH SHORE HORTICULTURAL SOCIETY.

At the last meeting of this society Maurice Fuld talked on the subject of dahlias. A lecture on Birds by Mr. Forbush is scheduled for October 15.

On September 24 was held the first incorporation meeting of the society. A clerk was chosen and most of the by-laws adopted. The meeting adjourned till October 8, when it is expected to get the rest of the business transacted and papers ready for the corporation commissioners.

JOSEPH HEACOCK
President Florists' Club of Philadelphia.

LENOX HORTICULTURAL SOCIETY.

The regular meeting of this society, Saturday, Oct. 2nd, was largely attended. Messrs. G. Foulsham, W. Jack and A. Bond, were appointed arrangement committee for the forthcoming exhibition which will be held in the Town hall, Lenox, Oct. 26-27, and promises to be one of the best the society has ever had. Special interest is centered on the group of miscellaneous plants arranged for effect to occupy space 8 x 13, for which Henry A. Dreer offers a silver cup to be won twice before becoming property of exhibitor. This cup was won by E. Jenkins in 1907 and in 1908 by F. Heeremans. Some very fine groups of orchids are expected and the classes calling for individual specimens of orchids will be sharply contested. Roses, carnations and chrysanthemums are very promising and competition in the classes for these flowers will be keen. Vegetables, which are always a conspicuous feature of our annual exhibition will be fully up to the standard of past years.

A welcome visitor at the society's meeting was H. A. Barnard representing Stuart Low & Co., Bush Hill Park, Middlesex, England.

GEORGE H. INSTONE, Secretary.

FLORISTS' CLUB OF WASHINGTON.

The October meeting of the Florists' Club of Washington was held at 1214 F. St., on the evening of the 5th inst. It was the day set for the Washington florists especially to visit the Vincent farm at White Marsh, Md. Six of the trade went and expressed themselves as more than pleased at their trip. The show was held open one day more, hoping that more florists would go. The old grievance against the street fakirs was taken up and discussed at much length; those who supply the fakirs also came in for their share of criticism. A circular letter was gotten up by the club asking the co-operation of all the local growers and wholesalers in suppressing the nuisance and also requesting that their attitude be made known by the next meeting of the club.

One new member was admitted, B.

DAVID RUST
Secretary Florists' Club of Philadelphia.

Winkler, a florist at Chevy Chase, Md. A vote of thanks was tendered Geo. H. Cooke for his beautiful decoration of the Washington Florists' Club car, and many regrets expressed that it was not in competition.

FRENCH CHRYSANTHEMUM SOCIETY.

The fourteenth Annual Show and Congress of this society will be held at Marseilles on the 23rd, 24th and 25th of October. The meetings of the Floral Committee are fixed for the 5th, 13th, 23rd and 28th of October and the 9th of November. The Roll of membership now consists of 799 members, inclusive of 61 affiliated societies. The agenda for the Congress includes the following questions to be discussed: Amendment of the Floral Committee regulations, Damping of blooms, Insects and diseases. A small color chart as supplement to the Repertoire des Couleurs, Systematic experiments for manuring plants grown in the open.

C. H. P.

ROYAL HORTICULTURAL SOCIETY.

On September 14 the Hall was again filled to overflowing with flowers and flowering plants in season, particularly the various sections of the Dahlia. To describe and give the names of these would need a large amount of space, and I will content myself by affording readers of this journal a few only of the more conspicuous of the newer introductions of semi-double decorative or Peony-flowered varieties, now so much admired when planted in masses, and at considerable distance from the observer. They can scarcely be termed refined looking, but their large blooms and striking colors and forms, combine to afford a grand display in the flower garden. South Pole is a semi-double, white flower; the entire measuring 7 inches across; King Leopold, canary yellow, and of the same diameter; Miss Gladys Banson, yellowish salmon, 4 inches in diameter; Circle de la Tete, Jeanne Charmet, pale magenta, 7 inches in width; Yellow Colosse, a full flower of a pleasing yellow color, 5 inches in diameter; Mad. Van den Bael, pinkish lilac with deeply channelled florets; Papa Charmet, a fine deep crimson flower, with channelled florets, and having a diameter of 6 inches.

Cactus dahlias were splendidly shown by various specialists, and of striking colors. There were noted Williamsoni, scarlet; Rev. A. Bridge, pink at the tips of the florets, the lower half yellow; Lady Fox, brilliant scarlet with incurving florets; Dorothy pale lilac, and Harold Pearman, a pure yellow flower. The above were observed among the exhibits of Messrs. Cannell & Sons. In the exhibit of dahlias from Messrs. Cheal & Sons, Cawley, show varieties of pure self-colors were noted. Their collection of cactus varieties was very fine.

Messrs. T. Ware & Co. were likewise exhibitors of fine dahlias of all classes, and of a blue double-flowered Aster. A beautiful *Potentilla atrosanguinea* Gibson's Scarlet, a capital hardy border perennial with strikingly pure scarlet blooms mounted on tall stems, was shown by Maurice Prichard of Christchurch, Hants.

A Silver Flora Medal was awarded to Sander & Sons for a group of orchids of which the following were conspicuous, viz.: *Laelio-cattleya Carissima*, a white hybrid suffused with purple which is deepest at the tips of the petals and sepals, the throat having a yellow stain. The limbs of the flower do not expand much and they are terminal on tallish pseudo bulbs; *L.-c. Phoenix*, a cross with *Cattleya aurea* and *L.-c. Henry Greenwood*, has a lip of a rich purple tint, the petals paler and sepals of a buff color with a green suffusion; *Brasso-cattleya Mad.* Chas. Maron-brassavola Digbyana and *Cattleya Gigas*. The flower is 7 inches in width, and of a purple color, the throat having a yellow stain, and a large lip, fringed and furnished with

short hairs at its margin. *Cattleya Iris inversa* var. *Amabile*, is of a purplish orange tint in all its parts excepting the lip, which is of an intense purple color.

Messrs. Stuart Low & Co., Enfield, showed some fine *Cattleyas*, etc.; *C. Harold* var. *Hildegard*, white in all its parts excepting the lip, which is of a purple color, and the throat inside of a pale canary yellow tint. This firm also showed *Sophro-laelia Danae roseum*, a flower of light rosy purple.

Stanley & Co. showed *Cattleya Iris*, out of a cross of *C. tricolor* with *C. aurea*, the flower having sepals and petals of a deep orange tint, and lip of bright purple. From the same cross several flowers were shown, differing in their colors. Some six hybrids of *Cattleya bicolor* and *C. Eldorado*, raised from seeds taken from one capsule, showed marked differences in coloring and marking, and yellow and buff tints were observed in all, and likewise purple in more or less degree. An award of merit was given the exhibitors.

Edward V. Low showed a plant of *Angraecum Eichterianum* with a tall pseudo-bulb 4 feet high having white flowers, alternating with the leaves along its entire height—twelve in all; *Cattleya conspicua superba*, with a purple-colored labellum and sepals and petals of buff suffused with purple.

Sir Trevor Lawrence staged among other things, a nicely flowered plant of *Angraecum Kotschy*, a distinct looking plant of small dimensions, with many flowered racemes, bearing white flowers with reddish-brown tails.

Messrs. McBean and Charlesworth & Co. were also represented by some interesting species and varieties.

FREDERICK MOORE.

CLUB AND SOCIETY NOTES.

At the State Exposition at Oakland, Cal., the commercial exhibitors included C. C. Morse & Co. of San Francisco, E. Gill of West Berkeley, and J. Sculberger of Oakland.

Joseph A. Manda has been appointed manager of the exhibition of the Horticultural Society of New York, which is to be held at the Museum of Natural History, November 3 to 7.

E. A. Corson, East Rochester, M. R. Folsom and Chalmers' Conservatories were extensive exhibitors at the Cold Spring Park fair in Rochester, N. H. J. K. Alexander of East Bridgewater, Mass., won all the first prizes for dahlias.

The Elberon Horticultural Society of New Jersey will hold a chrysanthemum show in Townley Hall, Long Branch, on October 27-28. The committee of arrangements are: Jas. Kennedy, Benj. Wyckoff, A. Grieb, Peter Murray, Mr. Carry, Anthony Bauer and P. Ewin.

At the annual exhibition of the Rhode Island Horticultural Society at Providence, on September 29-30, the prizes on dahlias went largely to the New Bedford growers—W. D. Hathaway, Mrs. H. A. Jahn, W. F. Turner & Co. Asters were shown in profusion. F. P. Howe of Bristol showed some choice grapes for which he received a prize.

The annual meeting of the National Horticultural Society will be held at

Council Bluffs, Iowa, November 15 to 20. Forty-two states, Canada and Mexico will exhibit their varied horticultural products. Prizes aggregating \$25,000 will be awarded in a great many different classes. The superintendent is F. L. Reed, Council Bluffs, Iowa.

The Wappingers Dahlia Society held their ninth annual show in Park Hall, Wappingers Falls, N. Y., on September 17. It was a beautiful display. In the center of the hall was a huge pyramid of decorative plants from the W. P. Clyde estate, gardener H. J. Osterhoudt. The Uplands silver cup was awarded to A. S. Hunt, Jr. The names of Chas. Hilbert, James Ashton, Thos. Boyle and H. J. Osterhoudt are prominent among the prize winners.

PROSPECTIVE EXHIBITIONS.

San Francisco, Calif.—Pacific Coast Horticultural Society and California State Floral Society, Hotel Fairmount, Oct. 14, 15, 16. J. R. Atkinson, 110 Twelfth Av., San Francisco, secretary.

Boston, Mass.—New England Fruit Show, Horticultural Hall, Oct. 19-24. Wilfrid Wheeler, Concord, Mass., secretary.

Madison, N. J.—Morris County Gardeners' and Florists' Society, Oct. 27, 28. E. Reagan, secretary.

Glen Cove, N. Y.—Nassau County Horticultural Society dahlia show, Oct. 14; annual show, Oct. 28, 29. Wm. Mackenzie, secretary.

Pasadena, Calif.—Pasadena Gardeners' Association, Oct. 28, 29, 30. A. McLeod, secretary.

New York, N. Y.—Horticultural Society of New York, Nov. 3-7. Geo. V. Nash, Botanical Garden, Bronx Park.

White Plains, N. Y.—Tarrytown Horticultural Society, St. John's Hall, Nov. 4, 5, 6. E. W. Neubrand, Tarrytown, secretary.

New Haven, Conn.—New Haven County Horticultural Society, Music Hall, Nov. 2-4. F. H. Wirtz, 86 Nicoll St., secretary.

Hartford, Conn.—Connecticut Horticultural Society, Putnam Phalanx Hall, Nov. 3, 4, chrysanthemum show. G. W. Smith, Melrose, Conn., secretary.

Boston, Mass.—Massachusetts Horticultural Society, chrysanthemum show, Nov. 4-7; Orchid exhibition, May 26-30, 1910. W. P. Rich, 300 Massachusetts Av.

St. Louis, Mo.—St. Louis Horticultural Society and Florists' Club, Coliseum, Nov. 9-12. Otto G. Koenig, 6743 Florissant Av.

Toronto, Ont.—Ontario Horticultural Exhibition, St. Lawrence arena, Nov. 10-14. P. W. Hodgetts, Parliament Buildings.

Chicago, Ill.—Horticultural Society of Chicago, Coliseum, date not announced; J. H. Burdett, 1620 W. 104th Place.

Milwaukee, Wis.—Milwaukee Florist Club, Auditorium Building, Nov. 13-16.

Norwich, Conn.—New London County Horticultural Society, November. F. B. Allen, secretary.

JUDGING SCALES.

Our editorial reference in issue of September 18 to the desirability of having some generally recognized scales of points for judging the various classes of flower and plant exhibits has elicited several letters of approval from our readers. We give below a number of such scales as adopted by various societies for general use or for special occasions and hope our readers will make comment upon them if so disposed and send us any additional scales of which they may have knowledge.

MONSIEUR VIGER.

This eminent French horticulturist, the President of the National Horticultural Society of France, has recently been nominated a corresponding member of the Royal Horticultural Society of England—a well deserved tribute to his great interest in European horticulture and while offering him our congratulations we must not forget that the nomination was made on the proposition of Sir Albert Rollet, a member of the Council of the R. H. S. whose Anglo-Continental sympathies are well known.

C. H. P.

SOCIETY NOTES FROM ABROAD.**British Dahlia Shows.**

The effects of the trying season were noticeable at the first show of the National Dahlia Society at the Crystal Palace on Sept. 2nd and 3rd. The premier award in the trade section was secured by Messrs. J. Stredwick & Sons, who have in recent years introduced a number of novelties of merit. They received first-class certificates for Red Admiral, Iolanthe, H. H. Thomas (named after the Society's Honorable Secretary), and Indomitable. A new break of long-stemmed Cactus varieties was sent by Messrs. Stredwick, and recommended for trial by the Society next year. The Society held a second show on September 21st, at the Royal Botanic Society's gardens, at Regent's Park. The trade were again well represented by a splendid display of new and old varieties. There were forty new varieties put forward for a certificate, but the committee are now less lavish in awarding these coveted honors. The only varieties receiving a certificate were Prima Donna, a graceful white cactus, shown by Mr. Shoosmith, of Woking; and Tristan, a dark crimson pompon, exhibited by Charles Turner, of Slough.

A Society's Troubles.

For many years the Royal Botanic Society has had extensive conservatories and gardens at Regent's Park, in the northwestern district of London. In recent years the affairs of the Society have not been very flourishing. On the other hand the Royal Horticultural Society in London has in recent years gone ahead, financially and numerically. The question naturally arises "Is there room for two societies?" The Royal Horticultural Society is not desirous of adding to its liabilities by taking over the affairs of the Botanic Society, and apparently would have nothing to gain by the amalgamation. According to one speaker at the annual meeting of the Botanic Society this week, last year it was carried on at a loss of £1,787, with a net liability of over £35,000. They were practically in the same position as that of last year. The Society, he added, had come to the end of its resources, and it was time they faced the position, and saw that the policy of drift adopted by the council must come to an end. A proposal was made with a view of giving authority to the council to negotiate for an amalgamation with the Royal Horticultural Society. The chairman declined to accept the resolution, as not being in order, but promised to consider the suggestion. It will be a great loss to horticulture if the gardens are closed, owing to the Society's unsatisfactory financial position. The conservatories are particularly suitable for the shows of the National Rose Society, the Winter Flowering Carnation Society, the National Dahlia Society, and other organizations which have arranged meetings there. Perhaps a little fresh blood in the personnel of the Society might be advantageous.

W. H. ADSETT.

NEW DAHLIA "BOSTON YELLOW."

THE RAWSON CUP

The handsome new dahlia illustrated herewith, was raised last year by James Robertson of Newport, R. I. At the recent exhibition in Boston by the New England Dahlia Society this variety won the Rawson silver cup—of which a picture is also shown—for the vase of flowers found to be the freshest at the conclusion of the exhibition. It was also awarded first prize at the show of the Newport Horticultural Society in competition with vases of 25 yellow of any type. The color is lemon yellow and the flower has an excellent stem.

SOME ROEHRS SPECIALTIES.

One of the most beautiful pictures to be seen anywhere at the present time is the house of *Oncidium* in full bloom at the Roehrs establishment in Rutherford, N. J. No less than 6000 varicosum blooms were sold from this house in one day this week and they are not missed. *Cattleya aurea* is blooming now—the largest stock of this lovely orchid in the world probably. *Dendrobium Phalaenopsis* is also making a glorious show and *Cattleya labiata* is bursting into bloom by the thousands. Evidently the period of orchid famine is over for a time.

A house of *Celosia Pride of Castle Gould* attracts the eye and admiration of every visitor. They are all in bloom already—yellow, crimson and scarlet—but they will not be at their best for some weeks yet, and for Christmas there will be some specimens worth going a long way to see.

CARNATION DOROTHY GORDON.

Joseph Heacock, who is preparing to disseminate this novelty the coming season informs us that although he has not yet spent anything on printer's ink for it he has already booked orders for about 58,000 rooted cuttings. It has proved to be one of the most profitable carnations ever grown. Last winter he had about 6000 plants and the flowers were all sold at \$12.00 per 100 at the holidays. He says that it gave one-third more flowers than *Enchantress*. This variety is a cross between *Lawson* and *Enchantress*. It

scored 86 points at the exhibition of the American Carnation Society in Washington, D. C., and 90 points at the New York Florists' Club exhibition. The flowers are fragrant and average 3 inches in diameter; color a shade darker than *Pink Enchantress*. The florist will be slow that does not take hold of so good a carnation.

SPOKANE ASTER SHOW.

Herman Thoeny, a veteran grower of Spokane, carried off the chief honors at the aster show by the Spokane Floral Association in connection with the 16th annual Interstate fair in Spokane, Wash., September 20 to 25. The displays, housed in a large tent, were visited by thousands. The judges were Mrs. Joseph Robertson, F. L. Zeigler, and Z. A. Pfile. The displays were the best ever seen in Spokane and the judges complimented the growers on the colors and quality of the flowers and their arrangement. In addition to the wealth of aster displays, there were other exceptionally fine flowers, including prize-winning dahlias and a rare assortment of sweet peas.

The awards in the professional classes were as follows:

Single group, Herman Thoeny, first; silver loving cup.

Display, Herman Thoeny, first; Fred Winters, second; silver medal.

Potted plants, Fred Winters, first. Best executed design, Miss M. Armstrong, first; Frank Burchett, second; silver medal.

Fifty tall growing asters, Miss Frances Burchett, first; Mrs. George Gobel, second; silver medal.

Dahlias, Herman Thoeny, first; Mrs. F. H. Uhls, second.

Mr. Thoeny was also awarded the honorary prize for the best basket exhibit.

A MERITORIUS NOVELTY.

"Novelties" in flowers are, as a rule, "snares"! The planter reads the glowing description in the catalogue of the introducer, buys the seeds, plants, grows, and cares for the "new baby" until its first bloom, which waited and watched for seldom makes good but rather is a disappointment; still the plant is cared for with the belief that the next may be better and come up to the description more closely. In the majority of cases the results are decidedly unsatisfactory; in a few cases only are they of merit.

Such as the latter is *Dimorphotheca aurantiaca*, sent out in 1907 by Messrs. Barr & Sons of London. Reading their description I sent for seed, grew it that year, and again this year have grown it, in each season with success and with satisfaction. As a bedding plant, and edging plant to beds of other annuals it has been very attractive and pleasing and perfectly satisfactory. The growth low and branching, free from insect attacks, the color unique, flowering early, constantly and continuously, it should surely become a "stand by" and an annual for general culture. H.

Our news notes tell us that Ernest Peterson, a Florence, Neb., florist, called a motorman a "scab" and was severely beaten therefore. "Scab" is not horticultural language. If Peterson had called the man a "green-fly" or a "*Coccus adonidum*" he probably would have taken it as a floral compliment. Stick to your knitting, my boy.

NOTES ON NEWER ROSES.

H. E. Molyneux, in *The Garden*, London.

Hybrid Perpetuals.

The Hybrid Perpetuals among newer Roses are few and far between; in a list of the newer roses published in the National Rose Society's Annual for 1909, compiled by the publications committee and numbering nearly ninety distinct varieties, there is only one Hybrid Perpetual—Dr. William Gordon, a 1905 variety—and going through my notes to look for the Hybrid Perpetuals is almost like searching for a needle in the proverbial bundle of hay. Surely the possibilities among the Hybrid Perpetuals have not been exhausted. No doubt the tendency to run down the Hybrid Perpetuals as a class has something to answer for in this connection, and so some raisers with the slightest excuse label their new productions Hybrid Teas rather than Hybrid Perpetuals, which I think is a great pity, for more reasons than one; but we must take things as we find them, and the new rose suffers for the sins of its class. Undoubtedly "Hybrid Perpetual," by a curious paradox, has in the eyes of not a few rosarians come to mean once, or temporary flowering only, and not perpetual in the ordinary acceptance of the term at all. We have heard no more of Mr. Pemberton's suggestions that the time had come for doing away with the terms now in use, nor perhaps are we likely to, unless the proposal to destroy is accompanied by an easily workable and intelligent scheme of reconstruction. I have no doubt when they arrive together the thing will be done; in the meantime we must put up with the inconsistencies and paradoxes of the present arrangement which are manifest. The first Hybrid Perpetual that I have any note about is:—

Barbarossa, sent out by Welter in 1907 and generally described in catalogues as a red Frau Karl Druschki, which is a pity, as it has no resemblance to Frau Karl Druschki as we know it. The color is not bad, but there is a good deal of carmine in it, and I have yet to see a good flower of it. I am afraid it must join that increasing army labelled "not wanted." In other words, it ought not to have been sent out. That is my own opinion, and I have had it confirmed in more than one quarter. No, the red Frau Karl Druschki is yet to seek.

Dr. William Gordon.—Sent out in 1905 by Messrs. William Paul & Son, Waltham Cross. This is a big flower of the old-fashioned type, color satin pink, that comes rather flat, although I have seen a high-centred flower. Useful for pot culture, as it seems free enough.

M. H. Walsh.—Another 1905 introduction raised by Messrs. Alexander Dickson & Sons, Newtownards. This is a good rose, fine crimson color with a suggestion of scarlet in the younger flowers; it comes good enough for exhibition when at its best; good habit of growth, which is of the kind usually termed "erect." Has been well exhibited by the raisers this year at

more than one show. I noticed a particularly fine flower at Luton. It is good in the autumn, which is another advantage, as reds are then scarce. Its price has reached the normal, so it is worth trying.

Mrs. A. M. Kirker (1906, sent out by Hugh Dickson of Belfast).—A sweet-scented, good-sized flower, clear, bright cerise color, that has opened well with me, notwithstanding the wet; rather a tall grower. It has found its way into the exhibition boxes, and I think has come to stay.

Oberhofgartner A. Singer (1905, P. Lambert) is another rose that I think we can do without, it having nothing especially to recommend it.

Urania (1906, Walsh).—This is a giant; my solitary plant has had some tremendous flowers that would make even the old Paul Neyron look small. It is a similar shade of color to Ulrich Brunner, slightly deeper perhaps, so might be called cherry crimson; a good grower apparently. I have not seen it exhibited, but have little doubt when better known, as it deserves to be, it will be found among the back-row flowers in the exhibition boxes.

This completes the newer Hybrid Perpetuals as far as my notes are concerned. A Continental correspondent tells me I should try Gloire de Chédane Guinoisseau, and describes it as true vermilion in color, of good shape that should do well in England, but I can get no confirmation of his report among the trade growers. I also heard there was another Jules Graveriaux that was likely to be useful—a Monsieur this time, I presume—but I almost hope it is not so; two names only distinguished by a prefix that is often left out will only lead to confusion.

Of the Hybrid Perpetuals, then, I can only recommend two as worthy of a trial, or, at the most, three—M. H. Walsh, Mrs. A. M. Kirker and Urania—the product of the world's raisers during the last four years, not an overproduction, at any rate.

THE CANNA.

Those of our readers interested in the culture of the Canna and who know German may like to be made acquainted with the fact that Arpad Muhle of Temesvar, Hungary, has recently brought out a work entitled "Das Geschlecht der Canna, deren geschichte, Cultur, und anzucht." It contains 119 pages of text, of which the major portion is devoted to a list of varieties with raisers' names and descriptions.

C. H. P.

A CORRECTION.

In our editorial last week on the sale of the Morgan orchids, twenty-four years ago, the date mentioned should have been, of course, 1885, not 1884 as printed. It was not "John Bergman" but Gus. Bergmann who represented Sander & Co. at the sale.

Rosen-Zeitung for August, 1909, encloses a colored plate of J. Pernet-Ducher's new H. T. rose Entente Cordiale (Mme. Abel Chatenay x Kaiserin Aug. Victoria). As represented, the flower and foliage show the Kaiserin blood very strongly, the difference being mainly in color, which is light yellow.

BY "WIRELESS" FROM THE HOME OF FAIR MAID.

Say "Fair Maid" and you think of Roper. With all the glory which has come to that distinguished Tewksbury carnationist through his great Bay State and other sensational products, it can safely be said that there have been few carnations that have made the money for both growers and dealers that this modest, unpretentious little Fair Maid has earned. And she never looked better than she does today. Mr. Roper has 35,000 carnations in his benches this year—a moderate number as compared with some of the big operators, but there's plenty to be learned from an inspection of them in company with their industrious owner. Standard varieties and new claimants are there a-plenty. Mr. Roper says he is "sick and tired" of house culture in the summer and proposes to return to the old system of field culture excepting only in the case of Lawson, Windsor and others of that type.

Among the new varieties to be seen here is a scarlet seedling, known as No. 1021, which is well worth keeping one's eye on—as a commercial proposition perhaps rather than as an exhibition sensation. There is a white seedling, deeply fringed, quite similar to Shasta, which shows good qualities, including a stem at the present time of mid-winter proportions. One that is sure to be heard from is a two-year-old, of a soft but lively pure pink. Bay State looms up sturdy and regal as ever, bristling with buds of noble mien. Like her namesake, she is invincible.

It is but a short distance from Roper's to the establishment of Patten & Co., where the beloved ex-president of the American Carnation Society and his proficient son are to be found "always on their job." Mr. Patten gives quite a jolt to anyone who has been pinning faith to iron as an indestructible component in greenhouse construction, showing iron uprights corroded off at the surface of the soil while the wood in the benches of equal age of service is still intact. The carnations are handsome, as always, showing the effect of constant and intelligent care in clean vigorous growth and a miniature forest of lusty buds. Practically every novelty advertised during the past year or two may be seen here, all getting a chance to prove their qualifications for a permanent tenancy. Among the most impressive at the present time are May Day, pink, and Sara Nicholson, crimson. They both look very much like winners.

John T. Gale is another prosperous Tewksbury grower. About 6,000 violets and nearly the same number of carnations is the extent of his outfit. Like many Massachusetts violet growers, he ignores the capricious and unreliable Marie Louise and rests his faith on Lady Hume Campbell, from which he has now commenced to pick.

"We like your paper very much as an advertising medium and have always had satisfactory results from ads in it." T. C. THURLOW & CO., West Newbury, Mass., Sept. 29, 1909.

HARDY PERENNIAL SEEDLINGS AND ROOTED CUTTINGS FROM SOIL

These are all nice strong, transplanted plants from Spring sown seed, at \$2.00 per 100; \$15.00 per 1000. No less than 50 of one kind sold.

THE SEARCH FOR NEW FERN FORMS.

A feature of fern study that has not as yet been very extensively exploited in America is the search for forms of ferns of commercial value. In Europe this appears to be one of the main indications of an interest in ferns, and in consequence the named varieties are almost limitless. Often the appearance of the cultivated forms are scarcely attractive from the point of view of beauty, but their odd shapes seem to please the public, for it may be observed that if our own florists cultivate any of these European forms they almost invariably select the crested, tasseled and frilled specimens. It cannot be denied that variation along certain lines adds to the beauty of an already beautiful race of plants. Illustrations of this may be seen in the many sports of the sword fern (*Nephrolepis exaltata*) all of which are undoubtedly more beautiful than the type, and in "*Adiantum farleyense*," which is well known to be a sport from a species that is not celebrated for its appearance. Since most of our greenhouse ferns are tropical in origin, the search for desirable forms will go on most vigorously in the tropics and may lend zest to every outing, but such fern hunting need by no means be restricted to the tropics. The demand is steadily increasing for ferns of the temperate regions, hardy enough to endure our winters out-of-doors unprotected, and if people are willing to pay for the Christmas fern, the ostrich fern and the Osmundas as they are, surely they will pay more for improvements in these forms, perhaps even coming to the point when they demand the new form and refuse the type, as they now do in the so-called Boston fern. Mr. Terry's multifidum form of the Christmas fern is one that would always be selected in preference to the type and the same may be said of various forms that Mr. Hans has produced; indeed, a decided and characteristic form of *Polystichum acrostichoides incisum* would no doubt sell well, as would a crested form of the lady fern or the Dicksonia. There is a satisfaction in giving to the world a more beautiful form of anything than it now possesses, quite aside from any monetary consideration, but when art, beauty and commerce join forces, the student of ferns has cause to rejoice.—The Fern Bulletin.

CONVENTION RATES AND HEAD-QUARTERS.

The Editor of HORTICULTURE:

Dear Sir:—I have noted the controversy in HORTICULTURE with regard to the failure to secure special railroad rates to the Cincinnati Convention. No doubt the inability to secure a more favorable rate was partly responsible for the small attendance on such an important event. The mere fact that only 300 voted at the election gives a general idea of the attendance in proportion to the number of florists there are in the United States.

I have been wondering whether the failure to secure a concession from the railroads was due to the same influences that were responsible for the switching of the headquarters of the society at Cincinnati from the hotel originally selected.

HARRY A. BUNYARD.

APHINE The Insecticide that Kills Plant Lice of Every Species

Without the slightest injury to flower or foliage.
Has no equal for the Greenhouse.

But is no less effective outdoors.

"Aphine has a future as wide and long as the United States," says Colliers.

"Aphine will do all you claim for it and more," says Chas. H. Totty.

"Aphine will do the work; if you don't believe, try it," says another.

Eminent entomologists and other expert authorities are no less enthusiastic in their praises of the merits of this wonderful insecticide discovery.

Aphine can be applied effectively as a spray, wash, or dipping solution—it is used at an average strength of 1 part Aphine to 40 parts water.

PRICE \$2.50 PER GALLON

If your supply house does not yet handle Aphine, write us and we will send you name of our nearest selling agents.

AUTO FLOWER PARADE AT WASHINGTON.

The auto flower pageant of the 30th ult. is a matter of history and there has been but one opinion expressed, viz., "a wonderful success." There was but one thing to mar its beauty—the cars were not public-spirited enough to stop running while the parade was in progress. The day was ideal and "the world and his wife" had turned out to enjoy the pageant. There were flag-bedecked cars and flower-decorated cars, both with natural and artificial flowers, miniature cars and touring cars, but the car most admired by the public was the one to which the five judges gave the sweepstake prize, consisting of a \$600 rose bowl—the Navy Yard car, which was decorated by F. H. Kramer. The Florists' Club first prize of a silver vase was awarded to Harry Wardman, for a Venetian gondola, decorated by Geo. Shaffer. The Florists' Club considered only the cars decorated in natural flowers. Honorable mention was made of the Florists' Club car, which was decorated by Geo. Cooke and was not in competition.

AMERICAN INSTITUTE.

The list of premiums awarded at the 78th Fair of the American Institute at New York City on September 21-23, has just come to hand in printed form. Among the dahlia prize winners the names of W. D. Hathaway, W. P. Lothrop, H. F. Burt and George L. Stillman appear frequently in the commercial and general classes. In gladioli, John Lewis Childs; in herbaceous flowers, Peter Murray; in ornamental plants, Harry Turner and A. J. Manda; in roses, L. A. Noe and F. R. Pierson; in carnations, Geo. Hale; in violets, Howard Nichols; in flowering and foliage groups, Julius Roehrs Co.; all appear prominent. Certificates were awarded as follows:

E. S. Miller, collection of gladiolus seedlings; Mills & Company, single dahlia "Jessica"; Wm. Wills, garden-

er to Clarence Whitman, Katonah, N. Y., cactus dahlia "Katonah"; Francis Milne, seedling dahlias "Mamaroneck" and Mrs. Francis Milne"; J. T. Lovett, seedling dahlia "Dr. Frederick A. Cook"; J. T. Lovett, Seedling dahlia "Henry Hudson."

ASTORIA BOWLERS.

The Astoria Florists' Bowling Club will be entertained on Saturday, October 16th, by Wm. H. Siebrecht at his country home at Chappequa, N. Y. This club will leave by automobile at 9 a. m. from the Siebrecht greenhouses at Astoria, L. I.

Pipe Pan, for joy and let thy Shepherds sing!

Mr. Burpee being very busy writing up his new catalog turned the writing of this ad over to one of his new young men—who hopes you will like it so well that promotion will follow shortly. Send in your orders.

¶ When the Pilgrim Fathers landed on Plymouth Rock—shelter, food and firearms were the first desideratums. We do not credit all of the ditty that:

“First they fell upon their knees
and praised the Lord,
And then got up with fire and sword,
and fell upon the aborigines.”

¶ More likely they wrote home to the old country for some farm and garden seeds. Their eighty or ninety million descendants don't have to do that—they have seedsmen of their own—men who have grown up with them and studied their wants and their climate and know their peculiar needs from a to izzard. If you want the finest

American Grown Pedigree Seeds

for the farm or the garden try the largest mail order house in the world

BURPEE Philadelphia

¶ And, be sure to include in your order the three great Sweet Pea Novelties they offer for this season.

¶ Anyway, they want to get acquainted with you and would be happy to have you send for one of their catalogs. It is a splendid book and a liberal education on horticulture. Mailed free and with pleasure. Liberal terms to the seed trade, who are invited to catalog these and other novelties.

BEST THREE NEW SPENCERS FOR 1910

MIRIAM BEAVER; glowing soft apricot tinted and suffused with lemon.

MARIE CORELLI; (nee Prince of Wales Spencer); brilliant rosy carmine; wings rich crimson.

SENATOR SPENCER; deep claret striped and flaked with light heliotrope.

✍ An illustrated circular describing the above and other new Spencers mailed to the trade on application.

SALVIA SETHELLII.

We have received from Palisades Nurseries a branch of flowers of this handsome garden perennial. They say:

"We have grown this outside for two years and find it one of the most desirable herbaceous plants we know of. Its dark velvety olive green foliage is quite as attractive as the rosy purple flowers that cover the plants. It grows 4 feet high, many branches, and flowers from beginning of August right into frost. Although it was frozen outside with us the beginning of last winter before we took it in to propagate, we do not know whether it stands our winters unprotected outside or not; but it certainly stands freezing without injury, and could be termed a hardy Salvia or Scarlet Sage, which it closely resembles except in color of flower and for which it appears to us there is much need, and should make a striking novelty for some large retail catalogue firm."

The result of investigations by the Japan Agricultural Society shows that the export of lily bulbs from Japan last year markedly increased. The total value of bulbs exported reached 444,727 yen last year, against about 250,000 yen for the preceding year. The principal destination was England, where they were exported to the value of 214,959 yen. Next comes America, which took 184,913 yen in value, followed by the Netherlands, with 15,925 yen; Germany, with 11,031 yen; Denmark, with 5,530 yen; and Canada with 6,602 yen.—Journal of Horticulture.

Dreer's Special Offer

OF

Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world. Our collection is unequalled, and we are prepared to furnish the new and rare kinds as well as all the popular standard varieties in large quantities.

The plants we offer are all strong one-year-old field-grown plants and will make a fine display of flowers next season.

New and Rare Varieties.

	Per 100	Per 1000
Aglæ Adanson (Tall). Immense flowers, snow-white, with red eye.....	\$8.00	\$75.00
F. G. Von Lassburg (Medium). The purest white in cultivation; individual flowers larger than any other white.....	8.00	75.00
Jules Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.....	6.00	50.00
Louis Blanc (Tall). Reddish-violet, with purple shadings and darker eye. A distinct dark-colored variety.....	6.00	50.00
Prosper Henry (Dwarf). Large compact truss of pure white with bright crimson-carmine center.....	6.00	50.00
Siebold (Dwarf). An improvement on the popular scarlet "Coquelicot," brighter and stronger.....	10.00	90.00
George A. Stroblein (Medium). Bright scarlet, with crimson-red eye; does not bleach.....	10.00	90.00
Mme. Paul Dutrie (Medium). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large, and borne in panicles of immense size.....	10.00	90.00
Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.....	6.00	50.00
Von Hochberg (Medium). The ideal crimson Phlox; the richest of its color.....	10.00	90.00

General Collection of Hardy Phlox.

Best Scarlet and Red Varieties.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.
Etna (Medium). Crimson red suffused with fiery red; cherry-red eye.
Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.
General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.
Pêcheur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet, fine.
R. P. Struthers (Tall). Rosy carmine, with claret-red eye, fine.
Price: Any of the Scarlet or Red Varieties, \$6.00 per 100; \$50.00 per 1000.

Best White Varieties.

Albion (Tall). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.
Diadem (Dwarf). A fine dwarf, pure white.
Helena Vacaresco (Dwarf). Very large-flowering dwarf, white.
Hermine (Dwarf). The dwarfiest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.
Jeanne d'Arc (Tall). A good standard late white.
Louise Abbema (Dwarf). A dwarf pure white of fine form.
Mrs. Jenkins (Tall). The best tall early white for massing.
Price: Any of the White Varieties, \$5.00 per 100; \$40.00 per 1000.

Best Pink and Rose-colored Varieties.

Bacchante (Tall). Tyrian rose with crimson-carmine eye.
Caran d'Ache (Dwarf). Geranium-red, with old rose shadings and white eye; very effective.
Clara Benz (Dwarf). Lovely carmine rose, with darker eye.
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
La Vague (Medium). Pure mauve, with aniline-red eye.
Pacha (Dwarf). Deep rose pink, suffused with Solferino-red and carmine-purple eye.
Pantheon (Tall). Bright carmine rose.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Price: Any of the Pink or Rose sorts, \$5.00 per 100; \$40.00 per 1000.

Best Purple and Crimson Varieties.

B. Comte (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.
Charles Sellier (Dwarf). Bright reddish-violet with large white star-shaped centre.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Chevalier de Boufflers (Medium). Deep reddish violet, with brighter shadings.
Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.
Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.
Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre with an exceptionally large white centre.
La Foudre (Tall). Rich glowing French purple, shading crimson.
Le Mahdi (Tall). Deep reddish violet, with darker eye.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Price: Any of the Purple and Crimson sorts; \$5.00 per 100; \$40.00 per 1000.

Best Light Varieties With Dark Eyes.

Bridesmaid (Tall). White, with large crimson-carmine centre.
Colibri (Tall). White, with crimson-carmine centre; very late.
Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.
H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.
Price: Any of the Light Varieties with Dark Eyes, \$5.00 per 100; \$40.00 per 1000.

Best Mottled Varieties.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish-lilac; large, white halo.
Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Eugene Danzanvillier (Tall). Lilac, shading white towards the edges; large white centre.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Price: Any of the Mottled Varieties, \$5.00 per 100; \$40.00 per 1000.

Phlox Sufruticosa—Miss Lingard.

Extra strong plants of this valuable early white flowering variety \$6.00 per 100; \$50.00 per 1000.

For the most complete assortment of Hardy Perennials offered in America, see our current Wholesale List.

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

Seed Trade

British Vegetable Trials.

It may be of interest to readers of HORTICULTURE to be informed of some recent trials at the R. H. S. gardens at Wisley, inspected by members of the Fruit and Vegetable Committee. These trials consisted of runner beans, cauliflowers and late potatoes. Of runner beans, the smooth-podded varieties were first inspected, and from these were selected Count Zeppelin, of the old case-knife form, stringless, 12 in. in length, singularly tender, and delicious eating when cooked (Heinemann, Erfurt). Dark Dun, a selection of the climbing French type, prolific with short fleshy pods (James Carter & Co.) Climbing beans selected tender and true form (James Carter & Co.) Princess of Wales, a very fine heavy-cropping bean (Sutton & Sons). Of the Scarlet or Dutch runner type, Scarlet Emperor has long pod of a deep green color, and Red Giant with long narrow pods, of a pale green color (James Carter & Co.) Also Prizewinner certificated in 1892. Mr. Beckett, gardener at Aldenham House, Herts, had sent a white flowering variety named White Emperor, which was the heaviest cropper of all, with pods long and shapely. All of these received three marks apiece, and these awards were sanctioned by the full committee on Tuesday, September 14.

A trial of cauliflowers was then inspected and most of the varieties which had turned in showed fine heads. Early Snowball, an old variety, was the earliest—a good stock (Barr & Sons). Good varieties for succession were King of the Cauliflowers (Barr & Sons), Magnum Bonum (Sutton & Sons), Dwarf Mammoth (Carter & Co.), and Conqueror (Vilmorin et Cie, Paris). These received three marks, and this was sanctioned by the full committee. Of the potatoes, seedlings from the variety Up-to-Date were in the majority. Those selected and shown to the full committees were Duchess of York (W. Holmes, Tain, N. B.), a long white tuber; Vera O'Brien, a flat oval (Tullins, Kildare); Widecombe Intermediate, a round tuber (Pickering, Ashburton); and Scottish Chief, a large flat-tish round tuber (Barr & Sons). These all received three marks.—*Extracted from Gardeners' Chronicle for September 18.*

Contraband Tobacco.

Whence goes all the forfeited tobacco of the British Custom Houses is a question asked and answered in "The Daily Chronicle" (London), for September 23. "Smokers will be glad to know that the contraband tobacco is no longer consigned to what used to be known as the 'Queen's Tobacco Pipe'—the kiln by the London Docks. It was an awful waste of incense. Nowadays, if you are a criminal and a lunatic, and are accommodated at Broadmoor, you get your tobacco from the Customs for nothing. And any tobacco that is below your criminally lunatic taste is used for the discouragement of insects in Kew Gardens."

F. M.

The Grass Seed Market.

We have just received from Barenbrug, Burgers & Co. their annual report on this year's crops of Natural Grass Seeds in the various growing districts at home and abroad. They tell us that of the last three years, all with decidedly short crops, the present season beats the record for shortness not only of them, but of at least a score of years, owing to the very unfavorable weather which has been well-nigh universal all over Europe. At one time a continuous drought when practically every plot of grass land seemed a barren place; after that a period of cold wet weather, with the result that whatever had fortunately passed through the drought was confronted by the opposite fate, viz., that of being destroyed by water.

The early varieties—those that had to pass through and ripened during the dry period—showed consequently heads with almost no seed in, whereas the later varieties—those which had to go through the cold and wet period—had an exceedingly poor flowering time, with the result that the seed-setting was badly affected; so that the yields on the whole are not one-third of what they should be; and of both early and late varieties, the quality of the produce of all is of an exceedingly light character, the carrying up of which to a satisfactory standard of purity required a good deal of winnowing and a big loss of light matter. They say that if it has been surmised by seedsmen that last season's quotations for the majority of grasses were about the highest that could reasonably be expected to find customers, they fear that at least for a few varieties the trade will be called upon to pay still more this year, if as is presumed to be the case, they can't do without them. For, considering the exceedingly small yields, this season's light qualities which will show an enormous loss in cleaning them up to a decent standard of purity, and finally, the excessive high prices paid to farmers for their rough material, quotations cannot fail to soar a good deal higher than last season for those kinds which suffered most from the inclemency of the weather.

Of the sorts which are likely to command advanced prices, they enumerate *Achillea millefolium*, *Agrostis stolonifera*, *Agrostis canina*, *Anthoxanthum odoratum*, *Avena elatior*, *Avena flavescens*, *Cynosurus cristatus*, *Festuca duriscula ovina*, and *ovina angustifolia* (these higher than ever before), *Festuca elatior*, *F. pratensis*, *F. rubra*, *Poa nemoralis* and *Poa pratensis*. *Alpecurus pratensis* is a satisfactory crop and moderate prices are quoted, but buyers are warned against old or mixed seed as last year's seed was unsatisfactory as to both purity and germination. *Anthoxanthum odoratum patelli* will probably advance, *Dactylis glomerata* will be reasonable, as also will be *Poa trivialis* and *Lolium perenne* and *Italicum*.

The History of Alfalfa or Lucerne.

In an account of the history and dissemination of Lucerne, Prof. J. C. Hodgenson is quoted as having said that the plant was introduced from Rome into Spain and France and thence to South America and Mexico during the Spanish invasion and from there to

California in 1854, and from California it was taken to Utah, Colorado, Kansas and further east. He adds:

"Lucerne was introduced into the Eastern States long before it came to California, but it made no headway and was forgotten until it made its way eastward from the great West."

The latter statement is open to question. We have been informed that the first 100ths of alfalfa for the state of Texas went from Philadelphia in 1889 and from there it spread all over the central western and Pacific states. Now Texas sends the seeds out in hundreds of carloads, all over the United States and to foreign countries; but in this connection it is well to bear in mind the words of a leading European authority (Larenbrug) on this subject:

"There is an enormous difference between the produce of European and American grown Alfalfa, so much so that even in Holland it is considered a fraud if American grown is sold for European or if mixtures of the two are sold for European seed. There is simply no comparing the one plant with the other. Not only that—the American plant's duration does not exceed two or three years at best so that it does not answer to having a longer lay than a field of red clover and that it is by far the inferior of the 5 or 6-year plant of European origin, but the plant itself is rather a poor one in comparison. Even the first cut does not yield more than half the quantity, whereas the second cut is even less. Among the European-grown seeds, namely:—Provence, Middle, and North of France, Italian, Hungarian and Russian—we consider the Provence and Italian seeds to be the best, next we would prefer the north and middle of France and Hungarian, while the Russian is in our opinion no better than the American."

The cultivation of Lucerne is older than Rome—in fact, it is of unknown antiquity. The Persians had it before the Greeks or Romans. As a cultivated plant it is probably one of the oldest known to the human race. Of course, Professor Hodgenson is no doubt correct in ascribing its introduction into South America and the Pacific coast territories to the Spaniards. But to imagine a West-to-East migration is too much, and clean contrary to all probabilities. More likely it simply followed the settlement of the United States from East to West. Another thing—what is there about Utah-grown seed that such claims are set up for it? We want to know, you know, even if we are not "from Missouri."

The Aster Seed Crop.

Referring to the aster seed notes in our issue of September 18, Mr. Charles H. Vick of Rochester, N. Y., writes us as follows:

"I note, in a recent number of HORTICULTURE, a short article on the Aster Seed crop. While we have had very unfavorable weather in the vicinity of Rochester, we expect a fair crop, with sufficient seed to fill all orders. The early season was unfavorable on account of the wet. After our plants were set out, the drought interfered with the growth. The recent showers have helped some and our asters at present are in full bloom and, with a favorable fall, we will harvest nearly the usual quantity of seed.

"Two new Extra Early Uprights, Pink and White, will be added to our list, and also a new one identical in the growth and style of flower to our Violet King, a very beautiful rose in color. These we shall offer to the trade in packets."

Michell's English Mushroom Spawn

100, per brick (25c. postpaid), per doz., \$ 1.00;
25 lbs., \$.75; \$1.50 per 100 lbs.; per 1000 lbs.,
\$60.00; 250 lbs. at 1000 lb. rate.

TESTIMONIAL

Newark, N. J., Dec. 28th, '08.

I am very well satisfied with the Mushroom Spawn purchased of you; it has turned out splendidly.

E. BOISAUBIN.

Lambert's Pure Culture Spawn

This type produces larger mushrooms than the English, coming into bearing somewhat earlier, and bearing for a longer time.

Standard No. 8 Cream White. For use from April to October.

Standard No. 9 Pure White. For use from October to April.

Prices of Pure Culture Spawn. Standard Bricks

Per brick, about 1½ lbs., 25c.; per brick, postpaid, 30c.; 5 bricks, 90c.; 12 bricks, \$1.80; 25 bricks, \$3.50; 50 bricks, \$6.50; 100 bricks, \$12.50; 1000 bricks, \$115.00.

Direct No. 8 Cream White. For use from October to April.

Direct No. 9 Pure White Type. For use from April to October.

Prices of Pure Culture Spawn. Direct Bricks

Per brick, 25c.; per brick, postpaid, 35c.; 12 bricks, \$2.40; 25 bricks, \$5.00; 50 bricks, \$9.25; 100 bricks, \$15.00; 1000 bricks, \$140.00.

LAMBERT'S PURE CULTURE SPAWN

As we understand it, the difference between Direct and Standard Spawn is as follows: The "Direct" bricks are inoculated with spores taken from specimen mushrooms; without laboratory transfer. The "Standard" bricks are inoculated from spores propagated and when propagated transferred into the bricks of spawn. The Direct bricks produce the truest types of one kind or shade of color mushrooms.

A Straight Talk!

MICHELL didn't discover the north pole. All honor to the men who did. Michell's triumph rests on being a pioneer in good seeds and bulbs. If you want the very best the world can give you (A. D. 1909) our lists are at your service. Mailed free. If any one claims to know more about the florists' supply business than we do—please write us—we might be able to tell you something! You have everything to gain and nothing to lose in getting next to us! Write today, for our wholesale price list of bulbs.

HENRY F. MICHELL CO.

Chinese Sacred Lily Bulbs

We import these direct from China, where we get the selection of fine, sound bulbs. These sell readily on the store counter, and yield a handsome profit. We would recommend to force a few into flower, which can be done in about five weeks, and place the bulbs you desire to sell on the counter, with the blooming plants.

Regular Size Bulbs. 60c. per doz.; per basket (10 bulbs) \$1.25; \$4.50 per bale (120 bulbs), \$32.50 per 1.00.

Mammoth Size Bulbs. \$1.00 per doz.; per basket (10 bulbs) \$2.25; \$7.50 per bale (120 bulbs), \$60.00 per 1000.

Golden Chinese Lilies

Pure golden yellow, very fragrant. 30c. per doz.; per 100, \$2.00.

Pebbles for Chinese Lilies

40c. per doz, quart packages; per 100, \$3.00; not less than 50 at 100 rate.

PUBLICATIONS RECEIVED.

Landscape Planting for Pleasure and Profit. Sent out with compliments of Reading Nurseries, J. Woodward Manning, proprietor, Reading, Mass. A nicely gotten up little pamphlet with Rhododendron Vaseyii in colors as a cover attraction.

Year Book of the Greenhouse Vegetable Growers' and Market Gardeners' Association of America, 1909. This pamphlet contains the proceedings of the first annual convention of the above named society, held at Cleveland, Ohio, October 30 and 31, 1908, and other matters of direct interest to the market gardening fraternity.

Bulletin of the University of Missouri. Gives full information of the opportunities for agricultural and horticultural education furnished by the college. Fully illustrated with plates showing the various departments and their work. Explains the functions of the departments, admission requirements, costs, equipment, and all that the ambitious student may desire to know.

Number 23, Vol. 7, of The Bulletin of the New York Botanical Garden, which has just been issued is designated the "Hudson-Fulton Celebration Number." It contains a descriptive guide to the grounds, buildings and collections and a descriptive guide to the native trees of the Hudson River Valley prepared by Norman L. Taylor. There are forty full-page half-tone plates and a general plan of the garden. The tree descriptions are given in popular style, unencumbered by scientific terms, and the volume will no doubt find many interested readers.

MOVEMENTS OF GARDENERS.

John Forbes, who was for some time gardener for Mrs. Wm. B. Leeds at Newport, R. I., is now installed as gardener for Perry Belmont.

Wm. Mackay is now in charge of the E. T. Gerry estate at Newport, R. I., Arthur Griffin having resigned that position.

Patrick F. Reynolds, gardener for Mrs. J. P. Kernochan at Newport, R. I., is receiving congratulations from his many friends. The wedding took place October 5th.

SEED TRADE NOTES.

Howard M. Earl and Edwin Lonsdale arrived home from their California trip, October 5th.

Toronto, Can.—The Steele-Briggs Seed Co. have moved their retail business to a larger and more spacious building across the street, 137-139 King street. A. W. Annandale is in charge.

We are informed that Mr. Theo. Cobb, for twenty-four years with the D. M. Ferry & Co., Detroit, Mich., has decided to join forces with the J. F. Noll & Co., Inc., Newark, N. J. Mr. Cobb has been elected secretary of the company and will be glad to see any of his friends at 115 Mulberry St., Newark, N. J., any time after the 15th of this month.

Two Valuable Seed Novelties

Do not fail to include in your next catalogue

HOLMES' DELICIOUS SWEET CORN and
HOLMES' GREEN PROLIFIC POLE LIMA

Two of the greatest acquisitions ever offered. See our full page advertisement in Horticulture of Sept. 18th for descriptions and illustrations. Liberal terms to the trade. Write at once before our limited surplus is all engaged.

HOLMES SEED CO., Harrisburg, Pa.

THE LILY BULB SITUATION.

A pretty good consignment of Japanese lily bulbs was disposed of at auction in New York on October 5. The bulbs were mostly bought up by the wholesale importers at rather high prices—evidently to cover shortages—which seems to indicate that shipments now arriving in this country are under estimate and that orders on some lines will be filled with more or less difficulty.

We are informed in a letter just received from Japan, that forty-five days of consecutive rain and misty weather did much damage to the multiflorum lilies and "9-10s" are very scarce in consequence. The longiflorum giganteums are all right, but have stiffened in value in consequence of the demand caused by the scarcity of the multiflorums.

LILIES
PLANTS
BAMBOO STAKES

SINGLE LATE MAY-FLOWERING or DECORATION DAY TULIPS

These are exceptionally useful flowers for Decoration Day, and every florist should plant out a few. Once planted, they will remain for years and serve you with a wealth of bloom.

	100	1000
<i>Beauty of America</i> . Creamy white, turning pink...	\$1 00	\$8 00
<i>Bizarres</i> . Handsome, rich flowers, with yellow ground; finest mixed.....	75	6 00
<i>Bouton d'Or</i> . Deep golden yellow; very handsome flowers	85	7 50
<i>Bridesmaid</i> . Lovely soft pink.....	85	7 50
<i>Byblooms (Roses)</i> . White ground, blotched, striped or feathered with lilac.....	85	7 50
<i>Byblooms (Violets)</i> . White ground, striped and blotched purple and blue.....	90	8 00
<i>Darwin</i> . Very large flowers. They include every known shade	85	7 50
<i>Golden Crown</i> . Large, bright yellow.....	1 00	7 50
<i>Gesneriana</i> , <i>Scarlet (true)</i> . Largest and handsomest of all Tulips; fine for Decoration Day.....	1 25	10 00
<i>Macropsella</i> . Crimson-scarlet, black center.....	85	7 50
<i>Isabella (Shandon Bells)</i> . Carmine-rose, shaded creamy white	1 00	9 00
<i>Maiden's Blush</i> , or <i>Picotee</i> . Clear white, margined on the edge with pink, pointed and reflexed petals; most beautiful.....	90	8 00

PARROT, or DRAGON TULIPS

Parrot Tulips should be more largely grown. Their odd colors and fantastic shades make them ready sellers, and make a unique decoration when placed in vases or low bowls.

	100	1000
<i>Admiral de Constantinople</i> . Large; red, yellow edge.	\$0 85	\$7 50
<i>Cramoie Brillante</i> . Rich blood-crimson, with bluish markings	85	7 50
<i>Lutea major</i> . Large, showy yellow.....	75	7 00
<i>Markgraaf von Baden</i> . Red and yellow, orange inside; very showy.....	1 00	9 00
<i>Perfecta</i> . Yellow, striped red.....	85	7 50
<i>Superfine Mixed Parrot Tulips</i>	75	6 00

Of Interest to Retail Florists

TO RETAIL FLORISTS.

In view of the fact that there has recently been some comment in the trade press concerning the interchanging of retail orders among the florists of the country, it is proper to state that this subject was discussed at the recent convention of the S. A. F. and O. H. in Cincinnati with the result that the officers of that society are now actively at work and confidently expect to shortly announce the organization of a Retail Delivery Association composed of a large number of retailers throughout the country working in conjunction with the S. A. F. and O. H.

Retailers not now members of the national society have expressed an eagerness to join as soon as such an organization can be effected. The de-

Chauncy Slade has taken a position with W. McCarthy at Erie, Pa.

Mr. J. Backhouse of York, England, sailed for home on October 6, on the Mauretania from New York.

Our sincere sympathy is extended to J. K. Allen, the New York wholesale florist, whose sister died on October 1.

A. D. Goldenberg of R. M. Ward & Co., New York, returned from his European trip October 4, on the George Washington.

John H. Taylor, Bayside, N. Y., returned on Red Star steamer from Antwerp last Sunday, after a European tour of several weeks.

Arthur H. Norton, son of M. H. Norton, was married to Miss Doherty at St. Peter's Rectory, Dorchester, Mass., on Wednesday evening, October 6.

Visitors in Boston: T. Melstrom, representing F. Sander & Son, St. Albans, Eng.; H. Thiemann, Monson, Mass.; H. S. DeForest, of Pierson U-Bar Co., New York.

Visitors in New York: A. J. Pieters, Hollister, Cal.; Hon. Phil. Breitmeyer, Detroit, Mich.; W. C. Langbridge, representing Jerome B. Rice, Cambridge, N. Y.; E. Allan Peirce, Waltham, Mass.

Harry Budlong, son of J. A. Budlong, and for many years identified with J. A. Budlong Sons & Co., Auburn, R. I., has severed his connection with the business and will devote his time to other interests.

Philadelphia visitors: S. B. Dicks, London, England; Leonard Long, Long Branch, N. J.; Phil Breitmeyer, Detroit, Mich.; Jefferson Thomas, Harrisburg, Pa.; Victor Groshens, Glenside, Pa.; Alex. Cumming, Hartford, Conn.

NEW BEDFORD NOTES.

Trade Jottings.

Vacations over, and with the fall season on hand business has been improving every day. The past week when the rainy weather caused havoc with the outdoor stuff, there was a big demand for indoor flowers, with little to be had. Chrysanthemums are now showing up in the store windows, and amongst the growers the plants are looking fine. R. E. Nofftz, H. A. Jahn and R. H. Woodhouse were the first to cut some nice Polly Rose and Glory Pacific. The local dahlia exhibitors have been very fortunate this year, bringing home many prizes from every city where they exhibited.

Local festivities have started in with the right kind of a snap. A banquet and dancing party given to Miss Elizabeth Peirce at Fairhaven Town Hall gave Peter Murray an opportunity to display his artistic abilities, and on October 9, R. H. Woodhouse has an elaborate church decoration for the Peirce-Williamson wedding. We mention these simply to show that New Bedford's season is beginning with a noise that sounds like a glorious winter for business.

Personal.

Fred C. Covell, formerly with E. H. Chamberlin, has now taken the position of manager of the flower department of the Shepard Co. in Providence, R. I.

Recent visitors were A. Leuthy, Ros-

Flower Market Reports.

This market has emerged from the summer torpidity with a vivacity which promises well for the opening season. The closing out of the aster crop was all that was necessary to open the eyes of the trade to the fact that the demand was sufficiently lively already to use up most of the regular product if of good character. Roses are being received in liberal supply and are being taken up satisfactorily. They are of creditable quality in all respects, the only lack being stems. Carnations are far below the demand and the market could consume many more than are offered. The fine weather has increased the supply of chrysanthemums, which have been somewhat backward in coming forward and at the pace they have now assumed they will probably stave off any possibility of starvation which might otherwise have seemed imminent. Gladioli have had a convalescence since the rainy spell which put them temporarily out of business and are again in good shape. Violets are really good for so early a date. Altogether, the outlook is for a very good general supply in all lines for the immediate future, with a reasonable demand for seasonable goods.

Chrysanthemums are getting a little more plentiful. Owing to the cool

weather the crop has been somewhat backward. Golden Glow is giving way to Monrovia in the yellow. October Frost is at its best this week and blooms that have been left on the plant long enough are very fine. There seems to be no lack of pink roses at present. Mrs. Marshall Field, Killarney, and Maryland are of excellent quality. The demand for medium Beauties has increased during the past week and the stock of all grades of this flower is of good quality. A big crop of White Killarney is on with some growers and Kaiserin is still at its best. Brides and Bridesmaids are getting more plentiful and Richmonds are coming with good stems and fine flowers. About 90 per cent of the carnations are on short stems and the stock later in the season would not bring the price it does now, but the scarcity of this standby and the difficulty of substituting anything for it brings the price up. Some really fine blooms of Lawson and Enchantress are in the market, though the stems are not more than fifteen inches. Victory, too, is looking fine for the season and bringing a good figure. A few cosmos, dahlias and asters are still seen, but dahlias are considered a failure in this locality. At Chas. McKellar's, where orchids are a specialty, there are to be had now in addition to Cattleya labiata, oncidiums, Vanda coerulea and Dendrobium formosum. 3 to 5 for oncidiums, 25 to 30 for vandas and 40 to 50 for formosums are the prevailing prices.

The quality of PHILADELPHIA American Beauty roses improved greatly last week and this great flower resumed its premier position in the

market. The supply was so much larger, however, that no advance in prices can be noted. Bridesmaid continues under grade and very little satisfactory trade could be done with it. Many growers have quit growing it altogether on account of the superior profit-bearing qualities of Killarney and Maryland. Bride is showing up better, and has far superior finish—better stems; better substance; better every way. Richmond has also improved a good deal. Carnations are commencing to

look like carnations once more—and are welcome. Supply, so far, entirely inadequate. Chrysanthemums more conspicuous with excellent demand, especially in the higher grades. Orchids show more variety, and find ready sale at good figures. In addition to cattleyas, there is a fair showing of oncidiums, phalaenopses, vandas and cypripediums—also a very few Dendrobium formosum. Lily of the valley, gardenias and dahlias remain normal. The latter are liable to stop any day now—if a sharp frost comes along.

Flower Market Reports.

(Continued from page 519)

The local business barometer stood rather low last week and it may well be said that the supply of stock was still lower. It is nothing new, but an annual occurrence of shortage at this time with everybody wishing for some of those carnations which will go to waste when the glut is on next November or March. Considering how certain we are of these ups and downs in supply, it seems odd that no remedy has been brought out for it. D.

The present week is **NEW YORK** a refreshingly busy one with the wholesale trade. It started out on Monday with a vigor which recalled old times and has continued the pace right along ever since. The removal of the outdoor flowers from the arena has helped things amazingly and put new life into everybody. The price of lilies has doubled up and carnations would bring winter figures at once if the flowers received had anything like winter quality. Chrysanthemums are noticeably increasing in quantity as well as quality. The orchid pinch has been relieved by the incoming of *Cattleya labiata*, *Dendrobium Phalaenopsis* and *Oncidium varicosum* in quantity and the price of cattleyas has already been cut in two. Roses are improving in quality daily. Violets are also im-

proving and have taken their place as a regular daily item. Hudson-Fulton gaities did not do the flower business any good—hurt it, rather.

The premium lists for the 15th annual exhibit of the New Hampshire Horticultural Society which is to be held in the town hall building, Peterboro, N. H., Oct. 27, 28 and 29, have been issued.

JOHN YOUNG'S HUDSON-FULTON WINDOW
Artist, George Hildenbrand.

Washington.—A general consensus of opinion among the trade is "nothing doing," although there has been not a little funeral work, there is no steady demand for flowers. The weather is ideal and that fact has delayed the return to the city of the flower buyers.

AN INSECT FRIEND.

An insect, slightly resembling the dragon fly, was received at the Division of Zoology of the Pennsylvania Department of Agriculture by State Zoologist Surface, accompanied by a letter having the name attached of a prominent Luzerne county physician, who wrote: "The enclosed specimen is highly destructive to my maple shade trees. Kindly inform me what to do."

The specimen proved to be a Thalessa, which State Zoologist Surface pronounced "a destroyer of other insects, and, especially, of some of the worst enemies of trees." In this respect it is like the lady bug, which feeds upon the San Jose scale. The Thalessa has long antennae and a tail composed of three black hairs, like those of a horse's tail, each about three inches long. These form a long tube which it inserts in the holes made in trees by borers, and having encountered a borer it deposits its eggs in or near it. These eggs develop larvae which feed upon the borer and destroy it. Owners of fruit and shade trees, instead of destroying the Thalessa, should protect and preserve this useful insect.

NEW ORLEANS NOTES.

A storm of unusual violence, which started about midnight of the 19th of September and continued with increasing force for twenty-four hours, swept over this city and left wreck and ruin in its wake. Business was paralyzed for quite a while, and the florists were badly hit. A great many chrysanthemums are grown in the open here specially for All Saints' Day, November 1st, and in nearly every case these were blown down and badly damaged. Several greenhouses of olden type were

completely demolished. Lath sheds are the favorite structures for summering palms and the one on C. W. Eichling's place went down before the storm and almost completely ruined his decorative stock. A couple of sheds at J. A. Newsham's and the roof of a warehouse were also swept away, but no plants were damaged. The Metairie Ridge Nursery Co. had about 500 lights blown out, but here also all plants practically escaped damage. The worst wreck of all was at Horticultural Hall in Audubon Park, where a whole section of about 300 feet, foundations and all was toppled over, completely destroying the plants underneath. This was a relic of the Exposition of 1885 and was one of the show places in town. It will probably be rebuilt.

A table of Cattleya Bowringiana at Newsham's is a glorious sight at present, bud and bloom rioting in profusion. This cattleya does not seem to take in the northern markets, being one of the smaller flowered ones, but its bright cheerful color and rare beauty ought to triumph over mere size.

A feeling that we ought soon to entertain the S. A. F. and O. H. here at their annual convention is springing up, and while the idea has not quite crystallized yet, it will soon do so. This city is an ideal convention one, even in the month of August and much good would result to, as well as from, the mother society in a visit here.

OBITUARY.**B. Hasselbring**

Bernard Hasselbring, florist of Flint, Mich., died on September 25, after but a few hours' illness. Mr. Hasselbring was born in Germany in 1841, came to this country in 1872 and located in Saginaw; in 1877 rented the greenhouses at Flint, which later he purchased. A widow, four sons and a daughter survive him.

James Dennis

James Dennis died on September 16 at the Rhode Island Hospital, at the age of 73. He run the greenhouses at the rear of 3124 Pawtucket avenue, E. Providence, for a number of years. He leaves a widow and a daughter.

George Lambert

George Lambert, florist of Atlanta, Ga., was found dead at his boarding place on the morning of September 28.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

RAILROAD GARDENING.

An excellent and practical paper on the comparative value of hardy perennial and tender plants in railroad gardening was read at the annual convention of the Railroad Gardeners' Association at Philadelphia by Patrick Foy, gardener for the Norfolk and Western R. R., Roanoke, Va.

Mr. Foy advocated the use of hardy plants as almost a necessity, from the fact that in the past twenty years railroad mileage has so increased, and property adjacent thereto has been so improved that were these grounds to depend on their plants for their adornment a great deal of it would be allowed to remain unadorned. He called attention to the fact that some of the most beautiful plants and shrubs that grow most luxuriantly in the southern states will not thrive in the northern states nor in the great northwest, so the fellow whose lot is cast in Pennsylvania, Massachusetts or New York, or out in some of the north-western states is deprived of the enjoyment of having in his collection the majestic Magnolia grandiflora, the beautiful Crepe Myrtle and the sweet scented Cape Jasmine, and the grandest of all climbing roses, the Marechal Niel rose, and many other things which are at the disposal of the gardener in a more favored clime. He recommended the planting with hardy decorative plants all station grounds away from headquarters and of less importance, and that prominent centers by all means be planted with both tender and hardy plants.

KANSAS CITY'S PARK SYSTEM.

Under the provisions of the law which permits this city to issue \$150,000 in bonds for the acquisition of land for public parks, the park commissioners have just issued \$45,000 worth of bonds. Out of the proceeds, land is to be purchased or condemned for artificial lakes, sunken gardens and a parkway from Washington boulevard and Tenth street to Tauromee avenue and Eleventh street. In addition, two playgrounds and a small park are to be provided.

In the development of Kansas City, the board of park commissioners are giving attention to a system of boulevards. Engineers are now laying out a cliff drive to follow the Kaw river bluffs; extensions of the boulevards in the heart of the city also are proposed.

In addition to the permission to borrow \$150,000 for the acquisition of lands, the municipal authorities can levy a one-half mill assessment for the maintenance and improvement of the park system. This amounts to \$35,000 a year.

Much of the land taken for park purposes is low priced property, and the municipality is saving money by purchasing the ground at present. George E. Kessler, who designed the park and boulevard system of Kansas City, Missouri, is supervising the work here. One of the active promoters of the improvement is The Mercantile Club, which is one of the affiliated organizations of the American Civic Association.

Cornus florida in the Boston parks is loaded with brilliant fruit this year. The coral berries in association with

Weathered eight section boiler, in use two seasons, good as new, \$100. Cash. Chas. E. Evans, Watertown, Mass.

MISCELLANEOUS WANTS

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

the bronzy red tint of the changing foliage make a fine effect and help to justify Mr. Pettigrew's characterization of this species as the best of our native ornamental trees. Other cornuses, the crataeguses, viburnums, etc., are all well supplied with fruit this season.

CHICAGO NOTES.

General News.

A gem of beauty is the sunken garden at the Sears, Roebuck & Co.'s plant on the west side of Chicago. This is one of the largest mail order houses in the world and apparently no expense is spared to beautify their grounds. Practically all is done for the pleasure of their 10,000 employees; as their grounds are so extensive, little of the gardens can be seen from the streets. A special feature is a pergola, 25 x 125 ft., its artistically shaped roof supported by massive concrete pillars, which material also forms the floor and steps as well as the entrance to the garden itself. Sixty thousand plants each year are required and from six to twelve men, under Head Gardener Geo. H. Cook, devote their time to the grounds. The banks of the garden are completely hidden by geraniums, begonias, asters, etc., while beyond the banks are shrubs and trees.

The gardens are beautifully laid out. Beds of various designs, gorgeous with color, all harmoniously arranged to show what a beauty spot can be made in connection with great walls of brick and with a mammoth business enterprise as the main feature. It is to the credit of the management that the tender plants are not allowed to be killed by the frost, but are given to the employees in the fall.

A greenhouse for the care of their palms, etc., is now in process of construction, and others will be built later. If our large cities had more such beauty spots as this, what object-lessons in horticulture they would be to the people!

The neat invitations sent out by the Wholesale Florists' Employees' Club are meeting with a ready acceptance. The officers, H. W. Rogers of Weiland & Risch, G. F. Poehlmann of Poehl-

The Chicago Retail Florists' Association has issued a circular dated October 1, to the wholesalers, asking them to refrain from selling to the consumers or allow their employees to do so. They also ask that no designs be permitted to be made up on their premises. October 9th is the limit in which to send a reply and if none is sent by

vicinity of Chicago, and though it has been a poor year for out-of-door flowers in general, still there are enough in the average garden to supply all ordinary wants.

Lloyd Vaughan has returned from New York where he has been to look up the violet question for the coming

GARDENS OF A CHICAGO BUSINESS HOUSE

The Pergola.

that time it is to be regarded as a refusal to comply. The request is signed by forty-three of the leading retail florists of Chicago.

A one-story structure for the home of the South Park Commissioners, Chicago, is under way and will be enclosed before the snow flies. Supt. J. F. Foster says it will be a model of convenience, with private rooms for

season. Mr. Vaughan found things in the Rhinebeck district in a flourishing condition and shipments are expected to begin about the middle of November.

A number of Chicago firms will exhibit at the State Fair at Springfield this week. The scarcity of flowers has prevented many from taking this opportunity of showing their stock and their skill in handling it.

The remodeling and repairing of the dome of the Garfield Park Conservatories is begun, under the direction of the city architect, Henry Seirks.

Personal.

Mrs. August Poehlmann is home from a three weeks' stay in the hospital, and is fast regaining her health.

Percy Jones, whom we reported last week as being ill and consequently absent from the Flower Growers' Market of which he is manager, was taken to the hospital a few days ago and after an operation pneumonia set in, making his condition the cause of grave anxiety. He is said to be on the road to recovery, though still very sick.

Visitors: A. Leedle, Springfield, O.; Dan. MacRorie, San Francisco, Cal.; E. A. Peterson, Hoopstown, Ill.; John Bourgaize, of North Side Greenhouses, Racine, Wis.

Hitchings & Company

Designing & Sales Offices General Offices & Factory
1170 Broadway, N.Y. Elizabeth, N.J.

A Two Compartment House, 50 Feet Long Built at Edgeworth, Pa.

An attractive little house, isn't it? It has one compartment for propagating bedding plants, growing chrysanthemums and for general purposes — the other for potted plants and such decorative kinds in tubs as are brought in from the grounds in the fall. To accommodate the taller ones, the center is left open and has only tables around the sides. But there are any number of ways to arrange it; the main point to start with, is to choose the right firm and then you are sure of getting the right construction. As a starter, just try us.

LORD AND BURNHAM COMPANY

Irvington-on-Hudson, N. Y.

New York — Boston — Philadelphia — Chicago

A GREENHOUSE FACT OF IMPORTANCE

Greenhouse designing and building is a business by itself. It is no more possible for a general builder to give you a practical, satisfactory greenhouse than it is for the local blacksmith to make an automobile.

If you want a greenhouse designed harmoniously, artistically — a house that will yield the greatest amount of plants and flowers with least trouble — one that is built to withstand the destructive conditions that must exist in every greenhouse, then go to a professional greenhouse builder. We are that kind of builders.

We build a distinctly different kind of house from any one else — no one else can build it, the patent is ours.

It has an all steel, all galvanized frame of unusual strength, but extreme lightness. It is in fact the lightest greenhouse built, and the lighter your house, the more and better your flowers will be.

Our catalog tells interestingly and illustrates plainly just why U-Bar greenhouses are the best houses for you. Let us send you this catalog.

WM. TRICKER, Arlington, N. J.

NEPHROLEPIS ELEGANTISSIMA COMPACTA

Another New Fern Originating with Us. To be introduced Fall, 1909.

Of all the valuable introductions in ferns that we have sent out, beginning with the Pierson (Nephrolepis Piersonii) we consider Elegantissima compacta the most valuable of all, particularly from a commercial standpoint.

While this resembles Elegantissima in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with Elegantissima except in a general way, because it occupies a place by itself, and is as distinct from Elegantissima as that variety is from Piersonii, — in fact, it bears the same relation to Elegantissima that Scottii does to Bostoniensis.

Elegantissima compacta has an ideal habit. The fronds are considerably shorter than those of Elegantissima, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2½-in. pots, \$5.00 per dozen, \$35.00 per 100; 4-in. pots, \$7.50 per dozen, \$50.00 per 100; 6-in. pans, \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of Nephrolepis, carrying a large stock of all sizes at all times, — Piersonii, Elegantissima, Superbissima, Bostoniensis, Scottii, Whitmanii, Amerpohli, etc.

Notes from the Arnold Arboretum

Many new Clematises have been introduced recently from China where the genus seems to be very well represented; two of them, *Clematis nutans* and *C. orientalis* are now in full bloom and must be considered, particularly on account of their late flowering time, desirable additions to our ornamental vines. *Clematis nutans* resembles in its foliage much our native *C. virginiana*, but the flowers are entirely different. It is apparently a high climbing shrub of vigorous growth. The bright green long-stalked leaves are pinnately divided with slender stalked leaflets from one and a half to three inches in length, ovate in outline, deeply and incisely toothed and sparingly hairy on both sides. The flowers are disposed in many-flowered short panicles borne high above the foliage on slender upright stalks up to six inches long; the individual flowers are nodding, yellowish white, but little over one-half inch long and resemble in shape those of the hyacinth. The cluster of nodding flowers borne on slender stalks high above the foliage give this Clematis a very distinct appearance unlike any other species.

The second species is *Clematis orientalis*, or more correctly a new variety of this very variable species. The slightly bluish green leaves are also pinnate, but the leaflets are smaller than those of the preceding species and generally three-parted, otherwise nearly entire. The yellow nodding flowers appear in axillary clusters individually on slender stalks from two to four inches long and are about three-quarters of an inch long; they are followed like those of the preceding species by showy heads of long-tailed feathery fruits. The flowers, though not as large as those of *C. tangutica* described in an earlier issue, are very conspicuous on account of their yellow color. Two more species of Clematis are coming now into bloom and will be described in the next issue.

Besides *Elsholtzia Stauntoni* from North China mentioned in an earlier issue there has been recently introduced from Central China a second species, *E. polystachya*, forming a roundish bush from four to six feet high similar in foliage to the preceding, but with white flowers. The short-stalked lanceolate leaves are from four to six inches long, distinctly toothed, long-pointed and hairy and grayish green on the under surface. The small white flowers are disposed in slender spikes from three to seven inches long and produced in great profusion at the end of the branches. The appearance of the roundish bush studded all over with the white flower spikes is quite striking, though not as showy as *E. Stauntoni*.

A handsome new red-fruited *Cotoneaster* from Central China is *C. Dielsiana* (*C. applanata*). It is a deciduous upright shrub with slender horizontally spreading and arching branches thickly studded in autumn with scarlet fruits. The short-stalked leaves are generally ovate in outline, about one inch long, dull green on the upper and grayish tomentose on the lower surface. The pinkish flowers appear in few-flowered clusters and are rather insignificant.

Another handsome species is *Cotoneaster humifusa*, a creeping shrub with evergreen foliage. The short-stalked glabrous leaves are oval in outline, about one-half inch long, dark green and glossy on the upper and whitish on the lower surface. The solitary white flowers measure nearly one-half inch in diameter and are followed in autumn by bright red fruits. The shrub with its long creeping and rooting branches is well suited for rockeries and rocky banks.

Alfred Rehder.

Three Good Garden Roses

After two seasons' trial under conditions of weather distinctly unfavorable, Rhea Reid has proved to be the best of all crimson roses for garden planting. A sturdy vigorous grower, hardy in the vicinity of Boston and probably equally so in places much farther north, it fills a place hitherto vacant. The flowers as grown outdoors are dazzlingly brilliant, with size and form equal to the best H. P. varieties and, blooming freely on the young wood, all one has to do is to keep it growing to get flowers in succession all summer and fall.

Another rose which cannot be too highly spoken of in the same respect is Wellesley. This is perhaps the freest bloomer of all the H. T.'s, being several days quicker than even that well proven favorite, Killarney, in producing its second crop after the June flowering. The growths are tall and stout and the flowers are produced in abundance. It also is perfectly hardy in Boston and no garden should be without it.

A writer in some horticultural paper which we read recently referred to the Burbank rose as being of inferior character and practically identical in color with the old Hermosa. This was certainly a mistake, as Burbank bears a larger flower with petals loosely rolled back and has foliage not at all like Hermosa. Moreover, the flowers are almost cherry red, whereas Hermosa is delicate pink and with cupped petals. While the individual flower is not to be compared with even the poorest of the garden H. P. varieties, yet the effect in mass of the Burbank rose is superlatively good, and its hardiness and unexcelled freedom of bloom place it among the indispensables. Its proper place in the rose garden will be quickly found by the observant planter.

culture because of the inadequate remuneration in the park department. There seems a lack of discrimination between the ordinary type of workman and the well-trained, well-read and proficient all-around gardener in most places and it is notorious that the services of the latter class are, in many instances, shamefully underestimated and underpaid. When such men switch off into commercial lines, commercial floriculture is the gainer, sometimes more than the individual, who, if he has not had the benefit of a commercial training earlier in life, is liable to encounter many unforeseen discouragements and bitter experiences as he progresses.

Vicissitudes of the flower trade

Referring to the carnation famine existing at the time of writing, our correspondent in Detroit, in last week's notes, remarked that it seemed odd no remedy for the shortage had been found. Our reports from various markets this week indicate that the remedy was not long in making its appearance, and, like the North Pole finding, there was entirely too much of it. Following directly upon the discomfiture of the garden crops, the carnation girded itself for action and for a few days it certainly "made good," but the reverse came as suddenly as the uplift and, in some markets at least, it didn't take twenty-four hours to cut the prices one-half and load up the wholesaler's storage boxes with carnations of high and low degree. We are sorry. These acute fluctuations are bad for everybody. Now enters the chrysanthemum and all thought of famine for the next few weeks may be promptly dismissed. It will require a big allotment of that promised prosperity to absorb the flower crop—roses, carnations, chrysanthemums, violets, orchids—which is now in sight.

The "sleepy" carnation

We have received a communication from a correspondent who is engaged in the wholesale cut flower business calling attention to the numerous complaints received concerning the non-keeping qualities of carnations shipped out by him. His care to procure and ship only absolutely fresh stock counts for nothing with the customer, who will accept no other explanation than that the flowers were old. He has tried every imaginable device in handling and caring for the stock and is almost in despair over the repeated failure to find any process that can be depended upon to obviate the trouble. We have reminded our correspondent that the difficulty complained of is an old one which has taxed the ingenuity of the most advanced carnation growers and exhibitors to explain. All sorts of theories have been advanced in discussions of the subject of "sleepiness," as it is called, in carnations, at the meetings of the American Carnation Society and elsewhere but the stubborn ghost still walks and the reproach of having sent out worthless goods, on which he cannot enforce payment, is the charge which the carnation shipper must continue to face. C. W. Ward says in his book, "The American Carnation," that "the chief value of any flower consists in its being placed in the hands of the consumer in a fresh, lasting condition," and dwells upon the necessity of proper handling of the blooms from the time they are cut, factors in which are—picking in early morning, when the blooms have not reached full maturity, avoidance of changes in temperature and impure air, etc., all of which, together with much other information essential for the full success of anyone growing or dealing in the divine flower is fully covered in the book above mentioned.

The gardeners' predicament

The question of gardeners' wages in public and private grounds, brought up for discussion in the last meeting of the New York Florists' Club, acquires added importance through the news that the accomplished gardener of Elizabeth Park, Hartford, Conn., has resigned to go into commercial horti-

Cattleya citrina

The picture represents the same plant which was illustrated in *HORTICULTURE* in the issue of December 12, 1908. In the first picture it bore two sprays of two flowers each; it now shows three, indicating that the treatment as recommended in the article by M. J. Pope in connection with the first illustration is congenial to this *Cattleya*. A cool, airy house such as primulas, azaleas, etc., are grown in; very little water but a cool, moist atmosphere at all times, is Mr. Pope's prescription for success with this interesting, sweet-scented and altogether beautiful flower. The species has the reputation of "going back" after a few years of cultivation. That this is due to improper cultural methods and not a fault of the plant itself would seem to be the logical inference from Mr. Pope's experience with it. No doubt this eminently successful orchid grower will be pleased to give, through *HORTICULTURE*, on request, further detailed information on this or any other topic connected with the growing of orchids.

European Horticulture

DAHLIA AND AUTUMN FLOWER SHOW AT LEIPZIG

The German Dahlia Society—a union of a relatively few enthusiastic amateurs—is, notwithstanding the fewness of the members, one of the most active of German horticultural societies. They understand how, by means of their annual journal and various exhibitions to keep alive an interest in dahlias and other autumnal flowers. The first exhibition was held at Magdeburg in 1898, and that at Leipzig was the thirteenth in the series. The late exhibition was held in the Festival Saloon of the publishing house and the adjacent rooms, all of them very suitable for such a purpose owing to the admirable light-

ing arrangements that allowed every object to be seen at its best. The show was abundantly advertised: colored posters, which, however, owing to their faint coloring were not visible at a moderate distance, placards in the trains, etc., made the show known to the inhabitants of the city, yet the attendance was but moderate owing to the rainy Sunday.

The "Show" dahlia has had its day in Germany, and the various modern forms of single, partially double, collarette, etc., with stiff stems throwing the blooms well above the foliage have taken its place; so we find the gigantic chrysanthemum-flowered, the American *Fantasie*, and the enormous decorative varieties and the modest little *Pompons*. As actually new forms of these last, mention may be made of *Kardinal* and *Puppenfee*.

Fairy Doll the latter looking like a modern double daisy in shape and size, and almost pure white. The exhibition was astonishingly filled with German varieties, and the names attached to them were descriptive in many instances of their color. Two collarette varieties were quite up-to-date, namely, *Cook* and *Peary*.

It is impossible in a note of this kind to give the names and descriptions of the varieties, or those of the exhibitors, so numerous were they.

BERBERIS GAGNEPAINII

The list of shrubs, natives of temperate climates possessing an ornamental character, has been enriched by the introduction of *Berberis Gagnepainii* by Messrs. J. Veitch of Chelsea. The species is found in northern India and western China, where it and a number of allied forms are met with. The seeds were collected by E. H. Wilson. The species flowered in 1907, and was then identified at the Kew Botanic Gardens with *B. acuminata*, Franchet, and figured in the *Botanical Magazine* under that name.

The typical *B. acuminata* has larger, coarser, thicker leaves armed with stouter spines than *B. Gagnepainii*, and there are other differences which may be due to local conditions. So it is somewhat uncertain whether they are the same plant. A figure of *B. Gagnepainii* showing foliage and fruit, together with a descriptive note by W. Botting Hemsley, appeared in *The Gardener's Chronicle* for October 2nd.

APPLE ST. EVERARD

This variety is the result of a cross of the well-known Cox's Orange Pippin with Margil, a medium sized delicious variety. The fruit of the new comer is of middling size, roundish, and with the distinctive reddish stripe of Margil. Its flesh is of a rich flavor and juicy—an excellent dessert apple. The variety was shown by J. Veitch and Sons at the Royal Horticultural Society's meeting at the Vincent Square Hall on September 28, and received a first class certificate from the Royal Horticultural Society.

AN ANGLO-JAPANESE EXHIBITION IN LONDON, 1910

It is announced that an Anglo-Japanese exhibition will be held at Shepherd's Bush next year, in which there will be gardens in Japanese style, laid out by gardeners from the Island Kingdom. We have seen such gardens before, but doubtless the projected gardens at the White City will be laid out in a more ambitious manner than those. At the Vienna International exhibition in 1873, an extensive garden with stone lanterns, bridges, streams of water, flat stepping stones as paths and fords was a greatly admired object in the grounds.

Frederick Moore

NEWS OF THE CLUBS AND SOCIETIES

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

The first meeting of the club in their new quarters at the Fort Pitt Hotel on Tuesday, Oct. 5, brought out a large attendance of members. The surroundings were delightful, and every one seemed favorably impressed. In the absence of Prest. Burki, Vice-President Randolph took the chair.

It was Dahlia Night, but to the disappointment of the members, the shipment promised from R. Vincent, Jr., & Sons, White Marsh, Md., did not arrive. Neil McCallum of West End Park showed a collection of hardy flowers in recognition of the variety and excellence of which he was unanimously awarded a gratuity. Frank Crook showed *Cattleya labiata* and *Odontoglossum grande*. The cattleyas were of Sander's stock, shipped in 1904, and still holding up well, considering our Pittsburgh climate.

The judges, J. Hutchinson and Jas. Moore, awarded a substantial prize to this exhibit.

Randolph & McClements showed a dozen of a new yellow sport from chrysanthemum Polly Rose, which looked very promising, also about fifty pots of fine crotons and other foliage plants for which they were awarded a certificate of merit.

Asked how to get mealy bugs off crotons, Mr. Randolph said he never allowed them to get on, but if unfortunately any plants were infested he recommended Fels Alco-Naptha soap. Among his plants he pointed out *Ficus pandurata*, as hardy as an aspidistra, which though introduced a number of years ago, is only just beginning to take.

Jas. Moore of Phipps' Conservatories showed a specimen bloom of *Aristolochia gigas*, a curious freak, looking as though it was a cross between a goose and a pitcher plant.

The very successful outings of the club in 1908 were called to mind and it was decided to have the first one of this season on Monday, November 1st; the members to meet at Phipps' Conservatories, Schenley Park, at 10 a. m., and after inspecting the chrysanthemums there to visit Randolph & McClements.

The Finance Committee reported the matter of financing the Carnation Convention as well under way and everything in good shape. Five new members were elected and three names proposed for membership.

Subject for next meeting: Chrysanthemums.

H. P. JOSLIN, Sec'y.

NEW YORK HORTICULTURAL IMPORTERS' PROTECTIVE ASSOCIATION.

A regular meeting of the New York Horticultural Importers' Protective Association was held on Thursday, October 7th at the Astor House, New York; a full attendance being present. This organization was formed about two years ago, primarily for the purpose of regulating credits of buyers of plants, seeds, bulbs, etc. It includes practically all of the large wholesale importers and agents.

J. McHUTCHISON, Sec'y.

NEW YORK FLORISTS' CLUB.

The meeting on Monday evening, October 11, was attended by about seventy-five members. Plant market committee, Transportation committee and Outing committee all presented favorable reports, the latter showing a net profit of \$61.97. Three new members were received and six were proposed. The proposed amendments to the By-laws developed lots of oratory. There were amendments to the amendments, motions to lay on table, refer, etc., but the proposition to permit nominations for officers from the floor at the November meeting was finally passed by a decisive vote.

An interesting discussion on the alleged inadequate pay received by gardeners in the city employ was launched by Robert E. Berry. The subject was committed to the tender mercies of the legislative committee.

Information of the death of the sister of J. K. Allen and of the son of J. B. Nugent being given, Messrs. Shaw, Gutman and Rickards were appointed on the first mentioned and Messrs. Traendly, Pepper, and Miller on the last named to prepare suitable resolutions of condolence.

H. A. Barnard of Stuart Low & Co., Enfield, England, was discovered in the hall and duly called upon to address the club, which he did in characteristically appropriate and pleasing manner, remarking on the beauty of the landscape, the vastness of the country, the adornment of the railroad stations, the comforts enjoyed by the middle classes, and other impressions gained in his recent trip in the Eastern States. He especially dwelt upon the wonderful future before the American horticultural industries and the boundless field for the florists' vocation.

The award committee gave a cultural certificate to C. H. Totty for an exhibit of very handsome chrysanthemum blooms.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Canna.

Public notice is hereby given that Vaughan's Seed Store, 84 Randolph street, Chicago, Ill., offers for registration the plant described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

Description—Seedling; deep velvety green foliage. Very free and robust grower, extra free bloomer, carrying three and four perfect flower spikes at one time. Color bright vermillion with narrow golden yellow border. Four feet.

Name—Multiflora.

W. N. RUDD, Secretary.

October 8, 1909.

CONNECTICUT HORTICULTURAL SOCIETY.

Our first October business meeting was held on the 8th instant, President Huss presiding. Two applicants were received into membership; namely, Shiras Morris, of Hartford, and C. D. Wisner, of South Manchester. Inasmuch as our recent dahlia exhibition fell on two rainy days, and the revenue pertaining to it was consequently small, the announcement by the secretary that the bill introduced into our last legislature increasing the annual appropriations by the state to incorporated agricultural societies, had been passed and approved, was received with gratification and applause. Under the provisions of this bill \$6,000 is annually appropriated to such societies for the payment of premiums on agricultural products; each incorporated agricultural society applying for it, and previously having paid out \$200 in premiums, can receive reimbursement from the state for that sum; and any balance then unused out of the \$6,000 is payable, on application, pro rata, to such societies as expend over \$200 in premiums. It is believed that a great stimulus will be given to the healthful competition among the members of our state horticultural organizations by this new measure; \$100 only, and the contingent pro rata surplus mentioned, being available under the old law, to each society.

Our society is in a flourishing condition, retaining most of its old members, and constantly receiving new ones. All are looking forward with expectancy to our forthcoming chrysanthemum exhibition at Hartford, Nov. 4 and 5.

GEORGE W. SMITH, Secretary.
Melrose, Conn.

DETROIT FLORIST CLUB.

The Detroit Florist Club, under the energetic leadership of Mr. Charles Plumb, seems to have started an activity which is bound to be of permanent benefit to its members. Of course, no officer can succeed without the support of the members, but the program lined out by the committee on essays alone is certainly tempting enough to bring about a full attendance. A committee of two is already busy to gather facts from various prominent florists throughout the country, to compile statistics as to the cost of running a retail store and the cost of running a greenhouse plant. Two growers and two retailers are compiling data as to the productiveness of various plants and flowers under cultivation, respectively, and the demand of the buying public for these products. The result of this investigation will be given out in time to serve as a guide for next season's plantings.

Such features as "Store management," "Greenhouse management," and "The desirability of a theoretical training for young florists" will be treated by outside experts. Evenings devoted to such important discussions interspersed with evenings for entertainment are bound to bring out full attendance and lasting good.

FRANK DANZER.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual fruit exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, October 19 to 24, inclusive. This exhibition will be held in connection with the New England Fruit Show at which every New England state will present the best products of its orchards.

The main object of this combined exhibition is to demonstrate the superior quality of New England fruit; to encourage better methods of production and marketing, and to call attention to the possibilities of commercial fruit growing in the New England States.

On account of the orchid show in May, 1910, for which extensive preparations are being made, the usual spring exhibition at Horticultural Hall, Boston, will be omitted next year. The January show will also be omitted, but there will be an exhibition in February which, if the proposed plan of amalgamating the market shows with it should be adopted, will be a very extensive and interesting affair, especially from the florists' trade standpoint. The dates set for this show are February 26, 27 and 28, and not February 19 and 20, as has been announced elsewhere.

New England Fruit Show.

The several New England States will hold a Fruit Show at Horticultural Hall, Boston, Mass., from October 19th to 24th, 1909.

This proposed show is one of the results of the meeting of the Governors of the New England States in Boston, November, 1908, at which meeting questions relative to the promoting of New England's fruit interests were discussed. This will not only be a collection of fine fruit, grown entirely in New England, but it is to be of educational value, for besides exhibits of fruit, orchard tools, spraying outfits, and materials, there will be lectures by the best experts in the country on all matters pertaining to fruit growing, and problems which the orchardist will encounter will be discussed. New England has a wonderful future before her in fruit growing, for, contrary to the general opinion, her soils are not run out nor her farms abandoned for lack of soil fertility.

Lack of knowledge and industry are largely responsible for the present condition of fruit growing here. New England can produce as good looking apples as the West. This has been proved beyond a doubt by the few men who are really caring for their orchards, and the quality of New England grown apples surpasses that of apples grown in any other section of the country.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Owing to the New England Fruit Show occupying all the halls in the Horticultural building on October 19, the regular club meeting will be held on Tuesday evening, October 26 at 8 o'clock. J. K. M. L. Farquhar will favor us with a stereopticon lecture on "Hardy Bulbous Plants." He will also show a number of views of interesting horticultural sights as seen

Trophies to be Competed for in the Professional Classes at the Portola Flower and Fruit Show, San Francisco, Cal.

during his late European trip. Numerous exhibits are planned and the meeting will undoubtedly be very largely attended.

At the meeting on Nov. 16 Miss Louise Hetzer of the Lowthorpe Ladies' School of Horticulture, Groton, Mass., will speak on "Jottings of a Journey Abroad." Ladies will be made welcome at both the October and November meetings.

W. N. CRAIG, Secretary.

CHRYSANTHEMUM SOCIETY OF AMERICA.

At the joint exhibition of this Society and the American Institute of the City of New York, to be held in New York on November 10, 11 and 12 the following special prizes are offered, open to all unless otherwise stated.

Class A—C. S. A. prize, Best 10 blooms of any one variety, long stems, Silver Cup.

Class B—H. W. Buckbee prize, Best 12 blooms 12 varieties American seedlings, 12-inch stems, Silver Cup.

Class C—J. C. Vaughan prize, (open to private gardeners only). Best specimen bush plant, any variety, Silver cup.

Class D—Stumpp & Walter prize, Best 10 blooms of Miriam Hankey, long stems, Silver cup.

Class Ea—W. Wells & Co. prize, 6 blooms Pockett's crimson, long stems, first, gold; second, silver; third, bronze medal.

Class Eb—W. Wells & Co. prize, Vase of single varieties, assorted colors, 12 sprays to constitute the vase, first, silver; second, bronze medal.

Class F—F. R. Pierson Co. prize, (open to private gardeners only). Best 12 blooms in 4 varieties, 24-inch stems, 3 blooms in a vase, \$10.

Class G—Peter Henderson & Co. prize, 12 vases of Ostrich Plume chrysanthemums, 12 varieties, 3 blooms to a vase, first, \$10; second, \$5.

Class H—Elmer D. Smith & Co. prize, 12 vases Anemone varieties, 12 varieties, 6 of which to be introduc-

tions of 1909, 5 sprays to each vase, first, \$15; second, \$10.

Class I—Chas. H. Totty prize, 6 blooms, one variety, introduction 1909, long stems, first, \$15; second, \$10.

Class J—Skidelsky & Irwin Co. prize, 12 sprays Pompon varieties, 12 varieties, first, \$2; second, \$1.

Class K—Foley Manufacturing Co. prize, Best undisseeded seedling, 6 blooms—white, pink or yellow; purity of color to be chief factor in judging, \$10.

Class L—Traendly & Schenck prize, Vase 12 blooms Col. D. Appleton, long stems; open to commercial growers only, first, \$6; second, \$4.

Class M—William Duckham prize, 12 blooms, 12 varieties, not over 12-inch stems, first, \$10; second, \$5.

New York Florists' Club prizes, Six blooms of chrysanthemum seedling or variety never before exhibited in this country. To be judged under both the exhibition and commercial scales, the highest total number of points under both scales to decide the winner, first, silver medal; second, bronze medal.

ILLINOIS STATE FAIR.

The floricultural department of the Illinois State Fair was exceptionally large and creditable this year. Prominent among the prize winners in the ornamental plant classes were G. M. Brinkerhoff, George Van Horn, Wirth & Gaupp, Geo. A. Kuhl, A. C. Brown and Vaughan's Seed Store. Roses made a fine showing. Among the exhibitors in the various rose classes were Poehlmann Bros. Co., A. C. Canfield and A. C. Brown. The same exhibitors and the Chicago Carnation Co. showed carnations. Bassett & Washburn showed O. P. Bassett carnations not for competition, and Peter Reinberg a general collection of roses. Design work of artistic excellence was shown by Schiller and A. Lange of Chicago; Geo. A. Kuhl, Wirth & Gaupp, A. C. Brown and others. Among the combination designs of noticeable quality were the following: Bridal bouquet of Kaiserin roses, spray of *Dendrobium formosum* and shower of lily

of the valley, by Schiller; centre piece, fern dish filled with orchids and lily of the valley, by Brinkerhoff; cross of boxwood foliage with cluster of orchids and lily of the valley and square base of American Beauty and white roses and lily of the valley, by Schiller; urn—body of bronze galax, cluster of violets and lily of the valley, handles of red roses, American Beauty in top and white chrysanthemums in base, also by Schiller.

The gate receipts were over \$17,000 in excess of last year.

AMERICAN CARNATION SOCIETY.

A few words regarding the new section (Sec. C) added to our premium list may not be out of place, inasmuch as it may not be altogether clear to all of your readers.

In Section B there are separate classes for each of all the leading varieties, so that no variety is obliged to compete with other varieties. None of the new comers were included in this list for obvious reasons, and if one of them wished to compete, it had to compete in the classes provided for any variety in its color, not named in the list. This put these varieties in exactly the position which was considered unjust in the older standby.

Now there is no denying the fact that the new varieties are the most interesting part of the whole show, and they should be encouraged in every possible way. The only relief from the above conditions was for the disseminator to offer a special prize, which was very frequently done, though not always. So now in order to bring the matter down to more of a system and to give the new varieties the prominence they deserve, we have made a separate section for them and a separate class for each variety.

The premiums will be uniform, \$6.00 for 1st, \$4.00 for 2nd; 50 blooms to be shown, as in Sec. B. It is stipulated, however, the disseminator must pay for the two premiums and he must agree to do so before his variety is included in the list.

This seems perfectly just to us, because any man who disseminates a variety ought to be willing to back it up to that extent the first year it is on the market. If the variety "makes good" it is put into Sec. B next year.

Several of the novelties of last season have already been put into this list, and it is hoped that all those who sent out varieties last year will come forward and "stick in" their pets.

A. F. J. Baur, Sec.
Indianapolis, Ind.

ROYAL HORTICULTURAL SOCIETY.

In the Veitch collection at the exhibition of September 28 were some fruits not yet in general cultivation. The new apple, Rev. W. Wilks, named after the secretary of the Society, was observed in several examples. It is a large, handsome fruit of slightly conical shape, and was borne in numbers of two to five on trees grafted in March last year.

Among the novelties in Paul & Sons' display were a golden variegated Liriodendron, Quercus magnifica, Cotonaster nummularia having purple-colored fruits; Catalpa Bignonioides purpurea, this purple tint being only visible in the leaf stalks, and the rind of the young shoots.

Carnations of the winter flowering

NARCISSUS J. B. M. CAMM.

Here is one of the most graceful narcissi which, now that its price has got down to a moderate limit should

be much more widely disseminated. The trumpet is rich yellow changing to creamy yellow and the perianth is white. The flower has great substance.

or hybrid perpetual class were staged by Messrs. Cutbush & Son. I noted among them Mrs. Joe Wright, a pink, picotee-edged flower, that should have a future; Lady Millar, a blusa Malmaison, having several fine points, as has likewise Mrs. Rob. Norman, and C. H. Curtis, a nice bloom of a scarlet color.

F. Sander & Sons were exhibitors of a small lot of Laelio-cattleyas of distinct forms or of new colors, of which mention may be made of L. c. Walter Gott=C. bicolor and L. c. Bletchleyensis. Charlesworth & Co. staged a plant of Cattleya Mrs. Pitt superba=C. Harrisoniae x C. aurea, a showy and pleasing novelty. An Award of Merit was made to this variety. A similar award was made to Cattleya Basil=C. Enid x C. Mantini. Other pretty varieties were Sophro-cattleya Nestor aurifera, Cattleya Vulcan superba=C. Mossiae x C. Schilleriana, a striking novelty, flowers 8 inches in total width.

Messrs. Stuart Low & Co., Bush Hill, Middlesex, showed Cattleya Rhoda conspicua=Cattleya Iris x C. Hardyana, Cynoches maculata, a plant having two long racemes of yellow flowers spotted with purple; Cypridium Maratonae, a flower with a lip of greenish-brown, and dorsal sepal with a white margin at the upper part.

J. Veitch & Sons were awarded a Botanical Certificate for Disa polygonoides, an Australian species having flower stems 1 1-2 and 2 feet high, bearing minute orange and yellow flowers.

Lieut.-Col. Holford showed Laelio-cattleya-Pizarro, the flowers of which are of an extremely rich orange color, and the lip purple. The full width of a bloom was 7 inches. First-class Certificate. He also showed Laelio-cattleya Golden Fleece, a flower with orange-colored sepals and petals, the lip orange lined with purple.

FREDERICK MOORE.

INCORPORATED.

Walla Walla, Wash.—Walla Walla Floral Co., by Jas. Wait, F. E. Mojonier and H. H. Curr. Capital stock, \$50,000.

Buffalo, N. Y.—Lenox Flower Shop has been incorporated with a capital stock of \$4,000 by J. Rowland Cloudsley, Edward H. Altman of Buffalo, and others.

Memphis, Tenn.—Italian Seed Company. Capital stock, \$5,000.

Notice the bulb offer of James Vick's Sons in this issue. It's "a cinch."

We Declare APHINE

To be the most effective insecticide, on the market today, for the destruction of all **Greenhouse** pests.

It kills the insects without the slightest injury to flower or foliage.

These assertions are based on expert tests made by unquestionable authorities.

Aphine can be applied as a spray—wash—or dipping solution—It is used at the average strength of 1 part Aphine to 40 parts water.

\$2.50 per gallon.

PHOENIX and KENTIAS

MISSOURI VALLEY FAIR AND EXPOSITION.

The craft in Kansas City have had a very strenuous week, the Fall festivities bringing in over 250,000 strangers.

First prize on display of Decorative Plants was won by Sam Murray, with a magnificent group, most artistically arranged. It contained a grand specimen of *Araucaria compacta*, some ten feet high, with leaves down to the pot; *Kentias*, *Cocos*, *Phoenix Roebelenii*, etc.; fringed with *Amerpohli* and *Todeaoides* ferns producing a very fine effect. Second prize was received by W. L. Rock, who showed a large group of good material. Third prize to Ed. Humfeld, with a splendid variety of rare and choice hot-house plants. Fourth prize to The Rosery, and fifth to W. J. Barnes.

On floral designs, Sam Murray received first prize for a very fine lot of artistically arranged designs, pronounced by many people to have been the most beautiful they had ever seen. Miss Mary Hayden was the artist.

Second prize was won by Ed. Humfeld, with some very high-class work. Third prize by W. L. Rock.

There were also prizes for groups of crotons, in which W. L. Rock, received first, W. J. Barnes, second; six *araucarias*, first Ed. Humfeld, second W. J. Barnes, third W. L. Rock; six *kentias*, first The Rosery, second W. L. Rock, third W. J. Barnes; six *Whitmani* ferns, first W. J. Barnes, second Sam Murray; six Boston ferns, first W. L. Rock, second W. J. Barnes; six any other ferns, first Sam Murray, second The Rosery, third W. J. Barnes; standard and pyramid bays, first W. L. Rock.

There was also a very fine display of fruits, especially apples.

The Agricultural display was very large and very fine. One of the prominent features of one of these collections was a *Billiken*, made of wheat, of which it was said that if all of the old maids would tickle the soles of its feet, marriage would result within six months. It is said that many of them availed themselves of this opportunity.

The Electrical parade, with *Pallas Athene* in the lead, was very fine indeed. The Automobile parade in which nothing but artificial flowers, were used, was not up to the standard.

The weather was ideal and the attendance good. In talking with one of the Park management was told that they expected to clean up over \$5,000.

THE WAR OF THE DAHLIAS.

We have all read of the famous "War of Roses," of the houses of Stuart and of York, and of the romance and bloodshed during those days of English chivalry. Now comes the War of Dahlias.

Yes, indeed, History, that musty old bromide, is repeating herself once more, for right here in Boston the War of Dahlias is about to be waged. The New England Dahlia Society is rent in twain. The old society claims the rent is not severe, that only a small fragment of the original dahlia association circle is missing, but the real war comes in the publishing of "The Dahlia News." A rival publication has

sprung into existence. Away back in Holland's foolish days fortunes were wasted and murders committed over tulip bulbs. While it is not probable there will be many assassinations in connection with Boston's dahlia war, the matter will doubtless go into the courts. Alas, all is not a bed of blossoms for the dahlia faddists.—*Boston Journal*.

PERSONAL.

D. Y. Mellis of Flatbush, N. Y., has returned from his visit to Scotland.

E. J. Fancourt of S. S. Pennock-Meehan Co. is reported as a visitor in Indianapolis.

Alexander McKay, Saxonville, Mass., has retired from business on account of failing health and will go to Scotland.

Patrick J. Reynolds, gardener for J. P. Kernochan, was married to Miss Margaret J. Donovan at Newport, R. I., October 5.

A. H. Knickman, formerly of New York, has taken a position with S. J. Reuter & Son, at their New London (Conn.) store.

Charles Flackburn and Miss Josephine McCullough, daughter of J. Albert McCullough were married at Cincinnati, Ohio, on October 2.

The Burr Nurseries at Manchester, Conn., will build a large concrete building to meet the increasing demands of business. The building will be 50x100, 14 feet high.

LEVAVASSEUR'S 1909 ROSE NOVELTIES.

Mr. Winfried Roelker of Aug. Roelker & Sons, New York sends us the following descriptions of Levavasseur's three new roses, raised at Orleans, France. Mr. Roelker saw these roses in full bloom towards end of July, and was fairly surprised at the brilliancy of their coloring. **ROSE ORLEANS**, a cross between *Baby Rambler* (Mad. Norbert Levavasseur) and an unnamed *Polyantha* seedling, is of a bright pink, well covered with large flower heads; the foliage a healthy green; plants standing about two feet high, of striking appearance. This rose promises to outshine the *Baby Dorothy Perkins* (Maman Levavasseur). It is reported to be a very free and continuous summer bloomer, retaining its brightness. **MRS. TAFT** is a cross between *Baby Rambler* and *Crimson Rambler*, possibly more intense in color than the latter variety; said to be constant in color, and far superior to the old *Baby Rambler*. Both novelties will prove valuable acquisitions to the rose trade, as well for growing in pots, as for outdoor bedding purposes. **JEANNE d'ARC** is a white *Baby Rambler*, of which it is a seedling, but with smaller foliage. Messrs. Roelker are sending out a plate of these new roses in colors.

Mr. and Mrs. H. S. Hill have recently moved from Gardner to East Brookfield, Mass., where Mr. Hill manages the Pine-Croft Greenhouses.

JAMES VICK'S SONS, - Rochester, N.Y.

Seed Trade

The Burpee Purchase.

The purchase of a ranch in the Lompoc Valley by W. Atlee Burpee & Co. is most interesting reading and may prove the forerunner of other purchases in the Golden State by fellow-seedsmen. As was once remarked on another occasion, Mr. Burpee and his chief push, Mr. Earl, do not follow, but establish precedents, and have been pioneers before. This purchase was whispered in HORTICULTURE'S seed trade ear some months ago, but we did not feel at liberty to make it public, and it is probable that permission to publish the facts might not have been given at the time. For years it has been rumored that one of the largest jobbing houses was considering the establishment of a seed growing plant in California, and the result of the Burpee experiment will be watched with much interest. It is hoped the result will be such as to encourage others to go and do likewise.

Crop News.

Some criticism of HORTICULTURE'S crop news has been made, but if anyone can point out where we have been conspicuously at fault, we should be pleased. If the writer's memory is correct, we have predicted crop results with remarkable accuracy. Latest reports on Sugar Corn show general improvement as stated in issue of October 2, and the Connecticut crop promises to prove much better than was expected some weeks ago, but onion seed in Connecticut has been very poor as a whole. A few crops have been a fair average, but they could not make up for the failures, yet there will be tons of Connecticut-grown onion seeds offered for sale, and as in former years, several times more of such seed will be sold than is grown in the entire state. And there are other items which go much the same way.

Not much has been heard of potatoes as yet, but a good deal will be heard soon, and it will not be a joyful noise either as far as Maine is concerned. Reports that the tubers were rotting badly have been in circulation for some weeks, and it now can be said definitely that these reports are only too well-founded, and the worst has not been

told. For years Maine stock has commanded a premium, and in fact it was difficult to dispose of other stock, hence there will be woe in many parts of the country, particularly in the South, but the real heavy losers will be the Maine farmers and those dealers who have bought farms and grow their own potatoes. Many thousands of bushels will be thrown away, and troubles and tribulations await dealers who handle Maine potatoes in all parts of the country. The losses in any event will be heavy, and if the trouble spreads and continues, they will be enormous. New York potatoes were once the standard of excellence, and they will probably come into their own again this year, and for a brief period will likely dominate the situation, though New York will have strong rivals for the crown, notably Michigan and Wisconsin, whose crops of "Murphies" are said to be excellent in quality, though short in quantity. It looks as if choice seed potatoes would bring strong prices by next spring, and it will pay well to hold them over winter. Buyers have to be educated up to high prices, and seldom are willing to pay actual values early in the season, and there seems little chance of prices being lower next spring.

Beans are like corn, still a more or less uncertain factor in the general crop situation, and probably will not prove as large as expected a few weeks ago, but really accurate information will not be obtainable for a few weeks yet. All that can be given is the trend of things at this writing. Of course, the bean crop is made, but it is not housed, and "there's many a slip 'twixt cup and lip"—between the maturing and safe storing of a crop of beans—as many a grower has learned to his sorrow.

It is said that the Lima bean crop—meaning commercial Limas for consumption—is the largest ever harvested in California, while the quality is very fine. If threshing and storing can be completed before rain comes, the enormous crop will unquestionably have the effect of depressing prices. This great crop was produced in five counties, and divided about as follows: Ventura, 950,000 bags; Orange, 275,000 bags; Los Angeles, 100,000 bags; Santa Barbara, 20,000 bags; San Diego, 15,000 bags. It will be noted that Ventura county produces nearly two-thirds of the entire output, but in some of the other counties the business is in its infancy and the splendid success attend-

ing this year's venture will no doubt lead to a large extension of the industry. All this will be hailed with satisfaction by seedsmen, as it indicates that they will not have to be dependent on a small group of men in a very restricted territory for their seed Limas, and, by the way, it may be taken for granted that the crop of seed Limas this year will be above average—both in quantity and quality.

Notes.

"Culture of Garden Peas for Canning Purposes," is the title of a paper by Mr. W. S. Siebert, printed in "The Canner" of October 7th. It is able, and in the main reliable and accurate. Not only canners, but seedsmen will find this paper interesting and informing. Some criticism of it may follow in next week's issue.

Boston seedsmen report an unusually heavy bulb trade—some say the largest they have ever had. They have had to cable second, and even third orders. So far as can be learned, trade has been exceptionally good everywhere, and the promises of a pennant year for the trade as a whole were never brighter. The season of 1909-10 will almost surely set a new high record.

The advent of Mr. Theo. Cobb, for over twenty years with D. M. Ferry & Co., into the corporation of J. F. Noll & Co., of Newark, N. J., adds a live wire to the staff of that concern. Mr. Cobb has been considering this move since last spring, and his connection with the business has been contingent upon Mr. Dungan's becoming identified with it. With Dungan and Cobb working in harmony, J. F. Noll & Co. (Inc.) will become known by many who have never yet heard of them. They will have the hearty congratulations of all broad-minded, right-thinking persons, and best wishes for their success.

Dreer's Special Offer OF Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world. Our collection is unequalled, and we are prepared to furnish the new and rare kinds as well as all the popular standard varieties in large quantities.

The plants we offer are all strong one-year-old field-grown plants and will make a fine display of flowers next season.

New and Rare Varieties.

	Per 100	Per 1000
Aglæ Adanson (Tall). Immense flowers, snow-white, with red eye.....	\$8.00	\$75.00
F. G. Von Lassburg (Medium). The purest white in cultivation; individual flowers larger than any other white.....	8.00	75.00
Jules Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.....	6.00	50.00
Louis Blanc (Tall). Reddish-violet, with purple-shadings and darker eye. A distinct dark-colored variety.....	6.00	50.00
Prosper Henry (Dwarf). Large compact truss of pure white with bright crimson-carmine center.....	6.00	50.00
Siebold (Dwarf). An improvement on the popular scarlet "Coquelicot," brighter and stronger.....	10.00	90.00
George A. Stroblein (Medium). Bright scarlet, with crimson-red eye; does not bleach.....	10.00	90.00
Mme. Paul Dutrie (Medium). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large, and borne in panicles of immense size.....	10.00	90.00
Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.....	6.00	50.00
Von Hochberg (Medium). The ideal crimson Phlox; the richest of its color.....	10.00	90.00

General Collection of Hardy Phlox.

Best Scarlet and Red Varieties.

- Consul H. Trost** (Medium). Pure red, with bright French-purple eye.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.
Etna (Medium). Crimson red suffused with fiery red; cherry-red eye.
Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.
General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.
Pecheur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet, fine.
R. P. Struthers (Tall). Rosy carmine, with claret-red eye, fine.
Price: Any of the Scarlet or Red Varieties, \$6.00 per 100; \$50.00 per 1000.

Best White Varieties.

- Albion** (Tall). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.
Diadem (Dwarf). A fine dwarf, pure white.
Helena Vacaresco (Dwarf). Very large-flowering dwarf, white.
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.
Jeanne d'Arc (Tall). A good standard late white.
Louise Abbema (Dwarf). A dwarf pure white of fine form.
Mrs. Jenkins (Tall). The best tall early white for massing.
Price: Any of the White Varieties, \$5.00 per 100; \$40.00 per 1000.

Best Pink and Rose-colored Varieties.

- Bacchante** (Tall). Tyrian rose with crimson-carmine eye.
Caran d'Ache (Dwarf). Geranium-red, with old rose shadings and white eye; very effective.
Clara Benz (Dwarf). Lovely carmine rose, with darker eye.
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
La Vague (Medium). Pure mauve, with aniline-red eye.
Pacha (Dwarf). Deep rose pink, suffused with Solferino-red and carmine-purple eye.
Pantheon (Tall). Bright carmine rose.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Price: Any of the Pink or Rose sorts, \$5.00 per 100; \$40.00 per 1000.

Best Purple and Crimson Varieties.

- B. Comte** (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.
Charles Sellier (Dwarf). Bright reddish-violet with large white star-shaped centre.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Chevalier de Boufflers (Medium). Deep reddish violet, with brighter shadings.
Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.
Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.
Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre with an exceptionally large white centre.
La Foudre (Tall). Rich glowing French purple, shading crimson.
Le Mahdi (Tall). Deep reddish violet, with darker eye.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Price: Any of the Purple and Crimson sorts; \$5.00 per 100; \$40.00 per 1000.

Best Light Varieties With Dark Eyes.

- Bridesmaid** (Tall). White, with large crimson-carmine centre.
Colibri (Tall). White, with crimson-carmine centre; very late.
Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.
H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.
Price: Any of the Light Varieties with Dark Eyes, \$5.00 per 100; \$40.00 per 1000.

Best Mottled Varieties.

- Antonin Mercie** (Medium). Light ground color, upper half of petal deeply suffused bluish-lilac; large, white halo.
Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Eugene Danzanvillier (Tall). Lilac, shading white towards the edges; large white centre.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Price: Any of the Mottled Varieties, \$5.00 per 100; \$40.00 per 1000.

Phlox Sufruticosa — Miss Lingard.

- Extra strong plants of this valuable early white flowering variety \$6.00 per 100; \$50.00 per 1000.

For the most complete assortment of Hardy Perennials offered in America, see our current Wholesale List.

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

LILIUM AURATUM.

The subject of our cover illustration needs no introduction to the readers of HORTICULTURE. But all who plant auratums do not make a success of it and inquiries as to its character and needs are often met with.

The present is a good time for planting Liliun auratum. The bulbs should be set not less than ten inches deep in well-drained soil. They should then be mulched so that no frost can reach them, as auratum is one of the very few lilies that commence to grow now and continue to grow right along all through the winter.

SEED TRADE NOTES.

T. W. Wood & Sons, who started their seed business in the store at the corner of 6th and Marshall streets in 1879, recently remodeled and renovated the place and it is now one of the best equipped retail seed establishments in this section.

Huntington & Page, prominent for many years in the seed business of Indianapolis, Ind., have gone into receiver's hands. Thomas Quill has been appointed receiver. Liabilities are given as \$30,000 and assets \$20,000.

There is a possibility of another seed house making a start in Providence. It would seem that there are enough there already, still if another starts let's wish it success.

USEFUL BOOKS.

We can supply the following books, postpaid, at the prices listed:—

The American Carnation. C. W. Ward. Price, \$3.50

Chrysanthemum Manual. Smith. Price, 40 cents.

The Chrysanthemum. Herrington. Price, 50 cents.

Manual of the Trees of North America. C. S. Sargent. Price, \$6.00.

Soils: How to Handle and Improve Them. S. W. Fletcher. Price, \$2.20.

Daffodils-Narcissus and How to Grow Them. A. M. Kirby. Price, \$1.10.

The Art of Landscape Gardening. By Humphrey Repton. Price, \$3.20.

Roses and How to Grow Them. By Many Experts. Price, \$1.21.

The New Cyclopaedia of American Horticulture. L. H. Bailey. Four volumes, \$20.00.

How to Plan the Home Grounds. S. Parsons, Jr. Price, \$1.10.

How to Make a Vegetable Garden. Edith L. Fullerton. Price, \$2.20.

"Money in Grasses," by Joseph Theodore Barenbrug, Barenbrug Burgers & Co., Arnhem, Holland.—This is a book of sterling value to anyone interested in the grass seed industry and to every gardener who has to do with lawns and pleasure grounds. Price, \$1.00 postpaid.

CHICAGO NOTES.

Business and General News.

The Warwick Flower Shop at 574 47th street is in charge of a new manager, Frank Vogt, who has formerly been in the retail business in various parts of the city.

The first snow of the season appeared Tuesday, Oct. 12th. There was just enough to warn the florist that the time had come for everything to be in shape for the winter. No one except the coal men felt jubilant at the first sight of snow in the air.

George Woodward, whose connection with the private place of H. H. Mitchell has made him well known here, will open a retail flower store at 51st and Lake streets about the 15th of October. Mr. Mitchell is moving his palms, etc., to his summer home at Lake Geneva, Wis.

A series of assemblies will be given by the West End Woman's Club that will make florists in other cities hope the idea may prove infectious. The first one comes off this week and is called a rose festival, that being the club flower. The decorations will call for thousands of roses and the dancers will wear garlands of roses.

The work of City Forester J. H. Prost and the useful knowledge he has disseminated by means of the various pamphlets he has issued is bearing fruit in the interest the people of Chicago are taking in the planting of trees and care for those already planted. Oaks and other hard wood trees have not done well in the past, but it is claimed that with the right treatment they might be made to thrive.

Among the large growers in and around Chicago, stock is in first-class condition. The rose Mrs. Jardine has struck a wave of appreciation. Wiator Bros., who are keen observers, have put in 20,000 of it this year against 1000 last year, and regard it as leading in the qualities of continuous blooming, long keeping and fragrance.

Carnations Enchantress and White perfection are placed at the head of the list for shipping qualities by John Kruchten, who has been giving them a decisive test in shipments three times a week to New Orleans.

Hoerber Bros., whose advertisement as wholesale florists appears regularly in this paper, have what is regarded as a model plant for rose and carnation growing and visitors to Chicago should visit their new office at 51 Wabash avenue and inspect the quality of material their expert grower, F. Benthey, is already turning out from this up-to-date equipment. The houses are of Foley construction, ten of them, each 27½x300; seven devoted to roses and three to carnations. W. F. Hoerber manages the selling department and F. C. Hoerber the greenhouses.

Personal.

Miss Then leaves for a week in Detroit in a few days.

Florists are especially interested in the success of Miss Grace Kennicott, daughter of the late Flint Kennicott, who has a marvellous voice and has

made a great success in the musical world.

Miss Ida Evert after an absence of seven months has again taken a stand in the Market. She will handle stock grown by her father and brother at 255 Devon avenue. Mr. Evert makes the growing of fancy vegetables a winter specialty.

Anton Then, one of the old time successful Chicago growers has been making an extended auto tour of Michigan and various sections of Illinois and says he finds indications of a good lively year ahead. He is building a new office.

A series of friendly visits for the promotion both of good will and business are being exchanged between the ladies of the Flower Growers' Market. Two weeks ago Mrs. A. W. Myers was the hostess and this week Miss Josepha Then will entertain. These social events include tours of the greenhouses.

Visitor: Frank M. Smith of Smith & Fettes, Cleveland.

BELL PHONE, 29 L

A NOVEL DECORATION SCHEME.

The difficulty of decorating a large department store is well known. In a recent local decoration of this kind in Detroit, Breitmeyer hit on a novel plan whereby they not only filled the place acceptably, but also expressed the sentiment of the harvest season by suspending fourteen hammocks made of common chicken wire between the large columns on some bare wall spaces. The underside was covered with green moss, the inside filled with damp sphagnum and some jars with water. These were then filled with hydrangea, purple wild asters, zinnias, marigolds, corn showing the ripe fruit and a variety of berries. As green, tamarix, laurel-leaved willow, Wichuraiana roses, corn stalks and autumn-colored oak leaves were used. There were many other good features such as a marble fountain covered with oak bark to look like a grotto, etc., all of which worked harmoniously to produce an artistic and seasonable decoration.

Flower Market Reports.

BOSTON The severe weather reported from various places west and south did not touch Boston, and receipts of flowers at the wholesale marts have been very heavy all through this week. Prices have taken a decided drop on many items and the market tables are heavily weighted with carnations, roses and other material which has been coming in faster than it can be disposed of. Carnations of all varieties are in superfluity and are bringing reluctantly less than one-half of the prices prevailing a week ago. Roses are gaining in quality as well as in quantity right along. Chrysanthemums ditto.

BUFFALO Fall weddings having been numerous the past two weeks and a heavy demand having been had for Bride roses, lily of the valley, etc., trade has been very good. There have been excellent gladioli and asters. Carnations are rather short in supply, especially long-stemmed white and Enchantress, both of which find ready sales. Beauty, Killarney, My Maryland, Kaiserin and Carnot are in fair supply and sell rapidly. Dahlias and cosmos are also in good supply, but lilies are on the scarce line. Chrysanthemums have come upon us and some good Glory Pacific, October Frost, Polly Rose, Kalb, Bergmann and Monrovia are to be seen daily. Plenty of greens.

CHICAGO The state of the Chicago market changed rapidly with the change in temperature the past week. Everyone agrees that October opened with a fairly good trade, in fact, better than

that month usually brings. The early frosts had done little damage and the air was just cool enough to stimulate trade and flowers had a good chance to keep out of the waste barrel. Indeed, good stock was very scarce. Then came summer heat back again, hurrying on the roses the supply of which was more than the demand could take care of and by the end of the week trade in some cases was quite demoralized. Some of the houses have more chrysanthemums than they can move and prices have dropped accordingly. Rosierre is now in for the first and Bergmann is dividing honors with October Frost in white. Monrovia and Golden Glow have the field in yellow. Some are inclined to think the growers have devoted too much

space to this flower this year. Carnations are improving and the stems are new of good average length. A few straggling out-door flowers of various kinds are still seen.

It may be truly said that **DETROIT** business has opened up before the florist was ready. Carnations and chrysanthemums are from two to three weeks behind, some growers cutting only one-tenth of the amount of flowers they were cutting a year ago. Many years have passed since the writer sent so many palm leaves and magnolia wreaths with orchids used in design work, plainly the result of a scarcity of flowers.

Flower Market Reports.

(Continued from page 551)

INDIANAPOLIS The month of
October has
opened up very
auspiciously, the weather fine and the
demand for flowers noticeably greater
than the previous week. The cool
weather has been quite a factor in
the market and early frosts have di-
minished the variety and quantity of
stock. The quality is much improved
and in a short time will be equal to
that of mid-winter. In roses the mar-
ket is well supplied in all varieties;
carnations of every variety are to be
had in good quantities and are fetch-
ing just double what they were a few
weeks ago. Chrysanthemums are now
a feature of the market but in the
larger blooms only. Harrisii lilies are
not in heavy supply but are moved at
good prices. Orchids in the several
varieties are plentiful enough to sup-
ply all demand. Violets are slowly
coming to the front but the demand
for them is small. Adiantum and
other greenery is selling better. Some
dahlias are being received but season
is nearing the end. Tomlinson Hall
market reports business on the in-
crease.

The period of scarc-
NEW YORK ity in some lines and
activity in all which
gave so much gratification last week
to all interests did not continue long.

Chrysanthemums	8.00	to 15.00	8.00	to 15.00
Gladioli	1.00	to 2.00	1.00	to 2.00
Gardenias	5.00	to 25.00	5.00	to 25.00
Adiantum50	to .75	.50	to .75
SanMax	8.00	to 12.00	8.00	to 12.00
Asparagus Plumosus , strings.....	20.00	to 30.00	20.00	to 30.00
" " & Sprea. (100 bchs).....	12.00	to 20.00	12.00	to 20.00

Circumstances seemed to conspire to
increase supply and decrease demand
at one and the same time, and if the
bottom didn't quite drop out entirely
it certainly broke through in several
spots, and now we are back again
where every buyer can get more than
he wants and at a price which looks
very diminutive to the grower. Chry-
santhemums, violets, carnations, roses,
cattleyas and several other things are
on the increase now and the outlook
is for a continuance of present condi-
tions.

PHILADELPHIA

The first four
days of last week
were very satis-
factory, but the warm spell brought
in a big influx of roses, dahlias and
other stock on Friday and Saturday
and while business was of normal
volume during these two days, there
was a glut of stock and consequent
congestion. Jack Frost will bring
first aid to the wounded—the wounded
in this case (as usual) being the
growers and wholesalers. The retail-
ers are very well satisfied with condi-
tions and wear a "cat-that-has-eaten-
the-canary" expression. There are
more than enough American Beauty
roses to go around, and no present
hope of that radical improvement in
price which the growers have been
waiting for so long. Other roses keep
on improving; but we see no thirty
and forty-inch stems here in Mary-
land, Killarney, etc., such as the Chi-

cago growers offer. The general im-
pression is that these would not be
profitable in the Philadelphia market
in early season. White Perfection,
Enchantress, Winsor, Bountiful, are
the leaders in the carnation field, also
a few good Beacon. Better and big-
ger chrysanthemums and more of them
with prices easier. More dahlias than
ever, and fine quality, but these are
liable to go the journey any day now.
Plenty of good lily of the valley and
cosmos and any amount of greens.

New York, N. Y.—The New York
Plant Market is open three times a
week—Tuesday, Thursday and Satur-
day—from 6 to 9 a. m.

G. E. Bradshaw has again started
in the wholesale flower business at
55 West 26th street.

OBITUARY.

John S. Zschorna.

J. S. Zschorna, well known as a re-
tail florist in Brooklyn, N. Y., died on
September 29.

Fred Zappe.

Fred Zappe, formerly for many
years fireman for the J. A. Budlong
Co., Chicago, and father of Chas.
Zappe with the store force of the same
firm, died Sunday, Oct. 10th.

NEWS NOTES.

Salvia Bethellii, not Sethellii is the
name of the new salvia referred to in
our issue of October 9.

Pittsburg, Pa.—J. M. Jones, florist,
has bought nine acres of land on
Highland avenue, Summit Park, for
\$9,250. He intends to establish a
nursery for decorative plants.

Fairhaven, Mass.—Peter Murray
and Harold Hall, an employe, were
thrown from a delivery wagon, the
horse running away, last Tuesday af-
ternoon and both were injured but not
seriously.

South Manchester, Conn.—Peter
Zuger, who has been connected with
the park department of the city of
Hartford, has leased a greenhouse and
land here and will start on Nov. 1 in
the florist and nursery business.

Franklin, Mass.—William Doel of
Pascoag, R. I., has purchased the Wal-
ter Slade estate nursery. For the
winter he will put a caretaker in
charge of the greenhouses and next
summer may take charge of the busi-
ness himself.

CATALOGUES RECEIVED.

Knight & Struck, New York City—
Descriptive folder of Gloriosa Roths-
childiana, with illustration in natural
colors.

SOME WORK OF THE U. S. DEPARTMENT OF AGRICULTURE AS AFFECTING FLORICULTURE.

By R. T. Galloway, Chief of the Bureau of Plant Industry, U. S. Department of Agriculture, before the Society of American Florists, at Cincinnati.

The United States Department of Agriculture is doing considerable work bearing both directly and indirectly upon floriculture. I shall not attempt to discuss all of this work, but will endeavor to point out and emphasize certain lines of investigation and experiment that are now being carried on by the Bureau of Plant Industry.

Introducing New Plants.

As is pretty well known, the Department has for a number of years been making a special endeavor in the matter of introducing new plants and seeds from foreign countries. While the greater portion of the introductions have been more strictly of an agricultural nature, there are some things which have been brought in of interest to the horticulturist. During the past three years the Department has had Mr. Frank N. Meyer, an agricultural explorer, visiting little-known regions of Asia, with the result that quite a number of promising crops have been sent in by him. It is too early yet to predict what these things will do. They are being tested at a number of our stations and also in co-operation with reliable horticulturists in different parts of the country with a view to determining their possibilities and adaptation to varying conditions of soil and climate. Among some of the things which Mr. Meyer has secured is a new and striking white bark pine which grows to great size and seems specially fitted for cemeteries and certain types of public parks and grounds. Mr. Meyer has secured also a number of interesting quick-growing and more or less ornamental, drought and alkali resistant willows. One of the problems met with by horticulturists in certain parts of the West has to do with plants that may be suitable for ornamental purposes under arid or semi-arid conditions. It is believed that some of the willows found by Mr. Meyer will be useful in this connection.

FOR SALE

BOILER FOR SALE

Weathered eight section boiler, in use two seasons, good as new, \$100. Cash. Chas. E. Evans, Watertown, Mass.

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 20 Montrose Ave., Brooklyn, N. Y.

FOR SALE—At Southampton, L. I., 1/2 acre, 8-room house, hot house, 100 ft. long, and barn. All newly painted and in good condition. Easy terms. Inquire Pacific Paint Co., 27 Sixth Ave., Brooklyn, N. Y.

FOR SALE—1200 ft. of good 4 inch pipe; also large sectional Sunray boiler. Apply to Mrs. H. Baeppler, Teaneck, P. O. Bogota, N. J.

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

Wanted—Violet Grower

Must be steady, experienced and strictly up-to-date. Address, DALE ESTATE, Brampton, Canada.

WANTED—Buyers and agents to sell our cement block and fence post machinery. Send for circulars and prices. Address W. L. Keller Cement Block Machine Co., Kearney, Neb.

WANTED—An expert grower of all kinds of fruits under glass; also an expert florist and plantsman, including Chrysanthemums and Carnations. Apply to J. Featherstone, Greenlawn Conservatories, Penn and Murland Aves., Pittsburgh, E. E., Pa.

WANTED—experienced vegetable and flower seed packer to take charge of packing room. Must know the seed business. Give reference and salary wanted. Gurney Seed Company, Yankton, South Dakota.

WANTED—Young man, single, with experience in growing ferns, orchids, sweet peas, etc. Commercial. \$55 a month. Address J. 28, care HORTICULTURE.

SITUATIONS WANTED

SITUATION WANTED—By a gardener and orchid grower; thoroughly experienced, able and willing to work up a collection with any lady or gentleman requiring his services; good experience in greenhouse plants, vegetables and lawn; married; middle age; best of references. Address Gardener, Box 114, Secaucus, N. J.

SITUATION WANTED—Gardener and Superintendent: Thorough in all branches of his profession; over 18 years last place; best of references; employer would be pleased to see any one personally; married, no family; English. R. H., care J. Terry, Berkeley Ave., Newport, R. I.

MISCELLANEOUS WANTS

NOTICE TO ENGINEERS AND LANDSCAPE GARDENERS.

San Antonio, Texas, Oct. 6, 1909. The City of San Antonio invites competitive, suggestive plans for platting, designing and beautifying a new City Cemetery to be known as "Mission Cemetery." Topographical maps of the tract of land upon which said cemetery is to be established can be seen in the office of the City Engineer.

A cash prize or premium of Five Hundred (\$500.00) Dollars is offered for the best and most acceptable plan, a cash prize or premium of Three Hundred (\$300.00) Dollars for the second best plan, a cash prize or premium of Two Hundred (\$200.00) Dollars for the third best plan for so platting, designing and beautifying said cemetery, which prizes above mentioned will be awarded upon the recommendation of the Mayor and the Cemetery Committee of the City Council, who reserve the right to reject any or all plans submitted, and whose decision as to the award of said prizes or premiums shall be final.

All plans for which prizes have been awarded become the property of the City of San Antonio.

All plans must be securely sealed, addressed to the "Cemetery Committee of the City Council, San Antonio, Texas," and be submitted on or before 11 A. M., January 6th, 1910.

BRYAN CALLAGHAN, Mayor.
Attest: FRED FRIED, City Clerk.

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

tion. Several new forms of poplars have been secured, one of which it is believed will prove a valuable tree for avenues and streets. Mr. Meyer also secured a collection of Chinese pistachio, a beautiful ornamental tree and a very promising stock for the pistachio nut—a plant which the Department is endeavoring to introduce in various parts of the country. Various forms of elms have also been found and introduced. Some of these have promise of value in their ability to resist drought and alkali, hence may become quite useful in connection with the development of gardens and parks in the semi-arid regions of the United States. Some promising cold and drought resistant roses were secured which may be of value in connection with the drier sections of the country or may become useful adjuncts to the horticultural possibilities of other sections.

Plant Breeding and Improvement.

Closely associated with the plant introduction work is that which has to do with the improvement of plants by breeding and selection. Considerable work of this kind has been under way for a number of years, the results of which have already been published. Mr. Oliver's efforts in the direction of improving the lily have been set forth in bulletins from the Department, and his work in securing new types of dahlias has also been described from time to time in other publications.

As a finishing touch to our lily work we secured a large number of apparently healthy bulbs of such varieties as the multiflorum, Harrisii, and giganteum. They were flowered and what was thought to be desirable crosses made between the varieties. Nearly 60 quarts of seed resulted which was distributed in southern California and elsewhere. One firm has eight acres of these seedlings in fine condition which will bloom next spring. Other lots are equally promising. The future of lily growing will depend upon the growers growing the bulbs upon new ground; that is, to put other crops in the ground for at least three years succeeding the lily crop. In connection with the work with dahlias I may say that we now have about six seedlings which are promising. One of them is a semi-double red with long stems and early in blooming.

Considerable work is in progress in the matter of getting at the basic principles involved in improvement by breeding and selection of commercial florist crops, such as the rose and carnation. The principles involved in carnation breeding are being studied by Mr. J. B. Norton, who has already presented one or two papers before this Society bearing on his work and the results he has secured. Mr. Oliver is doing considerable breeding work with roses, chrysanthemums, pansies, gladioli, and sunflowers. I may say that one of the roses discovered by Mr. Meyer has flowered. It has double yellow flowers and has the peculiar distinction of being the first of all the roses to bloom in the spring. This and several other species introduced from China and elsewhere are being used by Mr. Oliver in his breeding work and already some promising seedlings for outdoor planting have been

secured, notably a cross between the new double yellow rose and the white Rugosa. Mr. Meyer while in China was instructed to secure the wild forms of chrysanthemums from which our cultivated varieties have sprung. He succeeded in securing a variety with white or rosy-white flowers and also a yellow variety, both from the very cold regions of north China. These wild forms Mr. Oliver is crossing with some of our best hardy cultivated varieties in order to secure a thoroughly hardy race for outdoor culture in the north. Some promising seedlings have already been secured. Mr. Oliver has also begun some interesting work with pansies, crossing a summer blooming species secured from Australia with other varieties. This Australian variety blooms abundantly during our hottest summers, provided it gets sufficient moisture. We look to obtaining some interesting results along this line. We need a productive annual sunflower for summer cutting with larger and better shaped flowers than we have in the common varieties. This Mr. Oliver has secured by crossing, the resulting progeny having large and well developed flowers with long stems well adapted for cutting. In connection with the plant breeding and improvement work an interesting line of study has been conducted for some time by Prof. L. C. Corbett, having to do with the comparative merits of blind and flowering wood for propagation purposes in rose growing.

Studies of Diseases.

The Bureau of Plant Industry is continuing its investigations of the diseases affecting crops under glass. The results of this work, as is well known to the florist trade, have been published from time to time in the bulletins of the Department and elsewhere. The results of studies of wet stem rot of carnations, dry stem rot, microsporum spot, bacterial spot, and other diseases of this crop have been set forth from time to time, so that there is little new to be added regarding the manner in which the various diseases work or the methods of preventing the same. Wet stem rot has proved quite destructive in a number of sections of the country recently and as already pointed out, the fungus which causes this disease lives in the soil on decaying organic matter, especially if the soil happens to be poor in lime.

The crown gall disease of roses and chrysanthemums has received some attention from our pathologists. The cause of the disease has been discovered to be a bacterial trouble. We have also found out that it is spread by cuttings, which frequently become infected in the cutting bench. Some evidence has also been secured showing that certain varieties are not so susceptible to this trouble as others.

Experiments in Bulb Growing.

For a number of years the Bureau of Plant Industry has been giving attention to the possibilities of bulb culture in the United States. Various efforts have been made to encourage bulb growing in different sections and four or five years ago co-operative experiments were inaugurated in the State of Washington with several individuals, the work having for its object experiments and demonstrations in the mat-

ter of growing bulbs, especially Dutch bulbs in that section of the country. Reports of this work have been made from time to time, but as it progressed it was seen that to secure the best results the Government should have control of a certain amount of land upon which it could inaugurate with its own men a line of experimentation and demonstration that would necessarily have to last for several years. The citizens of Bellingham, Wash., were very much interested in this work, and for the purpose of encouraging the Department to undertake it near this town, placed at our disposal ten acres of land four miles from the city. The ground is well adapted to bulb culture and in addition to putting it into thorough shape for the work in view, the Chamber of Commerce, through whom the site was secured, also constructed the necessary buildings, provided water for irrigation, and also furnished other necessary equipment. The Department now has three experienced men in charge of this garden carrying on tests in the growing of various bulbs. Good stocks of the bulbs have been secured from Holland and planting was started last fall. Tests will be conducted so as to show the best methods of cultivating and manuring, the best soil conditions for each class of bulbs, etc. Careful records will be kept of the operations so that when definite results have been secured, publications may be prepared and issued for the information of persons desiring to take up the work of propagating bulbs to supply the trade. It will be well understood, of course, by the members of this Society that time is an important element in work of this nature, and premature reports are to be avoided. It is probably sufficient to say that the Department recognizes the importance of developing the bulb industry in the United States and is putting forth its best efforts to this end. With the improvement of transportation facilities, which is likely to come within the next few years, and with the gradual adjustment and settlement of agricultural and horticultural practices through the northwestern section of the country, it is believed that more interest will be taken in intensive crops, such as bulb and seed growing. The latent possibilities for the development of industries of this nature are present and as soon as it is demonstrated that the work is practicable and profitable, men with sufficient capital to inaugurate it will not be wanting.

The rest of Prof. Galloway's paper, relating to special work with Carnations will appear in next week's issue.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Dept. H, Springfield, Mass.

PHILADELPHIA NOTES.

Mr. and Mrs. Brown, and J. B. Hobbs, of Richmond, Va., were visitors on the 9th inst.

Louis Hansell, grower for Mrs. Smith, Secane, Pa., is sending in some exceptionally fine White Perfection, Beacon, Winsor and Enchantress carnations. The crop is being handled at wholesale in Philadelphia by Alfred M. Campbell.

A nice lot of new yellow Dickson rose, Harry Kirk, was seen around the Pennock-Meehan market on the 11th and was quickly monopolized by an enterprising retailer. Dr. Huey thinks this is the best yellow to date and equal to Killarney as a hardy hybrid tea.

A. B. Cartledge's new twin screw power yacht, Marguerite II, was launched from the stocks into the Delaware river on Saturday the 9th inst, amidst a shower of baptismal champagne and the hurrahs of many friends. Messrs. Baxter, Green and Kahler were among the store associates from Pennock Bros who helped at the christening. We could tell more about this long-looked-for event but the mere announcement is enough.

Hoopeston, Ill.—Andrew Peterson, of this place, purchased at sheriff's sale, Oct. 1, all the stock of the Momen Greenhouses, Momen, Ill.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine,
one coarse. These are easily removed and quickly cleaned. Spraying
face 4½ inches wide, nozzle 6½ inches long; ¾ inch pipe connec-
tions. These sprayers will never wear out and are said by users to
be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

**E. H. Hunt, 76-78 Wabash Ave.,
Chicago, Ill.**

**PRATT'S
"SCALECIDE"**

Will positively destroy SAN JOSE SCALE and all
soft bodied sucking insects without injury to the
tree. Simple, more effective and cheaper than
Lime Sulphur. Not an experiment. One gallon
makes 15 to 20 gallons spray by simply adding water.
Send for Booklet, "Orchard Insurance."

Designing & Sales Offices General Offices & Factory
1170 Broadway, N. Y. Elizabeth, N. J.

PARTICULARITIES

Quite a mouthful, that word. In associating it with our greenhouses it means a greenhouse that is carefully worked out in **all the details** — particular attention given, not only to the particular points, but to **all the points**.

No annoying, rough finished, crude pieces of workmanship. It is a top notch house **throughout**. That's what we mean by "particularities." It is the house for particular people.

LORD AND BURNHAM COMPANY

Irvington-on-Hudson, N. Y.

New York — Boston — Philadelphia — Chicago

THE PALM HOUSE PLAIN

We just wanted you to see how a palm house that is free from any **apparent attempts** to make it ornamental, can be especially pleasing, even if plain, **provided it is built U-Bar way**. This one is. It backs up what we have been saying all along about the U-Bar construction — that it is ornamental by itself — its graceful simplicity makes it a welcome contrast to other constructions.

Want our catalog?

Landscape Gardeners

Now is your opportunity to get a lot of fine large
shrubs and evergreens. I have a grand collection
of shrubs suitable for this climate, grown here one
plant of which will make as much show in a bed as
three of the average stock that is put out. This is
a rare opportunity to get such stock.

J. J. McMANMON, Nurseryman, Lowell, Mass.

Notes from the Arnold Arboretum

The two Clematises mentioned in the last issue as coming into bloom have now opened their flowers. The handsomest is an apparently new variety of *Clematis lasiandra* with purple flowers. It is a vigorous growing vine perfectly glabrous with angular and grooved stem in a young state more or less viscid, particularly near the nodes. The long-stalked leaves are pinnate with trifoliate leaflets or on lateral shoots the whole leaf often only trifoliate; the leaflets are ovate, long-pointed, toothed and from one to three inches long. The nodding light purple flowers appear in axillary clusters or sometimes solitary, the individual stalks hardly exceeding one inch; the length of the flowers is nearly one inch and they are campanulate with the tips of the oblong-ovate sepals recurved.

Less handsome in flower is *Clematis trullifera*, but it is remarkable for the enlarged base of the leaf-stalks which form large disks surrounding the smooth and perfectly round stem. The leaves are pinnate with ovate long-pointed toothed or slightly lobed leaflets somewhat hairy on both sides, the larger ones about three inches long. The nodding greenish yellow flowers appear in short-stalked axillary clusters and are tubular-campanulate in shape and about three-quarters of an inch long; they are followed like those of the preceding species by conspicuous heads of long-tailed feathery fruits. These Clematises besides another vine, *Paederia foetida*, mentioned in one of the preceding issues, with rather inconspicuous flowers partly hidden by the foliage are now the only shrubs in flower, if we except a few belated spikes of *Buddleia* and our native Witch-hazel.

A very handsome new vine with ornamental fruits is *Celastrus flagellaris* from North China and Korea similar to the well-known Japanese *C. orbiculatus*. It is a high climbing shrub with long and slender branches furnished at the base of the leaf-stalks with pairs of small hooked spines by which it fastens itself to trees and shrubs over which it climbs. The slender-stalked leaves are smaller than those of the Japanese species, broadly ovate or nearly orbicular in outline, from one to two inches long, finely serrate and glabrous. The insignificant greenish flowers are followed by ornamental fruits similar to those of the Japanese species and disposed in the same way along the branches. It has proved perfectly hardy at the Arboretum.

Another high climbing species of the same genus is *Celastrus hypoleucus* (*C. hypoglauca*), named thus for the whitish color of the underside of the leaves. These are generally oblong-ovate, from two to five inches long, crenate at the margin, pointed, bright green above and bluish white on their under side. The flowers are larger than in the preceding species, yellowish white, disposed in terminal panicles up to 9 inches in length and are followed by showy fruits similar to those of the other *Celastrus*.

Celastrus latifolius, like the preceding species from

Central China, is remarkable for the size of its leaves which are up to eight inches in length and six inches in width; they are slender-stalked, oval or broadly ovate in outline, crenate at the margin and at the end contracted abruptly into a short point. The yellowish white, small flowers are followed by dull green fruits disposed in terminal panicles from five to six inches in length and perhaps even larger, disclosing when ripe their orange red seeds. The two last named *Celastruses* from Central China are certainly much more ornamental on account of the large terminal panicles than the other species in cultivation, but they may not be quite as hardy in this neighborhood, which remains to be tested.

Alfred Rehder.

Two Good Climbing Plants

Climbing shrubs with ornamental flowers, apart from roses, are none too plentiful in our gardens and any addition to the number is always welcome to those who have suitable positions in which to grow them. Although by no means new plants, the two to which I wish to draw attention, viz., *Polygonum multiflorum* and *P. Baldschuanicum*, are far from being well known and yet for many positions they are two of the most beautiful and useful plants we have. The first named, a native of China and Japan, has been in cultivation for many years but apart from Botanic Gardens it is not generally known in this country. Young plants raised from seed sent here by that indefatigable collector, Mr. E. H. Wilson, may now be seen growing in the Arnold Arboretum. The plant shown in our cover illustration flowered at the Farquhar greenhouses, Roslindale, Mass., and is on exhibition at the New England Fruit Show.

The other species *P. Baldschuanicum*, is a native of Bokhara and found its way into general cultivation through the Imperial Botanic Gardens at St. Petersburg. Both of these *Polygoniums* are very rampant growers and frequently make as much as thirty feet of stem in one season but in spite of this there is no suggestion of weediness such as can sometimes be seen in plants of rapid growth. The flowers in both cases are white and produced with the greatest profusion in panicles throughout the summer and fall.

It is not difficult to find a suitable place for these two handsome plants. They are perfectly hardy, will succeed on the majority of soils though a good loam is preferable, and require very little attention in the way of pruning, but it is important that a sunny, open position be chosen where the wood is able to become well ripened. For covering pergolas, buildings such as sheds, tree stumps, fences or for any positions where climbing plants are used they are among the most desirable shrubs we have.

To restore
 New England's fruit
 prestige

We give a little space to the subject of New England fruit growing this week and only wish we had more room at our disposal in which to set forth the unlimited possibilities of the New England market for the products of agriculture and horticulture—a subject which furnished the theme for one of the most enthusiastic and auspicious meetings which Boston's Chamber of Commerce has ever held. We are glad to see, at last, our brethren of the fruit growing branch of

horticultural industry waking up to the situation as it confronts them in New England and getting ready to "do things." It has been plainly apparent for a quarter of a century that the floral and vegetable forcing industries were far outstripping the fruit growers in enterprise and substantial progress and that for some reason or reasons the fruit interests were lagging and rapidly losing the indomitable energy and lusty vigor which had placed the previous generation of New England fruit enthusiasts in a position of supremacy recognized all over the world. They seem to be going about it in the right way now to recover lost ground and make full use of the hitherto neglected advantages which are within their reach. We wish the movement all success.

State encourage- ment for horticulture

In quite a number of states, horticultural societies which are giving stated public exhibitions on broad lines and using their resources and best abilities for the advancement of horticulture in all its branches, are now receiving the benefit of state appropriations, under reasonable oversight. In those states where such appropriations are monopolized by organizations devoting their energies to any one division of horticulture such as commercial fruit growing, or any other single item, we believe it will be only necessary for the friends of other branches of the horticultural industries to voice their request in their respective societies or, failing of proper recognition there, to make appeal direct for legislative consideration. Wherever this stand has been taken the result has been encouraging and when consistently and persistently followed up it has been satisfactorily demonstrated that horticulture can get much more than it has been getting if it will only go after it. The good example of states where this has been done,—say for instance in Illinois,—should serve as an inspiration in other places and make the undertaking much easier of accomplishment. Horticulture enjoys a popularity today far greater than ever before and the people and their representatives are disposed to treat it generously. This is due in a much greater degree than is generally realized, to the educating influences of our public parks. No other agency has done so much to elevate horticulture to its rightful place in the estimation of all the people.

The dahlia's future

It must be quite evident to the unprejudiced observer that the dahlia, notwithstanding the enthusiastic efforts of its confident backers to give it position and prestige, has hardly attained the position we should all like to see it attain as a universally popular garden plant. As an exhibition flower all will admit its adaptability. Its almost endless range of tints and combinations of color, and great variety of form make it an object of never failing interest and admiration and it is no surprise to us to see crowds of people with note book and pencil in hand gathered around the exhibition table or the florists' window where the resplendent blossoms are spread out under name or number, enchanted with the dazzling and radiant display and recording for future acquisition the varieties that charm them most. There are other ways in which the dahlia may be shown to advantage in the exhibition hall, besides the somewhat monotonous method of arrangement in bottles on flat tables, to which we have heretofore called attention and the "dahlia show" can undoubtedly be made in the future much more of a gorgeous and pleasing autumn festival than it has in the past. But go through the dahlia fields of the exhibitors of these flowers so fascinating when cut and

staged, and undertake to select from the big sprawling masses of coarse growth specimens that would acceptably adorn a well-groomed garden—considering further that for the greater part of the season they have been flowerless and that one frost means their utter ruin—and the dahlia's shortcomings will quickly be manifested. Instead of working to add to the number and variety of forms and colors of flowers of which there is a superfluity already it would seem that the dahlia specialist might better devote his energy and ingenuity to the development of greater compactness of habit and earliness of flowering, eliminating the rampant coarseness of the plant and thus giving it a shapely finish as yet unattained for garden use, and securing a longer and more reliable period of floral effect.

European Horticulture

THE CHIEF MEETING OF THE GERMAN DAHLIA SOCIETY

The order of the day was not abundantly filled on this occasion, owing to the acting chairman of the society being greatly burdened with the work of the exhibition. Mr. Obergartner Bergmann discoursed on the exhibits of dahlias; Mr. Editor Schneider, conversed about the exhibits of the florist's art and the importance of the dahlia to the florist of the present day; whilst Mr. Obergartner Schonborn of Wahren talked about Otto Mann's introductions of new herbaceous plants for cutting purposes, gladioli, etc. Herr G. Bornemann, president, read a report of the dahlia trial grounds at the Palmengarten, and at Otto Mann's nurseries at Leipzig-Entritzsch; and a letter was read from a member, Mr. Heinrichsen, concerning the condition of the Frankfurt trials. Should the exhibition at Leipzig turn out to be unfavorable the proposed great dahlia show in 1910 would be questionable, and as a substitute it was hinted that a visit should be undertaken to England during the dahlia season.

RE PELARGONIUMS BEROLINA AND METEOR (SYN. PAUL KRAMPHEL)

In a note in "Die Gartenwelt" for October 2, 1909, Herr W. Wendt, landscape gardener, Berlin, states that on six sunny balconies having a total length of 18 metres, he had substituted the variety Berolina for Meteor which he had previously employed as screening plants, rejoicing in anticipation on the fine effects these plants would produce in this sunny aspect. On these six balconies there were, however, about eighteen miserable blooms at the time of writing, instead of numerous corymbs, as would have been the case had Meteor been employed. The excuse that the Berolinas were spoiled by being crowded by other plants does not hold good, as in front of these stood plants of Begonia *Erfordia*, *Pelargonium peltatum* *Leopard*, which last in common with Meteor most decidedly, in regard to its fine clear coloring and markings, is to be preferred to the so-called Berlin *peltatum*. The result of his experience is that P. Meteor remains Meteor, and that the best about Berolina is its name.

DAHLIAS IN GERMANY

The readers of this journal who do not receive the German nurserymen's and florists' lists and may be desirous of information in regard to new varieties of dahlias now commonly cultivated in Germany by amateurs and gardeners will read the following remarks with interest. The varieties are almost exclusively of German origin, and are selected from a list of Herr Karl Bergmann's published in a leading gardening journal. The weather in the summer and autumn was wet and cool, causing unsatisfactory growth in the

plants, the shoots overtopping the flower-buds, and many varieties produced their blossoms beneath the foliage instead of above it, as is usual with them, but as the rains ceased and the weather became dryer the dahlias flowered abundantly, and the flowering season continued for a greater length of time, than has seldom occurred in that country.

Certain varieties as Aphrodite, ivory white; Sylphide, light rose; and Melpomene, dark crimson, flowered early and were richly colored, notwithstanding the unfavorable weather. The last two are sports from the first named variety, and they have the peculiarity of bringing flowers which are occasionally striped, and of much beauty. Other early bloomers are Polarstern, pure white; Weisse Perle, Erlkonig, light saffron; Medusa, blood red; Landrat Dr. Scheiff, of middling height, and of amber color; Feurstern, brilliant scarlet, a small Liliputian cactus variety; Vestalin, lilac, with light pink tint, a capital bouquet flower; Brantjunger, whitish pink, an abundant and early flowerer, which now and then produces less well-filled double flowers; Thuringia, of a fiery orange red tint; Aristocrat, cinnabar scarlet, the flower well poised. These are especially recommended for early flowering.

Of the large flowered section the writer lays great stress on Socrates, rosy scarlet, with florets inclining inwards; Aristid Gurtler, raised in Hungary, a flower of enormous size and of light red tint, the florets likewise bent inwards. The flower stalk is certainly too weak to carry the heavy bloom; Lisa Barecke is of a clear reddish lilac tint, and the flower is borne erect.

Of dwarf varieties of show dahlias mentioned may be Puck, orange scarlet; Zaunkonig, light carmine; Nick, dark carmine; Citronenvogel, light yellow, having a pink tinge; Edelweiss, snow white; Alma, rosy lilac; and Johannes Mortensen, orange colored. These last three are new. Marianne, which came into commerce in 1906, belongs to this class. The flowers have broad florets, and are of a pretty, loose form, and the color that of old gold. The flowers are much valued for florist's work. Harzer Kind has flowers of middle size, which appear early in the season, are moderately double and of a clear pink color, and they are carried well above the foliage, erect, and in great profusion.

NEW VARIETIES OF ROSES

The following new roses were noted in a collection shown by Messrs. W. Paul & Sons at a late show at the R. H. S. Hall, Westminster, viz., Comtesse Icy Hardegg, having the shape of Gruss an Teplitz, and a rosy crimson tint—a charming flower; Hugo Roller, a flower having white central petals, and outer ones cerise; Mme. Maurice de Luze, the flower of exquisite shape and the color a deep rose; Gruss an Sangerhansen, a purplish crimson, flat formed bloom; Le Progress, with beautiful shell-shaped petals, in color buff, and seen at its best in the partially open state; and Bianca, a white petalled flower with the tips of the petals a tender pink color. As a half opened bud it is a great beauty.

LETTUCES

The firm of J. Veitch & Sons have this year made a great display of vegetables and saladings. Among the latter deserving of special notice for their compact shape and firmness may be mentioned the All Seasons Cos and Goldrings Cos. The last named possesses leaves of a remarkable dark green tint, and brown at the tips. The following appeared to be excellent cabbage varieties, viz., Continuity, White Chavigny, a large and close form; Buttercup, and New York.

Frederick Moore

SOME WORK OF THE U. S. DEPARTMENT OF AGRICULTURE AS AFFECTING FLORICULTURE.

By B. T. Galloway, Chief of the Bureau of Plant Industry, U. S. Department of Agriculture, before the Society of American Florists, at Cincinnati.

(Continued from page 560)

Special Work with Carnations.

I have briefly reviewed the foregoing questions more as an introduction than an attempt to give you detailed information as to work actually accomplished, or in progress. My particular object at this time is to set before you certain results which have been secured in connection with our work on carnations and the growing of bulbs in the United States. At one of the former meetings of this Society we presented some of the results secured in the matter of feeding the carnation. Soon after this work was completed the houses in which we grow carnations were modified for the purpose of obtaining light on the relative effect of growing the crop on raised benches as compared with solid beds. The rapid increase in the price of lumber has made it essential and necessary that florists should take advantage of all methods or practices which will reduce the cost of production without interfering with the size and vigor of the plants or crop grown therefrom.

The experimental carnation houses of the Department are built on the rigid furrow plan and run north and south. There are no separating partitions, the house as a whole being 48 feet wide and 133 feet long. For experimental purposes the house is divided into seven beds which when filled

Wooden bench to the left with 3 in x 4 in. wooden supports, supports placed 4 feet apart. Bench three feet high. Solid concrete bed in center.

will hold about six thousand plants. It was planned in the experiment about to be described to test the effect of growing the crop on raised wooden benches constructed in the usual way with wooden supports; on tile bottom benches with iron supports, and in solid beds with concrete walls. The wooden supports of the raised wooden benches are made of 3-inch by 4-inch Georgia pine and placed four feet apart. The benches themselves are made of 1-inch by 12-inch by 16-foot white pine boards. The benches are about three feet high. The tile bench has a frame constructed of 1 1/4-inch iron pipe, the supports being set five feet apart. The legs of the supports

are set 12 inches in the ground in concrete, with two lines of two-inch angle iron and two lines of two-inch T-irons resting on the pipe supports to carry the tile bottom. The tile slabs are 23 3/4 inches long, 12 inches wide and 1 inch thick. There is a 6-inch iron spear point attached to the legs to support the side or facial boards. The height of the tile bench above the walk is 18 inches, corresponding practically with the solid beds next described. The walls for the solid beds are made of concrete, 4 inches thick and 24 inches high. Six inches of the wall is below and 18 inches above the ground. The concrete was made of one part Portland cement, three parts sand and six parts broken stone or gravel, without reinforcement. Such construction work can be done by greenhouse men themselves. Where soft coal is burned the ashes after screening would take the place of sand and gravel in about the same proportions. The usual way to construct with ashes or cinders is to use one part Portland cement, three parts fine ashes, and six parts coarse cinders. We constructed our beds 18 inches high for convenience in working them and gathering the flowers. If the beds are lower than this it is necessary to bend the back a good deal, which cuts into the time of the men when they are working with the plants. The accompanying photographs illustrate the methods of construction more satisfactorily than mere description.

It is interesting to note the relative cost of these different types of construction. The cost of the wooden benches constructed in the ordinary way with the wooden supports was 12 1/2 cents per square foot of bed space. The cost of the raised beds with iron supports and tile bottoms was 17 cents per square foot, while the cost of the solid beds with concrete walls was 11 cents per square foot. The cost per plant was 9 cents for the wood benches, 8 cents for the solid beds with concrete walls, and 12 cents for the tile bottom benches with iron frames and supports. It thus appears that the

Method of constructing tile bench with iron supports, U. S. Department of Agriculture.

solid beds with concrete walls cost less than the other two forms of construction and are for all practical purposes permanent.

The soil for the entire house was the same, being made from good fine sod composted at the rate of three parts soil and one part of well-rotted manure. The soil and manure were mixed thoroughly and worked over several times before being brought into the house. The raised wooden bench and tile bench were filled in the usual way. The solid bed was filled to a height of 12 inches with cinders, then two inches of straw was put on to prevent the soil from washing into the cinders. On top of the straw four inches of compost was added, this bringing it up flush with the top of the concrete walls.

With a view to getting definite information regarding the effect of the character of the bed, if any, on vigor and productiveness, the house was divided into five sections, a different variety of carnation being planted in each. Section one, for example, was planted to Winsor; that is, a portion of the wooden bench constituting about one-fourth of the entire length was planted to Winsor, the same variety being used for one-fourth of the tile bench and one-fourth of the solid beds. There were 1126 Winsor plants involved in this experiment—a sufficient number to give us a fair commercial test. The same methods were followed in the next section which was planted with White Enchantress, the next section with White Perfection, the next with Beacon, and the next with Pink Enchantress. A careful record was kept of the number of flowers cut from each section and the value of the cut estimated from the prevailing prices of carnations during the season. Without going into the details of this work it suffices to say that the records kept as described were for five months, including November, December, January, February, and March, and show practically no difference in the yields from the beds of different construction, if

anything the solid beds giving slightly better results. Our records show, for example, that the average yield per plant from the Winsor plants on the raised wooden benches was 14 flowers for the period indicated. The average yield on the solid beds was 12 flowers; on the tile bench 11 flowers per plant. The average yield of the Beacon on the raised wooden bench was 13 flowers, on the solid beds 13.9 flowers, and on the tile bench, 9.9 flowers. The average yield of Enchantress on the raised wooden bench was 10 flowers, on the tile bench 10, and on the solid beds, 13 flowers.

It should be borne in mind that records were kept for five months only. If they had been kept the whole season through, the average yields would have been about doubled.

The plants in the solid beds, however, were decidedly more vigorous, the stems being stronger and the flowers larger than in either the wooden or tile benches, consequently were worth more money. This is due to the fact that there is much better drainage in the solid beds. The soil never becomes soggy when an over-supply of water is put on as has been found to be the case with the wooden and tile benches. The plants in the tile bench were the least vigorous. It has been our experience that it takes about the same time to work the solid beds as the raised wooden benches. We have found, further, that the solid beds do not require watering as frequently as the other benches. It has been our practice to water the solid beds once a week, while it has been necessary to water the tile and wooden benches at least three times in two weeks.

The cuttings for this experiment were made about January 1 and potted in two-inch pots when well rooted. Early in March they were shifted to three-inch pots where they were kept until the last week in April, when they were transferred to the benches. No field-grown stock was used in the experiment.

Solid beds, showing method of filling, first, cinders, 12 inches; second, straw, 2 inches, and last, compost, 4 inches. Walls 18 in. high, 4 in. thick.

"WIRELESS" FROM FALL RIVER.

Paul de Nave's orchid-growing enterprise, begun eighteen months ago, gives every evidence of panning out successfully from now on. *Cattleya labiata* is beginning to bloom abundantly and there will be a succession of the different species and varieties in their season to keep up the continuous supply so essential in commercial orchid growing. The flowers are sold through Welch Bros., Boston. Mr. de Nave grows the greater part of his cattleyas in osmunda fibre, wired to flat boards about five feet long, a method similar to that followed by Lager & Hurrell. Besides the cattleyas there are oncidiums, vandas, cypripediums, dendrobiums, etc., that always useful and profitable white orchid, *Dendrobium formosum*, figuring prominently. This establishment will help fill a gap in the New England cut-flower market which has often been shy on orchids when they were most wanted, and the demand is sure to increase as facilities for production are enlarged.

C. Warburton, a few rods distant, still makes the carnation his special hobby regardless of the Cressbrook rebuff of a few years ago. There are ten thousand carnations in the benches. White is the winning color in Fall River, and hence predominates. One house of White Perfection planted in late July is a sheet of bloom now. A house of White Enchantress planted three weeks later is just about three weeks behind the other, and it is a credit to its name. There is a white seedling now in bloom which gives promise of a brilliant future, but it will be given two years further opportunity to show its quality before it even gets the honor of a name. The chrysanthemum houses are an attraction at present. Three blooms to the plant is the most profitable method in Mr. Warburton's experience, where local retail trade is the mainstay. Early Snow is the favorite white and it would be hard to beat it as a clean, uniform, shapely and healthy flower. A yellow of equal value to follow Golden Glow is wanted.

CATALOGUES RECEIVED.

Andorra Nurseries, Chestnut Hill, Pa.—Wholesale Price List of Specimen Trees, Shrubs, Roses, etc.

E. S. Miller, Wading River, N. Y.—Trade Price List of Bulbs and Hardy Plants for Spring 1910. *Gladiolus Gandavenses*, G. Childs and Lemoine's hardy hybrids, irises and other hardy herbaceous plants and a fine list of hardy lilies are included at prices that insure a sale.

New England Nurseries, Inc., Bedford, Mass.—Catalogue of Standard Fruits for New England Planting. This is a fine publication on a timely topic and we know by personal observation that the trees and shrubs which it lists are of the highest quality and best selection for the purposes indicated.

Washington, D. C.—A vote of protest was passed by the Florists' Club of Washington at its meeting on Oct. 8 against the selling of flowers by peddlers on the street.

NEWS OF THE CLUBS AND SOCIETIES

NEW ENGLAND FRUIT SHOW.

The sensation of the week has been this mammoth exhibition of New England-grown fruit, filling every nook of the Massachusetts Horticultural Society's building. The show opened on October 19, and will continue until Sunday night, October 24.

The president of the show, J. Lewis Ellsworth, and Gov. Eben S. Draper were the principal speakers at the opening on Tuesday. President Ellsworth told of the folly of fruit and apple growers going West and urged them to take care of the orchards at home.

Governor Draper told of his own attempts as an apple grower, and also of the success which has encouraged him to buy a large orchard with about 250 apple trees, which he will cultivate.

The New England Fruit Show is one of the results of the conference of the governors of the New England states, held in Boston during last November. It has been the object of the officers of the Association to bring together the finest exhibition of fruit ever assembled by New England fruit growers, and to demonstrate that New England can and does produce the finest quality of fruit grown.

This was all demonstrated by the excellent exhibits of apples, pears, grapes, peaches, plums and other varieties of fruit. Especially good is the exhibition of apples.

The judges have about \$5000 worth of premiums to dispose of, and there is abundant material to which every dollar of it may be worthily awarded. The display of apples is by far the biggest and best ever seen here. Vermont, New Hampshire, Maine, Massachusetts, Rhode Island and Connecticut are all heavy contributors to the barrel, box and plate displays. Up to time of writing the public attendance has been good. Twice a day there are demonstrations and competitive contests in packing apples in boxes and barrels. Teams representing the University of Maine, University of Vermont, Massachusetts Agricultural College and New Hampshire College indulged in a competitive contest in judging fruits on Wednesday forenoon. On the afternoon of the same day, Geo. T. Powell, of Ghent, N. Y., spoke upon "Some Essentials in the Production of High Grade Apples," and on Thursday, Wm. A. Taylor of the U. S. Department of Agriculture, delivered an address on "Orchard Management and Varieties for New England."

The allied industries are well represented, particularly the manufacturers of and dealers in spraying materials and implements. The exhibit of the Bowker Fertilizer Co. and Bowker Insecticide Co., which occupies a central position in the lobby, is very large and interesting. Some of the exhibitors come from distant points and all the booths are in charge of representatives of the respective houses. Grasselli of Cleveland, Ohio, and Thomsen of Baltimore, are among the largest exhibitors in the insecticide line. Harrison's Nurseries, Berlin, Md., have a fine tree exhibit and

so has the New England Nurseries of Bedford, Mass. A cider mill in operation and attended by attractive young ladies is on from Chicago. There is music by a ladies' orchestra every evening. Wilfrid Wheeler, secretary of the Show, who has worked untiringly for many weeks in preparing for the affair, has every reason to feel elated at the splendid success of this exhibition which, it is understood, is only the initial one of a regular series.

SOCIETY OF AMERICAN FLORISTS' AND ORNAMENTAL HORTICULTURALISTS.

Registration of Roses.

Messrs. Peter Henderson & Co., 35 Cortlandt street, New York, N. Y., offer for registration the following roses: Name—Priscilla.

Description—A seedling from Kaiserin Augusta Victoria crossed with Frau Karl Druschki. Color clear white, double flowers. Shows unmistakable evidences of its parentage in flower, stem and foliage, but distinct from each. Very free blooming, moderate growth, good stem and foliage.

Name—Abundance.

Description—A cross between Clothilde Soupert and Souvenir du Pres. Carnot. Flowers pink, produced in great abundance. Habit dwarf and compact, branching freely; good foliage.

These applications for registration having been submitted to the American Rose Society, and having been approved and accepted by them, the registration is completed under the rules of this Society.

Registration of Fern.

Public notice is hereby given that Mr. Alfred Roedder, Shorb, Calif., offers for registration the plant described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Description—Fronds 30 to 36 inches long, erect, 8 to 12 inches broad with strong stems. Pinnules one-half inch; a strong easy grower of the cuneatum type; originated with me four years ago.

Name—Adiantum Roedderii.

W. N. RUDD, Secretary.

October 15, 1969.

BUFFALO FLORISTS' CLUB.

Much important business was transacted at the last meeting. Several new applicants were elected and the club is swelling in the membership list. A paper read by W. A. Adams on "Bargain Sale Flowers," was very interesting and much discussion followed. At the next regular meeting President Slattery is booked to read a paper on "Color Harmony." A flower show is to be held some time in November on the same lines as the one held a year ago and the committee selected by President Slattery will no doubt prove same to be the best show ever held here.

NASSAU COUNTY HORTICULTURAL SOCIETY.

This society held its annual show in Pembroke Hall, Glen Cove, N. Y., on Wednesday, October 13th. Never has a finer display of dahlias been seen at Glen Cove. The hall was literally packed.

The Dean cup, a much coveted trophy, was much competed for. G. Wilson, superintendent for Mrs. B. Stern, Roslyn, L. I., was the winner. Mr. Wilson staged about 110 varieties, all in fine condition. Many good dahlias were noted in the collection, amongst which were vases of Dreer's White, Grand Duke Alexis, Chas. Lanier, Cuban Giant, Le Colosse and many others. J. Duthie, superintendent for G. M. Townsend, was second in this class. Mr. Duthie's collection was also of a high order, but some of his blooms were a little spent.

Mr. Wilson also won the Society's prize for the best collection of dahlias, G. W. Barton, gardener for H. W. Buchnals, being second. Mr. Duthie was awarded first for 12 distinct cactus; W. Eccles, superintendent for M. L. Schiff, second.

Mr. Duthie also won the class for 12 double varieties; Mr. Barton second; 12 pompons, J. Duthie; 12 singles, J. O'Brien, gardener for Parker D. Handy. S. J. Tiepass won first for four vases of four standard varieties; G. Wilson, second. First prize for vase of white, J. O'Brien.

Mr. V. Cleres exhibited some very fine vases of singles, for which he was awarded honorable mention. The Huntington Nursery Co. exhibited a magnificent vase of dahlias, for which they were awarded honorable mention.

Mr. Eccles was awarded a certificate of merit for vase of white cosmos, and H. F. Matz honorable mention for vase of single violets. R. Knight was awarded a cultural certificate for two vases of chrysanthemums, his Beatrice May being exceptionally good. Messrs. Nicol and Kirby acted as judges.

The regular monthly meeting was held in the ante-room. There was a good attendance, the large ante-room being packed. After formalities were gone through, President Everett presented Mr. Wilson with the Dean prize, a massive silver cup, of beautiful design. Some very fine stuff was staged for points and exhibition at this meeting, P. Reul again leading. The judges' awards were as follows: P. Reul, cauliflower, 93 1-3; V. Cleres cosmos, 90; Gaut, sweet potatoes, 85; G. Wilson, dahlias, 81 2-3. P. Reul was also awarded a cultural certificate for cauliflower and honorable mention for celery. V. Cleres, honorable mention for cauliflower; W. Marshall, cultural certificate for vase of chrysanthemums, Beatrice May; G. Ashworth, thanks of society for quincies; Petroccia, honorable mention for cauliflower. Messrs. Holloway, Duthie and Garrett acted as judges. Several new members were elected. P. L. Swan, Oyster Bay, was elected to honorary membership.

W. H. MacKENZIE,
Corresponding Secretary.

No Licensed Fireman Required

On Low Pressure Steam Boilers
if you put in the

Ashton Safety Valve

Complying with the Latest Revised Laws of the State of Massachusetts.
Accepted and approved by the Board of Boiler Rules and the Chief of the District Police.

These valves when applied to heating boilers carrying a pressure of not over 15 lbs. per square inch will permit the operation of the boilers **without requiring a licensed engineer or fireman.**

PRICE LIST: 2 inch, \$22.00; 2 1-2 inch, \$34.00; 3 inch, \$48.00; 3 1-2 inch, \$60.00; 4 inch, \$70.00. Liberal Discount from this List.

We have exclusive agency for this valve. Will furnish it at Manufacturer's Price. Without it, all greenhouses equipped with steam heat **must** have one or more licensed firemen.

JAMES VICK'S SONS, - Rochester, N.Y.

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society held a meeting in New York City, and it was decided to issue a second edition of the supplementary schedule for the exhibition of 1910, to be held in the American Museum of Natural History, New York city, with the list of additional special prizes that have been offered.

President Poehlmann urges the New York people to do their best in both growing material and in making prizes of such character that the display will out-do what was offered at Chicago. Vice-President Pierson responds that if it is possible they will put up such a show here in New York that it will attract the attendance of tens of thousands of people because of its beauty, its surroundings and extent, and every effort should be made to get a list of special prizes that would tempt efforts upon the part of the best growers of all kinds—amateur or commercial—to show up what they can do. New York city is the greatest rose market in all America. Part of the work of the American Rose Society, as stated in its by-laws is, "To increase the general interest in the cultivation and to improve the standard of excellence of the rose for all the people and to make it especially useful to amateurs."

On the 12th of October, there assembled before the Union Free School of Fishkill Landing, N. Y., a company of

over five hundred to listen to the report of a Home Garden Committee, comprised of the Rev. Dr. MacCullum, Mr. W. J. Pralatoski, and Mr. Frank Tully, the street commissioner. For six months this committee had been overlooking the gardens of the village, one of which was that of Mrs. Amelia Lefevere, a colored woman, who had a front yard devoted exclusively to roses and so well kept that it attracted the general attention, and as an encouragement for home amateurs, the American Rose Society at its meeting in Cincinnati, voted a silver medal to be awarded in recognition of this excellent example of amateur work. When the medal was presented to her, the whole company clapped most lustily and nothing occurred that was of more public interest than this particular act. The committee also made mention of two children's gardens which were really a credit to anyone.

It was resolved at the meeting of the executive committee to hold a meeting of the Rose Society on November 3rd, 1909, at the horticultural exhibition to be held in New York at the Museum of Natural History.

BENJAMIN HAMMOND, Secy.

CONNECTICUT HORTICULTURAL SOCIETY.

By an error in making up our schedules or prize lists, the dates for the coming chrysanthemum exhibition at Putnam Phalanx Hall, Hartford, were set down as November 4 and 5, whereas they should have been November 3 and 4. To avoid confusion, after the mistake was discovered, an effort was made to procure the use of the hall for the 4th and 5th, but it was found that other parties had engaged it for the 5th. Entry blanks are now being sent out, and should be returned to the secretary by November 1st.

Nathan F. Peck, one of our long-time and esteemed members, has a pawpaw tree now in full bearing, and is enjoying its toothsome, custard-like fruit. The tree has stood for about ten years in his beautiful grounds on Niles street, Hartford; and its constitution seems to be perfectly hardy, having withstood, in the winter of 1903-4, a temperature of nearly 40 degrees below zero, when thousands of trees were killed in this state, and some entire orchards nearly destroyed. The pawpaw fruit is very perishable, lasting but a day or two after being picked.

GEORGE W. SMITH,
Secretary.

FLORISTS' CLUB OF PHILADELPHIA.

A banquet will be given at Dooner's Hotel, 10th street above Chestnut, on Thursday evening, October 28, 1909, at 7 o'clock, as a testimonial to Mr. Edwin Lonsdale, who is leaving this city early in November to take up his residence in California. All members of The Florists' Club, also any friends of Mr. Lonsdale in the allied horticultural professions, are cordially invited to participate. The subscription is \$5 per person.

In order to make proper arrangements, replies should be sent at once to David Rust, Secretary, The Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce, Philadelphia.

No provision will be made for anyone who has not replied by noon on Monday, October 25th.

JOHN WESTCOTT,
FRED'K HAHMAN,
GEO. C. WATSON,
Committee.

Dreer's Special Offer

OF

Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world. Our collection is unequalled, and we are prepared to furnish the new and rare kinds as well as all the popular standard varieties in large quantities.

The plants we offer are all strong one-year-old field-grown plants and will make a fine display of flowers next season.

New and Rare Varieties.

	Per 100	Per 1000
Aglae Adanson (Tall). Immense flowers, snow-white, with red eye.....	\$8.00	\$75.00
F. G. Von Lassburg (Medium). The purest white in cultivation; individual flowers larger than any other white..	8.00	75.00
Jules Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.....	6.00	50.00
Louis Blanc (Tall). Reddish-violet, with purple shadings and darker eye. A distinct dark-colored variety.....	6.00	50.00
Prosper Henry (Dwarf). Large compact truss of pure white with bright crimson-carmine center.....	6.00	50.00
Siebold (Dwarf). An improvement on the popular scarlet "Coquelicot," brighter and stronger.....	10.00	90.00
George A. Stroblein (Medium). Bright scarlet, with crimson-red eye; does not bleach.....	10.00	90.00
Mme. Paul Dutrie (Medium). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large, and borne in panicles of immense size.....	10.00	90.00
Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.....	6.00	50.00
Von Hochberg (Medium). The ideal crimson Phlox; the richest of its color.....	10.00	90.00

General Collection of Hardy Phlox.

Best Scarlet and Red Varieties.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.
Etna (Medium). Crimson red suffused with fiery red; cherry-red eye.
Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.
General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.
Pecqueur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet, fine.
R. P. Struthers (Tall). Rosy carmine, with claret-red eye, fine.
Price: Any of the Scarlet or Red Varieties, \$6.00 per 100; \$50.00 per 1000.

Best White Varieties.

Albion (Tall). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.
Diadem (Dwarf). A fine dwarf, pure white.
Helena Vacaresco (Dwarf). Very large-flowering dwarf, white.
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.
Jeanne d'Arc (Tall). A good standard late white.
Louise Abbema (Dwarf). A dwarf pure white of fine form.
Mrs. Jenkins (Tall). The best tall early white for massing.
Price: Any of the White Varieties, \$5.00 per 100; \$40.00 per 1000.

Best Pink and Rose-colored Varieties.

Bacchante (Tall). Tyrian rose with crimson-carmine eye.
Caran d'Ache (Dwarf). Geranium-red, with old rose shadings and white eye; very effective.
Clara Benz (Dwarf). Lovely carmine rose, with darker eye.
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
La Vague (Medium). Pure mauve, with aniline-red eye.
Pacha (Dwarf). Deep rose pink, suffused with Solferino-red and carmine-purple eye.
Pantheon (Tall). Bright carmine rose.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Price: Any of the Pink or Rose sorts, \$5.00 per 100; \$40.00 per 1000.

Best Purple and Crimson Varieties.

B. Comte (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.
Charles Sellier (Dwarf). Bright reddish-violet with large white star-shaped centre.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Chevalier de Bouffiers (Medium). Deep reddish violet, with brighter shadings.
Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.
Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.
Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre with an exceptionally large white centre.
La Foudre (Tall). Rich glowing French purple, shading crimson.
Le Mahdi (Tall). Deep reddish violet, with darker eye.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Price: Any of the Purple and Crimson sorts; \$5.00 per 100; \$40.00 per 1000.

Best Light Varieties With Dark Eyes.

Bridesmaid (Tall). White, with large crimson-carmine centre.
Colibri (Tall). White, with crimson-carmine centre; very late.
Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.
H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.
Price: Any of the Light Varieties with Dark Eyes, \$5.00 per 100; \$40.00 per 1000.

Best Mottled Varieties.

Antonin Mercle (Medium). Light ground color, upper half of petal deeply suffused bluish-lilac; large, white halo.
Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Eugene Danzanvillier (Tall). Lilac, shading white towards the edges; large white centre.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Price: Any of the Mottled Varieties, \$5.00 per 100; \$40.00 per 1000.

Phlox Sufruticosa — Miss Lingard.

Extra strong plants of this valuable early white flowering variety \$6.00 per 100; \$50.00 per 1000.

For the most complete assortment of Hardy Perennials offered in America, see our current Wholesale List.

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

Seed Trade

Big Turnip Crop of Prince Edward Island.

Consul Frank Deedmeier writes from Charlottetown that the 1909 crop of turnips and other roots in Prince Edward Island is estimated at 4,500,000 bushels, or about 20 per cent. of the production of all Canada. The home consumption of turnips is about one-half, the surplus being shipped to New Brunswick and Newfoundland, and if prices are high there in the spring, to Boston. Prices last year were 14 cents per bushel f. o. b. Charlottetown and Summerside. As hay and other feed stuffs are abundant this year, 12 cents is the expected price this fall.

Notes.

The partnership between Alfred Watkins and Chas. David McKay, carrying on business as Watkins & Simpson, at 12 Tavistock street, Covent Garden; 13 Exeter street; Mercer avenue, Long Acre, London; and at Evesham, in the County of Worcester, was dissolved on May 10, 1909. Mr. Alfred Watkins will continue the business alone as Watkins & Simpson in the same manner as heretofore.

Mr. C. D. McKay has entered the service of Messrs. Cooper, Taber & Co., Ltd., seed merchants, 90 and 92 Southwark street, London, S. E., in which firm he has obtained shares.—Gardeners' Chronicle.

PUBLICATION RECEIVED.

Field Notes on Sweet Peas, with Appendix.—Published by C. C. Morse & Co., San Francisco, Cal. Edited by Lester L. Morse. The last issue of Field Notes was in 1907. The present edition is identical, but with the addition of eight pages in which are described the new varieties tried and personally examined, of Sweet Peas introduced during the seasons of 1908 and 1909. There are no less than one hundred and fifty of these so-called new varieties, the greater part of which are classed by Mr. Morse as similar to or inferior to sorts already in commerce. The author promises an entirely new book possibly by next year and expresses the hope that the Sweet Pea Society will in the meantime undertake to decide upon and act as sponsor for an authorized list of names which shall be acceptable to the entire American seed trade.

The price of "Field Notes" is 50 cents. Copies can be supplied from the office of HORTICULTURE.

In the auction rooms of William Elliott & Sons, 42 Vesey street, New York, they are moving large stocks of foliage and bulbous stock twice weekly. This medium of disposing of surpluses seems to increase yearly.

SINGLE LATE MAY-FLOWERING or DECORATION DAY TULIPS

These are exceptionally useful flowers for Decoration Day, and every florist should plant out a few. Once planted, they will remain for years and serve you with a wealth of bloom.

	100	1000
Beauty of America. Creamy white, turning pink...	\$1 00	\$8 00
Bizarres. Handsome, rich flowers, with yellow ground; finest mixed.	75	6 00
Bouton d'Or. Deep golden yellow; very handsome flowers	85	7 50
Bridesmaid. Lovely soft pink	85	7 50
Bybloems (Roses). White ground, blotched, striped or feathered with lilac	85	7 50
Bybloems (Violets). White ground, striped and blotched purple and blue	90	8 00
Darwin. Very large flowers. They include every known shade	85	7 50
Golden Crown. Large, bright yellow	1 00	7 50
Gesneriana, Scarlet (true). Largest and handsomest of all Tulips; fine for Decoration Day	1 25	10 00
Macrospeila. Crimson-scarlet, black center	85	7 50
Isabella (Shandon Bells). Carmine-rose, shaded creamy white	1 00	9 00
Maiden's Blush, or Picotee. Clear white, margined on the edge with pink, pointed and reflexed petals; most beautiful	90	8 00

PARROT, or DRAGON TULIPS

Parrot Tulips should be more largely grown. Their odd colors and fantastic shades make them ready sellers, and make a unique decoration when placed in vases or low bowls.

	100	1000
Admiral de Constantinople. Large; red, yellow edge	\$0 85	\$7 50
Cramoisie Brillante. Rich blood-crimson, with bluish markings	85	7 50
Lutea major. Large, showy yellow	75	7 00
Markgraaf von Baden. Red and yellow, orange inside; very showy	1 00	9 00
Perfecta. Yellow, striped red	85	7 50
Superfine Mixed Parrot Tulips	75	6 00

Brookline, Mass.—The florist shop of J. W. Howard at 1353 Beacon street is now under the management of Mrs. Merrill, who was for a long time known to patrons of C. P. Grimmer, Boston, by her maiden name of Miss Lavine.

Among the news notes from New York this week are announcements that Mr. Sharkey, formerly with Thos. Young, Jr., is about to open a store on East 28th street, near Fourth avenue; that Mr. Myer, formerly at War-endorff's Madison avenue store, has taken the old Hoffmeier store at Broadway and 83rd street, and that Mr. Peterson, recently with Fleischman, takes Mr. Myer's place at War-endorff's.

Roy E. Erb, who has been connected with the Carlisle Nurseries, Carlisle, Pa., for the past three years as manager, will open a flower store (Carlisle's first) under the title of the Roselyn Flower Shop, about the middle of November in the new McCullough building, next to the theatre. The store will be a thing of beauty—cases, refrigerators and finish being entirely in mission oak. Next spring Mr. Erb will build a range of greenhouses, about 3000 feet, on land recently purchased near Cave Hill Park.

FLORISTS' BARGAIN SALES.

A paper read before the Buffalo Florists'
Club by W. A. Adams.

Bargain sales to the florist of today
is a very serious question and all
cities cannot answer it as possibly we
do in Buffalo as to the effect it has
on the business at other times.

Do bargain sales injure the busi-
ness? I will say No, if conducted as
they should be. They are in many
cases a blessing, if the goods offered
are fresh, of good quality, and at a
price lower than they are ordinarily
sold at, so that the average person
who has any idea of flowers knows
that it is a bargain. In this way you
encourage the sale of flowers, educate
the people to the fact that flowers
are always appreciated and lend a
tone of refinement to the home, or
wherever sent, and enable one to en-
joy one of God's greatest gifts to the
world.

What are the reasons for bargain
sales? They are many, but the most
important one is to force business in
a quiet time; to get rid of a surplus
stock in many instances, and to get
the people to come to your place of
business, as when buying a bargain
flower they often see something else
that they want, which you sell at a
good profit.

I do not say that in every case you
sell the surplus you have in your
store; nor do I say that the man who
grows his own stock can sell it at all
times at a low price because he has
a large supply, for if he is running his
place systematically, as every grower
should do, he has to charge the store
with what the greenhouse sends him,
and in many instances, with coal at
\$6.00 per ton and wages at the pre-
vailing scale, he would find that one
place or the other had a leak some-
where.

Bargain sales are not always run by
stores that have greenhouses of their
own, but in more instances by those
who are patrons of the wholesale deal-
er, who, in his suave and tempting
way inveigles you into buying his sur-
plus stock.

But remember, when you are selling
this same stock in your store, you
have several things in your favor:
First, you know who has it; second,
you know what price you want to sell
it at; third, should you get a big or-
der you have the goods and the sale
can cease; fourth, when you are sell-
ing at a bargain, you have the satis-
faction of knowing that a reputable
store is back of the sale and not a
systematic delegation of street sellers
who go to the wholesaler, buy the
goods and walk back and forward in
front of your place, selling the self-
same perishable article as you could
have done had you wanted to. One
thing alone in its favor in Buffalo is,
that we have kept the street vender
away.

Remember when I speak of the good
effects of a bargain sale on the prop-
rietor, I have not forgotten the sales-
man who has many sarcastic remarks
thrust at him by some buyers regard-
ing the quality, freshness, etc., of the
flowers, doubting his veracity when, in
his amiable way (as all employed in
Buffalo are amiable), he says that the
flowers are strictly fresh and as good as
sold any day at double the price or
more, as the case may be. They then ask
to have them in a box and delivered,
or arranged in a bunch, and they get

very much offended if you do not
comply with any or all of their de-
mands. The same people will get up
early in the morning, chase down to
a dry-goods store, crowd in and wait
their turn to get a tie, pair of shoes,
sweater, or some other articles at a
reduction of four cents, with a big
newspaper "ad" saying: "No Charg-
ing, No Approval, No. C. O. D. or
Telephone Orders—but will Deliver,"
and they have had their tempers ruf-
fled far more than they ever had in
a flower store, and still get the flowers
at less than half price. This is where
the salesman's patience and temper
are tried. Although it is hard, I do
not think very many people have rea-
son to complain of inattention, when
the number of customers is taken into
consideration. Salesmen in flower
shops are far above the average.

In conclusion, I am of the opinion,
as stated in my opening remarks, that
when stock is plentiful, quality good
and prices right, a bargain sale along
these lines will be a benefit to the
public and to the florist, as an edu-
cator in the way of getting more peo-
ple to love flowers, and at the same
time bring business to your store.

BUSINESS CHANGES.

N. Milwaukee, Wis.—Mrs. Mary Volk has purchased the greenhouse establishment of F. Escau.

Bloomington, Ill.—R. M. Dale has purchased the business and greenhouses of A. R. Knowles in this city.

Rochester, N. Y.—J. O. Pridmore has retired from the florist business and his place on Cottage street has been taken over by E. R. Fry.

Westfield, N. Y.—Alfred G. Woodhouse succeeds Gus Schoenfeldt, who

after 26 years in the greenhouse business, has now decided to retire.

New York—A. J. Guttman and M. Kempner have dissolved partnership and the wholesale flower business on West 28th street, will be conducted hereafter by Mr. Guttman alone.

H. M. Robinson & Co., wholesale florists, Boston, have transferred their fern and greens department to the basement floor, leaving the entire street floor for their cut flower business.

Flower Market Reports.

BOSTON

The market is badly shattered here for the time being and considering

the way in which all kinds of stock is coming in the prospects for immediate improvement are not particularly rosy. All varieties of roses are accumulating in wholesalers' hands and are unloaded with difficulty, the question of prices having very little influence in effecting a sale. They are simply not wanted. The out-of-town buyer has his own crop on in sufficient quantity to make him independent of the Boston market at least while the good growing weather continues. The first frost worth mentioning came on the night of October 19. It settled the dahlias and other soft material, which had up to that time been untouched, but no influence was felt in the flower market which was already sagging under its burden of indoor products. Orchids, gardenias, lily of the valley and other material usually classed as choice and desirable are in the same predicament as their plebeian associates and must sit on the "anxious seat" in company with the chrysanthemum, violet and carnation until things start up again.

Heavy rains, snow and sleet for nearly the whole week, have made business very unsatisfactory to all in the trade. The florists' windows are

decorated in autumn attire, chrysanthemums and autumn foliage, and all are in readiness for any rush of business. Chrysanthemums are coming in

(Continued on page 585)

Flower Market Reports.

(Continued from page 583)

more abundantly; Robt. Halliday and
Touset have been added to the list.
Violets have been a little weak in
demand, but lily of the valley is sell-
ing well. Beauties are of fine quality,
also White Killarney. My Maryland
is the leader in pink, though excellent
pink Killarneys are seen; also Brides-
maids. The call for Perles is increas-
ing daily and some excellent stock in
yellow are to be had. The scarce arti-
cle is still the fancy carnation and
not enough can be had at a time.
Gladioli, dahlias, cosmos and asters
were still on the list and the cemetery
florist on the lookout for this material.
Dahlias have been exceptionally good
this fall and such varieties as Jack
Rose, Sylvia, Arabella and Kreimhilde
have sold well.

More flowers is the cry
CHICAGO of the wholesalers. The
supply is apparently
shorter each day and the market shows
more bare tables than usually con-

fronts the retailer when he seeks his
stock. Carnations are gone as soon as
unpacked and a trip through the mar-
ket at noon reveals the fact that car-
nations are not to be had at any price.
The weather, that never-failing scape-
goat, is said to be the cause of the
scarcity, notwithstanding the fact that
Chicago has had all kinds of weather
during the past three weeks. Chrysan-
themums are coming in satisfactorily
and a fair number of varieties are now
in bloom. Of roses there are enough
to go around, but nothing in excess.
Beauties are on long stems, many fully
40 inches and there are also short and
mediums in sufficient supply to fill all
ordinary demands.

Local business condi-
DETROIT tions are up to the Oc-
tober standard. The
shortage of carnations is becoming
very irksome. Chrysanthemums also
are coming in slower than the de-
mand for them. Prices are about the
same, but another week will see a
material increase. Most of the down-
town stores have frequent call for
table decorations, as there are also
some bookings for weddings and balls
for December. It all helps to bring us
back to an activity such as we all
enjoyed during the season before last.

Improved weather
NEW YORK conditions resulting
in the elimination of
outdoor products and in the advance-

ment of quality on greenhouse-grown
material, have helped the situation
here very materially. Demand is no
better than it was last week, but there
is an occasional spurt on one line or
another which is encouraging as point-
ing to the time near at hand when
the spurt will be sustained long
enough to bring market values to a
uniform and generally profitable stan-
dard. There is no scarcity of any-
thing. Orchids, violets, roses, carna-
tions, chrysanthemums, lilies, lily of
the valley—all are obtainable in any
quantity and in quality which no one
can reasonably find fault with. Roses
move very reluctantly and carnations
have lapsed badly in demand. There
is in fact, a surplus on all lines and
so long as it continues stable market
values are out of the question.

During Recess

The visit of a dozen members and friends of the Astoria Florists' Bowling Club to W. H. Siebrecht's villa at Chappaqua, N. Y., last Sunday was replete with sensational incidents. The auto went on a strike after 33 miles had been traveled and in the time while waiting for another car an exciting ball game was indulged in. A glorious dinner at the farm and an uninterrupted trip home in the delightful October twilight rounded out a day which will doubtless furnish material for many an amusing reminiscence in years to come.

A Toast.

Given at visit of Astoria Florists' Bowling Club to Wm. H. Siebrecht at Chappaqua, N. Y., Oct. 17, 1909.

[No signature appears in copy, but the desire expressed to live a hundred years among the pies and chickens and eggs seems to fasten the authorship on our esteemed friend, J. Austin Shaw.]

Here's to the Chapple of Chappaqua;
Here's to his loving and lovable Frau;
Here's to his Kiddies, 1, 2, 3,
All of them look pretty good to me.
The better the day the better the deed;
Ours for the trip on our speeding steed,
Ours for the journey that beats the Dickens,
Ours for the land of the pie and chickens,
Ours for the place where harmony stays,
Ours for the eggs his pullet lays.
Health we drink to the Siebrechts all,
Papa and mamma and kiddies small,
Grandpa and babies and chauffeurs too.
Long may they live I say don't you?
Live on these glorious, healthful hills,
Where the air is pure and their beauty thrills;
Far enough from the wicked old town
Where the hustle and bustle just knocks one down;
Here, snug and cozy, near Nature's heart,
Far be the hour when this circle must part.
Really to me, sir, it now appears
I'd like to stay here a hundred years.
So you will if your wish comes true
And so we drink to the whole of you,
Grandpa and mamma and papa and all.
Long may it be ere the shadows fall.
May you grow younger and handsomer too—
If it is possible so to do,
Adding each day to your radiant health—
Adding each hour to your growing wealth.
And now to our lovable hostess and host
We drink long life, while we drink this toast.

The Chicago Bowling Club met Thursday evening and put in the usual hard work toward perfecting themselves in their team work. The totals of the three games bowled are as follows: "Orchids" vs. "Roses"—Orchids, 2100; Roses, 2082.

"Violets" vs. "Carnations"—Carnations, 1950; Violets, 1925.

Pretty well matched, it would seem.

Flower Market Reports

(Continued from page 585)

INDIANAPOLIS since last week changed somewhat

There is a marked increase in the shipments of cut flowers. Prices remain at a reasonable level, but a good advance is anticipated soon. The rose situation has improved considerably and high grade stock has shortened up. American Beauty and teas are fast getting into winter form. Chrysanthemums are coming in with a rush, white predominating. Carnations are showing signs of improvement and move well at good prices. Lilies are of excellent quality and find a ready market. Orchids are seen everywhere in abundance. Sweet peas have appeared but not in any quantity. The supply of lily of the valley is about equal to demand. The season for dahlias is over around this vicinity. There is a good market for all kinds of greens, Southern smilax especially being handled in large quantities. The demand for house plants has never been better at this season of the year. The Boston fern is more popular than ever, although fancy ferns are in good demand, also. Ficus pandurata is quite popular with the buyers of more expensive plants. Fern dish filling is quite a specialty with many of the retailers. While it takes a volume of this kind of business to run into money, still every little bit helps.

PHILADELPHIA 11th to 16th—a fair volume of

business with probably an aggregate increase, but this satisfactory condition was marred by the enormous influx of stock of all kinds, among which the principal offenders were cosmos and dahlias. The latter got their quietus on Wednesday and the wind-up of the week saw a much healthier tone. American Beauty roses took a little jump on Friday, caused by a shortening up of shipments. Killarneys and Marylands are improving very much in both flower and stem, and as they run now, are easily the leaders in their colors. Brides and Bridesmaids are only so so. Some very choice chrysanthemums are now arriving and the volume of shipments continues to increase. Among the best now are Virginia Poehlmann, Touset, Rosiere, Pacific Supreme, Croesus, and Harry Balsley. Carnations are improving in quality and quantity and moving off well. Double violets have made their appearance—Lady Campbell local and Marie Louise from outside points. In orchids there are plenty of good cattleyas and some nice spray varieties, such as vandas and oncidiums. Lily of the valley very good and about enough to go around. Gardenias also are good and are moving off in very fair shape. Greens, too, are plentiful.

WASHINGTON The first killing frost of the season has left but little

vegetation around Washington. Business is taking on its brisk fall pace and there is a good demand for all first-class flowers. Lily of the valley is scarce and in great demand for the many October brides. Carnations are fine now and coming in in good quantity.

Obituary.

William Brown.

One of the old-time Philadelphia gardeners passed away on the 13th inst. at his residence, 47th street and City Line, Philadelphia. William Brown was gardener for many years on the Simpson estate at Merion, and for the past ten years has been forester in Fairmount Park. While he did not come forward prominently at exhibitions or florists' gatherings he was of a very genial and sociable disposition and belonged to many fraternal societies and was a Mason of high degree. A. Lincoln Brown, his eldest son (now located in Cleveland) was a famous Philadelphia bowler in days gone by and was well known in S. A. F. circles.

Lieut. Chaure.

It is with very deep regret that we record the death of this gallant young officer who met his death in the "Republique" dirigible disaster. He was the son of our old and esteemed friend M. Lucien Chaure, the editor of the *Moniteur d'Horticulture* of Paris. Lieut. Chaure entered the French Army at the age of 18 years and was an enthusiastic airship officer. His grandfather, Jean Chaure, was the founder and for many years editor of the journal referred to.

C. H. P.

Barney D. Scarff.

Barney D. Scarff, of Tippecanoe City, O., president of the Miami County Horticultural Society, was instantly killed by a Big Four train Friday morning, Oct. 8, at Brown's Crossing, near Troy.

Mr. Scarff was well known in Clark and Miami counties and for many years was more or less interested in the nursery business which at one time was quite an industry in the neighborhood of New Carlisle.

Mrs. Benjamin B. Smalley

Mrs. Zella E., wife of Mr. Benjamin B. Smalley, florist, Everett, Mass., passed away at a Boston hospital on October 16, after a few days' illness. Mrs. Smalley was a native of Cutler, Me. Besides her husband, she is survived by a daughter, Mrs. Ethel Simpson of Everett, and a son, Mr. B. J. Smalley of New York. Funeral services were held at her late home, 18 Franklin street, Everett, Wednesday afternoon.

Henry Reilly.

Henry Reilly, 35 years old, of Jersey City, N. J., who had been in the florist business in New York City, committed suicide on the night of October 11 by leaping from the viaduct on Riverside Drive over 129th street.

Mrs. Ellen Meads.

Mrs. Ellen Meads, wife of John Meads, florist, Flint Village, Mass., passed away at her home on Marsh street, October 13.

Andrew Ferguson.

Andrew Ferguson, for over thirty years a successful grower and in later years also a retailer in Detroit, Mich., died of Bright's disease last Sunday

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Ham-filton Place, Boston.

HELP WANTED

WANTED—Buyers and agents to sell our cement block and fence post machinery. Send for circulars and prices. Address W. L. Keller Cement Block Machine Co., Kearney, Neb.

WANTED experienced vegetable and flower seed packer to take charge of packing room. Must know the seed business. Give reference and salary wanted. Gurney Seed Company, Yankton, South Dakota.

MISCELLANEOUS WANTS

NOTICE TO ENGINEERS AND LAND-SCAPE GARDENERS.

San Antonio, Texas, Oct. 6, 1909.

The City of San Antonio invites competitive, suggestive plans for platting, designing and beautifying a new City Cemetery to be known as "Mission Cemetery."

Topographical maps of the tract of land upon which said cemetery is to be established can be seen in the office of the City Engineer.

A cash prize or premium of Five Hundred (\$500.00) Dollars is offered for the best and most acceptable plan, a cash prize or premium of Three Hundred (\$300.00) Dollars for the second best plan, a cash prize or premium of Two Hundred (\$200.00) Dollars for the third best plan for so platting, designing and beautifying said cemetery, which prizes above mentioned will be awarded upon the recommendation of the Mayor and the Cemetery Committee of the City Council, who reserve the right to reject any or all plans submitted, and whose decision as to the award of said prizes or premiums shall be final.

All plans for which prizes have been awarded become the property of the City of San Antonio.

All plans must be securely sealed, addressed to the "Cemetery Committee of the City Council, San Antonio, Texas," and be submitted on or before 11 A. M., January 6th, 1910.

BRYAN CALLAGHAN, Mayor.

Attest: FRED FRIED, City Clerk.

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

FOR SALE

FOR SALE—Special 18 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 90 Montrose Ave., Brooklyn, N. Y.

FOR SALE—At Southampton, L. I., 1/4 acre, 8-room house, hot house, 100 ft. long, and barn. All newly painted and in good condition. Easy terms. Inquire Pacific Paint Co., 27 Sixth Ave., Brooklyn, N. Y.

morning. At the meeting of the Detroit Florist Club, Messrs. Sullivan, Porchelon and Danzer were appointed to draw up suitable resolutions and the club was requested to attend the funeral in a body.

INCORPORATED.

Fredonia, N. Y.—J. H. Larder Florist Co.

Granville, N. Y.—The Granville Nursery Co., capital \$5000, has been incorporated. Directors: John A. Farmer and John Farmer, of Granville, and Edgar B. Farmer of Quincy, Mass.

Indianapolis, Ind.—The Princeton Gardens, Princeton, O., have incorporated, capital stock \$25,000; nurserymen; incorporators, W. J. Ritter-skamp, L. A. Ritterskamp and J. T. Hannan.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting on Tuesday evening last, was well attended. Routine business pertaining to the annual exhibition of November 9th to 12th was transacted. The exhibits were early chrysanthemums. For six best flowers, any variety, 1st prize was taken by John W. Pepper, gardener Wm. Robertson, with variety Beatrice May, the flowers being the best ever exhibited at this time of year, with foliage clear up to the blooms. Second prize was taken by C. B. Newbold, gardener Sam'l Batchelor. For the best vase of double dahlias, Mrs. F. C. Penfield, gardener John McCleary, was first. For cosmos Lady Lenox, first prize went to John W. Pepper, for a grand vase of flowers, most of which were 3½ to 4 inches in diameter; the same exhibitor took first for a vase of mixed colors of giant flowering cosmos. Additional prizes for the November show were announced. Six foliage plants, six species, and specimen foliage plants, two prizes in each class; no limit to size of pots or tubs.

A very interesting discussion took place relative to recent tests made with the lime-sulphur spray in summer. It developed that a new era in spraying has arrived by the use of the self-boiled lime-sulphur wash, during the summer months, as a specific for the fungus diseases of the apple, and the brown rot, scab and bark borers of the peach. C. J. Benz, superintendent of the R. G. Wood estate, Conshohocken, Pa., took an active part in this discussion. He has this season marketed over 8,000 baskets of peaches from a ten-acre orchard.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Committee on Nominations of the Massachusetts Horticultural Society has posted at Horticultural hall, its list of nominations for officers for the Society for the ensuing year. The list is as follows: President, Gen. S. M. Weld; vice president, Walter Hunnewell; trustees, Wm. N. Craig, John K. M. L. Farquhar, Arthur F. Estabrook, Nathaniel T. Kidder; nominating committee, Duncan Finlayson, Dr. Charles S. Minot, Harry F. Hall, Herbert W. Rawson, Chas. H. Breck. In accordance with the by-laws two weeks are allowed for further nominations should there be any. The annual meeting of the Society for the election of officers will be held Nov. 13th.

WM. P. RICH, Secy.
Boston, Oct. 16, 1909.

DETROIT FLORIST CLUB.

The last meeting of this club was very animated. The subject of the evening, "What plants should be grown for Easter," stirred up many. The principal fact brought out was that too many Dutch bulbs are grown for Easter, while good pot plants such as ramblers, genistas, calceolarias, etc., are neglected.

On October 30 this club will visit the greenhouses of Elmer D. Smith & Co. at Adrian. November 4th has been chosen by the club for the annual visit to Mt. Clemens.

S. A. F. HEADQUARTERS AT CINCINNATI.

Editor HORTICULTURE:

Dear Sir:—I note in your issue of October 9th, a communication over the signature of Harry A. Bunyard, stating that "he had been wondering whether the failure to secure concessions from the railroads was due to the same influences that were responsible for the switching of the headquarters of the Society at Cincinnati, etc."

I was the "influence" which was responsible for selecting the headquarters, and assume that Mr. Bunyard knew such was the case. However, as many of your readers may not know this to be so, I make this statement so that all may understand.

Very truly yours,
W. N. RUDD.

BOSTON CO-OPERATIVE FLOWER GROWERS' ASSOCIATION.

Saturday evening, 23rd inst., is the date set for the annual meeting of this Association at Young's Hotel, with the customary dinner accompaniment. The latter is in charge of William Nicholson, which is an assurance that it will be a stunner.

The order of business includes hearing and acting upon the reports of officers, election of officers for coming year, to decide whether the corporation will vote to sell any or all of its assets or will vote to liquidate or dissolve, etc. Should the latter course prevail, we presume the outcome will be the forming of a new corporation on a larger scale. The Association has had a most successful career.

CHRYSANthemum SOCIETY OF AMERICA.

Work of Examining Committee: Cincinnati, Oct. 9th, Unaka, pink Japanese, exhibited by Elmer P. Smith & Co., Adrian, 83 points.

At the meeting of the Society in New York, November 10th, papers will be presented by Mr. I. L. Powell, Millbrook, N. Y. David Fraser, Pittsburgh, Pa., and Edwin Jenkins, Lenox, Mass.

CHAS. W. JOHNSON,
Secretary.

AMERICAN CARNATION SOCIETY.

F. Dorner & Sons Co., Lafayette, Ind., register new carnation, Scarlet Glow. Seedling crosses—Color bright scarlet; size, 3 inches. Good free growing; makes well-shaped plants. Transplants easily. Early and free flowering and long stems. Keeping qualities exceptionally good.

A. F. J. BAUR, Secretary.

Some of the self-sufficient newspapers which expect the public to take stock in their views on the Cook-Peary tangle, the crisis in Spain, etc., are giving space and approval to a yarn about "a hustling young man" in Brookfield, Mass., who has "produced a cross between the cucumber and the orange." Now, what do you know about that?

CHICAGO NOTES. The Flower Show.

For the purpose of facilitating business connected with the coming flower show, November 2-8, an office has been opened in the Atlas Block, 51 Wabash avenue, room 416, with office hours from 10 a. m. to 2 p. m. Geo. Asmus is manager of the show and J. H. Burdett, secretary.

The meeting last Friday night for the furtherance of the arrangements for the show was well attended. It was decided to cut out the usual banquet and substitute for it a "stag." A good time is being planned for the entertainment of the ladies, which will be disclosed when completed. Ed. Enders was appointed chairman of this committee.

A committee on the flower booths was appointed, with E. F. Winterson, chairman. J. B. Deamud will head the cafe and restaurant committee.

Business and Personal Items.

H. R. Hughes is again before the people with a Halloween party in prospect. Invitations are out for about one hundred children, who will dance and be entertained in various ways. A new song, composed by Harry Newton and set to music by Felix Adler, will be rendered by an orchestra of ten pieces. The window is newly decorated with an old home scene in honor of the approaching Thanksgiving, in which a farm house with surroundings are the principal features.

J. F. Farrell is building a new conservatory in connection with his new store on State street, near 46th. It will be ready about November 1st.

Percy Jones, who has been on the gain as reported last week, has suffered a relapse and is now considered dangerously ill.

NEWS NOTES.

Nampa, Idaho.—The executive committee of the National Horticultural Congress that is to be held at Council Bluffs, Iowa, November 15 to 20, has chosen Honorable Silas Wilson, of this city, chief judge for the fruit exhibits of that congress.

Brooklyn, N. Y.—Aloysius Gross, who shot and killed John Scott last April and was convicted of manslaughter in the first degree, has been sentenced by Justice Crane in the Supreme Court, Brooklyn, to not more than seven or less than four years' imprisonment in Sing Sing. The sentence is regarded in the florist trade as a very light one.

Northampton, Mass.—The number of gardens in competition for the Carnegie prizes, this year, was over 850. The tenth anniversary of the competition was observed fittingly in Carnegie Hall, on Oct. 14. The announcement of awards was made by George W. Cable, president of the People's Institute, and stereopticon views of the prize winning gardens were shown.

STEAM BOILER LAWS IN MASSACHUSETTS.

It is apparent from the course of events this fall that the security felt by the horticultural greenhouse men after the new statutes regarding boiler inspection and firemen's licenses had been passed, was premature and that they were mistaken in assuming that they were beneficiaries together with the agricultural people in the exemption granted to the latter.

As it now transpires, every florist and market gardener using steam heating apparatus is required to employ a licensed fireman, which under existing labor laws means practically three men who have passed examination as firemen, for each day, in shifts of eight hours each.

A meeting of protest was called by the market gardener interests last Saturday,

which was attended largely by vegetable forceis and florists. It was decided to hire counsel and appeal to the courts to ascertain whether florists and others growing crops under glass come or do not come legally under the general heading of agriculture. Messrs. Rawson, Moore and Johnson for the vegetable forceis and Montgomery and Elliott for the florists were constituted a committee of five to carry out the wishes of the meeting and report at a later date.

Since the above was put in type we have received the announcement of Welch Bros. concerning the Ashton valve, which appears on another page. The steam heat fraternity are to be congratulated on this opportunity to escape at a small cost so embarrassing a predicament.

Nails rusted off — roof bars rotted out.

This Will Never Happen to Your House If We Build It

It's just the natural result of wooden eaves, nailed-on roof bars and wooden posts. There's no wooden frame house that will stand a fraction the time that the Hitchings Iron Rafter house will — not to mention the difference in the amount of light that actually reaches the plants. The light, flat iron rafters and small roof bars make our house practically as light as day. Don't be fooled into buying an out of date house for a little less money — it will cost more in the end.

Hitchings & Company

Designing & Sales Offices General Offices & Factory
1170 Broadway, N. Y. Elizabeth, N. J.

You Can't Beat Our Curvilinear House For Ornamentalsness

There is a natural architectural beauty about the curve of its roof lines, while the Sectional Iron Frame Construction gives it a lightness and endurance that it is out of the question to find in any other curvilinear house, made any other way. Give us the chance to tell you just why.

LORD AND BURNHAM COMPANY

THE GREENHOUSE SENSIBLE

Just plain every day common sense applied to glass, wood and steel in such a way as to make the best greenhouse built.

But even as common sense is the most uncommon kind, so is a thoroughly sensible, every way practical greenhouse construction hard to find. Each one is strong in some few points, but what you want is one strong in all the strong points. Then the U-Bar is the house you are looking for.

Just why, we haven't room to tell here, but our catalog has. So send for the catalog.

Notes from the Arnold Arboretum

Some very handsome and interesting novelties are found among the Chinese Brambles of which more than a dozen have been introduced during recent years. Some of them differ in foliage and general appearance so much from our native species that at first sight one would hardly believe that they belong to the same genus. Those with long trailing shoots are well adapted for covering rocky slopes or sandy banks, also for planting on walls, trellises, pillars and the like; they keep their foliage unchanged until late in fall unaffected by early frosts and some are even half evergreen. Their leaves vary greatly in shape; in some species they are undivided or only slightly lobed, in some palmately lobed or palmately divided and in some pinnate.

One of the handsomest is *Rubus bambusarum* with trailing shoots from ten to twelve feet long, furnished with scattered small spines and covered while young with a white floccose tomentum. The leaves are trifoliate with narrow lance-shaped serrate leaflets from three to four inches long, glabrous and dark green on the upper surface and covered beneath with a white or later dun-colored tomentum. The flowers appear in terminal racemes from two to three inches long and are followed by black edible fruits.

Similar to the preceding species is *Rubus Henryi*, but the leaves are only lobed, not divided into leaflets, usually with five ovate serrate lobes or sometimes with three narrower lobes, covered on the under surface with a dun-colored tomentum. The flowers appear in short terminal racemes.

Another handsome species is *Rubus flagelliflorus* with long prostrate shoots from six to eight feet long and rooting at the tips, glabrous and furnished with a few spines. The half evergreen leaves are ovate to ovate-oblong, cordate at the base, unequally serrate and from four to five inches in length; the upper surface of the leaves has a metallic appearance and in shade they are sometimes beautifully marbled as in certain forms of Rex Begonia, the under surface is covered with a cream or dun-colored tomentum. The white flowers appear in small axillary clusters near the tips of the shoots. This species like the two preceding ones are valued for their ornamental foliage.

Chiefly for its ornamental fruit *Rubus innominatus* is to be recommended, resembling in habit and foliage the Raspberry. It is a strong growing shrub from six to eight feet high, the stems covered with a short velvety pubescence and furnished with a few scattered spines. The leaves are trifoliate with broadly ovate leaflets up to four inches in length, bright green and glabrous on the upper surface and white tomentose beneath. The showy drooping panicles of bright orange-scarlet fruits are from four to eight inches long or sometimes even longer and appear in September; they are edible and resemble in flavor those of the Blackberry.

Very distinct in foliage is *Rubus ichangensis* with long and slender shoots furnished with a few prickles.

The glabrous slender-stalked leaves are oblong-ovate, deeply cordate at the base, acuminate, with rather few large angular teeth and from three to five inches long. The small flowers appear in slender terminal and axillary panicles and are followed by small red fruits. Similar in the shape of the foliage is *Rubus Parkeri*, but the leaves are short-stalked and like the stems densely pubescent. The panicles are larger and looser and very glandular. Likewise similar to *R. ichangensis* is *Rubus Lambertianus*, but the leaves are broader, more deeply lobed and at the same time serrate and the panicles are larger and looser.

A very distinct species is *Rubus irenaeus* with long-stalked roundish, slightly lobed and serrate leaves from four to six inches in diameter, dark green on the upper surface, dun-colored with darker veins beneath. The flowers appear in axillary and terminal umbel-like clusters.

There are still other noteworthy species, as *Rubus chroosepalus* with leaves resembling those of *Tilia alba*; *R. conduplicatus* similar to *R. Henryi*; *Rubus coreanus* and *R. hypargyrus* with pinnate leaves white beneath; *Rubus Wilsoni* and *R. leucocarpus* also with pinnate leaves and other species not yet determined.

Alfred Rehder.

Oncidium varicosum Rogersii

(See Cover Illustration.)

This very useful as well as beautiful orchid is at its best now and its lovely sprays of pure yellow flowers have made the house in which they are growing here look bright and cheerful for the past three or four weeks and they will stay in good condition for another few weeks.

For general usefulness there are few orchids which can beat this lovely oncidium. It is of comparatively easy cultivation, once its requirements are understood.

Here they grow splendid in the coolest and at the same time lightest house of the establishment. Plenty of fresh air and light at all times are the main essentials to look out for. In winter they are kept at from 45 to 50 degrees at night with an increase of a few degrees during the day. Very little water is given throughout the winter, a syringing on bright days being sufficient until towards spring when the new growths are fairly well rooted; from that time on the amount of water is gradually increased until the plants are in full growth, when they are soaked once or twice a day, with an additional dip in weak manure water once or twice a week until the flowers begin to open; then water is gradually withheld until by the time the flowers have faded or have been cut, the plants are again ready for their long dry winter's rest. Here the plants are grown suspended from the roof near the ventilator, which assures an abundant supply of fresh air and light.

Proficiency
 set at naught

That the question of the arrangement of the elms on Commonwealth avenue, Boston, is still very much alive is evident from a lengthy communication

illustrated with views and diagrams, from the pen of Prof. C. S. Sargent, which has recently appeared in a leading daily newspaper. The incomprehensible action taken by the park commission in adopting a plan of

planting at variance with that originally recommended as best, after careful consideration by two such masters of the subject as Prof. Sargent and the late F. L. Olmsted and in opposition to the expressed views of far-seeing experts generally, goes to substantiate the opinion often expressed that on all park boards there should always be at least one man whose training has given him expert knowledge of sylvan and horticultural matters from a practical standpoint. The property abutters on any avenue are, for obvious reasons, among the worst advisers in any question of tree planting or tree removal and their short-sighted clamor has often stood in the way of wise procedure. Subservience to such influences in the case of such a thoroughfare as Commonwealth avenue seems too bad especially as there is no doubt that had the planting been wisely done originally their opposition to any change at the present time would have been equally vehement.

The trend
 of wholesale flower
 marketing

The production of flowers is an expense. The selling is another and distinct expense, equally unavoidable. It has always been a cherished hallucination with the

average grower for the wholesale trade that he could save money by doing his own selling. Usually a short experience serves to disillusionize him. It may be recorded as a broad truth that no man who is a successful grower can afford to devote his time, all of which is needed at the growing end, to the business of marketing; that under existing conditions and competition no man can expect to dispose of to advantage in a couple of morning hours at a market, the product of a place of any consequence but will often find himself up against the necessity of letting his goods go at sacrifice price or adopting the alternative of making some arrangement whereby they can be held in stock ready for transient demand throughout the day. The latter course tends irresistibly to a commission plan and either course means unavoidable expense, and, in addition carries with it almost invariably the ultimatum of giving credit and sometimes taking long chances as to collection. These phases of the business were discussed at length at the annual meeting of the Boston Co-operative Flower Growers' Association and the above were the conclusions reached by most of the speakers.

To interest
 the retail florist

President Valentine has called a meeting of the retail florists of the United States and Canada at Chicago on November 5, as noted in our S. A. F. news in this issue. The call seems somewhat obscure as to what is proposed but we presume that the project specifically referred to is to devise some feasible plan for the interchange by telegram of orders for local delivery of flowers. This class of business has been steadily increasing for a number of years ever since the more progressive retail florists in various centres began to advertise in the trade papers their facilities for carrying it on and no doubt there may be evolved a good magnet for drawing support for the S. A. F. from this section of the business if some method can be devised in which the national society will figure as an advantageous intermediary. Of course the great majority of florists everywhere are retailers. The class particularly referred to, however, in the oft-repeated complaint concerning their disregard of the S. A. F., comprises those who are engaged in store business in the larger cities,

who do little or nothing in the way of production but purchase their stock in the wholesale markets from day to day. These men have in many cases been hard to reach, yet their support of the S. A. F. is most desirable for in their ranks are found many representatives of high standing and ability as business men whose fealty would bring no little strength to any organization. President Valentine is taking a commendable step in endeavoring to bring them together with some common purpose and we trust the effort will be successful. Undoubtedly there will come to the surface at the proposed meeting other ways in which the national society can be of value to this class individually. We hope so, for it is on this ground rather than on the plea of broad general advantage that active support must be sought.

British Horticulture

CHRYSANTHEMUM CONFERENCE

The National Chrysanthemum Society, departing from the programme followed in previous years, instead of having a show of early varieties the first week in October at the Crystal Palace, held a conference in London, and this was attended by many of the leading growers and amateur exhibitors. "Chrysanthemums as Annuals" formed the subject of a paper read by Mr. C. H. Curtis, assistant editor of the "Gardener's Magazine," who spoke of the value of the flower in decorating the conservatory at a time of the year when variety in form and color is of value. Mr. W. Wells, a successful specialist, eulogised the value of early single chrysanthemums, many new varieties of which have been introduced by his firm. Another commercial grower, Mr. P. A. Cragg, dealt with "Late market chrysanthemums," and Mr. D. B. Crane spoke on the best varieties for cut flowers. There was a small but interesting collection of blooms on show. Awards were made to the following: White Gem, a large reflexed Japanese, shown by M. Silsbury; Empress, canary yellow, incurved Japanese, and Tom Edwards, rich yellow, incurved Japanese, shown by Norman Davis; Medals were won by Norman Davis, M. Wells and Co., J. B. Riding, W. J. Godfrey, J. H. Witty and T. Brazier. The Society are arranging to hold a big show at the Crystal Palace, early in November, and the annual dinner follows at a subsequent date.

NEW ROSES

At the autumn show of the National Rose Society some meritorious seedlings attracted considerable attention. Messrs. S. McGredy and Sons, of Portadown, Ireland, who have introduced a number of sterling novelties in recent years, gained a gold medal for Mrs. Edward J. Holland, of a rich pink tint and slightly reflexed petals, and cards of commendation for Mrs. Wakefield Christie Miller, a H. T. of silvery pink and cerise, and Mrs. Arthur E. Coxhead, of a magenta shade. Two other Irish firms also distinguished themselves in this department. Mr. Hugh Dickson, of Belfast, a well known exhibitor at these shows, was awarded a gold medal for Miss Cynthia Forde, a shapely H. T.

of a pleasing pink and silver shade. Messrs. Alexander Dickson and Sons, of Newtonards, received a card of commendation for Mrs. Frank Bray, a rich orange yellow, H. T. Claudius is the name of a very fine H. T. of a rich cherry red color, shown by Messrs. B. Cant & Sons, who received a gold medal. Messrs. H. Merryweather & Sons showed a useful addition to the polyantha section, Jessie, of a nice crimson shade for which a card of commendation was granted. The following were adjudicated the best blooms in the show in the trade section; H. P., Mrs. John Laing; H. T., Earl of Warwick; Tea, Souv. de Pierre Notting. In the amateur section the same varieties took the awards, with the exception that Maman Cochet was the best Tea.

A COLOR STANDARD

There has long been wanted some proper standard of colors, in order that uniformity should prevail in the descriptions of flowers. One has only to compare the various trade catalogues to realize the widespread variation in the details of the colors published respecting the same flowers. The Royal Horticultural Society has lately taken up this matter with the view to forming an international code which would convey the exact meaning when any particular tint was mentioned. The Rev. W. Wilks, Secretary of the Society, recently announced that the Society has obtained a color chart "containing 360 colors between white and black, with the names of each in French, German, English, Spanish, and Italian, together with four shades of each of the 360 colors, so that anyone wishing to describe to a friend at Calcutta the exact color and shade of a flower or a silk or painting need only refer to the color chart number, quoting if for apricot, e. g., page 53, shade 3; or if for rosy pink, page 118, shade 4, and so on. My excuse for asking you to make this widely known is the manifest utility which would accrue to everyone all the world over if this chart were adopted universally as a standard of color nomenclature, not only (as it will be) for flowers but also for all trade and commercial purposes which relate in any way to color. How very vague, for example, are most people's ideas of the distinction between purple, crimson, and mauve, and how often is the word carmine used as an easy method for solving the difficulty without conveying any definite notion as to what color exactly is meant."

JOTTINGS

The second Masters' Memorial picture has been given before the members of the Royal Horticultural Society, the subject being "The production of horticultural varieties."—A proposal has been made to raise a fund to provide some fitting memorial to the late Peter Barr, the "Daffodil King."—A pamphlet has been issued by the Board of Agriculture with the object of giving encouragement to the bulb-growing industry in this country. Figures are given suggesting that the gross returns per acre should be something like £40 after the first year, and a good deal more after the second.

London.

W. H. Adsett.

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

Our second business meeting in October was held on the 22d instant, at the County Building, Hartford, with President Huss in the chair. Much routine business was transacted, including the admission of two new members, Thomas Muellin, of Berlin, and Miss Bertha P. Dennis. James M. Adams read an interesting newspaper article on the scientific culture of the dahlia.

The admission of a new lady member makes pertinent the expression of the earnest desire of the society that there shall be more participation of ladies in its beneficent work, and also more personal attendance at its business meetings, at which a question box is always open for their inquiries, and experts in almost all lines of horticulture are ready and glad to impart information. It is the belief of many of our members, that such affiliation and interest on the part of ladies interested in the uplifting and aesthetic art of horticulture, would widen the usefulness and influence of the society in this state.

Plans are about perfected for our annual chrysanthemum exhibition at Putnam Phalanx hall, Hartford, Nov. 3 and 4. The decoration of the hall will be in charge of A. Calverly, C. O. Purinton and W. W. Hunt. As an advertisement, and partly as a philanthropic measure, fifteen hundred tickets for children's admission will be presented, gratis, to the superintendent of schools of Hartford, Thomas S. Weaver, for distribution, in his discretion, among the school children of the city. It is expected that much interest in the exhibition will thus be elicited from the families of the children. Arthur T. Boddington's gratuity of \$25 for the best collection of vegetables is likely to bring out a splendid array in this very important branch of horticulture, which Mr. Boddington correctly believes has not hitherto received the attention it deserves in horticultural fairs. The rules of the Lenox Horticultural Society will govern in this special award.

At our last meeting, in keeping with the frequent practice of the members to voluntarily exhibit some special articles or plants, W. H. Shumway, of Berlin, showed three monstrous fruits of the lemon, each over twelve inches in circumference, grown in his greenhouse in an 18-inch pot. They are thin-skinned, and of very best flavor, he states. Nothing like them in size has ever been seen here before. They were afterwards placed in a newspaper window in Hartford, and have attracted much attention.

Peter Zuger, who has held the position of head gardener at Elizabeth Park, Hartford, for eight years, and who is one of our most indefatigable workers when there is business to be done, has lately resigned his position, and will remove to South Manchester to enter the arena of commercial floriculture. He carries with him the best wishes of our society; and, fortunately for us, he will be so near to Hartford

that we look for his continued assistance in the future operations of the organization. He will remove to his new field on the 1st of November.

Our recent dahlia show fell on two rainy days; and a deficit of about \$50 is likely to occur, when we come to strike the final balance; but we are fortunate in the fact that the new state law, now in operation, makes \$200 of the funds of the Commonwealth available to us for the payment of premiums.

The weather this autumn has been very favorable to the growth of all flowers, vegetables, and fruits. Chrysanthemums are in their glory. No killing frost has yet occurred hereabouts, on uplands. Farmers are still enjoying succotash; and the writer has the unprecedented pleasure, this morning, Oct. 25, of eating luscious Goethe grapes right from the vine.

GEORGE W. SMITH, Sec.

Melrose, Conn.

NATIONAL CHRYSANTHEMUM SOCIETY OF GREAT BRITAIN.

On October 6th the above society held a conference and exhibition at the Essex Hall, Strand. In the absence of the president, the chair was taken by Mr. Thos. Bevan.

The first paper was read by Mr. C. H. Curtis on "Chrysanthemums as Annuals," in the course of which the author advised amateurs to raise their plants for garden decoration annually from seed. It was true that they would mostly be singles, but sown early in the year they would bloom the same autumn and provide a mass of flowers without the trouble of saving stock from which to take cuttings.

Mr. William Wells gave a paper on the "Origin, History and Culture of the Early Flowering Singles." Late market chrysanthemums were dealt with in two papers—one on the commercial side and the other on the aesthetic.

In conjunction with the conference there was an interesting display of earlies. W. Wells & Co. staged early Japanese and early singles in good form and in large numbers. W. J. Godfrey had a fine collection of very large show blooms, shown singly in tall vases. J. B. Riding put up a neat collection of Cactus and Decorative dahlias, Michaelmas daisies and early chrysanthemums. A nice exhibit also came from Frank Brazier in which Michaelmas daisies were daintily intermingled with chrysanthemums of excellent quality. Mrs. Norman Davis and Gladys Blackburn were immense blooms. Tom Edwards, a new yellow Jap. and Empress, a fine incurving Jap., both had first-class certificates. Then there were seedlings at present unnamed. Aster amellus Onward was a most effective variety.

Other exhibitors were J. H. Witby, C. Payne, Mileham and Martin Silsbury, whose new large creamy white seedling Japanese was awarded a first-class certificate.

The conference was attended by a large number of well-known enthusiasts.

NATIONAL DAHLIA SOCIETY OF GREAT BRITAIN.

If the first show of this society for the season was interesting, the second, which took place in the Royal Botanic Gardens on the 21st of September was far and away in advance. The flowers generally were of a higher average quality and the variety was enormous, every section from the old Show type to the more modern Peony-flowered being well represented.

Trade exhibits were conspicuous by their importance and high standard of excellence in setting up. A gold medal was awarded to J. T. West, who on a table 36 ft. long, staged Cactus and Pompons in fine form. Dobbies also had a gold medal for another big display most handsomely arranged. The Peony-flowered varieties seemed to include every known variety. The Singles, the Collarettes, the Pompons, the Cactus, the Pompon Cactus, the Show and other Decoratives were immense in number and impossible to enumerate.

T. S. Ware & Co. had a run of 50 ft. long. Decoratives, Peony-flowered and Cactus predominated. The front was set off with a row of *Isolepis gracilis* in pots and at intervals in the group were huge vases containing pale blue delphiniums.

Another grand group 50 ft. long was staged by Hobbies, Limited. These flowers were mostly of the Peony and Cactus sections, set up in very tall supports with plenty of autumn greenery by way of relief. They, too, had a gold medal.

In the competitive class the leading exhibitors were J. Cheal & Sons, J. Burrell & Sons, Keyes, Williams & Co., S. Mortimer, Sealer, John Walker, J. Stredwick & Sons, Chas. Turner, etc.

Artistic displays and floral decorations in which the dahlia was the leading feature found expression in many prettily arranged vases, baskets, wreaths and epergnes. Any attempt at enumerating the various leading varieties in the different sections would be an invidious task, but certainly the old Show varieties, the Pompons and the Singles were in splendid form. The more modern race of Peony-flowered appear to be largely increasing but in many of the more recent kinds the flowers appear to be ragged, wishy-washy things, only fit to ornament distant odd corners of the garden.

CHICAGO FLORISTS' CLUB.

The weekly meeting of the Chicago Florists' Club for the furtherance of the Flower Show was held at the Union restaurant. Reports showed everything well under way. The effect as a whole is to be that of a Japanese Garden. An acre of sod will be used. A committee was appointed to look after the welfare of the ladies at the flower show and especially the night of the theatre party.

The following names were proposed for membership: A. Miller, August Bergland, Albert Erickson, D. A. Robertson, John Schottzman, Harry Frank.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Appointments.

President Valentine has made the following appointments:

As representatives of the S. A. F. & O. H. to the National Council of Horticulture: J. Otto Thilow, Philadelphia, Pa.; Elmer D. Smith, Adrian, Mich.

Committee on Badge for Life Members: W. J. Vesey, Fort Wayne, Ind.

Conference Committee with the American Seed Trade Association: Wm. F. Kasting, Buffalo, N. Y. (The other members of this committee are ex-officio J. A. Valentine and F. H. Traendly. After January 1st the additional members will be F. R. Piereson and J. A. Valentine.)

Committee on State Appropriations for Experiment Stations: W. N. Rudd, Morgan Park, Ill.

Retail Dealers' Delivery Association.

By order of President Valentine a meeting of the retail florists of the United States and Canada is called for Friday, November 5th, next, at 2 p. m., at the Chicago Flower Show in the Coliseum Building.

Letters received by President Valentine from retail florists in various parts of the country indicate that there is a general desire for an association of this kind properly organized, and this meeting is called hoping that a large number of retail florists will get together, discuss the matter in all its bearings, and complete a preliminary organization which shall go forward and work out the details in such a way as to put this much needed project on a safe and effective basis.

In order to expedite matters and save delay at the meeting it is desired:

First: That all retailers interested who will be unable to be present, will write the undersigned expressing their views fully, such letters to be turned over to the meeting.

Second: All retailers interested are urgently requested to enclose with the above letters copies or forms for such telegrams as they customarily send or receive in such cases, with a view to preparing a suitable cipher code for telegrams.

Third: A special statement to be sent of the difficulties experienced at the present time in transacting such business by each individual, so that the new organization may have full information to work from and be able to make the new system at once safe, sure and speedy.

W. N. RUDD, Secretary.

Oct. 23, 1909.

Those Convention Railroad Rates.

The Editor of HORTICULTURE having seen fit to criticize, by implication, the writer for failure to obtain reduced rates to the Cincinnati convention, and that other bright star in the Eastern heavens, Mr. Bunyard, having seen fit to add his mite, it seems advisable that the facts should be given.

Application was made to the Central Passenger Association in Chicago, which has jurisdiction over the central portion of the United States, for reduced rates. This application was refused, except that rates were offered conditioned on an attendance of one

thousand, which is more than double the registered attendance for some years back. The matter was taken up again with unfavorable results, and it came before the association a third time, at which time the writer is advised that every road represented, with one exception, voted against our proposition. Practically the same experience was had at the Niagara Falls convention.

In view of the fact that the Central Passenger Association had repeatedly refused concessions to larger and more influential societies than our own, it seemed useless to go further in the matter. Perhaps Mr. Stewart or Mr. Bunyard could have done better—but the writer could not.

The following letter, in answer to a query of the writer, sets forth the conditions existing:

CENTRAL PASSENGER ASSOCIATION.

Tribune Building, Chicago.

October 9, 1909.

W. N. Rudd, Secretary,
Society of American Florists,
Morgan Park, Ill.

Dear Sir:

In response to the inquiry of your favor of 18th inst., I beg to advise that the lines of the Central Passenger Association participated in the excursion fares announced and tendered connections by the roads of the Southeastern Passenger Association for the occasion of the last annual meeting of the National Nut Growers' Association at Albany, Ga., the rate being one and three-fifths regular fares on the certificate plan, contingent on an attendance of one-hundred or more people. As you have been advised, this basis of a fare and three-fifths, requiring an attendance of not less than one-hundred persons, is not used in Central Passenger Association territory. Formerly, when passenger fares were three cents per mile, concessions were made to conventions of one and one-third normal fares contingent upon an attendance of one-hundred or more delegates. This practice, however, was perforce discontinued following enactment of the maximum passenger fare laws by the states in which these interests operate. Without using the basis locally, they have, however, conceded participation in such fares in the territories of other Associations, when tendering one and three-fifths regular fares on an attendance of one-hundred or more, as in the instance of the Nut Growers' meeting at Albany, Ga. As you have been informed, Central Passenger Association roads have, by reason of the conditions referred to, limited extension of convention fares to one and one-half published rates, contingent upon an attendance of one-thousand people. Yours truly,

(Signed) F. C. DONALD,
Commissioner.

Rochester, the next meeting place, is, I believe, under the jurisdiction of another traffic association and it may be possible to obtain rates. If such rates are granted by the Eastern Association, it would seem, in view of the above letter, that the Central Association would have to join in, in order to be consistent, although consistency does not always seem to be a strong attribute of those engaged in making passenger rates.

Information just received is that the total number of names registered in the book kept by the Cincinnati Florists' Club of those visiting Cincinnati at convention time was 1056, and this register did not contain the names of any local florists and did not contain the names of a good many of the members of the S. A. F. The total registry in the S. A. F. book was 258, and the total number of votes cast at election was 295.

From this it would appear that the question of railroad rates did not keep visitors away, but on the other hand that there was a large attendance. The whole proposition, then is, appar-

ently, that there was as large or a larger attendance at Cincinnati than at any other convention of recent years, but that only a small proportion of those attending joined the society. There were 1326 attending the entertainment at Coney Island, of which probably not to exceed 20 per cent were members of the S. A. F.

W. N. RUDD.

BOSTON CO-OPERATIVE FLOWER GROWERS' ASSOCIATION.

The annual meeting and dinner of this association was held at Young's Hotel, Boston, on Saturday evening, October 23. About forty gentlemen sat down to the excellent banquet, which was presided over by President Stickel with the grace and dignity born of seventeen years' consecutive occupancy of the chair and which was thoroughly enjoyed by those who participated, including the representatives of the trade papers who were invited guests as usual.

After the menu had been frazzled, the business meeting of the corporation was in order. The treasurer's report showed a surplus of about \$7,500 over the par value of the stock. The election of officers resulted in the re-election of all the old incumbents, S. J. Goddard being selected to fill the vacancy in the board of directors caused by the death of E. Sutermeister. An eloquent resolution of respect and condolence on the death of their fellow-member and director for many years, E. Sutermeister, was read by President Stickel and unanimously adopted by a rising vote.

The principal business of the meeting was then taken up, viz., to see if the corporation would vote to sell any or all of its assets and to see if the corporation would vote to liquidate or dissolve. This was debated at length from all standpoints and both propositions were finally adopted by a unanimous vote. The outcome of the move will be the incorporation of an organization with larger functions and capitalized at \$20,000 and it is understood that the stockholders in the old company will re-invest in the new company to the extent of the value of their shares in the old, or more.

The question of the scope of a flower market of this character brought out some interesting views, pro and con, as to the advisability of maintaining the salesroom exclusively for the use of bona fide local growers to dispose of their respective products in the morning or opening its facilities for the use of salesmen, brokers and commission dealers and keeping it in operation as a regular wholesale salesroom all day, with storage accommodations, etc., under the supervision of a manager. It seemed to be the consensus of opinion that the latter course is the only logical one under modern conditions, and that since competition from commission dealers with supplies from other states, etc., is inevitable, it might as well be met within the market walls as outside. In other words "not a theory but a condition" is to be met.

On the table was a vase of fine blooms of carnation Shasta from Patten & Co., which received many appreciative compliments for its very evident fine points as a good commercial white.

HORTICULTURAL SOCIETY OF NEW YORK.

A meeting of the Horticultural Society of New York was held at the American Museum of Natural History, on Wednesday, Oct. 13th. Fourteen new members were elected, including one life member. The election was also announced of Mr. T. A. Havemeyer as a vice-president. An interested audience listened to the lecture announced for the day, "Coniferous Evergreens; Their Use in the Landscape" by Mr. George V. Nash. The speaker illustrated his remarks with numerous lantern slides, some of them colored.

In a previous issue of this paper attention was called to the exhibition of this society to be held at the American Museum of Natural History on Nov. 3rd to 7th, inclusive. The exhibition will open on the evening of the 3rd at 7 o'clock, and this evening will be devoted especially to the reception of the members of the society, the Museum and affiliated organizations. On Thursday, Friday and Saturday the hours will be from 9 a. m. to 10 p. m., with the exception of the hours between 5 and 7, when the Museum will be closed to the public. On Sunday the exhibition will be open from 1 to 5 p. m. It is to be noted also that this exhibition is entirely free, no charge being made for admission.

It is hoped that all will appreciate the advantages offered and that all who can will enter the competition. All are welcome as exhibitors, whether members of the society or not, and an invitation is extended to societies and individuals to participate. The secretary will be pleased to send a schedule to anyone on application. Address communications to George V. Nash, Secretary, Horticultural Society of New York, New York Botanical Garden, Bronx Park, N. Y. City. The management makes an especial request that entries be made early, so that space may be properly allotted, thus insuring a prompt placing of exhibits immediately on arrival.

Those who have visited the American Museum of Natural History are acquainted with the beauties of its interior and the excellent facilities offered by its spacious halls for exhibition purposes. To those who are not familiar with this building a word of explanation may be welcome.

The main entrance is on the ground floor, on 77th street. A large foyer succeeds the entrance corridor. This foyer is oval in shape and is illuminated by numerous incandescent lights, and would make an ideal place in which to exhibit large specimen palms and other plants, and perhaps some of the larger specimens of chrysanthemums. All entering the Museum pass through this foyer. Opening from this are three radiating halls, well lighted by ample windows, and well supplied with electric lights. Cases, placed transversely on either side of the broad central aisle, divide these halls into small compartments in which may be placed individual exhibits or displays of a special nature. These cases are of elegant construction and will furnish a rich background to the exhibits. The halls are well ventilated, the temperature not too high, and the

floors of stone; factors which go a long way in preserving in good condition the flowers exhibited. The excellent appearance of the flowers at the end of the exhibition held here last fall was remarked by all. There is ample space available, so that none need feel cramped for room, and all are invited to make their exhibits as complete as possible. If all interested in horticulture, both professional and amateur, will do their best, if each will take a personal interest in the matter, the exhibition will prove one of the largest and best ever given in this vicinity, and will do much toward awakening an active interest in horticulture, an interest which cannot but be of benefit to all.

A few changes have been made in the schedule as first issued. A special prize for a collection of vegetables has been received from Mr. Arthur T. Bodding, \$15 for first, \$10 for second. It has been decided to slightly change the requirements as to length of stems for cut chrysanthemums, the requirement now being that they shall be not less than thirty inches long instead of three feet.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular monthly meeting of the New Orleans Horticultural Society was held at Kolb's Hotel on the evening of 21st inst, President Alost in the chair. There was a good attendance of members. After the routine business was disposed of the question of buying or building a club house on the lake shore was again brought up. The members present were strongly in favor of the proposition and a committee of six was appointed to investigate and report to the next meeting. It was agreed to renew the competition for plants, etc., each monthly meeting. Mr. Papworth invited the members to inspect his greenhouses at Metairie Ridge on Sunday the 24th. Abele Bros. had specimens of Robinson and Moravia chrysanthemums on exhibition, very fine flowers. R. Eichling, grower for U. J. Virgin, had a beautifully finished plant of Phoenix Roebeleni. He mentioned that it was planted in the open ground less than two years ago from a 2 1-2 in. pot.

NATIONAL NUT GROWERS' ASSO- CIATION.

The eighth annual convention of the National Nut Growers' Association, just held at Albany, Georgia, was one of the largest and most successful in the history of the organization. The membership roll was increased fully thirty per cent, and the financial condition permits the publication of the proceedings without delay.

Many pertinent papers were read and the discussions proved interesting and instructive.

Reports and data gathered, show a rapid increase in the planting of commercial orchards, and much public interest in the industry.

One entire day was devoted to visiting the large orchards and nurseries in the vicinity of Albany; a special train having been furnished for the occasion.

Reports from most of the pecan sections promise a fair crop this season, while the demand for nuts, especially the fine varieties, is far beyond the present supply.

The convention goes to Monticello next year.

Officers elected are as follows: President, J. B. Wight, Cairo, Ga.; first vice-president, J. B. Curtis, Orange Heights, Fla.; second vice-president, H. C. White, DeWitt, Ga.; secretary, J. F. Wilson, Foulon, Ga.; treasurer, M. B. McNeely, Little Rock, Ark.

ST. LOUIS HORTICULTURAL SO- CIETY.

Since the issuing of our final premium list, the Hess & Culbertson Jewelry Company of St. Louis are offering a beautiful silver cup for the "Best 100 American Beauties," same to be staged the first day of the exhibition, November the 9th. We should like to see some one of your readers win this elegant prize.

L'ASSOCIATION FRANCAISE DES AMATEURS ET JARDINIERS CHRYSANTEMISTES.

This Society in a way a rival of the older French Chrysanthemum Society at Lyons, is fast making headway. At the time of writing although it has only been in existence two years, it has a membership roll of 692. Its journal, "La revue Chrysanthemiste," appears regularly every month. The membership dues are 3 francs per annum. The annual meeting and conference takes place in Paris on the 6th November next.

C. H. P.

AMERICAN CARNATION SOCIETY.

Notice is given of the following registration:

Admiration—Result from seedling crossed with Enchantress. Color, light pink, lighter than Winona. Size, 3 to 3 1-2 inches. Habit ideal with no surplus grass, every shoot going right up to flower. Stem is as long as Enchantress, and holds the flower up at all times of the year. Easy to handle, either from field or planted inside. Originated by Chas. Knopf Floral Co., Richmond, Ind.

A. F. J. BAUR, Secretary.

NATIONAL SWEET PEA SOCIETY OF AMERICA.

There will be a meeting of the National Sweet Pea Society of America in the Museum of Natural History, New York City, November 3rd, at 7 p. m., to discuss the future of the society and other important business. All who are interested are invited to attend.

Seed Trade

Wholesale Seedsmen's League.

The Wholesale Seedsmen's League held their first meeting of the season at the rooms of the Hardware Club in New York City on the 29th inst. While no definite information has been given out, it is generally understood that there was a sharp marking up of prices on practically all varieties of peas, the advances ranging in some instances up to \$1.50 per bushel over last year's figures. The bean prices were not greatly changed and the same may be said of the general line of small seeds, such changes as were made showing a slight reduction from last year's prices. It is learned that certain varieties of cabbage seed of which the foreign-grown varieties are generally used, have been marked up; among these being the Danish Ball Head and the Winningstadt. There has been some advance in the prices of radish seed, particularly the French-grown stock. But, as stated, exact figures are not obtainable at this time and probably will not be until the prices agreed on at the meeting have been printed and issued to members of the league. These prices as a whole, bear out fully the estimates which have been given in HORTICULTURE from time to time as to general crop conditions and prove the value of HORTICULTURE'S crop news. Several prominent seedsmen have remarked on this fact and many are realizing the value of the crop forecasts given in these columns.

"Farmers' Alaskas."

Certain unscrupulous persons are already peddling the so-called "Farmers' Alaskas," grown by Wisconsin farmers, and in years of plentiful crops sold at the price of Scotch Blues, and often as Scotch Blues, but in seasons of scarcity like this they are trotted out and made to do duty as Alaskas. They may have been Alaskas once, but that type is lost now, and they will grow a vine six to seven feet in length, heavy as a Telephone vine, setting two to three sets of pods maturing over a period of three to four weeks. As these peas are grown in close proximity to Scotch Blues, and little effort is made to keep the two distinct, it can easily be surmised that they become mixed, and are gradually losing their separate identity. Cannons are the chief victims of the unprincipled dealers as they will snap at the bait of low price, and in the end their loss is many times the difference in the price of the seed. Such persons have been stung repeatedly, but are as often caught with the same bait. Of course they deserve no sympathy, but it is a pity the innocent victims, of which there are a few, do not seek redress in the courts. It is confidently contended that the disclaimer would not protect the sellers. It ought to be tried out, and if a dealer selling such junk were mulcted in heavy damages he would have to bear his troubles alone and could claim no sympathy. As a protection, canners and seedsmen should insist on knowing the pedigree of any pea seed offered and have it

put in writing. If this were done, little of such trash would be sold. It is an open question whether it should be classified as Alaska or sold under that name.

Vine Seeds Short.

Water melon seed is a scarce article in the west, but fairly plentiful in the south, and our western friends are supplying their deficiencies from that section, which nearly evens up matters. It might here be mentioned that nearly all vine seeds are short in supply, and particularly musk melons. Squashes are on the short side of course, but with reference to most vine seeds, the real situation is not yet known. The same may be said of beans and corn—at least as far as the general trade is concerned.

Among the very short items may be mentioned pumpkin seed. It looks as if Connecticut Field would be worth 20c. per lb. the coming season, while the more fancy varieties will double in price. This scarcity of pumpkins will be a hard blow to the lovers of that delicious desert, but think of the woe in the "pie belt!" Pie is nearly the "staff of life" in the pie belt, and what with the high price of beans, the denizens of the "belt" discovered by Kipling are bound to have their troubles. There may be wars and rumors of wars, and stocks may rise and stocks may fall, but what are such trifles compared with a scarcity of beans and pie? Well may the trembling Bostonian exclaim, paraphrasing the immortal words of Patrick Henry: "Give me beans and pie, or give me death!"

Notes.

The Gurney Seed Company of Yankton, So. Dak., are erecting a new store house of brick.

The A. E. McKenzie Co., Brandon, Man., lost a large seed warehouse and contents by fire on Oct. 11.

R. W. Laughlin, senior member of the Laughlin Seed Co., of Canton, O., is spending a few days among the onion growers at Canastota, N. Y.

The Ozark Seed Co. of Springfield, Mo., have elected John R. Barrett president, R. R. Ricketts vice-president and A. S. C. Sanders secretary of the corporation.

R. & J. Farquhar & Co. have just received notification of the award of the gold medal at the Alaska-Yukon-Pacific Exposition for new peony-flowered dahlias.

It is reported that Mr. George Philp has severed his connection with Sherman & Eberle of Albany, N. Y. It is said he has his ear to the ground listening for "dat call."

John Bodger, Sr., of John Bodger & Sons, wholesale seed growers of Gardena, Cal., has just returned from Europe, having visited several of the leading seed firms in England, Germany, France and Holland.

Mrs. H. A. Jahn of New Bedford reports a considerable demand from abroad for dahlia seed. Last winter she was successful in producing flowers in midwinter from tubers planted in the greenhouse in the fall. The blooms were sold for fifteen cents each.

The dinner to be tendered by the

Pennsylvania Florists' Club to Mr. Lonsdale, prior to his departure for California to take charge of the Burpee Ranch, promises to be a rather large affair, as the Florists' Club will be liberally represented, and in addition, many of the Philadelphia seedsmen and some of their out-of-town friends will be present. An account of the dinner will no doubt be given in next week's issue.

It is learned that a well-known seed firm in Central New York is on the eve of a dissolution of partnership. Whether this will mean the retirement of one of the partners or two stores in place of one has not been definitely learned, though the probabilities are in favor of the latter proposition. For reasons good and sufficient, it is not considered advisable to give names at this writing, but full details will be furnished in the near future.

While there is likelihood of one of the Central New York firms splitting up, there is another very anxious to sell out. Just what this latter has to offer is not known, but something tangible must be shown, as people of this day will seldom buy empty shells.

Crop report of October 6, from Hjalmar Hartmann & Co., Copenhagen, is as follows

Cauliflower—Not harvested. "Early" and "Earliest Erfurt" seems to give full crop provided there is a good fall. "Dry Weather" or "Danish Giant" will ripen very late and result is doubtful yet.

Cabbage—Harvested. Is short and gives only 25 to 50 per cent. crop. Red cabbage even less. The reason is frost in the heads before planting last fall and attack of insects during the summer.

Turnip and Swedes—Crop short and price 50 per cent. over usual price.

Mangold—Crop insignificant and not even sufficient to cover the Danish market.

Lily of the Valley pips—Crop excellent, quality very fine.

CATALOGUES RECEIVED.

G. Benard, Orleans, France—General Wholesale Price List of Plants, Hardy and Tender.

W. K. Nelson, Augusta, Ga.—Price List of Field Grown Roses and Ornamental Shrubbery.

Anton Schultheis, College Point, N. Y.—Wholesale Price List of Florists' Plants, Fall 1909, Spring 1910. Illustrated.

F. C. Heinemann, Erfurt, Germany.—Special Trade Offer of Novelties, 1910. This contains illustrations of some promising things in flowers and vegetables and is accompanied by a plate showing several of them in natural colors.

Hjalmar Hartmann & Co., Copenhagen, Denmark—Wholesale Price List of Cauliflower, Cabbage and Danish Root Crop Seeds. Attention is called to the high quality of Danish lily of the valley pips, which ripening earlier in the northern climate are especially desirable for early forcing, giving well developed foliage for Christmas.

Dreer's Special Offer

OF

Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world. Our collection is unequalled, and we are prepared to furnish the new and rare kinds as well as all the popular standard varieties in large quantities.

The plants we offer are all strong one-year-old field-grown plants and will make a fine display of flowers next season.

New and Rare Varieties.

	Per 100	Per 1000
Aglæ Adanson (Tall). Immense flowers, snow-white, with red eye.....	\$8.00	\$75.00
F. G. Von Laseburg (Medium). The purest white in cultivation; individual flowers larger than any other white..	8.00	75.00
Jules Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.....	6.00	50.00
Louis Blanc (Tall). Reddish-violet, with purple shadings and darker eye. A distinct dark-colored variety.....	6.00	50.00
Prosper Henry (Dwarf). Large compact truss of pure white with bright crimson-carmine centre.....	6.00	50.00
Siebold (Dwarf). An improvement on the popular scarlet "Coquelicot," brighter and stronger.....	10.00	90.00
George A. Stroblein (Medium). Bright scarlet, with crimson-red eye; does not bleach.....	10.00	90.00
Mme. Paul Dutrie (Medium). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large, and borne in panicles of immense size.....	10.00	90.00
Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.....	6.00	50.00
Von Hochberg (Medium). The ideal crimson Phlox; the richest of its color.....	10.00	90.00

General Collection of Hardy Phlox.

Best Scarlet and Red Varieties.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.
Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.
Etna (Medium). Crimson red suffused with fiery red; cherry-red eye.
Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.
General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.
Pêcheur d'Islande (Tall). Crimson red, suffused with cochineal-red and carmine-red eye.
Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet, fine.
R. P. Struthers (Tall). Rosy carmine, with claret-red eye, fine.
Price: Any of the Scarlet or Red Varieties, \$6.00 per 100; \$50.00 per 1000.

Best White Varieties.

Albion (Tall). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.
Diadem (Dwarf). A fine dwarf, pure white.
Helena Vacaresco (Dwarf). Very large-flowering dwarf, white.
Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.
Jeanne d'Arc (Tall). A good standard late white.
Louise Abbema (Dwarf). A dwarf pure white of fine form.
Mrs. Jenkins (Tall). The best tall early white for massing.
Price: Any of the White Varieties, \$5.00 per 100; \$40.00 per 1000.

Best Pink and Rose-colored Varieties.

Bacchante (Tall). Tyrian rose with crimson-carmine eye.
Caran d'Ache (Dwarf). Geranium-red, with old rose shadings and white eye; very effective.
Clara Benz (Dwarf). Lovely carmine rose, with darker eye.
General Giovaninelli (Dwarf). Bright Tyrian rose, with light shadings at the base of each petal, a pure red eye; very effective.
La Vague (Medium). Pure mauve, with aniline-red eye.
Pacha (Dwarf). Deep rose pink, suffused with Solferino-red and carmine-purple eye.
Pantheon (Tall). Bright carmine rose.
Selma (Tall). Large flower, pale rose mauve, with claret-red eye.
Sunshine (Dwarf). Large, aniline-red with crimson-red eye and light halo.
Von Goethe (Tall). Tyrian rose, suffused with carmine lake and carmine-red eye.
Price: Any of the Pink or Rose sorts, \$5.00 per 100; \$40.00 per 1000.

Best Purple and Crimson Varieties.

B. Comte (Tall). A glowing reddish or French purple; one of the finest dark-colored varieties.
Charles Sellier (Dwarf). Bright reddish-violet with large white star-shaped centre.
Champs Elysee (Medium). A very bright rosy magenta of an effective shade.
Chevalier de Boufflers (Medium). Deep reddish violet, with brighter shadings.
Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.
Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.
Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre with an exceptionally large white centre.
La Foudre (Tall). Rich glowing French purple, shading crimson.
Le Mahdi (Tall). Deep reddish violet, with darker eye.
Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.
Price: Any of the Purple and Crimson sorts; \$5.00 per 100; \$40.00 per 1000.

Best Light Varieties With Dark Eyes.

Bridesmaid (Tall). White, with large crimson-carmine centre.
Colibri (Tall). White, with crimson-carmine centre; very late.
Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.
H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.
Price: Any of the Light Varieties with Dark Eyes, \$5.00 per 100; \$40.00 per 1000.

Best Mottled Varieties.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish-lilac; large, white halo.
Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.
De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.
Eugene Danzanvillier (Tall). Lilac, shading white towards the edges; large white centre.
Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.
Price: Any of the Mottled Varieties, \$5.00 per 100; \$40.00 per 1000.

Phlox Sufruticosa—Miss Lingard.

Extra strong plants of this valuable early white flowering variety \$6.00 per 100; \$50.00 per 1000.

For the most complete assortment of Hardy Perennials offered in America, see our current Wholesale List.

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

TRIAL GROUNDS OF THE NATIONAL SWEET PEA SOCIETY.

The readers of HORTICULTURE will undoubtedly be interested in the progress of the work of the nomenclature committee of the National Sweet Pea Society. Allow me to present a brief outline of the work in progress and in anticipation as follows. The committee, composed of M. Fuld, Arlington, Mass.; A. T. Boddington, New York; William Sim, Cliftondale, Mass.; with the writer as chairman, were especially enjoined by the Society to state the practical aspects of the whole question. These features may be substantially summed up in the (a) elimination of synonyms and (b) the testing of new aspirants for public favor. In addition to these points it has been thought advisable to give some attention to cultural studies, with special reference to adaptations of varieties to fall and spring seeding and the influence of the time of seeding upon the resultant crop. Successful plantings of a few standard varieties are being made this fall and additional plantings of these varieties will be made again next spring.

The soil selected is a well drained clay loam, somewhat rolling in character but fairly uniform in its physical make-up.

Generous collections of seed have already been received from A. T. Boddington and Rawson & Company of Boston. An extensive correspondence has been entered into with the sweet pea growers of the United States and the old country for the purpose of enlisting the interest of originators of sweet peas. The immediate responsibility and care of the test grounds have been placed in the hands of Mr. A. C. Beal, a Cornell graduate who has been florist to the University of Illinois for several years and who now returns to Cornell for further post-graduate study.

I trust that all persons wishing to extend the interest in and knowledge of one of our beautiful annual flowers will join the Sweet Pea Society and aid the movement. I may add for general information that the secretary is Mr. Harry A. Bunyard, 342 W. 14th St., New York.

Let me repeat again, that correspondence regarding varieties, history and culture is solicited from seedsmen and originators.

JOHN CRAIG,
Chairman Com. on Nomenclature.

PUBLICATION RECEIVED.

Nut Notes, a bulletin issued monthly by the Publicity Committee of the National Nut Growers' Association for the purpose of giving reliable information regarding this industry through agricultural journals and prominent papers has been received from the office of J. F. Wilson, secretary, Poulan, Ga. Something on similar lines has often been suggested for adoption for the S. A. F. Undoubtedly it would be favorably received by the S. A. F. members and would do much to maintain that continuous touch between officers and members throughout the year which has been "a long-felt want."

Of Interest to Retail Florists

The beautiful
WASHINGTON weather of the
past week has
tempted an unusual number of buyers
out and all the retailers to a man re-
port trade decidedly on the increase.
With all outside bloom killed the de-
mand for greenhouse flowers went
steadily up the scale. The first sweet
peas are being shown and are excep-
tionally good. Violets, too, are com-
ing in, in limited quantities but the
weather continues too warm for
length of stem.

Bros., florists, of Holyoke, Mass., was
married to Miss Julia Hallissey at
Springfield, on October 27.

W. Wells of Merstham, Eng., the
celebrated chrysanthemum expert,
sailed for New York on the Maure-
tania, Saturday, Oct. 23, and will be
the guest of C. H. Totty in Madison,
N. J., for several weeks.

Visitors in Philadelphia: Jno. N.
May and wife, Summit, N. J.; R. G.
Bowersox, Lewistown, Pa.; Geo. Salt-
ford, New York City; Parker Thayer
Barnes, Harrisburg, Pa.; Miss Matilda
Held, representing Mrs. Chas. Held,
Baltimore, Md.

Adin A. Hixon, secretary of the Wor-
cester County Horticultural Society is
seriously ill at his home in Worcester,
Mass. Mr. Hixon has been in poor
health for some time, but was taken
ill in Boston on Thursday while at-
tending the New England apple show.
He was at his desk in Horticultural
Hall part of Friday, but was compelled
to go home in the afternoon.

Since then he has been under the
care of a physician and is confined to
his bed.

EXHIBITION AT SAN FRANCISCO.

The Portola Flower Show under the
management of the Pacific Horticul-
tural and California State Floral So-
cieties, closed October 16, after at-
tracting an unusually large crowd dur-
ing three days at the Fairmont Hotel.

The first prize for flower filled ham-
pers was awarded to Pelicano & Rossi,
whose exhibit was a beautiful display.
The second prize for a hamper of mis-
cellaneous flowers went to the Art
Floral Company. The sweepstake
prize went to H. Plath as the winner
of the greatest number of exhibits, in
cash. S. E. Slade ranked second and
the Art Floral Company third.

One of the most beautiful features
was the display of tuberous begonias.
Three large tables were filled with
these flowers from the Henry E. Both-
in place, Ross Valley.

The artistic arrangement of set
pieces was a striking feature. Notice-
able among these was the Venetian
water scene. The back wall was of
maidenhair ferns, arched over with
Liberty roses and ferns. Columns of
coreopsis, the brackets of gailardias,
with a gondola on the pond of the
same flowers.

The judges of the show, who passed
on the entire display, were John More-
ly, superintendent of parks at Los An-
geles; Robert Armstrong, also from
the southern city, and William Hert-
rich of San Gabriel.

NEW BEDFORD NOTES.

White and Pink Ivory at this date
and Adelaide and Yellow Bonnaillon to
follow them are the leading mid-sea-
son chrysanthemums in this market
this season. Wm. P. Peirce has them
in excellent quality and R. E. Nofftz
is already in with Bonnaillon. At the
greenhouses of R. H. Woodhouse are
to be seen as usual, many novelties in
chrysanthemums. Last year this
grower bought and tested twenty-six
highly praised varieties and of them
he has only retained three. He is
recognized here as an expert and crit-
ic. Outdoor flowers are all gone with
the exception of a few stragglers in
sheltered spots. Business in floral and
nursery lines is reported good, all
around.

Visitors last week were: John Fitz-
harris of Roseville Pottery Co., Zanes-
ville, O.; A. Zirkmann, representing
M. Rice & Co., and S. D. Green repre-
senting H. Bayersdorfer & Co., Phila-
delphia.

Flower Market Reports.

BOSTON

Serenity rules the market this week, the conditions having improved very materially. Chrysanthemums of the medium grades are selling well but there is little room for the high-priced blooms. Carnations are slowly outgrowing their recent handicap of short stems and are of excellent quality, bringing a better price than they usually do in chrysanthemum time. Killarney, Maryland, White Killarney, Bride and Bridesmaid roses are fine and selling satisfactorily. There are still some Kaiserins and Carnots in market but they show the effects of approaching cold weather and are getting ready to hibernate. The rose situation is much better than it was a week ago. Violets are improved in quality. Singles are again preferred over doubles as in the past two years. Orchids and gardenias are holding their own well.

BUFFALO

Plenty of rain and inclement weather was had the past week though trade was quite satisfactory. There was sufficient stock to be had in all lines except carnations which are still slow in coming in and hardly enough to supply the demand. In the rose line Beauties continue of excellent quality and so far have sold well. Killarney and My Maryland are improving. White Killarney from local growers is finding its way to the front. Bonsilenes are in steady demand. Chrysanthemums are cleaning up well and very few are left after the day's business; the later varieties are gradually coming on, amongst them being Duckham, Poehlmann, Pride and others. Violets, lily of the valley and cattleyas are having a better call than the previous week.

CHICAGO

The cry seems still to be for more stock. While there is a sufficient amount of certain kinds on certain days the supply in general can hardly be said to cover the demand. The exception is in chrysanthemums of which a good supply is now coming in. Virginia Poehlmann is a favorite white and Halliday is the best yellow now

in the market, but some complaint is made that the blooms of the latter are showing centers too much this year. Touset is at its best this week. Of American Beauties there is just about the right quantity. Stems fully 50 inches long are easily found and the mediums are moving as rapidly as the supply warrants. Carnations are scarce and bringing a good, stiff price. Violets from the East are competing with the home-grown ones and neither are selling rapidly. The home-grown ones are perhaps a little ahead on account of their fragrance.

We are happy to report a greatly improved market here.

The early part of last week was not so good, but the wind-up was excellent and at this writing trading is brisk and healthy with prospects of the best for the near future. American Beauty roses lead the market with enhanced values and improved quality. Richmonds are good and on the scarce side, if anything.

Brides and Bridesmaids remain about normal, with quality in favor of the latter. Killarneys and Marylands are steadily improving as to stem and flower, and meet with ready market. Carnations are still scarce and are cleaning up well. Some extra well-grown Queens are coming in—so good, in fact, that the experts could hardly believe that they were Queens. White Perfection, Bountiful, Rose Pink Enchantress, Winsor, Victory and Harlowarden, are among the leaders. Beacon is the finest on the list. Chrysanthemums are plentiful and moving off in fair shape. There is no glut as yet. Beatrice May and Yellow Eaton are the top-notchers. Virginia Poehlmann, Appleton, Ivory and Halliday are excellent, and there are still a few good Tousets around. Orchids are shortening up. Violets are more plentiful and improving in quality—Marie Louise, Princess and California mostly. Lily of the valley and gardenias normal. Mignonette just commencing.

Flower Market Reports.

(Continued from page 615)

NEW YORK We have reached the end of the earlier varieties of chrysanthemums and many fine blooms of mid-season flowers are coming along in quantity. The market is still unsettled and is likely to remain so, with exceptions, for several weeks to come. Chrysanthemums are the dominant factor and are selling at figures that compare favorably with last year. Ivory and Bonnaffon are just coming in and good blooms are not difficult to dispose of. Roses are steadily improving in size and substance. Beauties of first class quality seem to move at a price, but inferior stock has to be sold cheap. The price difference between the good and the bad is considerable. Of the small roses, Maryland has somewhat of an advantage over all the other pink varieties, though it is only the few selected flowers that bring a price. Pink and white Killarneys are plentiful and cheap. The Bridesmaid crop is off at present, Brides being heavier in supply. Carnations are improving in quality and not so numerous as to suffer in price. They are selling fairly well—better than roses. Lily of the valley holds its own—has been doing very well for the past month. The price of cattleyas has stiffened considerably; supply light. Violets enjoyed a spurt for a couple of days due

to funeral work and reduced receipts. It cannot be said, however, that they are any more popular with the best trade. The ordinary run of green stock is plentiful enough but is generally cleaned up at fair figures.

A BOSTON PLANT GROWING ESTABLISHMENT.

The greenhouses of the W. W. Edgar Company at Waverley, Mass., which in the time of its founder, the late W. W. Edgar, were one of the show places for good culture are, under the skillful management of H. H. Bartsch, fully holding their record and never looked finer than they do today. Azaleas, of which there are about 15,000, have been coming in and are being potted up as rapidly as possible. For the large sizes the low-stature pots are used exclusively and the saving in soil and weight is considerable. The varieties in largest quantity are Simon Mardner, Vervaeana, Firefly (Hexe) and Vander Cruysen. The latter, although not classed among the earliest bloomers, have their buds so large and well advanced that it is expected they can be had in bloom for the holidays. In fact, the azalea stock throughout has rarely been equalled for perfect condition of foliage and number and condition of buds.

Among the other stock of timely interest are the poinsettias, of which there is a house full, in all sizes from a few inches high up to big pans of

several large specimens, Lorraine Begonias from tiny thumb-pot size for table compositions up to exhibition plants, obconica primroses, cyclamens, genistas, acacias and little ferns of all sorts.

Pompon chrysanthemums, about 14 plants in a box 28 inches long, make fine subjects for church or hall decorations or florists' store window displays. Among the chrysanthemums for cut blooms, either in flower or rapidly opening are Rieman, Alice Byron, Touse, Bonnaffon, Merza, Eaton and Shrimpton—the latter provided especially for the rooters for the Crimson in the Harvard-Yale football game scheduled for next month.

Herbert E. George who has for the last 3 years been in the employ of Chas. Winsel, seedsman and nurseryman of Los Angeles, Cal., has resigned to go into business at Covina, Cal. Mr. George intends to devote his time principally to rose growing and high-class shrubbery. He will join partnership with Wm. Dibble. The firm will be known as George & Dibble Co.

CHICAGO NOTES.

Some Plant Growers.

The supply in the plant line promises to be all that can be desired for the holidays. Azaleas have been arriving very freely the past week. The buds this year are much smaller than usual, and some fear is expressed that the plants may not be at their best in time for the holidays. Belgium growers state that the season has not been favorable, and that stock another year is liable to be much smaller in consequence.

Sam Pearse was one of the first men to enter the plant business in Chicago. Twenty-two years ago he bought his place on Clybourne avenue, where he had a clear field around him. This is now in the very heart of a manufacturing district, and as a result his great brick smoke stack is ornamented with "for sale" signs and Sam some day will try another "far out" location and very possibly live to see the city crowd upon him again, for he is still one of the young men with a wife who is his right hand in business and eight sturdy youngsters to help some day. Twenty-five hundred azaleas are being potted up and bulbous stock is being rapidly boxed for forcing. There are 10,000 cold-storage longiflorum giganteums and other lilies in all stages from bulbs just starting up to plants in flower. Giganteum he prefers to Formosa. Multiflorum is favored, other than as cold storage. A big stock of poinsettias for cutting and in pans is coming on.

John Lang built his range of houses nearly a quarter of a century ago, and his local trade has lately made the growing of cut flowers more of a necessity than plants, consequently this year nearly all his glass is devoted to that purpose and to bedding stock, and he plans his chrysanthemums and carnations to be out of the way in time for the latter. Mr. Lang has bought ten acres of land farther out and in the near future will build an up-to-date range of houses.

Peter Sroczynski, better known as (and far more easily pronounced) "Big Pete," who has a very fine place, also finds the cut flower trade crowding out the plants. The city has grown up to him, but it has brought the retail business to his door and thus the city's growth often helps while it changes the nature of the business for the florist.

Frank Oechslin, the largest plant grower in the city, has developed his business in the last ten years. To those who visit this establishment far out on the West Side for the first time it is a revelation. Five delivery wagons carry his plants to the retail trade, north and south. These are modern, enclosed vehicles, with trays and fitted for warming during the cold weather. These wagons in the busy season are often seen far into the night returning or starting out with a load bound for points many miles distant. Mr. Oechslin's second carload of azaleas came in last week. In poinsettias from twelve to fifteen thousand are planned for this season, one-third of which are in five to ten-inch pans. Poinsettias as well as chrysanthemums here are

grown as plants only. Boston and Whitmani ferns, cyclamens and obconica primroses are grown in quantity. Baby Rambler roses are among the plants for Easter trade. Mr. Oechslin does a wholesale business only, and has the support of the trade accordingly.

General News.

The Chicago Woman's Club, an organization of great influence in Chicago and having a membership of 500, has set its influence toward the making of the City Beautiful. Last week it entertained representatives of the twenty-four improvement organizations this city has and Alderman Beilfuss, chairman of the Special Park Commission, and City Forester Prost gave addresses.

Harry B. Clow has purchased twenty acres of the Ferry tract at Lake Forest, Ill., and will spend \$100,000 on buildings and landscape gardening. Lake Forest is the home of many of the finest private estates in this country.

The big signs, "World's Greatest Flower Show," are conspicuous in the down town district and interest in the coming event is becoming more intense each day. Twelve local nurserymen will exhibit at the show.

The Warwick Flower Shop, 47th St. and Forestville Ave., has been purchased by C. J. Cleve Houck, formerly at 3411 Croton Ave., Cleveland, O.

Tickets for the Stag at the flower show are out. Price \$1.00.

Personal.

T. J. Corbrey left last Tuesday for his home in Long Beach, Cal., after several weeks' visit with his old friends in the wholesale business.

F. Benthey of the Benthey Coatsworth Co. is doing his duty as a citizen by serving on jury.

Mrs. W. E. Kelley, wife of the president of the Horticultural Society of Chicago, has been honored by Elmer D. Smith who names a beautiful new chrysanthemum after her.

Visitors.—A. Elberfeld, proprietor of the Alpha Floral Co. of Kansas City, Mo., accompanied by his wife; John A. Evans, Richmond, Ind.; D. B. Hazen, Batavia, Ill.; Mrs. Clara Brown, Jackson, Miss.; A. C. Brown, Springfield, O.

FOR

ADVERTISERS

A good illustration is often the means of making a sale, especially if it shows something new or novel.

We have in stock many of the cuts used in our reading articles, all of which show the best type of the subject illustrated and in an effective manner.

They should all prove effective for catalogue or advertising purposes and can be secured at about half price.

Tell us your requirements and we will send you proofs of cuts nearest suited to your needs.

Obituary.

E. Sutermeister.

This well-known grower for the Boston market was born in Boston in January, 1851, and worked as a boy and learned his business of florist with Lewis Davenport of Milton, Mass., whose daughter, Miss H. G. Davenport, he married. He died at the Emerson Hospital, Forest Hills, on Thursday night, October 21, after an operation for pancreatitis, of which he had a complicated case. His wife, one son, Edwin, a chemist in Madison, Wis., and one daughter, Margaret, survive him.

Mr. Sutermeister started in business

E. SUTERMEISTER

for himself in 1890 at Readville. He was one of the incorporators of the Co-operative Flower Growers' Market and has been a director of that institution for over ten years. His products, forced bulb stock, have always carried a high reputation. Personally, he was held in affectionate esteem by his associates in the trade. His disposition was cheery and companionable and his loss is deplored by all ranks and classes of the market frequenters. His home life was of the happiest.

Mrs. Gardiner G. Hubbard.

It is with deepest sorrow that we record the death of Mrs. Gertrude M. Hubbard, widow of Gardiner G. Hubbard and owner of the beautiful estate at Washington, D. C., known as Twin Oaks. Mrs. Hubbard was killed in a collision between a street car and her automobile on October 20. Half a century ago Mr. and Mrs. Hubbard were known as enthusiastic patrons of horticulture and at their spacious grounds and conservatories in Cambridge, Mass., everything new and interesting in fruit and flowers were to be found. At Twin Oaks the interest has been maintained and the accomplished gardener, Peter Bisset, has been encouraged in his valuable work on aquatics,

HELP WANTED

WANTED—Buyers and agents to sell our cement block and fence post machinery. Send for circulars and prices. Address W. L. Keller Cement Block Machine Co., Kearney, Neb.

WANTED experienced vegetable and flower seed packer to take charge of packing room. Must know the seed business. Give reference and salary wanted. Gurney Seed Company, Yankton, South Dakota.

WANTED—Two reliable greenhouse men, good potters and understanding the work of a plant growing establishment generally. Good pay to the right men. Wm. W. Edgar Co., Waverley, Mass.

WANTED—First class propagator of carnations and general stock. Pay, \$60 a month. C. J., care HORTICULTURE.

MISCELLANEOUS WANTS

NOTICE TO ENGINEERS AND LANDSCAPE GARDENERS.

San Antonio, Texas, Oct. 6, 1909. The City of San Antonio invites competitive, suggestive plans for platting, designing and beautifying a new City Cemetery to be known as "Mission Cemetery." Topographical maps of the tract of land upon which said cemetery is to be established can be seen in the office of the City Engineer.

A cash prize or premium of Five Hundred (\$500.00) Dollars is offered for the best and most acceptable plan, a cash prize or premium of Three Hundred (\$300.00) Dollars for the second best plan, a cash prize or premium of Two Hundred (\$200.00) Dollars for the third best plan for so platting, designing and beautifying said cemetery, which prizes above mentioned will be awarded upon the recommendation of the Mayor and the Cemetery Committee of the City Council, who reserve the right to reject any or all plans submitted, and whose decision as to the award of said prizes or premiums shall be final.

All plans for which prizes have been awarded become the property of the City of San Antonio.

All plans must be securely sealed, addressed to the "Cemetery Committee of the City Council, San Antonio, Texas," and be submitted on or before 11 A. M., January 6th, 1910.

BRYAN CALLAGHAN, Mayor.

Attest: FRED FRIED, City Clerk.

WANTED TO LEASE—Retail greenhouse establishment; state full particulars first letter, size of houses, glass, rent, etc.; terms must be reasonable. Box 97, Jersey City, N. J.

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 88 Montrose Ave., Brooklyn, N. Y.

FOR SALE—At Southampton, L. I., 1/2 acre, 8-room house, hot house, 100 ft. long, and barn. All newly painted and in good condition. Easy terms. Inquire Pacific Paint Co., 27 Sixth Ave., Brooklyn, N. Y.

roses and other specialties, some of which now have a world-wide repute. At the meeting of the American Rose Society at Buffalo, last March, Mrs. Hubbard announced through Mr. Bisset the establishment of a fund to provide gold medals to be awarded to valuable new roses of American origin and was made its first honorary member by the Society in acknowledgment of the gift.

Those who were personally honored with Mrs. Hubbard's acquaintance will always hold her in affectionate remembrance for her charity and rare goodness of heart.

Mrs. Mary A. Free.

Mrs. Mary A. Free, long engaged in business as a florist, died at Stamford, Conn., October 20, of pneumonia.

TWO FINE CHRYSANTHEMUMS.

Mrs. A. R. Peacock is a seedling of Beatrice May which it greatly resembles in form and color, but the foliage is finer and carried right up to the flower. The variety is too early for the shows but will be a welcome addition to the early commercial whites. The flower is twice as large as Virginia Poehlmann or October Frost or any other white, flowering at that season. Exhibited by Chas. H. Totty, it was certificated by the New York Florists' Club, October 11, and by the New York committee of the C. S. A., as "No. 1 Seedling" on October 16, scoring a certificate on both exhibition and commercial scales. Mrs. W. Wincott, another of Mr. Totty's candidates, is an improved Mrs. Chamberlain coming in right behind Pacific and always producing an evenly colored flower. It is a dwarf, handsome grower, and while not a large variety it will be widely grown because pink varieties at that season (October 15) are still very scarce. The plants can be grown close together. This variety was certificated October 16, as "No. 2 Seedling," by the C. S. A. committee at New York, on the commercial scale.

NEW AZALEA INDICA.

Having just received one case of the new Azalea Indica from the Haerens Co., Somergem, Belgium, the writer thinks that they will fill a long-felt want. The plants are of a very robust growth and arrived in excellent condition, without loosing any leaves. The flowers as seen at the nurseries

CHRYSANTHEMUM MRS. A. R. PEACOCK

at Somergem, the 2d of August, were of the most delicate shades and very large. As soon as they come in bloom they will be seen and talked about at the Gardeners' and Florists' Club meetings, as well as at the Mass. Horticulture exhibitions.

They will not be for sale this season, but the introducer thinks that he will have a fairly good supply for next season.

A. LEUTHY.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The lecture room of Horticultural Hall was well filled with an appreciative audience last Tuesday evening to listen to an informal talk by J. K. M. L. Farquhar on some things he had seen on his recent European trip, and enjoy the many handsome stereopticon views which he presented in illustration of his remarks. Mr. Farquhar's tour was somewhat out of the usual route, having extended to the far northern part of Norway and the views of the sublime mountain scenery and glacial falls were extremely interesting. Christiana, Stockholm, Copenhagen and several of the German and Italian cities, as well as the bulb-growing districts of Holland, were all drawn upon for pictures of horticultural or historical value. An enthusiastic vote of thanks was accorded the lecturer.

The question of annual dinner and installation exercises was discussed and finally referred to the executive committee. An amendment to the constitution providing for a life membership was laid on the table for action at the next meeting.

The flowers on exhibition included carnations May Day and seedling No. 106, from Peter Fisher, both of which received honorable mention. Mr. Fisher said that May Day gives every promise of being an unexcelled commercial favorite, being a splendid grower, productive and unique in color. The seedling is a large, very shapely white striped in the way of Bay State.

W. N. Craig showed a number of the English early single chrysanthemums and a vase of seedlings fully equal in all points to the named sorts. Rossmere Conservatories showed chrysanthemum Ivory and Wm. Downs staged cosmos, White Lady Lennox, which he says he grows in 12-inch pots and is able to cut flowers abundantly till Christmas.

CHRYSANTHEMUM MRS. W. WINCOTT

CLUB AND SOCIETY NOTES.

Officers of the National Horticultural congress, in association with other local men, have established a horticultural publication, which is expected to become the official organ of the congress. It is to be called "The National Horticulturist." Publication is to begin immediately. The magazine will be issued monthly and will be modeled after "Better Fruit," a horticultural magazine published in Hood River, Ore.

Articles of incorporation of the National Horticulturist Publishing Co. have been filed for record. The incorporators are W. S. Keeline, J. P. Hess, F. L. Reed, George Sancha and W. H. Lynchard. W. S. Keeline is president; J. P. Hess, vice-president; F. L. Reed, secretary, and George Sancha, treasurer. The company has a capital stock of \$5,000, divided into shares of \$100 each.—Council Bluffs Nonpareil.

The catalogue for the eleventh annual exhibition of the Tarrytown Horticultural Society, which will be held in St. John's hall, White Plains, N. Y., on Nov. 4, 5 and 6, has been issued. Among special prizes offered are these:

By J. D. Archbold, \$20 for the best twelve blooms of chrysanthemums; Mrs. William Church Osborn, \$25 for the best thirty-six blooms; Miss Blanche Potter, \$35 for the best twelve blooms, distinct varieties; William Rockefeller, silver cup for best eighteen blooms; Samuel Untermyer, \$20 for the best four plants of Begonia Gloire de Lorraine.

Mrs. Stuyvesant Fish offers a handsome silver cup for the best arranged floral decoration for circular dinner table, six feet in diameter, seating twelve persons, and Mrs. Isaac N. Seligman \$10 for the best basket of cut flowers.

James Sutherland, florist, Athol, Mass., left his store last Friday, telling no one where he was going, and has not been heard from since.

and brittle. Broken glass more easily removed
without breaking of other glass as occurs with
hard putty. Lasts longer than putty. Easy to
apply.

It Costs No More To Build A House Like This

Than one that may last only a few years. It is mighty expensive business, putting out good money for repairs on a cheaply constructed house—repairs that begin shortly after the house is built, and keep up until it is torn down or abandoned by the disheartened owner. Our Iron Frame House, with its light, strong, rigid frame work is practically indestructible and light as day, making it unmatched for productivity.

If you build, have the best—it means money in your pocket. Let us hear from you.

APHINE

IS THE NEW INSECTICIDE
THAT KILLS PLANT LICE
OF EVERY SPECIES

This has been demonstrated in tests made by the highest scientific authorities of the land, and is proclaimed an infallible spray for all outside plants.

For the Greenhouse and Conservatory it has no equal among the various remedies now in use.

APHINE is a combination of essential and ethereal oils, combined with nicotine, in a readily soluble and available form, and can be applied as a spray, wash or dipping solution.

It is used at an average strength of one part APHINE to forty parts of water — full directions on each can.

Price \$2.50 per Gallon

COLLIER'S WEEKLY SAYS:—*"Aphine has a future as long and wide as the United States."*

MR. CHARLES H. TOTTY SAYS:—*"Aphine will do all you claim and more."*

PROF. JOHN B. SMITH:—*"You can guarantee your material to be effective against plant lice. I know that from personal experience."*

PROF. EDMUND B. SOUTHWICK:—*"I have given your preparation for the destruction of Aphids a very thorough trial; for this special purpose I have found nothing that compares with it."*

ANOTHER SAYS:—*"Aphine will do the work, if you don't believe it, try it."*

Aphine is now on sale in New York, Philadelphia, Baltimore, Washington, Boston, Rochester, Buffalo, Detroit, Chicago, St. Louis and Denver, with negotiations pending for agencies in other cities in the United States and Canada.

The first shipment has just been made to the Pacific Coast to Messrs. MacRorie-McLaren Company, San Francisco, Cal., selling agents for Aphine.

If your supply house does not handle Aphine, write us and we will send you name of our nearest selling agent.

THE LIBERTY TREE, ANNAPOLIS, MD.—One of the most striking examples of the perfect restoration of a historic landmark by modern methods of tree surgery.

The Preservation of Historic Trees

This is a matter which is attracting attention of thoughtful people everywhere. Historical societies and village-improvement associations are interesting themselves in the preservation of trees, many of which are century-old landmarks.

I have been particularly successful in doing this sort of work as evidenced by examples to be found among the historic trees of Mt. Vernon, notably the restoration of the Holly planted by George Washington, which had been so severely injured by wind storms and decay that its restoration was considered hopeless. The top of the tree was crowned and the weakened branches bolted to a reinforcing rod and the tree now has a new lease of life.

Another example was the restoration of the famous Liberty Tree at Annapolis, Md. Probably more cement and reinforcing material was used in this tree than on any similar job in the country, but the tree is now as solid as a rock and is likely to withstand the wear and tear of several centuries.

The art of tree surgery is comparatively new, but it is based on scientific principles of plant growth and the knowledge of the source of disease and decay. After decay has been arrested and all the dead and useless limbs removed I give special attention to new growth by the proper feeding of the tree.

I will give personal attention to any inquiries which the readers of Horticulture may send regarding any trees which for sentimental or other reasons they would like preserved for generations to come.

I undertake the management of orchards as well as all kinds of ornamental plantations, grading, surveying, making of flower gardens and give professional advice on estate management.

DAYBREAK

A Superb New Rose Raised by JACKSON DAWSON

Wichuraiana type, formerly known as seedling No. 7 (Wichuraiana X The Dawson). A vigorous grower, profuse bloomer and easy forcer. Foliage light yellowish green. Hardy as far north as Canada.

Flowers single, in loosely pyramidal clusters. Color deep yellowish pink, a shade darker than Lady Duncan, slightly lighter tint towards centre. Stamens very bright orange. Flowers full, round, cupped. See illustration of plant in this issue.

THIS IS A ROSE EVERY NURSERMAN WILL WANT

PRICES — Strong three-year-old plants, \$3.00 each; \$25.00 per dozen.
Two-year-old plants, \$2.50 each; \$20.00 per dozen.

Notes From the Arnold Arboretum

A horticulturally very important genus is *Viburnum* of which quite a number of new species have been recently introduced from China. Some of them are deciduous and some evergreen: all of the former may be expected to prove hardy in the neighborhood of Boston, while the latter can only be depended upon farther south.

One of the handsomest and certainly the most graceful and distinct of the new species is *Viburnum kansuense*, a shrub related to the Highbush Cranberry, but smaller in every part and with much more finely divided foliage. The slender-stalked bright green leaves are ovate-oblong in outline, from one and a half to two inches long, deeply three or sometimes nearly five-lobed, the middle lobe elongated into a slender point and like the lateral lobes furnished with a few large teeth. The pinkish white flowers appear in slender-stalked clusters about one and a half inch in diameter along the upper part of last year's branches and are followed by comparatively large ovoid bright red fruits. Particularly in fruit this *Viburnum* is very handsome and presents with its small deeply cut foliage an appearance very different from any other *Viburnum*.

Very distinct is also *Viburnum erubescens* on account of its flowers being arranged in drooping panicles and not in umbel-like clusters as in almost all other species. In its native habitat it grows into a small tree attaining twenty feet in height. The leaves are generally obovate or obovate-oblong, short-pointed, serrate at the margin and from two to four inches long. The white flowers are funnelform, not flat as in most other species, about one-third of an inch long and are borne on slender drooping panicles from two to four inches in length; they are followed by dark crimson fruits.

Similar in habit and general appearance is *Viburnum Henryi*, but the flowers are flat as in most other species, not funnelform. The panicles are much broader and somewhat larger and the leaves are narrower, of a firmer texture and quite glabrous, not hairy on the veins of the under surface as in the preceding species.

Viburnum betulifolium is closely related to *V. dilatatum* and differs chiefly in its smaller glabrous foliage and larger and looser flower clusters. The leaves are borne on very slender stalks and usually rhombic-ovate or oval in outline, pointed and toothed, from two and a half to four inches long and glabrous on both sides. The flowers appear in large and loose corymbs from four to six inches in diameter and are followed by scarlet fruits. Another species of the same affinity is *Viburnum Wilsoni* with denser and smaller corymbs covered with a dense and short yellowish tomentum; the leaves are generally ovate, pointed and pubescent on both surfaces. To this species *Viburnum dasyanthum* is very closely related, but the yellowish tomentum is confined to the upper part of the corymb and the more elongated leaves are glabrous. *Viburnum corylifolium* is also closely related to *V. dilatatum*, but the young shoots, leaf-stalks and the inflorescence are densely covered with long spreading yellowish hairs and the scarlet fruits are larger.

Another very distinct species is *Viburnum foetidum* (*V. ceanothoides*) with rather small, but numerous

flower clusters. The leaves are only one or two, rarely three inches long, obovate to oblong in outline with a few large teeth near the apex and quite glabrous. The white flowers are borne in corymbs from one and a half to three inches in diameter and followed by scarlet fruits.

Viburnum Veitchii is similar to *V. Lantana*, but the flower clusters are larger. The leaves are ovate, pointed, cordate at the base, finely toothed, from four to five inches long, covered on the under surface with a white tomentum and slightly hairy on the upper surface. The flowers appear in terminal panicles from three to four inches broad and are followed by black fruits. *Viburnum buddleifolium* is very similar to this, but the leaves are narrower, more lanceolate in outline.

All the *Viburnums* mentioned above are deciduous; some of the new evergreen species will be mentioned in the next issue.

Alfred Rehder.

Alternanthera "Jewel"

For a number of years foliage plants have been artistically used for massing or color effect in the flower garden, parterre, private and public gardens, cemeteries, and all places where plants are used for bedding or decoration.

Changes have constantly been made with the advent of new or improved varieties, which add beauty and effectiveness in the general display. Progress is ever the order of the day and there is always beauty in variety. Mention might be made of such plants as crotons, acalyphas, pandanus, philanthus, abutilons, coleus and a few others amongst the stronger growing varieties but for effectiveness in general designs, or carpet bedding nothing can vie with the alternantheras. Of these we have several varieties and distinct forms, some strong and free-growing, others dwarf and compact, with several shades of color—some sombre, others of distinct yellow, while others again are of an orange red varying to rose carmine and cerise. The vivid and brilliant colors are most striking and our semi-tropical summers are conducive to their full development of growth and color. For many years the variety *amœna* and *A. spectabilis*, *latifolia* and *versicolor*, with several sports of more or less value have been in cultivation, though of late years they have dwindled down to two or three distinct colors of red and yellow.

We are indebted to Wm. Pfitzer, of Stuttgart, Germany, for the recent introduction of *Alternanthera Jewel*, which has proved a most valuable addition to this class of plants. In habit it is compact and spreading, foliage as large and probably larger than *A. latifolia*. The young foliage is bronzy orange, changing to rosy carmine and brilliant crimson. For massing where color effect is desired it is unequalled, also for borders—especially with subtropical plants—and can be used for many and varied purposes in parks, cemeteries and all gardens where bedding plants are used. It is by no means a delicate or tender plant but is of free growth compact habit and vivid coloring.

Wm. Pfitzer.

A rose
and a gardener

We are especially proud of our cover illustration this week. It is a very happy combination—Jackson Dawson and one of his most highly prized rose productions—and the excellent likeness of this universally loved gardener will be appreciated at home and abroad by a myriad of friends. The handsome rose, appropriately named in honor of Professor C. S. Sargent is delicate pink in color and grows to a height of ten feet. It is the result of a cross between Wichuraiana × Crimson Rambler and a pink H. P. It was awarded a silver medal at the Rose Exhibition of the Massachusetts Horticultural Society, June 26, 1909.

Where novelty
and originality
are indispensable

A disposition to break away from the beaten path in flower exhibition arrangements is somewhat in evidence this season and should be regarded as a very hopeful sign. It is not possible to perpetually interest people in monotonous lines of blooms and conventional mounds of potted plants, however finely they may be grown, as has been repeatedly proved, to the sad discomfiture of well-meaning promoters, and novel effects must be forthcoming to insure financial success for flower shows as is the case in every other venture for which continued public support is sought. It is equally true that the skill to produce plants and flowers which are triumphs of the growers' art does not always carry with it the ability to arrange artistically or to conceive and carry into execution original and impressive effects. Here is one prime reason, in addition to others which are obvious to everybody why the professional floral decorator should always have something to say about planning our public exhibitions. To the fact that he has been oftener than otherwise conspicuous by his absence is undoubtedly due much of the inertness and stagnation which so often characterize exhibitions that from a cultural standpoint are highly meritorious.

One effect
of abundance

The attentive observer cannot fail to notice the steady trend in the wholesale flower markets for several years back, in the direction of a wider and wider divergence between selling value of stock which is first-class as to quality and that which is not. The variation between the selling price of best and second best, formerly but a trifle, is today a wide gap and the probability is that it will become more so. As the sources of supply increase, so the buyer grows more and more insistent as to grading and quality and the grower or the wholesale dealer finds he can get standard prices only on the top grade material. Except in rare cases of scarcity on some special line the balance of the stock, which of course is the main bulk, becomes a subject of dicker, with the result that the figure at which the small fraction of choice stock was sold often bears but little relationship to the actual average for an entire cut. There was a time when published quotations in the trade papers, from week to week, meant something but that time has gone and, while one may do everything possible to insure accuracy in such quotations, it is a fact that they convey very little information to anybody. The grower who is able to produce regularly the largest percentage of first grade flowers is the one who will come out on top. The bare number of flowers cut becomes of less and less importance under these conditions in which it often happens that, of one thousand blooms, one hundred will realize as many dollars as will the remaining nine hundred.

Treatment of Cattleyas

Editor HORTICULTURE:— I have a $\frac{3}{4}$ span house 20 x 50 feet and 13 feet to the ridge. I have this house full of cattleyas of the following varieties: Labiata, Trianae, Percivaliana, Speciosissima, Schroderae, Mossiae, Mendelli and gigas in varieties, all this year's importations. When potting I gave plenty of drainage. Will they stand plenty of water, as they are breaking away very good and making plenty of new roots? Can I give them full sunlight after a month or so? I am removing the shade from the house by degrees. The house runs east and west. Will they stand and feed now? What is lime of soot and how is it used? How much Nicoticide should I use to fumigate this house ginner and any information you can each time, and how often as a preventive for the cattleya fly? I am a begive me through your valuable columns will be highly appreciated by—

A SUBSCRIBER.

Editor of HORTICULTURE:

In reply to the questions asked (1) by Subscriber, would say the following: Subscriber had better use the water rather sparingly on his cattleyas from now until toward spring when the days begin to get longer and the sun has more power again. It does not pay to try to hurry them along, on account of the winter setting in now. A good watering once a week ought to be enough from now on, using a little weak liquid manure at the same time. It would be foolish to attempt to lay down strict rules as to how often the plants should be watered as each house has its own peculiarities, the plants in one house drying out much faster than the plants in an adjoining house. I find the safest way is to watch your plants and water them as soon as they are thoroughly dry. A little careful attention to this will soon teach "Subscriber" more about watering than anybody could tell him who is not thoroughly acquainted with the existing conditions of the house. Never water a cattleya in winter unless it is dry. Cattleya gigas and C. speciosissima should be kept a few degrees warmer and a little dryer at the roots than the other species mentioned. This can be accomplished by grouping them together at the warmest end of the house. These two varieties will also stand more sun than the rest of them; indeed they will simply refuse to flower if not given plenty of light at all times. Keep Cattleya Mendelli at the coolest end of the house. C. Schroederi requires to be kept quite dry during winter. If the house is damped down once or twice a day and the plants syringed on all favorable occasions very little other watering will be required during the dull winter months for the three varieties mentioned above. (2) The sooner Subscriber gets off the shading from his houses, the better, as the sun has lost its burning power long ago, at least up this way. Our houses are covered with ground glass, which gives sufficient shade

CATTELEYA GIGAS

for cattleyas during summer and far too much of it during winter. (3) I have used lime and soot to a considerable extent and find it throws off a beneficial gas which helps to put color and substance into the plants. Air-slaked lime and soot in equal proportion are mixed thoroughly together and strewn thinly under the benches and back of the heating pipes towards night about once a week, if time permits. (4) I doubt if the cattleya-fly can be eradicated by the use of Nicoticide. The safest way is to watch the young growths and to cut off any that come to an abrupt point as that is always a sign that there are larvæ in it. New imported cattleyas have plenty of good eyes and they will soon break away again. The time to look out for the fly is as soon as the plants start to grow, or when the young growth is about 1 inch high. If the larvæ of the cattleya-fly are destroyed then there will be no more trouble from them afterwards. Fumigate the house once a month with Nicoticide to keep down insect pests; four ounces of Nicoticide ought to be sufficient. If not bothered with insects a good fumigation two or three times a year will be advisable to keep the pests out, but to my knowledge there are few, if any greenhouses, and especially orchid houses, that are not infested with some kind of an insect.

M. J. Pope

Naugatuck, Conn.

Orchids are a timely topic. Any of our readers, interested in their culture, etc., are invited to send to the office of HORTICULTURE inquiries concerning any points on which they may desire further light and full replies will be given in these columns.

MUSHROOMS IN CARNATION BED.

Editor HORTICULTURE:

Will you please let me know through your columns if anybody has had the following experience in his carnation soil, and if so, what he would advise me to do?

In my carnation house in the centre bed, 50x5 feet, mushroom spawn has got in somehow. I am picking from one to two quarts a day since about September 18th. So far the carnations seem none the worse for it and look clean and thrifty. The crop, of course, is very welcome to the table of my employers. If someone has had any similar experience, will he please let me profit by his experience?

G. BLEIKEN.

In reply to the query of Mr. Bleiken I would state that it is a very common occurrence to have mushrooms come up in carnation beds. We have never seen any bad effects. Some times they will lift up a plant; then we dig up the stool and press the soil again around the plant. M. A. PATTEN.

Tewksbury, Mass.

**PTEROSTYRAX (HALESIA)
HISPIDA.**

This a shrub of much value, as a solitary decorative object on the lawn or by the water side, and is better in these respects than *Chionanthus virginica*, to which it comes nearest, but its habit is less pleasing. *Pterostyrax hispida* possesses large handsome foliage of a light green tint, and is an abundant bloomer in a young state, and the blooming period is considerably longer than in *Chionanthus*. The flowers are white, and bear a resemblance to those of *Deutzia crenata*. Owing to the compact habit of *Pterostyrax hispida* no pruning is required, it is not injured by frost, and is not particular as to the nature of the soil or its position.

F. M.

A NEW RAMBLER ROSE.

NEW ROSE DAYBREAK

Our advertising columns announce the introduction of the new rose *Daybreak*, an illustration of which appears herewith. As one of Jackson Dawson's productions no doubt will be entertained as to the excellent qualities and

permanent value of this latest progeny of the prolific *Wichuraiana* lineage. On the other side, the parentage is also of a high standard. The Dawson has proved to be one of the hardiest and most prolific of pillar and piazza roses.

CARNATION SHASTA.

The photograph of *Shasta*, reproduced herewith, shows a bed which was planted the first week in August, con-

taining about 1800 plants. The photograph was taken October 1st. Mr. Baur states that they are running this bed for blooms only, the intention at present being not to take any cuttings from these plants. They have another house full containing about 8000 plants, which they have kept cut back from which to take cuttings. Propagation will begin about November 1st, and delivery of rooted cuttings will begin about January 1st, 1910. Over 40,000 have been sold to date and indications point toward a large total sale on this variety. It will be remembered that *Shasta* elicited more favorable comment than any other variety at the A. C. S. convention, where it scored 89 points last January. As a commercial white carnation it has a most promising future.

TREE PRESERVATION.

We venture to say that practically every reader of these lines knows of some tree, historically valuable or prized for its associations or for its own beauty and shade which is rapidly going to decay because of lack of intelligent care. Some of us know many such trees and how glad we should be to see them put under the care of an expert in that new but already indispensable art known as tree surgery. Every tree lover should read the announcement on "The Preservation of Historic Trees," by John T. Withers, which appears on another page of this issue.

CARNATION SHASTA

THE LONSDALE BANQUET.

The classic halls of Dooner's Hotel, situated in the heart of Philadelphia on the spot where Franklin flew his historic kite, have been the scene of many horticultural gatherings during the past twenty-five years, all of them of commanding importance and distinction, but it is safe to say that none of these surpassed if they equalled the

EDWIN LONSDALE.

splendid array of leading lights in the horticultural world that assembled on the evening of October 28th, 1909, to laud and bid Godspeed to Edwin Lonsdale on his departure from Philadelphia to take up his permanent residence in California as manager of the new Burpee seed farms on the Pacific Coast. The affair was a glorious success in every way, and a fitting testimonial to the fine personality and high standing of the guest of honor as well as a creditable offering on the altar of friendship by the entire horticultural trade of the East to one of its most distinguished sons who has lived, loved and labored amongst them for nearly thirty years. Busy men in Boston, New York, Washington, and other distant cities threw aside their important affairs in order to journey to the City of Brotherly Love to testify their friendship, love and admiration for a fellow-worker who has nobly held his end up and done much as a soldier of the common good, and every one went away happy in the thought not only that he had done his own duty as a man and brother, but that he had enjoyed as well a feast of reason and a flow of soul so splendid that it would remain a pleasant red letter memory in his heart to the end of time. This is the reply that the American people make to critics who claim that they have no ideals and no sentiments and that their only thought is the almighty dollar!

To give in detail the faintest outline of the magnificent speeches made during the evening on all phases of the florists' trade, the seed trade, the nursery trade and allied horticultural industries would take up two or three papers the size of HORTICULTURE,

so we must content ourselves by giving below merely a list of a few of the fortunate seventy-seven guests and the merest outline of the program. A full stenographic report of these speeches has been preserved for the benefit of the present and future by that keen exponent of progress and affairs, W. Atlee Burpee, and we feel sure it will be put to good and permanent use for the public weal as behooves a man who stands at the head of the beatified hosts of wilderness-adorners and happiness-bringers to the hungry and forlorn of the human race.

A pleasing incident of the proceedings was the presentation of a Victrola—the latest and most wonderful of reproducing instruments—to the guest of honor, after listening to Harry Lauder, Melba, Caruso and La Bohème from its magic sounding boards.

To say that Edwin Lonsdale was pleased with the great ovation given him sounds stale, flat and unprofitable—he was simply all broken up.

There is a question as to who made the best speech of the evening. Some say Dr. Washburn; others swear by J. Otto Thilow. Patrick O'Mara of New York was crisp, scintillating and to the point. Elijah Wood of Boston was particularly happy and W. R. Smith of Washington got the hearts of them all in his ode to appreciation of the men who do things. F. R. Piereson was good, too, and some of the local stars shone out. Far be it from us to pose as a critic or judge. It is best to keep out of hot water in such a question. But we can say in all sincerity that everybody did well—speakers and singers alike. W. C. Langbridge, of the Jerome B. Rice Co., Cambridge, N. Y., made a fine address on behalf of the American Seed Trade Association, and was ably followed by Thomas E. Meehan, of Thomas Meehan & Sons, on behalf of the nursery trade. Edward Dooners' "Kilkenny" was one of the gems of the evening. However, one thing we are sure of, and that is that Howard Earl's speech was by all odds the biggest. It occupied two hundred typewritten pages and had to be wheeled up to the platform on a truck. The toastmaster was greatly relieved and gladly consented when a member of the committee asked for leave to print.

Joseph Heacock, the newly elected president of the Florists' Club, acted as chairman and was ably assisted by Toastmaster Ex-Mayor Smith—the latter having in no way deteriorated in his role of "the greatest ever" in the way of witty toastmaster. He (the ex-Mayor) is like a fiddle, a meerschauum pipe or a Scotch m-m-; gets better with age and more mellow and altogether delightful! Robert Craig gave an appreciative tribute to William K. Harris, who was absent through sickness, but who sent a fine message by wire which was read by Secretary Rust, as were a great many other messages of regret from all parts of the country.

William Wunder made a hit with his stories and monologues, and Thomas Hogan and C. H. Reed were also delightful in the "Flow of Soul." Frank Dooner gave the company "Loch Lomond" and made their hearts warm to him more than ever, although they were already highly strung on the

tautless care he and his chef had bestowed on the dinner arrangements. R. C. Bendig made an efficient accompanist on the piano.

Robert Craig sent a fine lot of the Lonsdale crotons to decorate the tables and these after they had been nicely trousered in green and silver by Robert Kift proved a great attraction. The flowers for the tables consisted mainly of pink and white Killarney roses, Farleyense ferns and hardy chrysanthemums. These were furnished by Robert Scott & Sons and were arranged artistically by George Craig, who also furnished several wagon loads of palms. It was a great night, all right, and our only regret is that exigencies of space compel us to be brief and cut out many of the delightful things, and no doubt also many of the appreciative mentions that should be given to those who helped to make the affair a success. Two things in particular we must not forget—the fine speeches made by Jno. Westcott and Jno. Burton. Both of these old war-horses rose to their opportunities in splendid shape.

In the words of the program, "Join we together in the public good for what we can," we all did so—each one to the best of his ability as called on and the highest encomiums are in order for one and all. The writer is proud to have been a cog in the wheel and is full of admiration for the noble way in which everybody aided and abetted in giving a good send-off to our dear old friend and distinguished horticulturist, Edwin Lonsdale. May he live long and prosper. And may that other dear old friend and distinguished horticulturist, W. Atlee Burpee, live long and prosper, too. We are proud of them both and think the new combination will accomplish far-reaching results.

G. C. WATSON.

DAHIA WM. J. STEWART.

The dahlia shown in the illustration is said to be a seedling from A. D. Livoni, raised by C. S. Finacom, Dracut, Mass. It is pure white and very

PLANTATION OF DAHLIA WM. J. STEWART

floriferous, an excellent flower for florists' cut flower use. Mr. Finacom has a 35-acre farm and grows between four and five hundred varieties of dahlias. The variety here illustrated is his most highly prized seedling.

THE EXHIBITIONS

LENOX (MASS.) FLOWER SHOW.

A report of the annual chrysanthemum exhibition of the Lenox Horticultural Society has already appeared in at least one of the horticultural papers, in which the prize list has been fully given, and various comments appended.

Lenox, Mass., nestles itself among the beautiful Berkshire Mountains, and as an ideal summer home has few equals. Here the New York business man can retire for his happy vacation, and can rely on peace and solitude undisturbed. It is off the beaten track and all we hear of Lenox is an occasional note in the Society column.

These business men and millionaires have their gardens and gardeners and in out-door life and the beautifying of their places they take especial pride, but the gardeners who are largely responsible for the appearance of their places get little of the passing comment. Now and then we read of some of their horticultural doings in a vague way, but anyone who is a competent judge and who visits some of these places and particularly their flower show, feels that these men are very much slighted by the press generally. In Lenox they are doing a pioneer work horticulturally in many respects, and this is very clearly emphasized at their exhibitions.

Perhaps the most outstanding and leading feature of these exhibitions are the plant groups. Here these groups are put up on a scale that we never see attempted at any of our other exhibitions. It is a long way by rail to transport these delicate plants to any of our large centers, but it certainly would be a grand feature for some of our New York exhibitions to have one or two of them just for once, as a sample. Perhaps if some of the show committees would use a little persuasion, and some liberal donor provide the necessary transport charges, we might be able to see this consummated.

Here the groups are put up with remarkable taste and so arranged that when you stand in front of them you can see the individuality of every plant used. It is in the province of the gardener to produce fine specimens but usually when he groups them they are so massed as to hide their individual beauty. In building the one-side mounds so often seen, it is not really necessary to have good plants, as only one side and sometimes only the top, shows. To show them to perfection, considerable decorative art is necessary, and this the gardeners in Lenox seem to study to as great an extent as they do the cultural details.

It is not the intention of the writer to discuss the superior merits of either of the groups as put up by Mr. Heremans, Mr. A. Jenkins or Mr. E. Jenkins. The judges had their own troubles in making the awards, but in any case

they were all really good from the most critical standing point, and were certainly a revelation to the writer and others, and an object lesson in their line. Notable among the individual plants used were some specimens of *Croton Warreni* at least five feet high and perfect in foliage and color, several beautiful pieces of orchids, and many well-grown palms, while the ground work was mainly composed of *Adiantum Farleyense*, lily of the valley and *Gypsophylla paniculata*.

For the group of orchids, Mr. Loveless carried off first honors, with Mr. Heremans a close second, both groups being exceptionally fine and reflecting great credit on the exhibitors, both for cultivation and the tasteful manner in which they were arranged.

For specimen chrysanthemum plants, Robert Spiers carried off the principal honors, while Mr. Loveless was first and Robert Spiers second for twelve plants grown in six-inch pots. This was as fine a lot of plants as we have seen grown in this size of pot. Every bloom would have graced an exhibition table in the cut-bloom class.

The principal prize in the cut-bloom chrysanthemum section was for 24 blooms, distinct. Here Edw. Jenkins was first, Thomas Proctor second and F. Heremans third. In competition for the C. S. A. cup, F. Heremans was awarded first for a splendid vase of Mrs. F. S. Vallis, this being perfect in form and finish; A. J. Loveless being second with Montigne. These were monster blooms, but hardly finished. Had the show been a week later the tables might have been turned. Thomas Proctor came in third with a well finished vase of Lady Hopetown.

It would take too much of your valuable space to enumerate all the varieties shown in each class, so we give herewith a list of some of last year's novelties which showed to best advantage in competition with the older kinds: Pres. Taft, Leslie Morrison, Pockett's Crimson, G. W. Pook, Frank Payne, Merstham Blush, Chas. Beckett, Mrs. O. H. Kahn, Mrs. C. H. Totty, Pockett's Surprise, Rose Pockett.

Some of the most prominent of the old varieties were: Mrs. J. C. Neil, Mrs. Henry Patridge, Mary Mason, Mrs. Norman Davis, H. J. Johns, Mrs. F. S. Vallis and Lady Hopetown.

In the vegetable classes, Robt. Spiers carried off first prize with a really excellent collection; Mr. Edw. Jenkins being second and F. Heremans, third. To show the excellence of the vegetables shown in this class, we have no hesitancy in saying that the third prize lot would have taken first prize in any show except Lenox.

For grapes, Mr. Carlquist carried off first honors, both for black and white, F. Heremans being second. Both showed Gros Colman in good form, being excellent in color and finish, while Muscat of Alexandria for white was exceptionally good. In fact we never saw it shown better this late in the season.

Altogether the show was worth a long journey to see. We are glad we went, and consider the time well spent.

WM. SCOTT.

Elmsford, N. Y.

THE FLOWER CITY'S FLOWER SHOW.

The first Flower Show of the Commercial Florists' Association, of Rochester, N. Y., opened at Convention Hall on Tuesday afternoon, November 2nd, with a display of floral wealth and beauty seldom seen at such exhibitions. Convention Hall was one immense, undivided garden of beauty, and the visitor was guided along paths and walks amid tropical gardens dense with palms and ferns; beds of violets and roses; and masses of chrysanthemums; bouvardias and primulas which smiled at one as he passed from one glorious view to another still more beautiful.

At the rear of the hall and reaching twenty feet toward the ceiling, a rock garden was constructed from the top of which a cascade tossed and tumbled to the little lake below. The walls of the building were covered with scenic paintings, and from the center of the roof thousands of yards of southern smilax were gracefully festooned to the supporting columns.

A part of the famous Kimball orchid collection was shown by Mrs. W. S. Kimball. These were undoubtedly the most interesting and rarest of the many beautiful exhibits.

While the orchids formed a considerable part of Mrs. Kimball's exhibit, the major part was a display of chrysanthemums.

The method of exhibiting was entirely distinct from any flower show held in the past, the plan being to make the hall a great garden, rather than a series of small booths or tables containing individual exhibits, and the success of this idea is in a great measure due to Mr. Charles H. Vick, chairman of the general committee, assisted by George B. Hart, W. L. Keller, J. M. Keller, F. L. Keller, R. G. Salter, E. P. Wilson, A. T. Salter, C. J. Brown, F. W. Vick, William Pitkin, C. B. Ogston, F. R. Schlegel, H. B. Stringer and E. A. Osborne.

The opening of the exhibition was very informal. President F. W. Vick, of the Florists' Association, introduced Mayor Edgerton, who spoke briefly and extended his congratulations. Then there was a crash of music, and from the Fifty-fourth Regiment Band's inclosure, where Conductor Fred T. Zeitler and his musicians were stationed, there came the strains of the Schlicht march, "Do It For Rochester."

In the many pergolas, leading into the miniature gardens were hung cages of canary birds.

The exhibit from the Highland Park conservatories, in charge of John Dunbar, superintendent, showed a desert of sand in which hundreds of specimens of cacti and other succulent plants grow.

An interesting exhibit showing what may be accomplished in landscape gardening in a small scale, was made by Walter Ticknor.

A complete list of exhibitors follows: A. W. Darling, Charles E. Fry, John House, Vick & Hill Company, E. R. Fry, Frank Bennett; Hiram W. Sibley, Etienne Berry; R. H. Pringle, H. E. Wilson, Thomann & Teute, George Crooke & Co., G. T. Boucher; Mrs. G. N. Perkins, John Condie, gar-

dener; Clifford & Son, George Bennett; George Eastman, William Pirie, gardener; Salter Brothers; Warham Whitney, T. Strezeski, gardener; A. M. Lindsay, John McKeown, C. D. Bonbright, Otto Graszinze, F. Kronsbein, Ed. Brockman, F. Schlegel's Sons, Charles Suhr, Brown Brothers Nursery Co., A. Rayton, Fred Teute; City Parks Department, John Dunbar, superintendent; Charlton Nursery Co.; Walter Tickner, Mrs. William S. Kimball, C. B. Ogston, gardener; George J. Keller, Ellwanger & Barry, Chase Brothers Co., E. C. Campbell, Thomas Cogger, George B. Hart, Wm. Ehmman, Crossman Bros., J. Thoman, H. C. Salmon, W. D. Oviatt, J. B. Keller Sons, W. D. Ellwanger.

Out-of-town exhibitors were: Mrs. D. M. Osborne, Auburn, N. Y.; Mrs. J. Fay Kennell, Chili, N. Y.; Wm. Scott Co., Chili, N. Y.; Chas. H. Totty, Madison, N. J.; E. D. Smith & Co., Adrian, Mich.; Mrs. F. F. Thompson, Canandaigua, N. Y.; Robert Ballantyne, gardener; A. N. Pierson, Cromwell, Conn.

THE BOSTON CHRYSANTHEMUM SHOW.

As we go to press the halls of the Massachusetts Horticultural Society present a scene of gorgeous beauty. Chrysanthemums and orchids shine resplendent in a setting of evergreens, palms and ferns, the judges are hard at work on their difficult duty and the public are thronging the open spaces, listening to the music and feasting their eyes on the scene, brilliant under hundreds of electric lights. It is a delight to the old enthusiasts to see the big trained specimen plants once again on deck. W. A. Riggs, W. C. Rust, Thos. W. Head, and James Marlborough are the rivals this year. In the groups of foliage and flowering plants covering 300 square feet, Edw. MacMulkin and T. D. Hatfield are represented. MacMulkin's is a stately production in which palms and bays predominate; Hatfield's is composed principally of pot chrysanthemums. Mrs. J. L. Gardner also has a handsome group edged with fine plants of *Selaginella Emiliania*. R. & J. Farquhar & Co. have a very extensive display of large ciphers in tubs, also Lorraine begonias and cactus dahlias in pots. In the commercial plant groups, W. H. Elliott and Wm. McGillivray are competitors, and in the other plant classes are found Martin Sullivan, E. H. Wetterlow, J. L. Smith and other local growers. E. H. Wetterlow and E. A. Richards, from Manchester and Greenfield, respectively, also James Nicol of Quincy, are entered for the Gane prizes. In the pompon classes, R. Vincent, Jr. & Sons Co., and the Bellevue Nurseries are represented by large and effective displays. The gigantic vases of 75 specimen blooms each, are as heretofore a unique feature of this show. W. W. Edgar Co., T. W. Head, James Nicol, Edw. MacMulkin, Mrs. E. M. Gill, D. F. Roy, Thos. W. Head, N. F. Conley and Wm. A. Riggs are conspicuous in this class. In the various other cut flower classes, Thomas Howden, Peter B. Robb, W. C. Ritchie, E. K. Butler, Wm. McGillivray, Mrs. E. M. Gill, D. F. Roy, Thos. W. Head, H. A. Abraham, Wm. Swan, W. N. Craig, W. S. Russell, and F. H. Kennard are all prominent contributors and the competition in vases of one specified

color is exceedingly active, there being numerous entries. The flowers from Mr. Robb and Mr. Howden, both of Whitinsville, are remarkable for size and finish, as are those from T. W. Head, who is a very large contributor.

Wheeler & Co. represented by J. Mutch, and Edw. MacMulkin, are competitors in the class for table, 50 square feet, of orchids, both beautiful. Lager & Hurrell have 25 square feet filled with orchids. Julius Roehrs Co. stage new Croton F. Sander and some choice cypripediums. Riverside Greenhouses show seedling coleus. Peter Fisher, Patten & Co., and S. J. Goddard are in with some handsome carnations. The entries for dinner table decorations of chrysanthemums are Edw. MacMulkin, Mrs. E. M. Gill and W. J. Creed. Next week we shall tell who won out.

CHRYSANTHEMUM DONATELLO

NASSAU COUNTY HORTICULTURAL SOCIETY.

The fifth annual fall show of this society, which was held in Pembroke Hall, Glen Cove, Oct. 28th and 29th, was a notable success in every way. Chrysanthemums were on a whole, much better this year than in previous years. The vegetables also were of a very high standard and the judges, in several instances, had quite a difficult task to pick the winning exhibit. A novel feature was introduced at this show by Mrs. B. Sterns—the offer of a premium for the best model of a flower garden exhibited by an assistant gardener. M. Sims, assistant for J. Ingram, landscape gardener, Oyster Bay, showed considerable skill in his model and was awarded first premium. D. Beaton, assistant for S. J. Trepass, won second prize with a very neatly executed design. Mr. F.

Moquin, assistant for G. Wilson, also showed good taste in the arrangement of his model. The principal prize winners in the chrysanthemum classes were: A. Mackenzie, superintendent for P. C. Chubb; J. F. Johnston, superintendent for P. Dava; J. Elmslie, superintendent for W. L. Harkness; W. Eccles, superintendent for M. Schiff and J. Robinson, superintendent for C. Hoyt. The blooms staged by Mr. Eccles and Mr. Elmslie were exceptionally fine. Mr. Eccles' vase of Beatrice May in the class for six white being the largest blooms of that variety the writer has ever seen. Mr. Eccles was awarded the prize for the largest bloom in the show for a flower of that variety. Mr. Eccles staged a fifty-foot group of chrysanthemums which deserves special comment—the class of stuff used and the arrangement both being fine.

Other winners of first or second prizes in addition to the exhibitors above named were: C. W. Knight, R. Cartwright, J. Ross, J. W. Everett, G. Wilson and S. J. Trepass in chrysanthemums; V. Cleres and G. Wilson in roses; J. Ingram and H. F. Matz in carnations. Other prize winners in the miscellaneous classes were H. Gant, E. R. Reidenbach, J. O'Brien, F. Pettrocia, G. Ashworth, J. Macdonald.

President Everett won the silver cup offered by Mrs. H. T. Pratt for best collection of fruit. H. Gant has the honor of having his name inscribed upon the Troy cup for collection of outdoor roses. This cup has to be won three times before becoming the property of an exhibitor. J. F. Matz exhibited a floral design for which he was awarded a certificate of merit.

The judges were Wm. Turner, Oceanic, N. J.; J. F. Huss, Hartford, Conn. and Peter Duff, Orange, N. J. J. Duthie proved an able manager.

WM. A. MACKENZIE, Cor. Sec.

MADISON (N. J.) SHOW.

The 14th Annual Flower Show of the Morris County Gardeners' and Florists' Society was a success in every way. The attendance was considerably larger than on any other like occasion. What we have been working for so long, is to awaken public interest, and it looks as if the time is fast coming. Several automobile parties came a distance of 40 miles just to see the show. The show itself was very satisfactory—the quality of the flowers and the way they were arranged.

There were fewer chrysanthemums than in other seasons, but what was wanting on this end was more than made up in roses and carnations. There was never shown in any place a finer lot of either.

Lager & Hurrell had a very choice collection of orchids, and Harry Turner had his *Celosia* "Castle Gould" in fine shape. He brought two seedling chrysanthemums from Lenox, one well-named "Big Bill Taft" and the other the "Suffragette." Some of the ladies thought it was too nice a flower for the name. C. H. Totty says, "It is all right for she has two or three mean habits." Duckham's central group was, as always, a feature, and the committee of arrangements deserve great credit.

E. R.
The list of awards at this show is held over, for lack of room, until next week when it will appear in full.

NEWS OF THE CLUBS AND SOCIETIES

HORTICULTURAL SOCIETY OF NEW YORK.

The regular monthly meeting of the society will be held at the American Museum of Natural History, 77th St. and Columbus Ave., N. Y. City, at 4 p. m., on Wednesday, November 10th, 1909. The Chrysanthemum Society of America will be holding its meeting in N. Y. City at that time, and in view of this fact it was thought appropriate to devote this meeting of the Horticultural Society to that popular flower. A paper will be presented by Mr. W. H. Waite, one of the most successful growers of the chrysanthemum, followed by a general discussion by others.

Facilities are available at the American Museum of Natural History for the display of cut flowers and plants, and those having choice or unusual specimens are requested to bring them to the meeting. A hearty invitation is extended to all, especially to those who may be visiting N. Y. City, to attend this meeting and join in the discussion. All are welcome. This will give an opportunity to those, who are not familiar with the American Museum of Natural History, to see what a fine building and admirable facilities are at the disposal of the Horticultural Society of New York, not only for the holding of its monthly meetings and exhibitions, but also for its large exhibitions. The building is easily accessible from all parts of the city, and this will probably appeal strongly to visitors. For the benefit of visitors it may be stated that the American Museum of Natural History may be reached by subway, the elevated lines on 6th and 9th avenues, and by surface lines on 8th and Columbus avenues.

AMERICAN CARNATION SOCIETY.

The following varieties have been entered in our new section thus far: Mrs. J. C. Vaughan, Pink Delight, Mrs. Chas. Knopf, Ruby, Mayday, O. P. Bassett, Wanoka, Apple Blossom, Georgia, Bay State, W. H. Taft, Gov. Dineen, Alvina. Each variety will constitute a class by itself, for which the disseminator offers a first premium of \$6.00 and a second premium of \$4.00.

In each class 50 blooms are to be shown, except in the class for Alvina, which calls for six plants grown in not over 8 in. pots.

Anyone wishing to offer other special premiums, should forward full particulars at once, in order to reach me before the premium list goes to press.

A. F. J. BAUR, Sec.

Indianapolis, Ind.

FLORISTS' CLUB OF WASHINGTON.

At the meeting of the Florists' Club on November 2nd, there was an unusually large attendance. The main interest of the meeting centered in the approaching flower show. All are striving hard to make this the "finest ever." The subject of street fakirs was again taken up, and the secretary was instructed to write to the commissioners, asking whether or not the department stores have a right to sell flowers without a regular florists' license.

A motion was carried to invite the Baltimore florists over for Tuesday night, November 9th.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Registration of Chrysanthemums.

Public notice is hereby given that Samuel Cockburn and Sons, of Woodlawn, New York, N. Y., offer for registration the plant described below. Any person objecting to the registration or to the use of the proposed name is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Description—Grows about two feet high. Can be cut 1st to 5th of October; dark green foliage. Parentage—Glory of Pacific. Color, mauve pink. Size of flower, about 5 inches. Originated with us about four (4) years ago. (The Chrysanthemum Society of America passed on this in New York, Philadelphia and Cincinnati in 1908 (Fall)).

Name—Dr. Frederick A. Cook.

W. N. RUDD, Secretary.

Date—October 30, 1909.

FLORISTS' CLUB OF PHILADELPHIA.

At the meeting of this club on Tuesday evening last two vases of White Killarney rose showing strong and vigorous growth were exhibited by the S. S. Pennock-Meehan Co. These were grown by the A. N. Pierson Co., Cromwell, Conn.

Joseph Heacock and Edward Towill gave a description and history of the new Dorothy Gordon carnation. The committee reported on this carnation as follows:

Joseph Heacock Co. exhibited two vases of Dorothy Gordon carnation. Flowers $3\frac{1}{2}$ to 4 inches in width; stems 24 inches and over. Good pleasing color, a shade of pink similar to Rose Pink Enchantress, but more uniform and larger and better substance. The flowers in one vase were four days old and they were in fine condition, which speaks well for the keeping quality. The stock seems very clean and healthy. Dorothy Gordon is without doubt a splendid commercial variety.

(Signed)

LEO NIESSEN,
ROBERT KIFT,
Committee.

Chas. H. Fox will read a paper at the next monthly meeting of the club, the first Tuesday in December.

ST. LOUIS HORTICULTURAL SOCIETY.

Flower Show.

At the Coliseum on afternoons and evenings, November 9th to 12th, will be held the greatest Flower and Pomological Display ever made in St. Louis. Many novel and picturesque effects. Concert every afternoon and evening by Poepping's Band.

There has been donated by the Mermod Jaccard & King Jewelry Co. a silver cup for the best 100 chrysanthemums, "any variety." The chrysanthemums as well as the American Beauties are to be staged the first day of the exhibition, November 9th.

Will all members of Ladies' S. A. F. and other visiting ladies to the St. Louis Flower Show come to Miss M. Meinhardt at the Coliseum Building, Tuesday, November 9th, 2 to 5 and 7 to 9 p. m., as she wishes their names.

CHRYSANTHEMUM SOCIETY OF AMERICA.

It is Mr. Thomas Proctor of Lenox, Mass., not Mr. David Fraser, as previously announced, who is to present a paper on "Pot-Grown Chrysanthemums for Exhibition Cut Blooms" at the New York meeting of the Society.

Work of Committees.

New York—Oroba. Jap., white. Exhibited by Elmer D. Smith & Co., Adrian, Mich., 86 points. Certificate.

Cincinnati, Ohio—Same variety. Same award.

Cincinnati, Ohio—Donatello (exhibited in 1908 as No. 36-41) Jap., yellow. Exhibited by Elmer D. Smith & Co., 88 points. Certificate.

Madison, N. J.—Mrs. W. Arnold, Jap., white. Exhibited by C. H. Totty, 88 points. Certificate.

CHAS. W. JOHNSON, Sec'y.

A VISIT TO ELMER D. SMITH & CO.

Good delegations from the Detroit and Toledo Florist Clubs visited, on invitation, the noted establishment of Elmer D. Smith & Co. at Adrian, Mich., on October 30. Those who went were well repaid for the trip. They found the chrysanthemums about two weeks later than last year. There were many promising novelties to be seen, especially among the Pompons. The inner man was well taken care of.

CHRYSANTHEMUM SEASON AT PITTSBURGH.

The chrysanthemum season opened in Pittsburgh, September 17th, with exhibitions at the Frick and Peacock Conservatories. At the Frick greenhouses D. Fraser has a display which as usual is perfect in arrangement and exceptional in quality. The chrysanthemums are the chief attraction, and while many of the flowers are as yet undeveloped, there are many very fine large blooms. The early buds this season have proved somewhat disappointing, many very fine, healthy, vigorous stems, with splendid foliage, producing gigantic buds which, when open, develop short-petaled flowers. With some varieties this is not the case, the early buds on such varieties as Mrs. Trainter, Reginald Valis, Beatrice May, Wm. Duckham and many other standbys being particularly fine. The later buds give promise of a fine display. In the other sections fine effects are obtained by the skillful arrangement of foliage plants—ferns, cattleyas, begonias, oncidiums, primulas, and many other things, all of which Mr. Fraser knows just how to arrange to produce the effects which are always a unique characteristic of the H. C. Frick exhibitions.

In spite of a severe hail storm in August, which broke nearly all the glass and defoliated many of the plants, the exhibition at the Peacock greenhouses contains some very fine chrysanthemum flowers of exceptional size and quality. Very fine blooms were noticed of President Viger, Lillian Coffard, Yellow Miller, W. H. Moir, Lady Hopetown, O. H. Broomhead, Mrs. Geo. Hunt, Mrs. Henry Part-ridge, Reginald Valis and Mrs. J. H. Trainter. The last named Supt. Jenkinson thinks the most useful white at present in cultivation. Many new varieties are shown, amongst the finest being C. H. Totty, dark bronze, G. W. Pook magenta, Rose Pockett yellow, Mrs. C. H. Totty shell pink, Pockett's Surprise deep crimson, Leslie Morrison crimson, Pockett's Crimson, and Mrs. O. A. Khan, yellowish bronze. Many other good things are found here. Some well-flowered Cattleya labiata, arranged with highly colored crotons and ferns on the centre bench in one of large compartments with chrysanthemums on the sides from which the benches have been removed, give a charming effect.

In the growing houses are some fine cyclamens, Calanthe Veitchii in fine shape, showing many strong flower spikes. There is a house of tea roses nearly filled with "My Maryland" which certainly is the rose for Pittsburgh. The foliage is entirely free from mildew, the stems and necks strong. Foreman Alex. McLeod, as an object lesson on the immunity of this variety from mildew, called our attention to a side bench of White Killarney in the same house badly affected.

The magnificent greenhouses of H. J. Heinz were opened to the public, October 24th, with the finest display of chrysanthemums and other flowers ever seen in these greenhouses. Since the spring exhibition a considerable addition has been made to the range, making it one of the best equipped establishments in the district. The new

MR. BUYER Make Yourself Familiar With THE BEST

Our stock is exceptionally fine this season and we can assure you of the very highest quality in the plants listed.

CROTONS, 4 in., \$25.00 per 100; 5 in., \$6.00 and \$9.00 per doz.; 6 in., \$9.00, \$12.00 and \$15.00 per doz.; 7 in., \$24.00, \$30.00 and \$36.00 per doz.; 8 in., \$3.00 and \$4.00 each.

ROBERT CRAIG CO., 4900 Market St. PHILA., PA.

ROEHRS, RUTHERFORD N. J. LORRAINE BEGONIAS

glass, which, like the older sections, is of U-Bar construction, consists of a roomy show-house, a peach-house, grapery, plant-house and connecting corridor. A new work room, office, etc., has been added, and under the plant and show houses is a large concrete cellar with every convenience for handling and storing large bay trees, a mushroom cellar, flower rooms, storage, etc. Outdoors are concrete heated pits and frames for every conceivable purpose. The arrangement of each compartment has been carefully planned. Cellars, work-rooms, office and greenhouses are all fitted with electric lights. Three large Lord & Burnham boilers heat the whole range.

The chrysanthemums are fine; many of the new as well as standard varieties are represented by well developed flowers. Amongst the best noted were: O. H. Khan, Leslie Morrison, Yellow Miller, President Taft, Mrs. Geo. Hunt, Edith Smith, Reginald Valis, Dorothy Eady, O. A. Broomhead, Mrs. Trainter, Dazzler, and Brilliant. The last named makes an excellent bush plant. The show-house was skillfully arranged, the centre bench of Cattleya labiata and Oncidium varicosum amongst superb plants of Adiantum Farleyense giving a charming effect. In the same house a combination of Lillium Harrisii, begonias, Amaranthus salicifolia, Strobilanthes Dyerianus, ferns, lily of the valley and other useful things were used to advantage. Begonia Vernou gracilis as an edging plant is very effective. In this compartment we noticed a magnificent hanging basket of the rare Polypodium Knightii. A novel feature of the exhibition was one of the corridors filled entirely with plants in fruit. Tomatoes and peppers

of various shapes and colors, Solanum capsicastrum, Ardisia crenata, and oranges were arranged with telling effect.

In the palm house are some noble plants, amongst which we noticed a fine basket of Polypodium subauriculatum, better known as Goniophlebium subauriculatum. The other sections contain many evidences of the skill of Supt. John Featherstone and his staff of assistants. J. HUTCHINSON.

BUSINESS CHANGES.

St. Paul, Minn.—Wm. Swanson has bought the greenhouses of Carl Haugen.

New Britain, Conn.—C. A. Parker has purchased the Traut greenhouse property.

New Haven, Conn.—F. H. Kimberly has disposed of his greenhouse property to Charles Munro.

Willoughby, O.—The greenhouse establishment of H. R. Carlton has been sold to Jas. B. Knight and A. B. Wilson.

Beatty, O.—The Fairview Floral Company establishment has been sold at receiver's sale to the Geo. H. Mel-len Co. of Springfield.

Westfield, Mass.—Henry Barton has sold his florist business at 58 Elm street and his greenhouse on Noble street to C. H. Jacobs, who will take possession Nov. 1. Mr. Jacobs is already in the florist business, having his greenhouse on Smith avenue. Mr. Barton first started in business nearly 9½ years ago, and has built up a large business. He has made no definite plans for the future.

Come and See DOROTHY GORDON

growing and judge for yourself of its good qualities.

Orders for 60,000 R. C. have been booked without spending anything for printers' ink.

DOROTHY GORDON is beyond question the best commercial pink carnation in sight today. Its pedigree, *Lawson on Enchantress*, alone should recommend it to every carnation grower, but pedigree is by no means its chief merit. It possesses many of its own, such as

- 1st Vigorous constitution and freedom from disease.
- 2nd Size. Blooms average over 3 inches, of excellent form.
- 3rd Color. Resembles Rose Pink Enchantress, but is superior to that variety in being more uniform.
- 4th Long stiff stem.
- 5th Fragrant.
- 6th Keeping qualities of the best.
- 7th Blooming qualities 30 per cent. better than Enchantress.

We had a stock of 6,000 plants last season. The flowers were all sold at the holidays to the trade in Philadelphia at \$12 per 100 and uniformly sold for 50 per cent. more than we got for Enchantress during the rest of the season.

DOROTHY GORDON will be disseminated during the winter of 1909 and 1910 at the popular price of \$10.00 per 100, \$75.00 per 1000. Strictly on its merits. No carnation grower can afford to be without it. Come and see it, examine our books, and decide for yourself. It must be sold on its merits or not at all. Orders filled in strict rotation.

Joseph Heacock Company, Wyncote, Pa.

AMERICAN NURSERYMEN'S ASSOCIATION.

John Hall, who has been secretary of the Western New York Horticultural Society for the past twenty-one years, has been appointed secretary of the National Nurserymen's Association to fill the vacancy caused by the resignation of George C. Seager. Mr. Seager has been secretary since 1894. Mr. Hall is well qualified to fill the office and the appointment is considered a good one by the members of the Association.

The lateness of the chrysanthemums this year has caused the Detroit Florist Club to change the date for its show to November 19. "Why are florists averse to commercial bookkeeping?" was a query drawn from the question box at the last meeting of this club.

Seed Trade

About Wholesale Prices.

The Wholesale Seedsmen's League prices which have been issued confirm fully the forecasts in last week's Seed Trade Notes. The advances predicted on the general line of garden peas have materialized in full, and it is quite generally recognized by leading leaguers that prices must go higher on many lines, for as one remarked about the present prices, "It is the first step, and we don't want to make it too long. Wait until we fix prices for the January lists." It is doubtful if peas will go much higher, but beans are likely to, and many items in melons, squashes and pumpkins, and possibly cucumbers, but from all information obtainable, there seems little justification for any marked advances in cucumber seed. It is thought by many that onion seed is priced too high. However this may be, there is time to correct any errors either way, before prices are finally fixed for the annual wholesale lists. It should be remembered that wholesale dealers are really only feeling their way at this season of the year or earlier, and are without sufficient data to be sure of their ground. By December they will know pretty nearly where they are at.

Offerings of peas are drying up. One large jobbing house has withdrawn offers on a number of important varieties, and asserts it will soon be sold out of every bushel of available surplus of all varieties. Those seedsmen, mainly retailers, who are always trailing the market, and ever from 50c. to \$1.00 per bu. on peas under current prices, are likely to meet with a disagreeable surprise when they really decide to buy. Such people almost invariably have to pay more, but this time it will not be so much a matter of price, as of getting reliable high-grade stocks. It is the system of "saving at the tap and losing at the bung." But it was ever thus, and will long continue the same.

For the Good of the Trade.

The warning to the seed and canning trades in last week's issue against buying any of the so-called "Farmers' Alaskas," a wild and degenerate type of peas grown by the farmers of Wisconsin, seems to have aroused certain parties to a defense of this stock, and angry criticism of the writer. It is pleasing to note that not a firm of high reputation has thus far expressed any but sentiments of warm approval of what we said, and as we are not making any strenuous efforts to please the former class, we shall go our own way, repeating the warning as often as may seem advisable. We may add in passing that it is the wounded bird that always flutters. There is no desire to break down the disclaimer, but it must not serve as a covert behind which to hide from the results of disreputable practices, and it would be a fine stroke of policy for the American Seed Trade Association or the Wholesale Seedsmen's League to go on record in this matter. Let it be known of all men that the disclaimer is to protect the honest seedsmen against unfounded claims, "strikes" and blackmail and not to give the fakir and humbug immunity. If our law-makers understood this better, there would be

less disposition to enact hostile legislation. Against such laws as that enacted by the State of North Carolina last year, the disclaimer is useless, unless each and every purchaser of seed can be induced to sign a waiver of the rights conferred by this act. This is a weighty and vital problem for the Seed Trade—the disclaimer, and its effect and relation to such enactments as those of North Carolina. The trade surely cannot afford to countenance its employment to defend flagrant violations of the law of common business honesty. But more hereafter.

Notes.

L. C. Matthews has opened a new grass seed house at Kimmund, Ill.

Hamilton, O.—The Gray Flower & Seed Store has opened for business at 151 N. 3rd street.

Omaha, Neb.—The Nebraska Seed Co. will build a two-story addition to its warehouse at 1208 Jones St., costing \$8,000.

Large-sized Longiflorum Giganteum lilies are very scarce, and there is considerable scrambling among the dealers to fill orders.

Yankton, S. Dak.—The Gurney Seed Co. has purchased the Yankton Nursery, which for years has been conducted by C. W. Gurney.

Hjalmar Hartmann, seed growers and exporters, of Copenhagen, Denmark, have sent out a handsome wall hanger, giving a life-size colored representation of Extra Earliest Dwarf Snowball Cauliflower.

Jersey City, N. J.—A two story seed house at Fifteenth and Provost streets, owned by Jacot & Mullen of 1 Water street, New York City, was damaged by fire on October 28 and \$50,000 worth of grass and other seeds destroyed. The firemen poured water on the burning seed bags for nearly four hours. The loss will aggregate \$70,000; insured.

TRADE NOTES.

Washington, D. C.—John H. Small,
president of the Board of Trade, and
Wm. F. Gude, president of the Cham-
ber of Commerce, were appointed joint
chairmen of a committee to entertain
the fifty-six members of the Japanese
nobility, who have been "doing" Wash-
ington the past week. The sightseers
visited Mt. Vernon, where they placed
a very handsome wreath made of
bronze magnolia leaves, lily of the val-
ley and orchids at the tomb of George
Washington.

F. H. Kramer is moving back into
his old quarters on F street, which
have been entirely remodeled and im-
proved.

Detroit, Mich.—A tone of general
satisfaction prevails in the trade. The
demand is good and the supply keeps
up well. Carnations still show some
backwardness, but having a good sup-
ply of chrysanthemums of all grades
this has no bad effect.

PORTRAIT OF W. G. MATTHEWS.

This is the portrait of W. G. Mat-
thews, proprietor of the Dayton Floral
Company, Dayton, Ohio. Mr. Mat-
thews has been established in Dayton
since 1883. He has 20,000 sq. ft. of
glass, and runs a city store at the
Phillips House, 16 W. Third street. As
stated in his advertisement, he can fill

orders for flowers and designs in good
shape, in any part of southern Ohio.

PERSONAL.

Miss Elsa Bertermann, daughter of
John Bertermann, and Arthur Hotch-
kiss were married at Indianapolis,
Ind., on Oct. 21.

J. Fred Dawson of Olmsted Bros.,
has gone to Seattle, Wash., on impor-
tant business in connection with the
disposition of the Exposition grounds.

Walter B. Ridgeway, after having
been engaged for the past year and a
half in planting at the Alaska-Yukon-
Pacific Exposition, has returned to the
employ of the Eastern Nurseries, Ja-
maica Plain, Mass.

William J. Moore has been appoint-
ed manager of the Washington branch
of the Pennock-Meehan Co. and en-
tered on his duties November 1st. Mr.
Moore will undoubtedly give a good
account of himself in the new field.

Charles W. Cox has been appointed
to succeed Edwin Lonsdale as super-
intendent of gardens and grounds at
Girard College. Mr. Cox was garden-
er at the Penna. Hospital, Philadel-
phia, and previously had been in a
number of commercial and private
places. He is a man of fine experience
and a good grower.

A pleasant surprise was tendered to
James Salter, the genial president of
the North Shore Horticultural Society,
and also ex-Governor of the Jeffry
Colony United Order of Pilgrim Fath-

ers, on Tuesday evening, November 2,
at his home in Manchester, Mass., by
the Jeffry Colony and members of the
Society, the occasion being the anni-
versary of his birth. Dr. Tyler, in his
genial way presented him with a gold
chain and chain on behalf of his
friends in the Horticultural Society.
and Pilgrim Boyle presented him with
a beautiful easy chair. Mr. Salter was
much overcome, but managed to thank
his friends very feelingly. Refresh-
ments were served. The evening was
pleasantly spent with appropriate
speeches, also music and dancing, un-
til the clock struck the midnight hour.

THE WHOLESALE FLORISTS OF

1608-20 LUDLOW ST.,

PHILADELPHIA, PA.

1212 New York Ave., WASHINGTON

Flower Market Reports.

The state of the market in Boston this week may be told in one word—slump. Warm weather and other contributing causes are to blame and there is no remedy but patience. Roses of all varieties are abundant and even first-class Beauties are given the unwelcome privilege of standing in the wholesalers' ice boxes until by reason of senility they become candidates for the old roses' home—the fakir's "hole-in-the-wall." Carnations are also down in value, although up in quality. Lily of the valley—finest ever—is in the same trouble. Chrysanthemums are in their height just now and are in part responsible for the trouble. They are selling low. So are violets and cattleyas.

Trade still continues active and there is plenty of everything in the line of cut material. Chrysanthemums came in more plentifully and thus far have moved at a good pace and at good prices. Sunday and Monday the temperature rising to 70 caused roses to come in full open and at time of

mailing this report (Tuesday) we are again loaded with material of all kinds, especially roses. Carnations are coming on more freely, select stock

selling on sight. It is hoped that cold weather will soon come upon us, not alone to moderate the supply but to accelerate the demand.

Flower Market Reports.

(Continued from page 651)

CHICAGO The retailers have all they can do this week, which means that the wholesalers must also be very busy. A great abundance of chrysanthemums is the special feature of the market, and while prices are a little lower than the grower likes, the consumer is inclined to look at it with satisfaction. All other blooms can be said to be in about the right proportion to the demand, though carnations are still far from plentiful. The great topic of interest is of course the flower show, which demands every moment that can be given up to it. Some of the florists who have exhibits are finding it extremely difficult to get time to attend to their booths on account of the unusual amount of business this week.

" " & Spreng. (100 bchs).....	12.00	to 20.00	12.00	to 20.00

Trade conditions are of the best and from present indications will keep booming. While there is no general advance in prices worthy of note the best quality in the different lines bring top-notch prices. This is most noticeable in fancy Beauties and chrysanthemums. The quality of the latter is all that can be desired. The majority of stock is equal to show blooms. The single varieties have taken a strong hold and are grown and handled in large quantities. Mid-winter quality of carnations is already seen. Orchids, lily of the valley, sweet peas and violets are much used at the present time. Harrisii lilies are not in heavy demand, but good stock is procurable in quantities.

We are getting all
NEW YORK we ever get here in election week. Add

to this the warm temperature and the situation will be apparent to any one who is familiar with New York's flower market history. Stagnation and accumulation of stock is the condition most in evidence, but there is considerable activity in retail lines and it will require only a little fortitude on the part of those who are puzzled and all prospects are hopeful for the near future. Chrysanthemums are making the usual fuss and they are not getting much out of it themselves; while making the road a rough one for their floral fellow-travelers.

Flower Market Reports

(Continued from page 653)

PHILADELPHIA

The improved trading conditions continued the past week and the market has been very satisfactory. Compared with the same date a year ago, all the experts agree that present season is away ahead. There is a rising tide in chrysanthemum receipts—quality of the highest—with Appleton, Eaton and Yellow Eaton among the leaders. Prices so far have been good and better returns will accrue to the growers than for the past five years, unless the bottom drops out of the remainder of the season. There is no marked change in the rose situation. Carnations have been good for some time as to flower, but short as to stem. This defect is less apparent this week, and it will only be a short time when this staple will be showing its proper form. Orchids are much scarcer and prices have hardened considerably. There are now a few cypripediums coming in from local sources. Violets are not plentiful; but enough for the demand—as there seems to be no strong desire for these so far. Local sweet pea crops are just commencing, and there is also a limited supply of good mignonette and bouvardia.

TWIN CITIES

been good right along. Chrysanthemums are coming along fine, plenty and good. There was quite a demand for them on October 30, when Chicago and Minneapolis had their football game, which was attended by over 10,000 persons. Violets are scarce yet.

WASHINGTON

Carnations have responded to the beautiful weather, and the best ones shown now are equal to the regular grade of winter flowers. There has been a marked scarcity of roses during the past week, especially in the yellow varieties, only one retail store in town having any of the latter, and they not of the best quality.

Obituary.

George D. Henson.

By the death of George Dowell Henson, one of the oldest and most reliable salesmen in the employ of Joseph Breck & Sons, Corporation, New England loses not only an able and highly esteemed seedsman, but also a man whose life history is an example of what industry and integrity can accomplish.

Mr. Henson was born a slave on a southern plantation sixty-eight years ago; his early life was one of hardship. Twice before he was seventeen he ran away—the first time he was captured and taken back; the second, concealed in a load of hay he escaped into the ranks of the Union army, where he became the body-servant of General McClellan. After the war he came to Boston and worked as a

GEORGE D. HENSON

freight hand in the old Fitchburg station. When his hard day's work was over he went to evening school, where all his education was acquired. In 1878 he entered the employ of Joseph Breck & Sons, where he learned the seed business thoroughly and for the past thirty-one years labored faithfully for the best interests of the firm. He was an honored and beloved member of the African Methodist-Episcopal Church, in the various societies of which he was throughout his life an energetic worker.

His loss is felt by all who knew him; he was loved and trusted by his employers and by all his fellow-employees. His many customers, who would "do business" with no one but "George," will miss him. His reputation for kindness, honesty and absolute trustworthiness might well be envied by people of his own and of every other race.

Percy Jones.

Only those who have known him long and intimately realize the loss the Chicago florists have met with in the death of Percy Jones. Still in the prime of life, he passed away on Saturday, Oct. 23, after a brave strug-

gle for life. Mr. Jones' intimate friends have known for some time that something was undermining his constitution, and his air of abstraction noticed frequently in business and sometimes mistaken for a lack of sociability, was the working of the slow poison that was to result in his death. Percy Jones was born in Canada, forty-six years ago. His father and grandfather were English clergymen, and since his father's death, when he was but fourteen, he had made his own way in life. He early entered the employ of the Northwestern R. R. and rose to the responsible position of auditor, but the strain of business life proved too much for his health and he was obliged to seek another climate and spent some time in Florida and Alabama. Six years ago he started in the Flower Growers' Market, and one year later was elected manager, and during the five years he has held that office he has placed that business on a secure footing and had bright prospects for the coming season. He leaves a wife and three brothers.

There was a profusion of beautiful floral designs and the choicest blossoms of the greenhouses were there to an extent that makes enumeration impossible, but among them was a design by the Flower Growers' Market in the shape of a large floral vase bearing long-stemmed American Beauty roses. The pall bearers were Geo. Walther, John Sinner, Chas. Klehm, Mr. Ryan, A. Garland and H. Clifton.

Mrs. Lily Garland Jones is a sister of the Garland Bros. of Des Plaines and of Mrs. Fred Wittbold. The family have the sincere sympathy of the trade for the double bereavement. But one day previous to the death of Percy Jones at the University Hospital, Josephine Garland, only daughter of Geo. M. Garland of Des Plaines, Ill., passed away after an illness of over a year. She had a sweet disposition, and her parents and two brothers will keenly feel their loss. She was born in Chicago 23 years ago, but lived most of her life in Des Plaines. The funeral occurred Sunday, Oct. 24, and she was laid at rest in the family lot at Park Ridge, where the following day the same family were called to follow the remains of Percy Jones.

John H. Beach.

John H. Beach, who until his retirement from business fifteen years ago conducted an extensive florist business in Bridgeport, Conn., died on October 29, at the age of 85 years. His death resulted from a fall which he had two weeks previous. He is survived by his widow, one daughter, and two sons, one of the sons—James E. Beach—being engaged in the florist business in Bridgeport.

Pasadena, Cal.—The effect of the quarantine against plants shipped in from outside states was felt in Pasadena a few days ago when Horticultural Inspector Thorndike condemned a valuable shipment of tropical plants from Florida. The shipment, which was sent to a local nurseryman was consigned to the flames and Pasadena was saved from a possible infection of the dreaded white fly, or purple scale, so prevalent in Florida.

NEW ORLEANS NOTES.

Trade is picking up considerably now in the stores. Nearly all the pleasure-seekers are home, and flower buying is quite brisk. Very few local chrysanthemums are ready to cut yet, and the retailers have to get much of their supply from northern points. The quality of these so far has only been very middling. The flower-buying public in this city will pay the highest price, but they demand the best quality, and all second quality flowers move slowly. Social gaities are not very active yet, but fall openings by several large department stores have used large quantities of palms and cut flowers. The Metairie Ridge Co. had two large openings last week that called for some of the largest and finest palms in the city. Arecas and kentias, 10 to 12 feet high, were used profusely as well as bay trees, cut flowers and golden rod grown in boxes. U. J. Virgin had a big opening which used up over five hundred palms. A central feature was a large Fleur de Lys design fully 6 feet high, made of carnations, chrysanthemums and tuberose. C. Eble's new store under the Grunewald Hotel is as fine as anything in town.

The growers are busy on the chrysanthemum crop at present. The amount of work these flowers call for here makes a fancy selling figure a necessity. Thrips, red spider, aphids and mealy bug have to be fought right up until the time the flower is out. The crop this year is about the average, and the supply will about meet the demand. The largest part of the crop is grown in the open ground, and as soon as the flowers show color they are covered with cotton or sash to protect them from the heavy dews. Very creditable flowers are produced in this way, although the finish is not equal to those grown in houses all summer.

On invitation from Mr. Papworth, the members of the New Orleans Horticultural Society visited the greenhouses of the Metairie Ridge Nursery Co. on the afternoon of Sunday, the 24th, for the purpose of inspecting the stock. The display of chrysanthemums was superb, roses, palms, ferns, begonias and orchids were in fine shape, and Mr. Papworth was congratulated on his success. Refreshments on a liberal scale were provided in a portion of the large shed screened from the vulgar gaze.

The market men are not doing a great deal these days. J. H. Menard, one of the old guard, attends market the whole season and is unique in that he never complains about poor business. He grows a miscellaneous stock and makes a specialty of Ficus repens, which he raises from layers by the thousand, and yet has difficulty in supplying the demand. This vine is used here with fine effect for the same purposes as Ampelopsis Veitchii is used for in the north.

Geraniums in the gardens have been largely killed out this summer and the market men are anticipating and preparing for a good demand for this flower in the spring.

B. M. Wichers of Gretna reports that he has just completed the shipping of orders he took at the recent convention in Cincinnati.

HELP WANTED

WANTED—Buyers and agents to sell our cement block and fence post machinery. Send for circulars and prices. Address W. L. Keller Cement Block Machine Co., Kearney, Neb.

WANTED—Two reliable greenhouse men, good potters and understanding the work of a plant growing establishment generally. Good pay to the right men. Wm. W. Edgar Co., Waverley, Mass.

WANTED—First class propagator of carnations and general stock. Pay, \$60 a month. C. J., care HORTICULTURE.

MISCELLANEOUS WANTS

NOTICE TO ENGINEERS AND LANDSCAPE GARDENERS.

San Antonio, Texas, Oct. 6, 1909.
The City of San Antonio invites competitive, suggestive plans for platting, designing and beautifying a new City Cemetery to be known as "Mission Cemetery." Topographical maps of the tract of land upon which said cemetery is to be established can be seen in the office of the City Engineer.

A cash prize or premium of Five Hundred (\$500.00) Dollars is offered for the best and most acceptable plan, a cash prize or premium of Three Hundred (\$300.00) Dollars for the second best plan, a cash prize or premium of Two Hundred (\$200.00) Dollars for the third best plan for so platting, designing and beautifying said cemetery, which prizes above mentioned will be awarded upon the recommendation of the Mayor and the Cemetery Committee of the City Council, who reserve the right to reject any or all plans submitted, and whose decision as to the award of said prizes or premiums shall be final.

All plans for which prizes have been awarded become the property of the City of San Antonio.

All plans must be securely sealed, addressed to the "Cemetery Committee of the City Council, San Antonio, Texas," and be submitted on or before 11 A. M., January 6th, 1910.

BRYAN CALLAGHAN, Mayor.
Attest: FRED FRIED, City Clerk.

WANTED TO BUY—Greenhouse property containing from ten to twenty thousand feet of glass and about ten to twenty acres of land, within 25 miles of Boston. 29A Locust St., Everett, Mass.

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

FOR SALE

GREENHOUSE PLANT, 12 miles out, 39,000 feet. 9 room 2 story house all imp., 225 feet greenhouses, hot water heat. Assessed \$6700. Price \$6000, \$2100 cash. W. W. Hodge, 8 Grand View Ave., Somerville.

GREENHOUSE PLANT, 25 acres, 30 miles out, good market, 1st class condition. \$3200, \$1700 down, bal. easy, lumber will bring over \$1700 right in town, low taxes. W. W. Hodge, 8 Grand View Ave., Somerville.

FOR SALE—Special 16x18 and 16x24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSELSKY BROTHERS, INC., 90 Montrose Ave., Brooklyn, N. Y.

FOR SALE—At Southampton, L. I., 1/4 acre, 8-room house, hot house, 100 ft. long, and barn. All newly painted and in good condition. Easy terms. Inquire Pacific Paint Co., 27 Sixth Ave., Brooklyn, N. Y.

FOR SALE—Greenhouse property, with stock and all; 12,000 sq. ft. glass, 1 1/2 room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland, Ohio.

TO LET

TO LET—Part of large store with large basement. Situated in the center of the wholesale florists' trade. Good opportunity for florists' supplies, green goods, Ferns, etc., or any business connected with the florist trade. Address Manhattan Flower Market, Wholesale Florists, 46 West 28th St., New York City.

CHICAGO NOTES.

The Exhibition.

For eighteen years Chicago has had an annual flower show that has done her credit, and this year is one of the best. As a reward for those who send their treasures for exhibition there are between four and five thousand dollars to be distributed. Besides this the opportunity for advertising is greater than in perhaps any other city, as Chicago is so centrally located that it draws from all sides of the country.

A single idea prevails throughout the whole, making a harmonious, pleasing effect. A Japanese garden with winding walks through sodded lawns, pagodas, rustic bridges, towering palms, huge beds of decorative stock and specimen blooming plants made a scene delightful beyond description.

Surrounding the Japanese garden are the booths by the retailers, showing how flowers may be used to best advantage in decorating for weddings, receptions and other occasions. The home owner has new opportunities for learning how to adorn his grounds, for City Forester Prost lectures each evening, telling how to beautify the yards and vacant lots. Visitors are supplied free with pamphlets on this subject.

Among the roses the lovers of that flower are trying as usual to find something which will surpass the American Beauty.

The predominating flower, of course, is the chrysanthemum. Thousands upon thousands of blooms, in all classes large and small, delight the eye on every side.

Among the Growers.

The Wittbold Co., whose business comprises out-door planting and landscape work as well as indoor decorative, recommend the fall planting of shrubs as they become well established during the winter. They have recently gotten out for their customers' use a folder with fall and spring scenes and suggestions for planting. The firm of Geo. Wittbold Co. consists of Geo. Wittbold, the founder of the business fifty-two years ago, and who is still actively in it, and his four sons, Louis, the manager, Otto, who is in charge of the place at Edgebrook, and Fred and Henry, who divide the decorating work between them. Among their yearly contracts are the floral decorations for Marshall Field and Carson Pirie Scott.

The Disposition of Old Wire Frames.

For some time past the disposition of old wire designs, wreaths, etc., from the cemeteries in and about Chicago has been a vexed question and people have viewed the matter according to the way their personal interests lay. The Cemetery Association has assumed the ownership of all the designs placed on the graves and instructed the sexton to remove them after a certain number of days. No one seems to have objected so far, but it is right at this point the disagreement begins. The Board of Health has long claimed that these moss-filled designs, having often been used where death has occurred from contagious diseases, should be destroyed. The sextons have been in

the habit of selling them back to the city florists for a nominal sum, and in order to prevent this an ordinance has been drafted by the Assistant Corporation Council and was introduced at the last meeting, prohibiting the sale of these designs, wreaths, etc., within the city limits.

Wholesale Employees' Ball.

Success crowned the efforts of the managers of the fourth annual reception given by the Wholesale Florists' Employees' Club, Wednesday evening, October 27, at Columbia Hall, Chicago. The attendance was large and nearly 100 couples enjoyed the dancing till the wee sma' hours. The decorations were by the Geo. Wittbold Co.

Personal.

The wedding of Edgar B. Washburn of Hinsdale, Ill., and Miss Belle Story, of Riverside, Ill., took place on Oct. 20 in St. Paul's Episcopal church at Riverside. Samuelson had the decoration, which consisted of white chrysanthemums at the chancel and white roses at the altar. The rest, with the exception of the pews for the relatives, was done in wild smilax and palms. The bride's bouquet was lily of the valley. Mr. Washburn is the son of C. L. Washburn and grandson of O. P. Bassett, comprising the firm of Bassett & Washburn, wholesale florists. Mr. and Mrs. Washburn will reside in the O. P. Bassett home at Hinsdale.

The usual number of callers from out-of-town are going the rounds, glad to see their old friends in the market. Among the earlier visitors to the Flower Show was H. E. Philpott, who arrived from Winnipeg, Friday. Being an active member of the Chicago Florist Club, he is serving on a number of committees. He leaves next week to attend the meeting of the Canadian Horticultural Society of which he is first vice-president.

Mrs. H. F. Port, who closed her store on West Madison street last summer and rented her greenhouses at Maywood, has again embarked in the florist business at 3213 West Harrison street.

NEW BEDFORD NOTES.

Peter Murray, Fairhaven, has made extensive additions to his greenhouses and installed a fine new delivery wagon.

Peter Davis has leased S. S. Peckham's greenhouse plant in Fairhaven for three years. He has stocked the entire place with carnations, which are looking fine.

At the annual show of the Newport Horticultural Society, Dennis Shea, gardener for Mrs. Horatio Hathaway, was awarded first premium in the decorative class, for the best seedling dahlia. The flower is nearly pure white, about six inches in width and two in depth. It is as yet unnamed.

INCORPORATED.

West Newbury.—T. C. Thurlow's Sons, nursery, capital \$15,000.

Olympia, Wash.—The Yakima Independent Nursery, of Wapata, has filed articles of incorporation, with a capital of \$10,000. W. A. & Ethel Berg.

A NEW FUNGICIDE.

During the recent fruit exhibition at Boston George T. Powell, of Ghent, N. Y., delivered an address upon the methods to be followed in making and caring for an orchard, and spoke particularly of the difficulties that confront New England fruit growers in resisting the attacks of San Jose Scale and other fungi, as well as of insects. It was necessary, he said, to find a substitute for the Bordeaux Mixture. To quote him, as reported in the Boston Transcript:

"A very important essential in New England apple culture is that of spraying. The San Jose Scale is spreading over every section of the country. For five years I have used one of the Mische Oils, 'Scalecide,' with much success, for the control of all scale insects. A new fungicide, called 'Sulfofide' has been brought out the past season, that gives promise of very valuable results. Bordeaux Mixture has of late been very injurious to many kinds of apples, discoloring them, and we must look to something better as a fungicide."

This new fungicide called "Sulfofide" is made by E. G. Pratt Company of New York City, and was on exhibition at the show. A special diploma was awarded them.

CUCASA.

Cucasa is a soluble saccharate of copper and lime, coming into use in Europe in place of the rather cumbersome Bordeaux Mixture. Many influential institutions and experiment stations report favorably on its use.

Cucasa yields a solution of copper that has all the fungicidal properties of Bordeaux Mixture, but with the added advantages of affording a clear solution in any dilution and of keeping comparatively long. Being a clear solution, it does not clog the nozzle of sprays; furthermore, much less of it need be used than of the Bordeaux Mixture, for efficient protection. A solution of cucasa is uniformly alkaline; there can, therefore, be no copper sulphate present in it that would injure the foliage.

When sprayed on the trees, the thin layer of the solution is readily changed by the atmosphere, as in the case of Bordeaux Mixture, into the insoluble film of copper compound that has the specific power to kill fungi. The thinness of this film has the advantage of interfering all the less with the important functions of the foliage, and also of sticking very close—which was found in one case to be for three months after one spraying.

Cucasa consists of molecular proportions of copper sulphate ($\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$), slaked lime ($\text{Ca}[\text{OH}]_2$), and cane sugar, thus being distinguished from other copper and sugar solutions by the proportions in which the constituents are present in order to produce a clear, alkaline, fungicidal solution. Its inventor is Dr. C. Rumm of Stuttgart, Germany.—*Merck's Report.*

A TRIUMPHANT INSECTICIDE.

There are insecticides and insecticides, and then again some more. The terrible ravages of insect pests in these latter days has furnished the incentive for the making and exploiting of numberless compounds for special or general purposes in the never-ending warfare upon insect pests. We know of none, however, which has more quickly demonstrated its efficacy than the recently introduced "Aphine" which, in the course of a comparatively few weeks, has become a talisman among horticulturists of unimpeachable veracity and unquestioned skill. The testimonials given in the advertisement of this preparation in this paper are well worth reading.

NEWS NOTES.

Mt. Airy, Pa.—The greenhouses of S. E. Graver were badly damaged by fire on Oct. 23.

Atlanta, Ga.—A severe hail storm on Oct. 14 wrecked many greenhouses in this vicinity, causing very heavy loss.

Newton, Kansas—Bankruptcy proceedings have been commenced by attorneys for Claude L. Shanks, florist. Assets, \$10,000; liabilities \$13,000.

Wagner's Nursery, Pasadena, Cal.—Trade List of Nursery Stock and Succulents.

Morrisville Nurseries, S. C. Moon, proprietor, Morrisville, Pa.—Wholesale Price List of trees, shrubs and hardy herbaceous plants.

California Horticulture: The Fruit Growers' Guide, issued by the Fancher Creek Nurseries, Fresno, Cal. There have been many beautiful, artistic and useful catalogues sent out by dealers in ornamental garden and landscape material within the past few years, but in many respects this handsome publication places all the rest in the shade. This is particularly true of the text matter which is largely devoted to cultural and other useful information, making it almost a cyclopaedia of the subjects on which it treats. It is a very interesting and readable book. The cover is rich, bearing on the front olive branches in fruit and on the back a cluster of luscious grapes, both in natural colors and size. Peaches and figs form the subjects of two inserts, also in natural colors. Accompanying the book is the Advance Price Catalogue of the fruit tree department of this company. Geo. C.

Kelway's Manual of Horticulture, 57th Edition, 1909-1910. Kelway & Son, Langport, Somerset, England. We know of no publication in its field that can be compared to this splendid product of the horticulturist's genius and industry and the printers' art. As in previous editions, it stands as a model for the maker of floral catalogues. Printed on heavy coated paper and substantially bound, with covers in white and gold, it will be accorded a place on the library table by the most fastidious, and its contents within are a veritable mine of interest and delight for the garden lover and plant enthusiast. There are a number of colored plates from photographs taken in colors from the object illustrated. A prodigious amount of information as to species, varieties, time of flowering, culture, etc., has been embodied in its 344 pages. In sending out such a publication the Messrs. Kelway have put the horticulture-loving fraternity under perpetual obligation.

PUBLICATION RECEIVED.

The 34th annual report of the Board of Commissioners of the Boston Park System for last year has been issued. Attention is called to the need of more liberal appropriations for maintenance and development. The suppression of the gypsy and brown-tail moths is mentioned as having been a heavy drain on the resources of the department. Continued and growing satisfaction with the use of oil for the suppression of dust on the roads, is expressed. The detailed report of work performed during the year, by Superintendent J. A. Pettigrew, is illustrated with some fine views of park and playground scenery and is very interesting.

W. Elliott & Sons are in possession of their first consignment of Holland nursery stock, which they are offering every Tuesday and Friday at auction in New York.

1170 Broadway, N. Y. Elizabeth, N. J.

A Two Compartment House, 50 Feet Long Built at Edgeworth, Pa.

An attractive little house, isn't it? It has one compartment for propagating bedding plants, growing chrysanthemums and for general purposes — the other for potted plants and such decorative kinds in tubs as are brought in from the grounds in the fall. To accommodate the taller ones, the center is left open and has only tables around the sides. But there are any number of ways to arrange it; the main point to start with, is to choose the right firm and then you are sure of getting the right construction. As a starter, just try us.

You Can't Form Any Conception of What A U-Bar is by Seeing It from the Outside

IT is the inside that shows up the bubble-like U-Bar construction. At first you may wonder how so light a construction can be so durable and so rigid. It is because of the steel casing of the roof-bar which gives both strength to the frame and a perfect protection to the bar. No house is as free from exposed parts of wood, none so thoroughly takes care of all condensation. To cap the climax there is no house can equal it for growing. Don't take our say so about it, ask any gardener who has worked or is working in a U-Bar house. Glad to send you our catalog.

Nephrolepis Elegantissima Compacta

Another New Fern Originating with Us.

Of all the valuable introductions in ferns that we have sent out, beginning with the *Pieroni* (*Nephrolepis Pieroni*), we consider *Elegantissima Compacta* the most valuable of all, particularly from a commercial standpoint.

While this resembles *Elegantissima* in a general way, it is far superior to that variety, on account of its perfect habit. Yet it can hardly be compared with *Elegantissima* except in a general way, because it occupies a place by itself, and is as distinct from *Elegantissima* as that variety is from *Pieroni* in fact it bears the same relation to *Elegantissima* that *Scottii* does to *Bostoniensis*.

Elegantissima Compacta has an ideal habit. The fronds are considerably shorter than those of *Elegantissima*, and it is a more compact plant. It throws a great many more crowns naturally, making a very bushy, dwarf, compact plant. The difference between the two varieties can be seen at a glance.

Fine, strong plants, 2 1/4-in. pots, \$5.00 per doz., \$35.00 per 100; 4-in. pots, \$7.50 per doz., \$50.00 per 100; 6-in. pans \$1.50 each; 8-in. pans, \$3.00 each.

We make a specialty of all kinds of *Nephrolepis*, carrying a large stock of all sizes at all times — *Pieroni*, *Elegantissima*, *Superbissima*, *Bostoniensis*, *Scottii*, *Whitmanii*, *Amerpohlii*, etc.

Notes From the Arnold Arboretum

In addition to the deciduous new Chinese *Viburnums* enumerated in the last issue, the evergreen species new to cultivation may now be here briefly described.

The most striking is certainly *Viburnum rhytidophyllum*, a vigorous shrub with large handsome foliage and large flower clusters. The short-stalked leaves are lanceolate in outline, from three to seven inches long, nearly entire at the margin, dark green and lustrous on the much wrinkled upper surface and covered with a dense yellowish tomentum beneath. The flowers appear in flat clusters from three to six inches in diameter and are followed by dark crimson fruits.

Viburnum utile is also a handsome species; it is a slender-branched shrub with rather small foliage, resembling that of certain species of *Elaeagnus*. The short-stalked leaves are oblong or lance-oblong in outline, obtuse or nearly so, entire at the margin, from one to two inches long, dark green and lustrous on the upper surface and whitish tomentose beneath. The flowers appear in rather small, but numerous clusters, they measure about two inches in diameter and are followed by purplish black fruits.

Viburnum cylindricum (*V. coriaceum*) grows in its native habitat into a small tree and its large foliage resembles somewhat that of a green-leaved *Aucuba*. The leaves are generally oblong, pointed, from three to six inches long, entire or with a few large teeth, dark green and lustrous on the upper surface, paler beneath and quite glabrous. The pinkish white flowers are bell-shaped, not flat as in most other species, one-fifth of an inch long and disposed in dense clusters from three to four inches in diameter and are followed by rather small purplish black fruits.

Nearly related and similar to the well-known *Laurus-tinus* is *Viburnum propinquum*. The slender-stalked three-nerved leaves are oval to oblong in outline, pointed, entire or often with a few small teeth, from one and a half to three inches long, quite glabrous, dark green and lustrous above and paler beneath. The insignificant greenish white flowers appear in rather small clusters not exceeding three inches in diameter and are followed by handsome, glossy and bluish black small fruits. A closely related species, but much larger in every part is *Viburnum cinnamomifolium*; the leaves attain a length of five inches and the loose clusters measure up to seven inches in diameter. From this the allied *Viburnum Davidi* differs in the broader and shorter thicker leaves and the denser and smaller corymbs.

Of the genus *Cornus* which is very similar in habit and appearance to *Viburnum*, though belonging to an entirely different family, several new species have been recently introduced from China; but none of them is very striking. One of the most distinct is *Cornus paucinervis*, a small shrub with small glossy foliage retaining its dark green color until late in fall and white flowers in small umbel-like clusters followed by black fruits. The narrowly elliptic pointed leaves do not exceed three

inches in length and are dark green on the upper surface, lighter green beneath and glabrous.

Some words may be said here about two much confused species known since some time from Japan but rarely cultivated which have been recently again introduced from China. One of them is *Cornus macrophylla* (*C. brachypoda* or *C. corynostylis*), one of the handsomest *Cornus* in cultivation, if we except the Flowering Dogwoods, and growing into a small tree. The elliptic leaves measure up to seven inches in length and are dark green on the upper surface and whitish beneath. The flowers are borne in large broadly pyramidal clusters from four to six inches in diameter. This species has opposite leaves like almost all *Cornus*, while the other species which has been called hitherto erroneously *C. brachypoda* or *C. macrophylla* has alternate leaves like our native *C. alternifolia* and has been called in reference to the controversy which has arisen over its correct name *Cornus controversa*. It is a handsome small tree with slender-stalked broadly elliptic leaves attaining six inches in length, bright green on the upper surface and whitish beneath and with umbel-like clusters up to five inches in diameter followed by bluish black fruits.

Alfred Rehder.

European Horticulture

LAGERSTROMIA INDICA NANA GLOBOSA

The name given above is certainly a long one, but it tells persons who know, what are the properties of the plant; but in the trade, a shortening to *Lagerstromia nana* is sufficient. *L. indica* is rather tender in England and Ireland and may not be left out of doors in the winter season, excepting in the warmest localities. When this plant in spring is planted out in a sunny place, and the shoots and roots severely cut back it develops a brilliant floral display in the course of the summer. The variety *nana globosa* appeared among a number of seedlings of *L. indica* growing in the garden of Choba Tonbi in the Crimea. It is distinguished by a dwarf, globose habit, which features have remained constant, during the twenty years that have elapsed since the date of its appearance in the seed bed. The plant bloomed splendidly in 1908. The variety is worthy of a place in mixed beds of flowering subjects; and after the flowering season is over, the leaves which at the time assume an orange scarlet tint, have a striking effect for some weeks.

CHALK'S EARLY JEWEL TOMATO

In Holstein this variety is much thought of, it being equally fruitful under glass, as in the open ground. The summer of 1908 was the most unfavorable that could be imagined, and yet in favorable sheltered gardens Chalk's Jewel ripened satisfactorily. It is one of the earliest to ripen its fruits which are of globular shape. The plant is of vigorous growth; and should be grown with one stem only, fastened to a stout stake. If a wall or close fence can be allotted to the plants they need not be restricted to one stem.

Enlisting
on new lines

In undertaking to enlist the interest and favor of the retail florist trade for the Society of American Florists, President Valentine is making a laudable and val-

iant push for support in a direction in which the national society is known to be sadly lacking. Mr. Valentine's predecessors and their associates in office have made frequent effort to discover a means whereby the indifference of this large and growing wing of the floral fraternity might be overcome but the "open sesame" has thus far remained undiscovered or, if discovered, was not discreetly used. There is a ring of practicability about Mr. Valentine's attempt and he has gone about it in such a way as to warrant a reasonable hope of success. He can leave no better legacy to the S. A. F. when he steps down from the president's chair than a well-started boom among the retail trade. His address on this subject, delivered in Chicago last week, which we shall present in full in our next issue will be found worth reading and we bespeak for its suggestions the serious attention of those in that branch of florists' occupation to which it is particularly addressed.

A problem
in which all
are interested

In considering the oft-repeated complaints of exhibition managers and others that so many of the retail dealers—the "floral artists"—shun clubs and societies and ignore flower exhibi-

tions, we have often wondered why the flower growers have not stepped up and made vigorous effort to have remedied a state of affairs which is so detrimental to their own interests as producers. Every grower of flowers for the wholesale markets might well ask himself for what purpose his flowers are intended and whether these flowers are enjoying adequate opportunity to fulfil that purpose. An often heard lament on the part of the growers is that their products are not privileged to reach the people at retail prices sufficiently reasonable to make their use more general. Whether this be so or not, it is our conviction that the producers have in the question of *how* their goods are presented before the public a much more promising field for thoughtful attention. It is generally conceded that, in our flower shows, we have failed of much desirable public support through limiting the displays to the raw material and overlooking the feature of adaptation and combination. If the shows suffer from this condition must it not be true that the general demand for flowers must also be injuriously affected by neglect to take advantage of such opportunities to extend their popularity? Think it over.

Looking to
harmony as con-
ducive to prosperity

We find within the ranks of the great general horticultural industry many divergent interests which are not slow to "put on the gloves" and try conclusions

with one another whenever a discordant issue intrudes. While it is distinctly the province and duty of a periodical, such as HORTICULTURE aspires to be, to gather and disseminate all the interesting news of the profession for

which it stands, yet we like to pass over these sectional breaches and partisan controversies as lightly as possible and avoid by all means having anything to say which might intensify existing differences. We are always more than glad to give space and also such aid and encouragement as our pen is equal to, in behalf of any movement for a better mutual understanding or that takes up grievances with an honest purpose of conciliation and correction. This is our answer to those of our readers who have sometimes seemed inclined to question our reluctance to help out on some contemplated castigation. While recognizing that our circulation in one or another direction might possibly be augmented by "giving them what they want," we feel sure that, in the long run, HORTICULTURE will best hold the respect and affection of the profession in all its branches by striving to maintain the standard of its reading matter and to uphold the dignity of American horticulture and its literature as best it can.

Allamanda

The most popular varieties of this genus, without a doubt, are *A. Hendersonii*, *A. Schottii* and *A. Williamsii*. The name *Allamanda* was given to these beautiful plants in honor of a botanist of Leyden, Dr. Allamand. He is said to have sent seeds of them to the great Linnæus. *A. Hendersonii* and *Schottii* are classed as climbers, but an elegant bush plant can be grown of either. The two are so near alike that I have heard heated discussions about the difference. *Schottii* was introduced from Brazil in 1847, according to Nicholson. He does not mention *Hendersonii* at all, but Bailey says it came from Guiana, Henderson & Co., St. Johnswood, England, bringing it from there, and it was distributed by Bull about 1865, and some suppose it to be a variety of *A. cathartica*, which came from the same place in 1785. Planted out in a well-drained rich border in a slightly shaded greenhouse or conservatory, trained on an end or on the roof, the flowering shoots being allowed to hang down, their large yellow, funnel shaped flowers against their deep green leaves form a beautiful effect. As cut flowers I have seen them used in a dining room decoration to good advantage, and a nice centre piece can be made, with the flowers fixed up with their own leaves, or other greenery. Many like something low in the center of the table, that will not obstruct the view, and these are just the thing in their season. I should think any florist might grow this plant, probably on some of the ends of his houses, especially if the houses run north and south. On the north end it would not obstruct much light, and a few dollars might be made in the course of a season and no space would be taken up. I have heard store men say they would use *Allamanda* flowers quite often if they could get them.

The private gardener can get a good deal of satisfaction and use out of a well grown bush plant of either of the above varieties, if grown in the full sun in a good

airy house. They need no staking or tying and can, when the flowers begin to open, be set outdoors in a sunny position, where they will keep flowering for weeks, if well taken care of. Yellow is a color I find a great many people like, even though some of the carnation men I have talked to are a little skeptical as to the yellow carnation.

To grow a bush plant, select a young growth with a heel, three or four joints long, pot into a thumb pot, in a sandy soil, and place in a tight case. It will root quickly in the spring of the year in a temperature of seventy degrees. As soon as the small pot is filled with roots, shift into a larger pot. An increase of an inch at a time is enough. A few days after the plant has been potted, remove to a good airy house where the night temperature is sixty degrees, no shade being on the house, and when three or four whorls of leaves are formed, cut back to the lowest joint. Every cut back should be done soon after potting into a larger-sized pot, and each strong shoot will give three or four breaks; the weak ones should be allowed to grow a little longer to get more vigor into them. A good strong loam that can be equally worked around the roots with bone meal and Clay's fertilizer added, say a small handful of each to a good shovelfull of loam is about right. Other manure can be furnished in liquid form as the plant increases in vigor. Do not let the plant flower the first year. It will be in about a seven-inch pot about November and we find a good plan is to slightly rest it for two months by withholding water and lowering the temperature a little but not enough to drop the leaves, as I think they break better when pruned and started up again in January, if the leaves are retained as much as possible. A ten-inch pot is a good size to flower in, and in that size we pinch twice, which makes a shorter growth and makes a nice bush. I once saw an *Allamanda* treated in this manner, and for a final potting a twelve-inch pot was used, the plant being potted rather deeply, leaving quite a space for top-dressing. The plant remained in this pot for ten years, and made a nice bush plant each year. It was rested in the fall in the manner described above. Pruned back in early spring the young shoots receiving one pinch when they were well started, the plant was in excellent flower about the end of August each year.

Allamanda Williamsii is without a doubt the most floriferous yet introduced. It is said to be a garden hybrid raised by B. S. Williams & Son of England, and was certified in 1891, appearing in this country about 1893. Grown in the manner described above, it makes an excellent bush plant. As a climber it is not to be compared with the two varieties *A. Hendersonii* and *A. Schottii*, the leaves being much smaller and not such a nice shiny green. The flowers are not so large as the above mentioned, but I think of a better shade of color and more of them. However, I have seen it used as a climbing plant and doing well, covering the whole end of a greenhouse.

George F. Stewart.

West Medford, Mass.

THE EXHIBITIONS

THE CHICAGO SHOW.

While no official announcement has been made, it is generally known that the flower show was a financial success, even ahead of last year. In artistic beauty, also, it was considered superior to anything hitherto seen in Chicago; not the largest number of exhibitors, but the best as a whole. Taken all together the details of the show were more complete on the first day than is usually the case. On Monday, the day preceding the opening, it was apparent that the arrangement of the Coliseum as a whole was a great success and the spaces not needed by the exhibitors were gladly appropriated by the superintendents of the city parks, who are always ready to help out when the opportunity presents.

The Japanese garden arrangement of the hall was due to H. J. Stockman of the West Parks, who not only planned, but largely executed the work. The impression as one entered the building was fine in the extreme.

VIEW AT THE CHICAGO SHOW

All was artistically arranged and there was a distinct absence of anything "set" about it. Two large pagodas added greatly to the effect. Another feature was an immense Japanese balloon-shaped lantern shedding a soft light over the scene. This was hung from the centre of the ceiling, which had been covered with blue cloth with stars shining through it, making an artificial sky reaching down to the balconies, which were heavily draped with wild smilax.

Branching from the wide central entrance walk was another winding its way the entire length of the Coliseum, which, turning to the right, crossed a rustic bridge spanning a lagoon which was attractive with water lilies. At the north end of the building was a mountain scene on canvas, underneath which was the band stand, occupied by the orchestra. On either side of the orchestra were refreshment tables waited upon by young ladies in Japanese costumes—an innovation much appreciated by the people.

On the south side a colonial house made a fine background and on the

steps in front of this the cut flowers were staged, American Beauties only the first evening and other roses, chrysanthemums, carnations, etc., appearing successively. These steps, leading apparently from the mansion, ended five feet above the main floor and rested upon an immense platform reached by other steps at either end and from this platform people had a splendid view of the entire hall.

Three booths to the right and three to the left of the entrance filled the space under the balcony. On the opposite side of the room were eight booths all given over to the retail trade, with the exception of two for pottery and an exhibition of how to pot plants. Of the booths as a whole, much could be said. E. Wienhoeber Co., Vaughan's Seed Store, Schiller Estate, A. Lange, Geo. Wittbold Co., J. F. Kidwell & Bro. and Samuelson, all had displays which meant time and money, and it must have been very gratifying to them to see the crowds constantly viewing the various decor-

arrangement of home lots, and City Forester Prost lectured to an audience that never left a chair vacant.

First Prize Winners.

The prize award list is a very lengthy one and has already been published, in the main, by the local Chicago trade papers. Among the first prize winners in the various classes were the following:

Chrysanthemum plants—Vaughan's Seed Store, Robt. F. Mueller. Chrysanthemum blooms—Mt. Greenwood Cemetery, E. G. Hill Co., Poehlmann Bros. Decorative plant classes—J. B. Kidwell & Bro., George Wittbold Co., Peter Schilt, Schiller the Florist. Carnations—Poehlmann Bros., C. C. Polworth Co., Nic Zweifel, Bassett & Washburn, Chicago Carnation Co., Des Plaines Floral Co. Violets—H. N. Lown of Rhinebeck, N. Y. Lily of the valley—Poehlmann Bros. American Beauty roses—Bassett & Washburn, Bohannon Floral Co., Holton & Hunkel. Other roses—Weiland & Ollinger, Poehlmann Bros., Chas. Knopf Floral Co., Bassett & Washburn, Peter Reinberg. In 100 "any variety" Poehlmann Bros. won out with White Killarney.

Brief but Honorable Mention.

Alois Frey of Crown Point, Ind., had a splendid exhibition of single chrysanthemums.

There was no competition for the S. A. F. medals for plant or flower of American origin.

Manager George Asmus was tendered a special vote of thanks for kind attention and courtesies shown.

The booth where cut flowers were sold was well patronized and the sales reached four figures by the last day.

The group by the University of Chicago contained some fine specimen plants, only seen in rare collections.

F. Dorner & Sons Co., Lafayette, Ind., won a silver cup, also certificate of merit on best white seedling carnation.

E. G. Hill & Co. won certificate of merit and silver cup on seedling chrysanthemums, also sweepstakes on seedling Elsie Papworth.

A bed of scarlet geraniums in full bloom by A. S. Trude. The thatched roofs of two of the booths were a pleasing contrast to the green.

The booths in which postals, candy, etc., were sold were in round, Japanese style and added instead of detracting from the beauty of the whole.

The city parks, noticeably Lincoln and South Park, lived up to their reputation and staged exhibits that make the people justly proud of their parks.

Swain Nelson & Sons Co. were also well represented. In fact the nurserymen added largely to the attractiveness of the show and received in return six days of good advertising.

Ed. Hauswirth, though still unable to use his hand recently cut by a fall through a window, was at his usual place. The show would not seem quite complete without the Auditorium florist.

Leesley Bros' exhibit of berried shrubs showed to good advantage in the winter scene. Leesley Bros. devote much attention to winter landscape

effects and the people are glad to get their ideas.

Axel Settenberg of the Maywood Nursery Co. had an instructive exhibit of charts, etc., for laying out grounds. Among them the plan of the Sears Roebuck Co.'s grounds, of which we recently showed two views, was seen.

J. F. Kidwell & Bro. had one booth showing their idea of a mantel decoration and another giving a porch decoration. Both were well done and both showed how the home could be made beautiful, a subject which always takes well with the public.

Ernst Wienhoeber's booth showing a table decoration done of pink bouvardia was a study in simplicity of style and harmony of color. Day by day added one more blue slip and the last day the big card was nearly covered with six first prizes, one for each day.

About sixty accepted the invitation of Manager Pyfer and went to the Chicago Carnation Co.'s extensive plant at Joliet, Friday. They were royally treated and saw a place that has a wide reputation as one of the foremost carnation plants in the country.

A. Lange's wedding decoration, in-

NEW YORK'S GREAT FLOWER SHOW.

The Horticultural Society of New York is to be congratulated for having secured so acceptable a place as the beautiful building of the American Museum of Natural History in which to present a flower show. We speak of the enterprise as "great" because of the local difficulties and impediments that its projectors have had to overcome and because of the splendid quality of the exhibits, notably the orchids, stove plants and specimen chrysanthemum plants. Secretary Nash, who has worked tirelessly from start to finish, and F. R. Pierson, who has also been indefatigable, have good reason to feel proud and grateful to the gardeners and plantsmen who responded so generously to the call.

The foyer of the Museum building presented an attractive scene with its groups of brilliant and stately flowering and decorative plants, the effectiveness of which was much heightened by the dazzling whiteness of the walls and surroundings under the

great was the throng of admiring visitors that it became necessary to stretch ropes for the protection of the plants.

In the apartments and corridors radiating from the foyer were arranged the various sections—orchids, roses, chrysanthemum blooms, carnations, etc. The principal exhibitors in the chrysanthemum bloom section were Howard Gould, gardener Harry Turner, Samuel Thorne, gardener I. L. Powell, Percy Chubb, gardener Alex. MacKerzie, C. H. Hathaway, gardener Max Schneider, Paul Dana, gardener John I. Johnston and C. H. Totty on show varieties; R. Vincent, Jr., & Sons Co., Robert Mallory, gardener William Smith, Chas. Mallory, gardener W. J. Sealey, E. H. Weatherbee, gardener Francis Milne and Samuel Untermeyer, on pompons and singles.

All the popular roses were well shown by F. R. Pierson Co., L. A. Noe, Mrs. D. Willis James and S. Untermeyer. The Pierson exhibit was very extensive and captured most of the best prizes. There was a nice show of carnations from S. Untermeyer, F. R. Pierson Co., C. Weber, M. L. Schiff, and Cottage Gardens Co., the latter winning the silver medal for finest 100 blooms and diploma for best new variety with variety Mrs. C. W. Ward.

We doubt if a finer showing of orchids, plants and cut blooms, has ever been made in this country. The groups of 50 sq. ft. extent from Lager & Hurrell and Julius Roehrs Co. were gorgeous, Lager & Hurrell winning out. Lager & Hurrell were also first with three hybrid orchids (*Cattleyas Stolleryanus*, *Ballantineanum* and *Mautinii*), collection of cypripedium blooms, best oncidium plant in bloom, best vanda ditto, best dendrobium ditto (*D. formosum giganteum*). Julius Roehrs Co. won first on novelty not before exhibited here (*Cypripedium Rosetti* = *C. Maudiae* X *insigne Sanderiana*), five finest cypripediums, finest specimen cattleya, best two specimen orchids and silver medal for best plant exhibited in either class—a *Cattleya labiata*. Mrs. B. B. Tuttle, gardener M. J. Pope, was awarded first for hybrid orchid—*Cattleya Wavriniana*, and a bronze medal for collection of cut orchids. Jos. A. Manda was first on collection of cut orchids arranged for effect. This was beautifully done, a graceful fountain effect being produced with long racemes of oncidium inserted between the leaves of a big tillandsia. On specimen plant of *Cattleya labiata*, A. J. Manda was first with several competitors. E. O. Orpet showed a big lot of hybrid orchids of his own raising, for which he received a silver medal. Clement Moore was awarded a silver medal for cattleyas and Mrs. H. I. Pratt, who won first for collection of orchids covering a 25 ft. table, was given a cultural certificate for *Pandanus pacificus*.

A certificate of merit was given to George Giatras for *Nephrolepis Giatrasii*, and honorable mention to Wm. Tricker for *Alternanthera* "Jewel" and to F. A. Bolles for winter window boxes. *Nerine fothergillii* major and some mammoth onions were shown by A. T. Boddington. The only entry for the dinner table decoration prize was by A. T. Bunyard, the centre-piece being of cattleyas, cypripediums and *Adiantum Farleyense*. Why did not the retail trade take advantage of this splendid opportunity to gain a profitable publicity with forty thousand of

VIEW AT THE CHICAGO SHOW

cluding an altar and a bride and groom, kept the young people lined up most of the time. How many got up courage to ask the important question is not known; but Mr. Lange will no doubt have much to answer for. That he put the lady on the wrong side was only noticed by those who had been through the mill.

Schiller the Florist had a wall decoration in green and white that was unusual and very beautifully done. Two centres of white pompon chrysanthemums were gracefully arranged, probably two feet in diameter, from which radiated strands of *Asparagus Sprengeri*, describing circles eight feet in diameter. It was perfectly executed and extremely delicate—most appropriate for a wedding decoration.

The Winterson's Seed Store booth had some original ideas in the way of showing their bulbs. An oval bed with gently sloping sides had bulbs of various kinds placed on the fresh soil showing what kinds and how close to plant them, an object lesson many gladly learned. Vases of water with hyacinths, Chinese sacred lilies, etc., growing in them also showed how to handle them in the house.

electric lights. There were great groups of bays, boxwoods and conifers in tubs from Bobbink & Atkins, gigantic palms and davallias from Mrs. J. Hood Wright, gardener C. A. Webber, specimen palms, stove plants, marantas and cycas from Mrs. Harold Irving Pratt, gardener A. J. Manda, wonderfully developed adiantums from Mrs. J. B. Trevor, gardener Howard Nichols, *nephrolepis* in varied forms from F. R. Pierson Co., gorgeous groups of marantas, crotons (including a fine group of the new *Croton* F. Sander, which received a certificate), Lorraine begonias and decorative plants and bay trees from Julius Roehrs Co., collection of stove and greenhouse plants and dracaenas of rare beauty from Samuel Untermeyer, gardener W. H. Waite, and a resplendent mass of *Celosia Thompsonii* *magnifica*, for which Lehnig & Winnitfield received a bronze medal. The cultural skill of Mr. Waite was displayed again in specimen trained plants of Garza, Annie Laurie and other popular varieties, of a size and finish rarely equalled anywhere, and there were trained specimens of high grade also from Miss A. B. Jennings, gardener Oscar Carlson. So

the best purchasing class in New York society? Strange, is it not?

The judges were C. H. Totty, Madison, N. J., Thos. W. Head, Groton, Conn., E. O. Orpet, Lancaster, Mass., A. J. Loveless, Lenox, Mass., and I. L. Powell, Millbrook, N. Y.

TARRYTOWN HORTICULTURAL SOCIETY FLOWER SHOW.

The eleventh annual chrysanthemum exhibition of the Tarrytown Horticultural Society had to be held in White Plains this year as the public-spirited owner of the Tarrytown hall seemed to think that a cheap moving-picture show was more essential to the welfare of the community than a good flower show and refused the use of the hall. However, the society did not fare so badly in White Plains, the attendance being above the Tarrytown average and, although it was more inconvenient for quite a number of the growers, they all turned out well and put up a first-class show. Plants were somewhat lacking but this was more than made up for by the quantity and quality of the cut blooms, which every one conceded were the finest ever shown. We have seen quite a few shows this year but this one easily heads the list for general high quality of cut blooms. The hall was tastefully arranged, and the energetic manager, James W. Smith, deserves great credit both from the members of the society and the exhibitors for the way the show was managed. Everything was placed and arranged so conveniently and the work of the exhibitors so facilitated that there seemed no need of hurry, all finding ample time to get the exhibits carefully set up and ready when the time came to clear the hall for the judges.

In the class for 36 blooms chrysanthemums—6 varieties of each—Wm. Rockefeller, gardener Geo. Middleton, was 1st and Frederick Potter, gardener Wm. Roberts, 2nd, the varieties shown being Glenview, Cheltoni, Mrs. J. E. Dunn, Mrs. Partridge, M. V. Venusta, and Merza in the 1st prize lot, and in the second Lady Hopetoun, M. Hanky, Glenview, O. H. Broomhead, Nellie Pockett and Beatrice May. The blooms all through were of phenomenal size, well colored and beautifully finished.

For 24 blooms Wm. Rockefeller was again first showing magnificent specimens of the following varieties: Mrs. Millar, Nellie Pockett, Gen. Hutton, M. Hankey, Mrs. J. C. Neil, Glenview, M. V. Venusta, Mrs. J. E. Dunn, Mrs. Wm. Duckham, Australia, C. H. Totty, Beatrice May, Ben Wells, Cheltoni, Brighthurst, F. S. Vallis, Lady Hopetoun, Mrs. Partridge, Mary Mason, and W. M. Moir. Henry Siegel, gardener T. Atkinson, was 2nd, the principal blooms in this lot being Mrs. Thirkell, Rose Pockett, G. W. Pook and F. S. Vallis. In the class for 12 blooms, distinct, the same exhibitors won out in the same order.

For 12 varieties introductions of 1909 Mr. Siegel was 1st and Mr. Rockefeller 2nd, the varieties shown being Leslie Morrison, Yellow Miller, Pockett's Surprise, Rose Pockett, Frank Payne, C. H. Totty, Lillian Coppard, Mrs. Totty, Mrs. O. H. Khan, Pockett's Crimson and Clara Wells. From the way

ROCHESTER FLOWER SHOW
The Cascade.

these varieties showed up when compared with the older varieties it is safe to say that they have come to stay and will be welcome additions to the exhibition tables.

The class calling for 18 blooms, 6 varieties, 3 of each brought a large entry; Fred Potter, E. Berolzheimer, gardener Wm. Jamieson, and Mrs. F. A. Constable, gardener James Stuart, won out in the order named. Besides several of the varieties already enumerated there were shown in this class some fine blooms of Merza, May Sedon, Montigue and Pres. Viger.

Other successful exhibitors in the cut bloom classes were E. H. Weatherbee, gardener F. Milne; W. A. Reed, gardener Andrew McKendry; and Miss Sands, gardener Thomas Lee.

The bush plants were few but what were shown were of high quality, E. Berolzheimer and Mrs. F. A. Constable being the principal winners. Mrs. F. A. Constable was first for a group of plants arranged for effect showing clean well-grown stuff, very tastefully arranged by her gardener, James Stuart. The same exhibitor was first for a very pretty table of orchids.

The first prize table of decorative plants shown by Joseph Eastman, gardener Robert Angus, was tastefully arranged with well-colored plants of crotons, dracaenas, aralias, etc. Both for foliage plants and ferns suitable for table decoration, Mrs. Constable was first; E. H. Weatherbee, second; and Joseph Eastman, third.

The dinner table decoration in competition for a beautiful silver cup brought out three entries, Wm. Jamieson winning first; Henry J. Allan, gardener for Fred Vanderbilt, second; and Allan J. Jenkins, Lenox, Mass., third. Orchids were the principal flowers employed and the decoration of all three was beautifully done, and it took the judges quite some time to decide, the competition being so close.

The classes for roses and carnations were all well filled and the competition keen. In the former the principal prize takers were Fred Potter. The Os-

burn Estate, gardener James Bell, Mr. Mallory, gardener W. J. Seely, Fred Vanderbilt and I. N. Seligman, gardener John Brunger. In the latter, Fred Potter, J. J. Riker, gardener Wm. Hughes, and W. A. Reed were the principal winners.

The F. R. Pierson Co., Tarrytown, exhibited a very pretty table consisting mainly of *Nephrolepis elegantissima compacta*, *N. superbissima*, *N. Amerpohli* and several vases of White Killarney and Killarney roses, for which they were awarded a certificate of merit. Scott Bros. of Elmsford Nurseries, were also awarded a certificate of merit for a table of chrysanthemum blooms, showing a number of single varieties, most of this year's introductions in the large-flowered varieties and a number of novelties to be sent out by them in 1910. These latter included such varieties as Gladys Blackburn, R. F. Felton, Hetty Wells, W. Mease, Keith Luxford, and Mrs. H. Stevens. W. S.

ROCHESTER FLOWER SHOW.

(See Last Week's Issue.)

The show at Rochester, N. Y., was a magnificent popular success and it was well worthy of it. There were over 8000 admissions in a single day. As C. H. Vick expressed it, it was "a unique idea in the holding of a commercial show, that the individual interests represented should sacrifice their personal plans for exhibitions to carry out a unified plan."

"Several of the exhibitors had their exhibits rearranged to make possible the ground plan or arrangement devised by Alling S. DeForest, but no murmur of disapproval was heard."

The officers of the Flower City Florists' Association are: President, F. W. Vick; vice-president, E. P. Wilson; secretary, H. B. Stringer; treasurer, W. L. Keller.

The general plan for the decorations and landscape effects was prepared by Mr. Alling S. DeForest, landscape architect, and it reflects great credit on his skill and artistic ability.

PHILADELPHIA SHOW.

The annual chrysanthemum show of the Pennsylvania Horticultural Society was held at Horticultural Hall, Nov. 9-12. This show compares favorably with many of the preceding shows, both in variety and quality.

The competition for prizes was all by private gardeners and the results speak well for their ability as growers and in many instances their excellent taste in decorating. The prizes for chrysanthemum cut blooms resulted in one of the finest displays exhibited in Philadelphia. The tables of blooms afforded opportunity for close inspection and the classes in which arrangement for effect and the use of decorative leaves and material were admissible resulted in a splendid decoration of the grand stairway.

As usual the display of orchids, ferns, palms and foliage plants, for which the shows at this season have long been famous, brought out many finely grown specimens, and new and rare plants. The groups of foliage and flowering plants arranged for effect, resulted in bold and effective decorations which added materially to the general effect. Crotons with the maximum of coloring in large shapely specimens were effectively arranged.

The lower hall contained for the most part the vegetable exhibits. The seedsmen whose liberal prize offerings bring out good collections and individual classes of vegetables had many competitors. We have heard much this past summer of the dearth of good vegetables, owing to the absence of rain; but such was not evident on this occasion. The products of the garden were exceptionally good in many cases, and the hot-house vegetables looked tempting. Another and important part of the show was the exhibit of the growers and seedsmen whose enterprise and liberal displays make the show more complete, interesting and instructive.

To comment upon everything worthy of mention would take too much space, but the following will serve as examples of the general excellence. The large bush plants without which no show is complete were fairly well done and the most prominent varieties were Dr. Enguehard, G. W. Childs, Golden Age, Mrs. Joseph Sinnott, Mrs. Frank Thompson. The winners, which were about evenly divided, were Mrs. Joseph H. Sinnott, gardener David Ingram and Mrs. F. C. Penfield, gardener John McCleary. In the classes for single stem 6-inch pots many good exhibits were made. Mr. P. A. B. Widener, gardener William Kleinhertz, carried off several firsts, having such varieties as Glenview, Lynnewood Hall, Mrs. Wm. Duckham with fine finish. Other winners in these classes were Mrs. Charles Wheeler, gardener Wm. Fowler; Mr. C. B. Newbold, gardener Samuel Batchelor, with fine Cheltonii, Nellie Pockett and Dr. Enguehard; Mrs. Penfield with Merza. A bright feature of the pot plants were the single flowering varieties, C. B. Newbold and P. A. B. Widener winning with excellent plants, such varieties as Anna White, Eva Reiman, Albert Williams and some seedlings being especially desirable.

In cut blooms C. B. Newbold won in the 50 blooms in 10 varieties against five competitors and some fine blooms were shown. His varieties were Miss

Norman Davis, Colonel W. Appleton, O. H. Broomhead, Clara Wells, Glenview, Miriam Hankey, Cheltonii, Nellie Pockett, W. Duckham and Mrs. W. Duckham. P. A. B. Widener was second. In the class for 6 vases, 6 varieties, 5 blooms each, J. W. Pepper, gardener Wm. Robertson, was first with Merza, Mary Mason, Cheltonii, Beatrice May, Glenview and Mrs. W. Duckham. C. B. Newbold was second with a fine lot. In the class for 4 vases, 5 blooms each, P. A. B. Widener was first and C. B. Newbold second. For the vase of 10 blooms, white, J. W. Pepper first with Nellie Pockett. Mr. Widener second with Lynnewood Hall.

Other winners in the cut bloom classes were: Mrs. R. B. Ellison, gardener Alex. Lendroth; Mrs. W. M. Potts, gardener W. G. Henderson; and Mr. W. W. Frazier, gard. Hugh Scott.

For hardy pompon chrysanthemums the silver cup given by "Meehan & Sons" was won by J. W. Pepper.

In the class for 25 blooms arranged for effect with foliage, C. B. Newbold's and J. W. Pepper's displays were tastefully arranged and made an admirable feature to the grand staircase. It was won in the order named against five competitors.

John Wanamaker, gardener John Dodds, was first with a fine table of orchids, tastefully arranged with ferns intermingled. For the best six foliage plants, John Wanamaker was first with Anthurium Veitchii, Croton "Queen Victoria," Dracaena "Bronze Beauty," and Kentia Belmoreana aurea as among the best. P. A. B. Widener was second with smaller but very choice varieties of Phyllotaenium, Cyclanthus cyparidus, Spheerogone and Acanthus montanus. G. W. Childs Drexel, gardener Thomas Long, was first on ferns with Gleichenia flabellata, Davallia Fijensis plumosa, Adiantum Williamsii, Nephrolepis Scholzei. Mr. Long has a national reputation for fern growing, always keeping abreast of the times in the newer introductions and being among the first to show finished examples. A silver medal was also

awarded Mr. Long for Nephrolepis exaltata superba. It seems, however, more like a crested fern of N. fine and tripinnatifida.

Among foliage plants, Mrs. Penfield and J. W. Childs Drexel were winners in other classes and each showed fine examples. Mr. John Wanamaker was first with Gloire de Lorraine begonia, Lonsdale variety, with Mrs. Ellison second with the pink variety. He was also first for Nephrolepis Schoelzei with a magnificent pan. For the group of foliage plants arranged for effect, Mrs. Penfield won. Mr. J. W. Pepper was first with crotons, among the best varieties being Dayspring, Hookerii, Queen Victoria, Edwin Lonsdale, Veitchii and Robert Craig, large plants in from 10 to 14-inch pots. Edward A. Schmidt, gardener John Hobson, was second. He has fine plants and is a well-known plantsman; the color, however, was lacking owing undoubtedly to the shade of his greenhouse by overlapping trees.

Among the trade exhibits were noted from Julius Roehrs Co.—a table of choice orchids with a fine plant of Brasso-cattleya Digbyana labiata; a new croton named F. Sander was also shown. Lager & Hurrell—some 50 plants of choice orchids which seemed to be an attractive spot. Robert Craig Co.—fine plants of Gloire de Lorraine begonia, cyclamen and Nephrolepis Schoelzei. Henry A. Dreer, Inc.—a large exhibit of Nephrolepis Schoelzei, a collection of palms and choice greenhouse plants, collection of hardy chrysanthemums and sundries, bulbs and other specialties. Henry F. Michell Co.—a tasteful arrangement of bulbs, grass seed and sundries, hardy chrysanthemums, etc. Hosea Waterer—choice bulbs, Scilla maritima and metallic hose. Overbrook Gardens—potted plants of single and hardy chrysanthemum. Thos. Meehan & Sons—hardy chrysanthemums and cacti. R. Vincent, Jr., & Sons Co.—hardy chrysanthemums. John Towill—vase of 50 "My Maryland" rose.

FRANCIS O. CANNING.

ROCHESTER FLOWER SHOW
Partial View.

CONNECTICUT HORTICULTURAL SOCIETY.

Our annual exhibition of chrysanthemums and other seasonable products, was held last week at Putnam Phalanx Hall, Hartford, and we have yet to hear of any person that does not declare it to have been the most successful and interesting exhibition ever given by the society. Preparations were begun for it almost a year ago by interested gardeners and florists. Though some expected wall and ceiling decoration was not forthcoming, the generous supply of potted palms, ferns, and similar decorative plants, by Messrs. John Coombs, James J. Goodwin, Walter L. Goodwin, and others, arranged by the deft hands of President John F. Huss, and his assistant, Francis Roulier, and by J. A. Weber and others, left little to be desired in the way of beautiful and artistic embellishment of the hall.

Great interest centered in the trained bush and standard chrysanthemums, in various colors, some containing as high as 200 splendid blooms. Nothing more beautiful was ever seen in the state; the highest degree of horticultural skill being manifested in their production. Anemone and single stem varieties also delighted the attendants. From the greenhouses of Miss H. F. Whiting, West Hartford gardener Carl Peterson, a small but perfect collection of roses was exhibited. Neil Nelson, gardener of the Hartford Retreat, showed some fine chrysanthemum blooms, as well as a group of cyclamens and primroses in pots. Mr. Huss, besides showing chrysanthemums of nearly every description, also staged cecinos and begonias. W. A. Weber's plant of pompon chrysanthemums, bearing nine grafts, of as many different colors, was greatly admired, the children present being greatly interested in this demonstration of the art of graftage. Miss Whiting was the only exhibitor of violets. A. H. Wingett, of Lenox, Mass., one of the judges, contributed, not for competition, a new and handsome carnation, "Lady Algy," a salmon pink sport of Beacon. Mr. Huss also showed a collection of orchids, and A. Righenzi won first honors for a pillow made of chrysanthemums, bearing in the foreground the society's initials. Mr. Coombs received the first award for the best floral piece of chrysanthemums, a beautiful bridal design in basket form. Others exhibiting chrysanthemums were: Mrs. William C. Lanman, of Norwich, gardener Charles Thos. Beasley; T. B. Brown, of Windsor; H. L. Metcalfe, Cuno A. Helfricht, James J. Wall; W. A. Kinne and Oscar F. Gritzmacher, of New Britain; and Miss Theodate Pope, of Farmington, gardener W. S. Mason. George A. Parker, superintendent of parks, sent 25 varieties of fine chrysanthemum blooms.

A finer display of vegetables has probably never been shown in Hartford. The special award of \$25, in this department, by Arthur T. Boddington, of New York, elicited three excellent collections, which, with that of James J. Goodwin (by Joseph Guzzo, vegetable gardener) who took the society's prize for the best collection, filled tables running along one whole side of the hall. The Boddington prize was given as follows: First, Charles

"The Triumphant Insecticide"

(See page 661 last week's "Horticulture.")

"So many 'killeis' have from time to time been heard from that we confess to having developed a strong disposition to be shown just what they will kill. A representative of the American Florist had recently an opportunity of witnessing a number of interesting tests with 'Aphine' at Chas. H. Totty's greenhouses, Madison, N. J. The tests were made by George E. Talmadge in the presence of Mr. Totty, William E. Tricker, his foreman, and the writer. Orchids affected with scale, grape vines in which mealy bug had obtained a hold, and black and green aphids on chrysanthemums and roses were all treated. The solution was applied with a small sprayer. We can say for this preparation that 'it does the work,' and it is so far from doing any damage to the plants that the foliage soon takes on a better color after it has been applied. The results of these tests show that there is an insecticide on the market that is effective and that is easily and quickly applied, at a comparatively small cost.

"The day after these tests were made, Mr. Totty, whose reputation for fair dealing is unquestioned, said:

"I have nothing but praise for the new insecticide, 'Aphine,' that we tested yesterday. The scale on the calanthes and cattleyas were all dead when examined through a glass this morning, and the plants are not injured in the least. The mealy bug was likewise wiped out where the mixture touched it. If Mr. Talmadge will maintain a uniform quality in his product, he will have an enormous sale, for it is unquestionably right every way." *American Florist, Sept. 18, 1909.*

GEORGE E. TALMADGE, Inc., Madison, N. J.

Send for Descriptive Circular.

M. Beach, West Hartford, gardener R. Cawte; second, R. & H. Scoville, of Chapinville, gardener Walter Angus; third, Walter L. Goodwin, gardener J. A. Weber. Mr. Cawte showed, including garden herbs, over fifty varieties of vegetables. Mr. Angus, who had just exhibited at New Haven, had the misfortune there to lose his coat by theft, and had to return home prematurely.

In fruits, George W. Smith, of Melrose, was the only exhibitor, showing nine varieties of native grapes, nine of apples, six of pears, and one of quince, and necessarily received the first prize.

Mr. Huss entered in 25 classes, and received either first or second prize in every class. Mr. Weber entered in 13 classes, and received 11 awards. Other prize-takers in the chrysanthemum or concomitant floricultural classes were: Mr. Beasley, Mr. Righenzi, Mr. Kinne (ten firsts, and two seconds), Mr. Gritzmacher, Mr. Peterson, Mr. Brown, Mr. Helfricht, Mr. Mason, Mr. Nelson and Mr. Coombs.

The following gratuities were also awarded: Cultural certificates to J. A. Weber for specimen single chrysanthemum plant, for a specimen plant of anemone chrysanthemum, and for a grafted specimen of pompon chrysanthemum; and to Thomas J. Dryden for Lorraine begonia; diploma to J. F. Huss for collection of single and anemone chrysanthemums in pots, with special mention of the following varieties: Gertrude Osmunds, Bishop Hemmingham, Mr. J. A. Peterson, Mrs. Edward F. Swift, Mrs. Bassett. Honorable mention to Mr. Huss for collection of orchids; certificate of merit to Mr. Coombs for collection of palms

and ferns; cultural certificate to Mr. Peterson for collection of roses.

1500 school children were given free admission, and some of them gave annoyance by unruly conduct. The judges were F. Heeremans and A. H. Wingett, of Lenox, who also kindly served in this capacity at our recent dahlia show. Our attendance was large, and the event doubtless a financial success.

GEORGE W. SMITH, Sec.

Melrose, Conn., Nov. 8, 1909.

WASHINGTON FLOWER SHOW.

The annual flower show given by the Florists' Club of Washington opened on the 8th Nov. at the old Masonic Temple. While the preceding shows have all been up to the standard, there is no question as to this exhibit being the handsomest ever attempted by the club and the immense crowd of Monday evening attested to the growing popularity of the exhibits. The idea first impressed upon one's mind on entering the hall, was that of white marble and flowers. The centre of the room was given up to a central Court of Honor which was decorated by Geo. Shafer with different colored chrysanthemums (single stems), wild smilax and hundreds of vari-colored electric lights. The four corners of the room were accentuated by four large vases mounted on pillars (imitating marble) and containing immense single-stem chrysanthemums, while at the base were grouped hardy ferns and vases of blooms. Two were filled by Gude Bros. and the other two by Geo. Cooke. The U. S. Botanic Garden had one of the finest and most unique displays they have ever made,

Chrysanthemum Novelties

BEST IN THE WORLD AS USUAL

The splendid showing of my last year's varieties at all the Eastern shows, proves how the standard is maintained. As the **American Agent of W. Wells & Co. of Merstham, England**, I have arranged for **simultaneous distribution of their novelty list of 1910** so that the American cultivator for the first time in history can obtain the Wells Pockett novelties at the same time as the British grower. That list will include **Mrs. David Syme**, the gold medal winner and other splendid kinds not yet named. The 1909 list comprises some grand varieties for the exhibition grower. **R. F. Felton** the deepest shade of yellow, **Well's Late Pink** a grand thing in the style of Brighthurst, **Mrs. H. Stevens**, **Gladys Blackburn**, **W. Mease**, **W. Hotston**, and other splendid varieties.

In **American Raised Seedlings** I will offer **Mrs. A. R. Peacock**, **Mrs. W. Arnold**, whites. **Mrs. W. Wincott**, pink, all certificated by the C. S. A. and a **yellow sport of the well-known Ivory**.

If Your Name is not on My Mailing List, Write Me.

CHARLES H. TOTTY, Madison, N. J.

consisting of all the rarest plants in Supt. Smith's very rare collection. The large triangle at the front was decorated by Fred Kramer in chrysanthemums, ferns and Queen Beatrice roses, while the corresponding one at the other end was fragrant with Gude's American Beauties. Chas. Totty of Madison, N. J., had a very comprehensive display of pompons embracing nearly every variety and Henry A. Dreer of Riverton, N. J., had his usual generous exhibit of prize ferns and fine chrysanthemums. Mrs. L. Z. Leiter's usual public spiritedness was manifest by her fine collection (said to be the finest in Washington) of begonias and ferns. The Washington Florist Co. had an exhibit for the first time and their display of the "Mrs. Taft" rose drew a good crowd around it. The rose is a very delicate shell pink with a darker centre and is an exquisite addition to the rose world. W. W. Kimmel of Massachusetts avenue, had his usual handsome display of fine chrysanthemums and unique baskets. A good crowd around Edw. S. Schmid's table, attested to the popularity of that gentleman's fine display of bulbs, gold fish, aquatic plants, etc.

W. Marche, Mayberry & Hoover, Geo. Cooke and Geo. Shaffer all had table and mantel decorations, but up to a late hour Monday evening the decorators had not finished so a description cannot be furnished here. The show will continue during the entire week and it is to wind up with a sacred concert on Sunday.

Especial thanks are due to Pres. Kramer and Chairman Cooke for their untiring efforts that have made of this exhibition such a success.

THE BOSTON EXHIBITION.

In our issue of last week we gave a fairly comprehensive description of the very fine exhibition of the Massachusetts Horticultural Society which was in progress at the time. We now append the list of awards with a few other comments.

The vases of ten each long-stemmed flowers of one variety, competing as to color, presented some wonderfully fine flowers. In red, Mrs. H. Patridge and Leslie Morrison, both from the Plant Estate, took precedence over everything in their color, although T. Carrington from Mrs. Fred Ayer was also much admired. In white, Merza by Peter B. Robb, vanquished Nellie Pockett and Beatrice May. Mrs. Wm. Duckham in yellow and Brighthurst in pink, both from the Plant Estate, were invincible. The six best varieties of 1909, as seen in the winning set from the same exhibitor, were Leslie Morrison, Rose Pockett, Frank L. Payne, Chas. Reckett, Mrs. L. Thorne and O. H. Kahn. The vases of singles from Miss E. J. Clark of Pomfret Centre, Conn., were very fine. R. Vincent, Jr. & Sons Co. staged no less than 100 varieties of pompons, right up-to-date with the finest new sorts, and promise even a bigger display for next year. W. H. Elliott's commercial chrysanthemum plants were beautiful. Many of the brightest of the single varieties were included. A table of 160 varieties of apples, one specimen of each, selected from the exhibits of the New England Fruit Show, the previous week, was a centre of attraction. An exhibit of American Beauty roses and lily of the valley of very high quality, grown by Carl Jurgens and

staged by Welch Bros., was continuously besieged by an admiring group of visitors.

Following is a summary of the awards.

Group of foliage and flowering plants covering three hundred square feet: 1st, Edward MacMulkin; 2d, Mrs. J. L. Gardner. Table of orchids, both plants and flowers, accurately named: 1st, Wheeler & Co.; 2d, Edw. MacMulkin. Chrysanthemums (two specimen plants, any color or class): 1st, W. A. Riggs; 2d, Morton F. Plant; 3d, Dr. C. G. Weld. Twenty-five plants, commercial specimens: 1st, W. H. Elliott; 2d, J. S. Bailey. Twelve plants, single flowering sorts: W. H. Elliott. Six plants, one bloom to each: 1st, Mrs. Lester Leland; 2d, ditto; 3d, Mrs. A. W. Blake. Best chrysanthemum plant on exhibition: W. A. Riggs, a silver medal. Two Xentias: 1st, Edw. MacMulkin; 2d, Wm. Whitman; 3d, Edw. MacMulkin. Two arecas, Wm. Whitman.

In the cut flower chrysanthemum classes the winners of first and second prizes were Thos. Howden, Morton F. Plant, Mrs. Lester Leland, Mrs. J. M. Sears, P. B. Robb, W. A. Riggs, Wm. Swan, Winthrop Ames, Eben D. Jordan, E. K. Butler, W. W. Edgar Co., J. S. Bailey, Mrs. Frederick Ayer. The Gane Memorial prizes were won by James Nicol and Thomas Howden, 1st and 2nd respectively, with splendid vases of Mrs. Jerome Jones and Yellow Mrs. Jerome Jones. The table decorations won in the following order: Ed. MacMulkin, 1st; Mrs. E. M. Gill, 2nd; W. J. Creed, 3rd.

The National Chrysanthemum Society's trophy was awarded to W. A. Riggs for the most meritorious display of chrysanthemums.

SILVER MEDALS: T. D. Hatfield, for artistic display of chrysanthemums; R. & J. Farquhar & Co., for meritorious display of coniferous trees and shrubs.

BRONZE MEDALS: Wm. C. Rust, chrysanthemum grown in form of a chair; R. Vincent, Jr., & Sons Co., display of pompon chrysanthemums; Langwater Gardens, display of single chrysanthemums.

FIRST CLASS CERTIFICATES OF MERIT: Bellevue Nurseries, Anemone japonica Prince Henry; Julius Roehrs Co., Croton F. Sander; Peter Fisher, new carnation May Day.

HONORABLE MENTION: R. & J. Far

Horseshoe Brand Products

The Emperor of China pays his doctor to keep him well. When the Emperor is sick the doctors pay is cut off. In other words a premium is paid to keep the ruler well. The successful merchant is he who satisfies his clients by supplying merchandise that will yield a profit, even though it costs him a premium.

Horseshoe Brand Products are procured from the very best sources of supply, from those who have a reputation at stake, and in purchasing this brand you have the assurance that the goods come from a house that is trying to better conditions instead of merely making a sale.

VOTE OF THANKS: Langwater Gardens, vase of chrysanthemum Old Gold.

The Massachusetts Agricultural College received honorable mention for a collection of cabbages showing the false economy of buying poor seed.

MASSACHUSETTS AGRICULTURAL COLLEGE.

The exhibit of table decorations by the students attracted a throng of visitors at the Massachusetts Agricultural College, Friday and Saturday, November 5th and 6th. The exhibit consisted of ten tables prepared and decorated by members of the class in floriculture, the decoration of each table being the work of two men working as a team. Each team was restricted to the use of chrysanthemums as flowers, but the choice of foliage was left to the students. The combinations of the various varieties of chrysanthemums with smilax, ferns, barberries and autumn leaves made up a varied and striking display and called forth much praise from the many visitors. The first prize, consisting of \$12 contributed by men interested in floricultural education, was awarded to H. F. Willard of Leominster, Mass., and C. J. Green of Bridgewater, Mass. The decorations on this table were very simple. In the center was a vase containing four splendid Nellie Pocket chrysanthemums and several fronds of maiden-hair fern of the *Adiantum formosum* type. The vase was slightly banked with ferns, and at the base were two more fine Nellie Pocket blooms. Under

each plate was a single frond of the fern, while at each of the four corners of the table was a group of three chrysanthemums of the anemone type on a mat of ferns. The dark green ferns and the pure white flowers harmonized especially well with the china,

which had a delicate fern in the pattern, and the judges were unanimous in their choice of the table for first place.

The second prize, consisting of Scott's "Manual of Floriculture" contributed by the Florists' Review, and

PARTIAL VIEW OF POMPON DAHLIA FIELD

J. L. Moore, Northboro, Mass.

five years' subscription to "HORTICULTURE," contributed by Horticulture Publishing Company, was awarded to I. W. Davis of Lowell, Mass., and E. M. Brown of West Springfield, Mass. Six huge Bonnafton chrysanthemums centered in a heavy mass of smilax, in which were scattered six more of the same blooms, made a striking decoration for this table. The judges were: Prof. A. S. Kinney, instructor in botany at Mount Holyoke, H. W. Field of Northampton, and Dr. W. B. Lancaster of Amherst. The tables were loaned by E. D. Marsh of Amherst, the china by the Charles Hall Company of Springfield, and the silver by the Ladies' Benevolent Society of the First Church, Amherst. Besides the exhibition of table decorations, there were shown violets, carnations, roses and a large number of varieties of chrysanthemums, all raised in the college greenhouses.

ROYAL HORTICULTURAL SOCIETY, LONDON.

The Vincent Square Hall was overflowing with exhibits on Tuesday, October 26, orchids being more especially plentiful; then came dahlias, winter-flowering and tuberous rooted begonias, the latter extremely decorative and whose season will soon come to an end. Perennial asters made a fine show; it is doubtful if these flowers have ever been observed to greater advantage. New Zealand shrubby veronicas, berried shrubs and finely grown hollies were abundant. Added to these attractions there were competitive exhibits of onions, apples, pears and grapes.

Pæony-flowered dahlias formed attractive features, Mr. Baker of Wolverhampton having a particularly showy group of these rather coarse looking flowers. Of varieties I may mention the following: A. B. Bantock, crimson, semi-double, splashed with white, and sometimes with lake the petals spatulate, pointed at the tips and the anther mass bright yellow; Glory of Baarn is of the same form, but is of a shade of lilac; John E. Faire is purplish rose; Colonel St. G. Wolseley, creamy white, flushed occasionally with rose; Mrs. Copland, old rose and something more than semi-double in form; Faust is a very striking orange scarlet variety; Elphinstone is of a royal purple tint, lighter in tone towards the tips of the petals, and 8 inches in average diameter. Another, its equal in size, was Baron de Graney; The Warrior, a blood red flower, was a striking variety, 7 inches in diameter; and Lady Norman, which was 8 inches across; Germania, Duke Henry, Countess of Lonsdale and Mrs. Mackellar were good varieties, in color, form and size.

Small exhibits of dahlias were shown by J. Cheal & Sons, who also

E. S. MILLER Wading River L. I., N. Y.

showed a number of what may be termed pompon cactus forms, having flowers of about 4 inches in diameter, very suitable for bouquet work, and single-flowered varieties in telling tints.

David Russell, Brentwood, made an admirable display of hollies, green, silver and gold variegated. A fine form of the silver variegated weeping holly was noted, as likewise the species fragrans, and Ilex Lawsoniana aureo maculata, both of them rare. This nurseryman showed Osmanthus argenteus variegatus, and O. aureo-variegatus.

Mr. Vickery Gibbs staged a grand group of hardy asters (Michaelmas Daisies). Each bouquet consisted of flowering shoots, arranged in cups or funnels of water, one above the other, thus forming pyramids of bloom, measuring 4 to 8 feet in height, and 3 to 6 feet in largest diameter.

In next week's issue we shall mention some of the many new and rare orchids staged on this occasion.

A full account of the Dobb's Ferry show will appear in the next issue of HORTICULTURE.

AWARDS AT MADISON, N. J.

In our account of the exhibition of the Morris County Gardeners' and Florists' Society last week the list of prize winners was crowded out. William Duckham was the winner of the "36 flowers in 6 varieties" prize, the "24 flowers in 24 varieties," the Dr. McAlpin special and the R. D. Foote special for 25 carnations, one variety, and first for 6 plants for table decoration. John Downing had more first prizes to his credit than any other exhibitor. He secured the Rickard Bros.' cup with his group and the trophy was well won.

The winners of first prizes on chrysanthemums were James Fraser, Ed. McElhauey of New Brunswick, N. J., Alex. Michel, E. E. Wild, H. Hentz, Jr., Alex. Brown, Chas. Barbauer and Jos. Allenge.

In roses, first prizes went to L. A. Noe, Henry Hentz, Jr., L. B. Coddington, Wm. Muhlmichel, Wm. Duckham, D. Falconer, E. H. Behre, F. L. Moore, A. McKendry, P. H. Cox and Wm. Inglis. Conspicuous among the carnation prize winners were Brant Bros. and Messrs. Duckham, Inglis, Totty and Fraser. In violets, Wm. Duckham and Max Schneider fought it out. Edw. Reagan showed some fine plants of Nephrolepis Scholzei which won first prize. J. D. Preusner got a certificate of merit for Nephrolepis Preusneri. John Heeremans sent from South Carolina some Sea Island cotton, tillandsia and peanuts. Mr. Heeremans' prize for the largest chrysanthemum in the exhibition was won by John Downing.

We still have a few thousand

AZALEAS

to offer at import prices in the best commercial varieties; also Bay and Box Trees, Euonymus, Eurya Latifolia, Araucaria, Asparagus, Crotons, Arecas, Cocos, Kentias, Latanias, Phoenix, Rubbers, Pandanus and Small Ferns for Dishes in best sorts at lowest wholesale prices.

Seed Trade

Dissolution of Partnership.

The partnership between Sherman & Eberle, seedsmen, of 112 South Pearl St., Albany, N. Y., is on the eve of dissolution. A complete agreement has not yet been reached, nor is it known who will retain the business, but it is pretty well settled that whichever partner sells, he will immediately start in business either under his own name or with new connections. The statement that George Philp had severed his connection with Sherman & Eberle is correct, but it develops that Mr. Philp was immediately engaged by Mr. Eberle in anticipation of the coming dissolution of the Sherman & Eberle co-partnership, and is now out drumming trade for his new employer. George has winning ways, and is regarded a very successful salesman.

Advance in Contract Growing Prices.

Contract growing prices are sure to show a marked advance on the general lines of peas and beans the coming season. Farmers are demanding more for their part in the business, and the growers must in turn advance their figures. So far as can be ascertained, none of the principal growers have yet definitely fixed a schedule of prices, but this will not be long delayed, and it can be stated as a fact that there will be a sharp advance over last year's growing prices. More full and specific information will be given in the near future.

Philadelphia Seed Trade Notes.

Jno. R. Satterthwaite succeeds to Tomlinson & Satterthwaite in the seed business at Trenton, N. J.

I. N. Simon & Son, seedsmen, 43 North Water street, have moved to 6 North Front street. They occupy the whole building, four stories and basement and are now right in line for transient trade from the ferries and Market street.

The Phila. Seed Co., a new concern making a specialty of grass and field seeds have located at 127 North Water street. C. A. Neall is president, J. C. Rupp, secretary. Both were for years with Scarlett of Baltimore and Mr. Neall was in the Agricultural Department at Washington for four years.

Notes.

George C. Stumpp, of Stumpp & Walter Co., New York City, has been elected Mayor of Bergenfield, N. J.

The J. F. Noll Seed Co., 115 Mulberry St., Newark, N. J., has been organized as J. F. Noll & Co., with a capital of \$100,000.

INCORPORATED.

Northwest Nursery Co., North Yakima, Wash, \$25,000. C. E. Honner, W. W. Ewing, J. H. Royer.

Crystal Springs Nursery Co., Seatle, Wash. Capital \$10,000. M. Furrys, W. L. Gazzam, W. A. Kuehn.

The Caldwell Nursery Co., of Caldwell, Ida., has been incorporated with a capital stock of \$25,000, by W. S. Hawkes, Charles T. Hawkes, H. H. Cummins and W. R. Wilkerson.

CONTINENTAL EARLY VEGETABLES AND SALAD PLANTS.

To write of the above in general is not an easy matter, as in most parts the so-called local varieties are those chiefly cultivated. I will in the present note mention those exposed for sale in the market of Frankfort-on-the-Main. Of radishes the leading varieties are Erste Ernte (earliest crop). The root is bright red, top consisting of a little bunch of short leaves. One of the best radishes for forcing but almost useless for open air cultivation in the hot months, owing to the root becoming woolly very soon. Marktkonigin, or properly Ruhm von Meckan, is a very early variety forming short leaves, and globular root. It is a superior summer variety. The Wuerzburger radish is considered a good variety, which, however, on account of its large size is not much in demand. The earliest to come into use, and the one meeting with most favor is the Grau halb-lange. I advise those who would cultivate this radish to press the seeds into the soil singly, and to sow in drills in the ordinary manner. The seeds should be inserted in the soil at a regular distance apart, which by a little practice is rapidly done. In a garden frame 1 ft. 6 in. in length by 3 1-2 ft. broad, five rows of seven seeds each are pressed in by finger and thumb.

In raising a crop of early kohlrabi gardeners often court failure by sowing seeds that are less than one year old, whereas, by employing seed of fully one year old, it is seldom that a plant runs into flower. Great care must be observed that the growth of the plants receives no check. The Ulmer Fruhe Glas-Kohl-rabi (Early Ulm) is still the best variety.

Of forcing lettuces there are numerous varieties, but it does not pay the market gardener to cultivate too many of these. The variety Ideal does not pay, it being too small; and when grown in warmth it produces a rather tall stalk. It is interesting to observe how carefully the purchaser handles the Paris lettuces, so that not a leaf is lost—for there are only three of them. It is far different with the Frankfurters when the early lettuces come into the market, for then the buyer cannot have too much in the handful and it becomes necessary to sell by weight. Ruhl's Marktbeher-scher (King of the Market) is a new introduction of a Wiesbaden gardener. This variety possesses every good property which a lettuce can have. The well-developed head is of a golden

tint, large and firm, and is weather-proof. Sutton's Commodore Nutt, a famous English variety, has been introduced. The head is of a green color, and it comes early into use. The method of making the head yellowish is not as yet much known. When the head has formed, in frame-grown plants the frame is forthwith uncovered and the plants are sprinkled with water, and the lights replaced. When the sun shines on the glass a steamy atmosphere is created and scorching is thereby avoided. The heads under this sort of treatment become of a pleasing yellow tint. The varieties Schwarzkorn (Black-seeded); and Steinkopf (Stone-head) are equally good varieties.

In writing advertisers kindly mention HORTICULTURE.

Boston tried the 50 cent admission plan at this year's chrysanthemum show, with 25 cent rate on Sunday and it proved a success. 25 cents has been the maximum heretofore. The receipts exceeded last year's by \$300.00.

MISSISSIPPI MATTERS.

This section of the country is showing strong signs of waking up to the opportunities offered in the floricultural line. Pass Christian and Biloxi are two famous summer resorts on the coast and a good business is done the whole season, both in plants and cut flowers. J. P. Adams has been established at the former place for a number of years and a year ago added a nice rose house to his plant, which has been a success from the start. At Biloxi Geo. D. Mahn, a former grower of New Orleans, ventured in business about two years ago and has now an established trade. Washingtonia robusta and Phoenix Canariensis are two palms largely planted for outside decoration, and both of these growers keep a supply of all sizes.

Columbus, an inland town of about 12,000 inhabitants, boasts of two progressive florists. T. G. Owen has a range of 125,000 sq. ft. of glass, devoted chiefly to roses and carnations, which he grows in good shape. This cut goes to Memphis, Birmingham, New Orleans and the smaller towns in the state. The Columbus Floral Co. has a range of 10,000 ft. devoted to the retail trade, and both plants and cut flowers are raised. Nearby towns having no florist draw heavily on this firm at times, and never meet with disappointment. B. F. Kline is the manager and takes pride in the results achieved. At Booneville, in the northern part of the state, some lady florists grow a big lot of chrysanthemums and grow them well. They are retailed from the finest stores in New Orleans and certainly don't have to blush when placed alongside the finest from Chicago. Jackson, the capital city, has one establishment started a year ago and the venture is succeeding. At Greenville a new modern range has just been built and there is no fear for its future. Meridian, an important railroad centre, supports two florists—Mrs. Watts and J. W. Marshall, Jr. The latter this last summer added two small houses of Lord & Burnham material, for roses.

The soil in this state is eminently suited for roses, and where irrigation can be supplied in times of drouth a great cut can be had all season from the outside. Indoors the plants show remarkable vigor and certain varieties like Kaiserin and W. R. Smith produce flowers that can not be surpassed anywhere. No matter how hard the plant is cut it comes up smiling for more, stronger than ever. The very grip of the soil inspires confidence in a grower.

There are many small towns yet without a florist and a grower with a small capital need have no hesitancy in embarking in business in any of them.

NEW ORLEANS NOTES.

J. A. Newsham has built a handsome show room in front of his place and is contemplating adding a rose house and orchid house. H. Papworth was at the Chicago show this week as one of the judges.

The weather for the last two weeks has been exceptionally warm and all outside flowers are blooming finely. Roses, especially the Pink and White Cochetts, are producing blooms that surpass anything grown under glass.

Alternanthera is just taking on its brightest hues and flower beds in the parks are a blaze of color.

All Saints' day trade this year was rather a disappointment. The regular stores and growers did about the usual amount of business, only two—J. A. Newsham and Metairie Ridge Nursery Co. reporting a substantial increase. The chrysanthemums received from the north were not nearly so fine as the home-raised ones, or the ones received from points in Mississippi and Alabama. The retail prices ranged from \$3 to \$10 per dozen, the biggest quantity being sold at \$5 and \$6. The truck farmers and other small growers who raise some chrysanthemums for this holiday, and depend on the markets for their outlet were badly stung, many of them having to haul the bulk of their cut home, even after slaughtering the prices. Some refused good wholesale offers a few days previous, which made the dose all the more bitter.

THE WHOLESALE FLORISTS OF

1608-20 LUDLOW ST.,

PHILADELPHIA, PA.

1212 New York Ave., WASHINGTON

Flower Market Reports.

BOSTON

With the exception of chrysanthemums, the various items on the wholesale market list are moving with much more life than they did last week, although in a broad sense the tone of the market is comparatively dull. Any change from the stagnation of last week is, however, very welcome. Orchids and gardenias show a vivacity which encourages, and all lines of roses are acquiring a degree of speed as gratifying as it was unexpected; but they must be good in order to find buyers. Violets are being held back, apparently, for the Yale trouble at New Haven on Saturday. For the coming few days much depends on the weather.

CHICAGO

Chicago market has been suffering from the effects of the flower show and the thousand dollars spent by the visitors at the Coliseum meant one thousand dollars not in the retailers' money drawer. The demand certainly was light, whatever the cause, and this week opens up with no great improvement. The warm weather has also been a factor in creating conditions amounting almost if not quite to a slump. Carnations are lower in price than for several weeks and the stock is excellent. Bouvardia has taken quite a prominent place these last few days and the orders can hardly be filled. This shows what an advertisement the flower show booths are for the retailer. The Wienhoeber table decoration which received first prize the six consecutive days of the show was done in pink bouvardia, and John Kruchten is the lucky man who furnished it and who has that flower in abundance this year. Chrysanthemums of every size and color are in in quantity. Everything is fine except the price, which might be said to be too fine.

NEW YORK

The tone of the market has not improved since our last report. It has been, in fact, a very unsatisfactory week, prices being low and all lines of material far in excess of the requirements. Chrysanthemums are in their full tide and, while making the conditions almost intolerable for all other things, have not been able to develop any compensating prosperity on their own account. They are bringing prices lower on the average than ever before, for same quality. Roses have suffered as much as any other single item and in addition to slack demand are decidedly off in quality in many instances. Carnations are a dead proposition at the present time. Of these, also, there are many inferior lots coming in. Violets were never better but they move feebly and when disposed of in quantity the prices are low, as indeed they are on everything whenever a purchaser for

wholesale quantities appears. The situation favors the retail store keeper in a general way but it also puts fat on the sidewalk merchant, who is enabled to carry and offer at cheap figures the highest grade of stock, a fact which bears hard upon the storekeeper in many respects.

PHILADELPHIA

The bottom fell out last week and everybody is in the dumps. There was a falling off all along the line and no special class of flowers was exempt from lack of activity. Chrysanthemums, roses, carnations, and all the staples, suffered from over supply, the only item holding its own being the orchid, which was, and remains, scarce. Violets improved a little as to quality. Sweet peas and mignonette are also improving. Jardine roses are coming in much better. This is a great rose. Many have been free with their criticism; but they have another think coming.

PHILADELPHIA NOTES.

The Roebling conservatories at Trenton, N. J. are showing with pride a pure snow-white Dendrobium Phalaenopsis—with an unpronounceable and unspellable terminal. At least, Mr. Goodier's assistant—the expert Mr. Keeling—was unable to satisfy either himself or the writer on the latter points. Mr. Keeling is from Bradford Forks.

Another Lord & Burnham house has been ordered by the Robert Craig Co. for their Norwood place, to be delivered within four weeks.

Wm. Henry Maule has awarded the construction of their greenhouse at their Jersey testing grounds to the King Construction Co.

Wm. Robertson has a lemon yellow sport from Cheltoni chrysanthemum which is considered by the experts to be very superior.

The thanks of HORTICULTURE and the writer are due to Francis Canning for reporting the P. H. S. fall show, on account of pressure of outside business this season. We hate to have anybody else do it, but we could not get a better substitute.

James F. Mapes, of the Mapes Rustic Works, Clayton, N. J., has nearing completion his new factory 152 x 146 ft.—of corrugated galvanized iron—to replace the structure destroyed by fire last September. New machinery has been introduced, and those in the trade who need window boxes, rustic logs, or anything in the line of natural bark or branches will find this concern headquarters. Their advertisement in another column of this issue is interesting reading.

The S. S. Pennock-Meehan Co. wish us to explain that last week's prices on cattleyas, etc., were inserted through a misunderstanding.

NEWS NOTES.

St. Louis, Mo.—An involuntary petition in bankruptcy has been filed against the Michel Plant & Bulb Co.

Kalamazoo, Mich.—A buggy containing L. P. Thurston, general manager of the Michigan Nursery Company, and his daughter, was struck by an auto at a street crossing, both vehicles being wrecked and the occupants thrown into the street. Mr. Thurston was severely cut and bruised but his daughter escaped injury. Thurston has retained attorneys and threatens suit for damages against the motor company.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

The meeting of this organization last Monday evening was marked by a large attendance, and they got their money's worth in some very interesting and richly humorous episodes not down on the program. The outcome of the exhibition of the Horticultural Society of New York, in which the club individually and collectively had taken a deep interest, was the cause of much gratulation. F. R. Pierson, Patrick O'Mara, Jas. T. Scott and H. A. Bunyard, all talked interestingly on this topic, noting with much satisfaction that at last it had been demonstrated that the people of New York could be awakened to take an interest in flower shows and pointing out the ways in which improvements can be made in the future. The indifference displayed by the "floral artists" towards the enterprise was commented upon and the possibility of overcoming this by providing big prizes was suggested. A wider publicity through the daily press was favored by all.

Wm. Wells, the famed chrysanthemum specialist of Merstham, England, who is visiting New York as the guest of C. H. Totty, was an interested and interesting participant in the meeting. His genial manner and jovial disposition captured all hearts at once and his remarks on the comparative behavior of different varieties in his home and here, and on the characteristics of the growers on this side, as he had noted them, as compared with those in the older country, were closely listened to and vigorously applauded. "My opinion of you American growers," said Mr. Wells, "is that you do go it, but you don't finish as you go." It was a surprise to many to learn that some of our most popular exhibition varieties, such as Col. Appleton, Merza and Dr. Enguehard, are very refractory subjects in England, it being impossible to bring some of them into bloom before January. Somebody ran up against the buzz saw, all right, when a Mr. Furst of California took occasion in the course of his remarks to introduce the Burbank question and to launch an ill-timed arraignment of those people in the East who had dared to criticize that gentleman, and his remarkable achievements. Little did the speaker dream of the volcano in close proximity to him in the person of Patrick O'Mara. All held their breath, for they knew what was sure to follow. Never did gladiator rush into the arena better equipped or more zealous to make mince meat of his adversary. Eloquent and convincing always, the gifted member from Jersey City outdid himself on this occasion. He declared that the unvarying judgment of horticulturists the world over is that Mr. Burbank does not measure up to the standards set for him by ignorant, subsidized writers, and protested against the placing of America and American horticulturists in an undue and humiliating light before

the world as endorsing the mass of untrue statements that had been so persistently circulated concerning Mr. Burbank's work. Nominations for officers for the coming year were made. For president, Harry Turner, A. L. Miller, A. L. Marshall and R. M. Schultz; for vice-president, Jos. A. Manda and Robt. E. Berry; for secretary, John Young and A. M. Henshaw; for treasurer, W. Rickards, J. K. Allen and A. H. Langjahr. Three nominees were named from which to elect a trustee for the unexpired one-year term of the late John Scott, and nine from which to choose three trustees for two-year terms. Election will take place at the December meeting.

JOHN HALL.

Secretary-elect American Nurserymen's Association.

(See last week's issue of Horticulture.)

MINNESOTA STATE FLORISTS' ASSOCIATION.

At the October meeting of this society, fourteen new members were taken in. Resolutions in memoriam of Governor Johnson were adopted. The society has joined the Minnesota State Horticultural Society as an auxiliary. Part of Wednesday, December 15, is set aside for our meeting at the annual meeting of the Horticultural Society.

L. S. Donaldson exhibited some nice Beauty, Killarney, Bride and Bridesmaid roses which scored 79 2-3, 93 and 82 1-2 points. S. Atlee, from Lakewood cemetery, exhibited some original vases, mission style, or which he was awarded an honorable mention.

President Wirth presented retiring Secretary Dysinger with a gold watch and chain, donated by the society for his efficient services rendered during the two years he had the office. A. Swanson read a very good paper on "The Employers' View of the Employee," and Mr. Smith defended very ably the employee's side, showing what could be done to improve the standard of the employee. Prof. Cady and S. D. Dysinger will read papers at the next meeting.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

Chrysanthemum night at this club has always been marked by a large attendance and the meeting Nov. 2d was no exception. The quarters at the Fort Pitt Hotel were gay with blooms and crowded with members.

H. P. Joslin and T. P. Langhans were appointed by the president to convey to Mr. Wm. Falconer the deep regret and sympathy of the club on the death of his wife and it was ordered that a floral tribute from the club be sent to the funeral. Notice was also taken of the funeral of the mother of E. C. Reinemann, another of our oldest and valued members, and the same committee acting in Mr. Falconer's case was instructed to send a letter of condolence to Mr. Reinemann.

Discussion occurred as to increasing the membership of the club, and it was finally decided that each member should try to gain at least one new one for the next meeting. The advisability of having a Horticultural Hall in Pittsburgh was also considered and finally the president appointed Wm. Falconer, P. S. Randolph, Samuel McClements and H. H. Negley a committee with power to add to its membership as seemed necessary to investigate and report upon some feasible plan.

The judges, Wm. Allen and Neil McCallum, awarded first prize for 12 chrysanthemums to T. P. Jenkinson, gardener for A. R. Peacock, second to N. C. Madsen, gardener for R. H. Boggs, and a second prize for chrysanthemum plant to Frank Crook, gardener for J. H. Park. There was a fine display from Phipps Conservatories at Schenley Park and North Side, and the Pittsburgh Rose & Carnation Co. and Randolph & McClements made good commercial displays.

The committee called attention to the high quality of the blooms shown by most of the exhibitors, and there was a discussion as to whether the large-sized blooms were really artistic and desirable. The prevailing opinion seemed they were not. John W. Jones, foreman at Phipps Conservatories, showed a single variety, Mrs. John Sligh, in a pot, loaded with flowers, that was a beautiful thing, and made a charming contrast to the unwieldy blooms of many of the old sorts.

H. P. JOSLIN, Sec'y.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

At the next regular club meeting on November 18, Miss L. L. Hetzer, Groton, Mass., will speak on "Jottings of a Journey Abroad." Ladies are specially invited to this meeting. Nominations of officers for 1910 will be made from the floor. Action will be taken in regard to life membership in the club. There will be a fine exhibit of late chrysanthemums and other seasonable flowers.

W. N. CRAIG, Sec.

Obituary.

Lyman Arnold Budlong.

On Nov. 8th, at his home on Foster ave., Chicago, there passed away a man who had done much to elevate the calling of the scientific market gardener. His was a life crowned by success, not only financially, but because by his example one of the best callings has been dignified.

Lyman A. Budlong met death at his beautiful home after but three days' illness and though eighty-two years of age was still active in the business he had established and which is now under the management of his son, Jas. J. Budlong.

Born Dec. 22, 1829, Mr. Budlong spent his early years in his native town of Cranston, R. I., and received more than a common education for those times. After teaching for a few terms he came West where he located in that part of Chicago then known as Jefferson, which appealed to him and he has seen the prairies drained, cultivated, built up into residence districts and become a part of the city itself.

Lyman A. Budlong was the founder of the pickle industry and from a modest beginning fifty-two years ago, teaching in winter to get a start, his vegetable gardens now cover 800 acres. The present firm, L. A. Budlong Co., was organized in 1900, with L. A. Budlong, president; Joseph J. Budlong, his son, vice-president; and son-in-law, H. H. Chester, secretary.

He leaves four children, Jos. J., Edw. L., and Mrs. A. L. Jones of Chicago, and Mrs. H. H. Chester of Wheaton, Ill. His wife passed away five years ago.

James S. Grant.

I regret to announce the death of this talented gardener on September 10, at the Cape of Good Hope, at the age of 33. The deceased was at one time head gardener to the late Cecil Rhodes at Groot Schuur; but at the time of his death he was in the service of Mr. H. M. Arderne at The Hill, Claremont, Cape Colony. He was formerly employed in the orchid department of Messrs. Sander & Sons, St. Albans, England; from whence he emigrated to the Cape, taking service in the Municipal Gardens, Cape Town. He was an expert cultivator of orchids, and his death is greatly regretted.

F. M.

Hippolyte Millet.

A famous Belgian horticulturist, died recently in the person of H. Millet, of Tirlemont. Sixty years have flown since M. H. Millet assumed a leading part in the organization of the Agricultural Committee of that town; and he organized horticultural lectures and took part in them for 60 years, encouraging a taste for arboriculture, and for plants and fruit in general. Two months ago the deceased celebrated his 60th year of teaching, and his pupils and old students took that opportunity to present him with a testimonial of their affection and esteem.

F. M.

David Thomson.

Our English contemporaries give considerable space to obituary notes

WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

HELP WANTED

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

MISCELLANEOUS WANTS

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, R. I.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 80 Montrose Ave., Brooklyn, N. Y.

FOR SALE—Greenhouse property, with stock and all; 12,000 sq. ft. glass, 1 13-room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland, Ohio.

TO LET

TO LET—Part of large store with large basement. Situated in the center of the wholesale florists' trade. Good opportunity for florists' supplies, green goods, Ferns, etc., or any business connected with the florist trade. Address Manhattan Flower Market, Wholesale Florists, 46 West 28th St., New York City.

SITUATIONS WANTED

SITUATION WANTED—By gardener and florist; German, single man; life experience in growing Carnations, Chrysanthemums, Christmas and Easter stock and bedding plants. Address R. S., care of W. Henning, Lock Box 73, Watertown, Conn.

of this eminent gardener who died on October 22 at Esk Bank, Scotland, at the age of 87 years. Mr. Thomson was the recipient of the highest honors during his life that could be conferred upon a man horticulturally, intellectually and socially a giant among his fellows. His influence and the inspiration of his life is indelibly written in the annals of British horticulture and in the hearts of the gardening fraternity.

Albert Reichsparr.

Albert Reichsparr of Richmond, Ky., died November 1. Mr. Reichsparr was up to about ten years ago employed by Nanz & Neuner, Lexington, following which he went into business as a florist in Richmond.

A. W. Steincke.

A. W. Steincke, 64, a Woodmere florist for 36 years, died of dropsy at his home, 2450 Fort St., W., Detroit, this morning. He was senior member of the firm of Steincke & Son.

Mrs. William Falconer.

Mrs. William Falconer, wife of the superintendent of Allegheny Cemetery, Pittsburgh, Pa., died on November 2, following a stroke of paralysis.

DURING RECESS.

Pittsburgh Florists and Gardeners Go Visiting.

About forty members met at the Shenley Park greenhouses on the morning of Monday, November 1st, to look over the chrysanthemum display. The party was conducted through the spacious conservatories by Superintendent Burke and Mr. Jones, where many things of special merit were noted. The chrysanthemums were for the most part massed in solid blocks of color. Many of the standard as well as the newer varieties were represented by many very large flowers. Besides the large blooms, singles and pompons add to the attractiveness of the display. Amongst these The Hub, Lisco, and Mrs. John Sligh are particular favorites. One compartment is almost entirely devoted to oddities, amongst which are some very curious flowers. Mr. Jones called our attention to one in particular, which he said was presented by Elmer D. Smith, called *Reine du Japon*. Not one in the party could tell which type it belonged to. From Shenley Park the party was conducted to the establishment of Randolph & McClements, where a sumptuous spread awaited them. Randolph & McClements always do things right and this repast was no exception. Mr. Jones acted as toastmaster and called upon John Eader, who responded in his usual humorous, fatherly way, also on Israel Rosnosky, whose special forte is storytelling. After a hearty vote of thanks to Messrs. Randolph & McClements and their respective ladies, the greenhouses were inspected and were found to contain many examples of good culture; chief amongst which were the finest lot of crotons the writer has ever seen. The chrysanthemums are particularly fine, also everything grown in this mammoth plant. After more refreshment the party ended a profitable and enjoyable day by visiting the conservatories of H. C. Frick and H. J. Heinz.

IRIS PALLIDA DALMATICA

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Committee on Gardens of the Massachusetts Horticultural Society announces its list of awards for estates and gardens visited during the present year. The change in the schedule of prizes, by which medals have been offered instead of money, has worked well and the number of entries and visits made has exceeded that of previous years.

The prizes awarded are as follows:

George E. Barnard, Ipswich, favorably reported for the second year of the Hunnewell Premium; Col. Harry E. Converse and Andrew G. Weeks of Marion reported upon favorably for the first and second awards respectively in the first year's competition for the Hunnewell Premium.

Special prize for estate of one to three acres: 1st, F. W. Dahl, Roxbury.

Garden of Spring Flowering Plants: 1st, Langwater Gardens, North Easton.

Garden of Summer or Fall Flowering Plants: 1st, Miss E. M. Tower, Lexington; 2d, Geo. E. Barnard, Ipswich.

Garden of Peonies: 1st, Mrs. James McKissock, West Newton.

Garden of Irises: 1st, Henry A. Belcher, Randolph.

Rock Garden: 1st, Geo. E. Barnard, Ipswich; 2d, H. A. Belcher, Randolph.

Fruit Garden: 1st, F. W. Dahl, Roxbury.

Vegetable Garden: 1st, Geo. E. Barnard, Ipswich; 2d, F. W. Dahl, Roxbury.

Bronze medals were awarded to Robert Cameron, Cambridge, for superior cultivation of late flowering tulips; W. W. Rawson & Co. for sweet pea garden at Marblehead; Duncan Finlayson, Jamaica Plain, for fine condition of Weld Garden; Robert Rust, Pomfret, Conn., for fine condition of "Courtlands" estate; B. Hammond Tracy, Wenham, for gladiolus culture; and C. W. Parker, Marblehead, for "Redgate" estate.

Honorable mentions were awarded to Mrs. H. R. Foote, Marblehead, for rose garden; and W. H. Swanton, Newton, for estate.

WM. P. RICH, Secretary.

EXHIBITION AT RED BANK, N. J.

The Monmouth County Horticultural Society held its 12th annual show on November 3, in the Armory. It was in all respects an unprecedented success. James Kennedy, Wm. Dowlen, Wm. Turner, N. Butterbach, H. Kettel and George Hale were the giants in the chrysanthemum and decorative plant classes. In the cut flower classes competition was very lively. Wm. Turner, Wm. Dowlen, George Hale, N. Butterbach, Jas. Kennedy, Jas. Stevens and A. Bauer were prize winners. The same exhibitors were generally successful in the rose, carnation and violet competitions. The Totty cup was won by William Turner with Leslie Morrison, Rose Pickett, Mrs. O. H. Kahn, Merstham Blush, Pickett's Crimson and C. H. Totty as the best six novelties of 1909. Mr. Turner also won the Julius Roehrs prize for orchids and W. W. Kennedy & Sons received a certificate for display of commercial chrysanthemum plants.

EXHIBITION AT LONG BRANCH, N. J.

The Elberon Horticultural Society held its first annual exhibition on October 27-28. The gardeners on the many fine estates in the neighborhood supported the show by fine examples of their cultural skill and in all respects the affair was creditable and gratifying. Among the prize winners in the various classes of chrysanthemum plants and cut blooms were James Kennedy, Peter Murray, A. Bauer, W. R. Symons, Wm. Dowlen, W. W. Kennedy & Son, Peter Ewan, James Kennedy, Jas. Stevens and August Grieb. In the rose and carnation classes, Peter Murray, Wm. Turner, Wm. Bryan, W. R. Seymour, A. Bauer and Peter Murray were conspicuous.

We have before us a list of over one hundred visitors to the Chicago show from all sections, representing twenty different states of the Union and some from outside, which lack of room prevents our publishing.

Detroit Florists Have an Outing.

The Detroit Florist Club members have another pleasant visit to their credit this fall—this time to Mt. Clemens, over sixty participating. Every place called upon was found in prosperous and altogether admirable shape. At Robert Klagge's La Detroit rose was especially worth noting. At Breitmeyer's a little diversion was introduced by the presentation of a diamond pin to the retiring Club President, Wm. B. Brown, Mr. Phil. Breitmeyer being the officiating spokesman. At Van Boeslagers the potting shed was transformed for the time being into a banquet hall. Cabbage, pumpkins, lettuce, cucumbers, carrots, onions, beets, etc., took the place of the conventional floral decorations in the ornamentation of the table. The rest of the symposium was fully up to the established ideals.

A BENEFICIAL INSECT.

Commenting on a note which we reprinted from one of Prof. Surface's bulletins, a nurseman writes us as follows.

"We are as much 'up a tree' now as the doctor was when he sent the insect spoken of on page 526, Oct. 9th issue. We would like to know our friends when we meet them and so would like a description of the *Thalessa Lady*."

We referred our correspondent's inquiry to Prof. Surface, who has replied as follows:

Replying to your favor of the 15th, I beg to say that it is only reasonable that your correspondent should desire to be familiar with the beneficial insects and know the *Thalessa* mentioned in our Weekly Press Bulletin for September 21st, and kindly passed along by you on page 526 of your issue of October 9th. However, I would beg to call your attention to the fact that in that article, although condensed to the ultimate of condensation, I said, "The *Thalessa* has long antennae and a tail composed of three black hairs, like those of a horse's tail, each about three inches long. These form a long tube which it inserts in the holes made in trees, etc." This certainly gives a description of one of the characterizing features of the *Thalessa*, so that anyone would know the insect when he sees it. What other insect possibly is there having a "tail composed of three black hairs, like those of a horse's tail, each about three inches long!" This, then, is a distinct feature and other descriptions are not necessary. I could give a technical description which would be worse than useless, because it occupies space and print and be meaningless to almost all readers.

I might add that the insect in question belongs to the great order of Hymenoptera or that including the bees, wasps, ants, etc. This consequently means that it has four membranous wings, furnished with but few cross veins; the hind wings smaller than the fore-wings, and the mouth parts with jaws which bite, and a tongue for sucking. It also means that it is an insect of complete metamorphosis or, in other words, existing through four stages, viz., the egg, the larva or pupa, and the imago or adult. This, however, does not describe it any nearer than characterizing the great entomological order to which it belongs. I might further add that it belongs to the sub-order Terebrantia, which is marked by having two segments instead of one in the trochanters or basal part of the hind leg, and that the tip of the abdomen of the female is not furnished with a sting, but with this boring saw described as a long tail. This marks the sub-order. The family Ichneumonidae belongs to the group known as the Parasitic Hymenoptera, which includes most of our insects that are beneficial because parasitic upon other insects. This family is marked by the abdomen being constricted at the piece inserted normally back of the thorax or middle part; having several crossing cells and also a stigma or dark spot in the forewings and a certain vein crossing between two certain veins and two certain wing veins consolidated from the base. This now marks or characterizes the family Ichneumonidae. It is a large family, and to trace the description of the *Thalessa* to its genus would be-

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{3}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

quirements, courses of study, equipment, student life, opportunities for its graduates, etc. It is illustrated with about twenty-five views which indicate that at Amherst, a spot of unusual natural beauty, there is located one of the most progressive and adequately equipped educational institutions of New England. It is also evident that the college is thoroughly preparing young men for positions of trust and influence in the various agricultural vocations. One of the noticeable features about the institution is that this fall its entering class numbers 130, and that its total enrolment of four year students is 315; both these tendence of over 100 per cent. in the last six years. A copy of this publication may be secured by writing to the president's office, and asking for the M. A. C. Booklet.

MOUNT KISCO FLOWER SHOW.

Of late years Mount Kisco Flower show has come to be looked on as one of the principal shows in its section. The cup offered by Mr. Baily, one of the leading tradesmen of the town for the 24 best chrysanthemum blooms attracts exhibitors from far and near. We had the pleasure of looking at the trophy and it certainly is worth coming a long way to win. It is valued at \$100 and it certainly looks its value. This year such high-class growers as Geo. Middleton, Tarrytown; Wm. Duckham, Madison, N. J.; Wm. Turner, Oceanic, N. J., and Ed. Jenkins and Thos. Proctor of Lenox, Mass., were all having a try at it. Geo. Middleton won out with 24 of the most magnificent blooms we have ever seen on the exhibition table. Wm. Duckham gave him a hard run, showing many of the newer and brighter colored varieties but the points he gained in this way were overbalanced by the exceptional size of bloom in the first prize lot. Ed. Jenkins was third with a neat, well-balanced lot of flowers. The other classes were competed for by the local growers and in most cases the competition was keen and close. Altogether it was a very pretty little

show and the gardeners in this section of Westchester county, New York, have every reason to be proud of their efforts for they are certainly forging to the front and many of them will be heard from at the larger shows in the near future. W. S.

CLUB AND SOCIETY NOTES.

The Columbus (Ohio) Florists' Club will have a dance on the night of November 18.

At the annual meeting of the Worcester County (Mass.) Horticultural Society the entire board of officers and trustees were re-elected.

At the meeting of retail florists called to confer with President Valentine of the S. A. F. at Chicago, Irwin Berterman acted as chairman and W. N. Rudd, secretary. The discussion of Mr. Valentine's recommendations was quite full and much enthusiasm was manifested. It was voted to leave the matter to a committee of five, with Mr. Valentine as chairman, to present a plan to the S. A. F. directors in Rochester next spring.

The attendance at the New York show for the five days was 30,734. The total attendance at the show held at the same place during November, 1908, was 8,411, the total this year being therefore over 3½ times as great. One of the gratifying features was the large number which came in private equipages. Another encouraging feature was the increased attendance from day to day, the Sunday's attendance being crowded between the hours of 1 and 5, being an average of over 2,800 an hour. The authorities of the museum placed every facility at the disposal of the management of the flower show, and much of its success is due to this.

The splendid display of orchids in the north hall was due to the work and zeal of the newly-formed orchid section of the society which had the arrangement of the program, in so far as it related to orchids, in hand. The orchid section deserves great credit for the results it accomplished.

Chrysanthemum Novelties

BEST IN THE WORLD AS USUAL

The splendid showing of my last year's varieties at all the Eastern shows, proves how the standard is maintained. As the **American Agent of W. Wells & Co. of Merstham, England**, I have arranged for **simultaneous distribution of their novelty list of 1910** so that the American cultivator for the first time in history can obtain the Wells Pockett novelties at the same time as the British grower. That list will include **Mrs. David Syme**, the gold medal winner and other splendid kinds not yet named. The 1909 list comprises some grand varieties for the exhibition grower. **R. F. Felton** the deepest shade of yellow, **Well's Late Pink** a grand thing in the style of Brighthurst, **Mrs. H. Stevens**, **Gladys Blackburn**, **W. Mease**, **W. Hotston**, and other splendid varieties.

In **American Raised Seedlings** I will offer **Mrs. A. R. Peacock**, **Mrs. W. Arnold**, whites. **Mrs. W. Wincott**, pink, all certificated by the C. S. A. and a **yellow sport of the well-known Ivory**.

GERANIUMS

WE ARE RECOGNIZED AS HEADQUARTERS

Our Standard List contains 42 Double and Semi-Double Varieties, representing the very cream of the World, is the finest collection ever offered to the American trade, in good 2 in. stock at \$2.00 per 100; \$18.50 per 1000; in lots of not less than 1000 and not less than 100 of a kind, except in the following Special Offer.

We will send 1000 in 20 distinct varieties, our selection, for \$18.50. We have been sending out these collections for a number of years and are willing to stake our reputation on them.

We have a large stock of Lantanas, Fuchsias, Lemon Verbenas, Alyssum, Coleus, Double Lobelia, etc., \$2.00 per 100, and are not in much danger of being sold out.

R. Vincent, Jr. & Sons Co., WHITE MARSH, MD.

DAHLIAS Every Day in the Year

SHASTA

Come and see Shasta growing, and be convinced that it is the greatest money making carnation in sight today. In point of freedom it excels any variety ever introduced. Carries more buds right now than most varieties produce in a whole season. The quality is there, too. High score everywhere. 89 points at the A. C. S. meet last January. Can be seen at either Indianapolis or Tewksbury. Booking orders now for Jan. delivery \$12.00 per 100; \$100.00 per 1000.

At \$5.00 per 100

WILLIAM SIM
Cliftondale, Mass.

Two Splendid ROSE NOVELTIES

Raised by JACKSON DAWSON
NOW OFFERED FOR SALE FOR THE FIRST TIME

LADY DUNCAN

Rosa Wichuraiana fertilized with Rosa rugosa. Absolutely hardy.

WINNER

of the Silver Medal of the Massachusetts Horticultural Society 1900. One of the finest hardy ramblers ever raised.

Has the prostrate long rampant growth of the mother, while the Rugosa blood shows in the foliage, spines and flowers, the petals being a warm, lively pink and making a delightful contrast to the yellow stamens.

DAYBREAK

Wichuraiana type, formerly known as seedling No. 7 (Wichuraiana X The Dawson). A vigorous grower, profuse bloomer and easy forcer. Foliage ght yellowish green. Hardy as far north as Canada.

Flowers single, in loosely pyramidal clusters. Color deep yellowish pink, a shade darker than Lady Duncan, slightly lighter tint towards centre. Stamens very bright orange. Flowers full, round cupped. See illustration of plant in last week's issue.

EVERY NURSEYMAN AND EASTER PLANT FORCER WILL WANT THESE TWO NEW ROSES.

Stock limited, order now for prompt delivery.

PRICES — Strong three-year-old plants, \$2.00 each; \$15.00 per dozen.

Two-year-old plants, \$1.50 each; \$10.00 per dozen.

We carry a very large stock of fine Conifers, Deciduous Trees and Shrubs and Hardy Herbaceous Perennials.

Notes From the Arnold Arboretum

The vines play an important part among the new introductions from China and particularly of the genus *Vitis* and its allies a large number of new species have been recently brought into cultivation. Some botanists and particularly the older include in the genus *Vitis* almost all the members of the family of Vitaceae or Ampelideae, but most of the more recent botanists recognize several genera, as we do at the Arboretum; this nomenclature will be followed in these notes, though the use of the name *Vitis* for all the species mentioned here cannot be considered incorrect nor unscientific.

The genus *Vitis* proper is easily distinguished from the other genera even in winter time by the bark separating in long and thin strips and fibres; here belong all the true Grape-vines with edible fruits. One of the most interesting of the new species is *Vitis armata* (*Spinovitis Davidi*) remarkable on account of the blunt prickles which beset the stems and leaf-stalks. The leaves are broadly ovate, heart-shaped at the base, slightly lobed and from seven to ten inches long; on their upper surface they are dark green, on the lower one bluish green and glabrous and change in autumn to a bright scarlet. A more vigorous variety with still more brilliant autumn coloring is var. *Veitchii*. An allied species is *Vitis Romaneti*; though not quite new, it is still little known in cultivation; its young stems and leaf-stalks are densely covered with bright purple bristles which give particularly to the young shoots a very striking and ornamental appearance. The leaves are broadly ovate, slightly lobed and from five to nine inches long, dark green on the upper surface and whitish tomentose beneath. *Vitis Pagnuccii* is the only true *Vitis* in cultivation which has leaves of two different shapes, undivided and three-parted ones on the same branch; the undivided leaves are ovate in outline, scarcely cordate at the base and slightly or sometimes deeply lobed; the divided ones consist of three oblong-ovate leaflets; on their upper surface the leaves are dark green, beneath bluish green and glabrous or nearly glabrous. Of the graceful Japanese *Vitis flexuosa* two new Chinese varieties have been introduced; of these var. *chinensis* has ovate leaves, only about two inches long, slightly or not at all lobed and dark green and glossy on their upper, purplish on the lower surface, while in the var. *Wilsoni* the leaves are of a metallic deep bronze green on the upper surface and bright purple beneath.

The other genera are distinguished from *Vitis* by the close, not shredding bark, the generally corymbose inflorescence and the petals expanding in flowering, not falling off as a whole. The characters by which the several genera are distinguished from each other are more minute and cannot be well explained in a few words. Of the genus *Ampelopsis* the most ornamental and handsome of the new species are *Ampelopsis leoides* and *A. megalophylla*; the former has pinnate leaves from five to nine inches in length consisting of five or seven stalked ovate-oblong and serrate leaflets, purplish when unfolding, later dark green on the upper, whitish and glabrous on the lower surface. The second species, *Ampelopsis megalophylla* has even larger, doubly pinnate, Aralia-like leaves from two to three feet long; the leaflets are in shape and color similar to those of the former species, but much larger. Another new species, *Ampelopsis Delavayana*, has the leaves three-parted; the leaflets are oblong-ovate, from three to four inches long,

dark green on the upper surface, paler and glabrous beneath.

A very handsome and graceful vine is *Cissus Thomsoni* with digitate leaves similar to those of the Virginia Creeper, bright purple when unfolding and retaining the purple color on the under surface during the summer; the five oblong leaflets are serrate and from three to four inches long. Another new species is *Cissus repens* (*Vitis repens*) with entire or only slightly three-lobed leaves, broadly ovate in outline, glabrous and about three inches long.

Of the genus *Psedera* the very handsome *P. Henryana* has already been described in the issue of July 24. Another new species *Psedera sinensis* has partly simple, only three-lobed leaves, broadly ovate in outline and from four to five inches in length, and partly digitate leaves with three to five leaflets, dark green on the upper, pale bluish green and slightly tomentose on the lower surface.

Tetrastigma obtectum (*Vitis obtecta*) also has digitate leaves consisting of three or five leaflets, oblong-ovate in outline, the middle one longer and from three to five inches in length.

Alfred Rehder.

British Horticulture

SOME NEW ENGLISH APPLES, PEARS, STRAWBERRIES, ETC.

Our fruit lists have been so extensively added to of late years that one hesitates to mention the new varieties, still there are a few undoubted acquisitions among the many introductions. The new culinary apple, Rev. W. Wilks is one of these. It has received an award of merit from the Royal Horticultural Society. The parents are Ribston Pippin and Peasgood's Nonsuch. The writer has observed 8-10 fruits on maiden bushes this season. It is being distributed by J. Veitch & Sons. Of apples of recent introduction I may mention Star of Devon, a fine variety of moderate size and a late keeper.

Veitch & Sons offer a new apple—Langley Pippin, raised by crossing the famous Cox's Orange Pippin and Mr. Gladstone; a very valuable acquisition. In season in August and September. It received an award of merit from the R. H. S.

Peach Duke of York is a cross between Nectarine Early Rivers and Peach Alexander, and ripening at the same time as the last named. It has the distinct flavor of the nectarine and is a free stone variety. Pear Santa Claus is a fine variety in season at the end of December. In form the fruit bears a resemblance to Doyenne du Comice. The variety obtained an award of merit from the R. H. S. Pear Blickling is a late variety raised by Mr. Allan, gardener at Gunton Park, Norfolk, who on January 12 of the present year, was awarded a first class certificate for the variety. The fruit ripens in January.

The famed raisers of strawberries, Messrs. Laxton, offer some new varieties. Progress is the result of a cross of British Queen with Latest of All. Messrs. J. Veitch & Sons offer a novelty in strawberries in Alake, raised by Mr. Seden at their Langley nursery. The fruit is very large, more or less wedge shape, of a bright scarlet color. The flesh is also scarlet.

Advancement
on right lines.

It is with much satisfaction and with sanguine hopes for the future of our horticultural exhibitions that we learn of the efforts being made in various

places to break away from the conventional monotony of the old-fashioned flower show and introduce novelty in arrangement and studies in adaptability and harmony in color effect in plant and flower grouping. This movement is in line with the views frequently expressed by **HORTICULTURE** in considering ways and means whereby public interest in flower shows may be reawakened and retained and we are glad to see that our efforts have not been futile. Rochester with its 17,000 paying visitors, Chicago with its record breaking attendance and Boston in its last spring's success give good evidence that the right spirit is active among the show managers and that the innovation of presenting a perfect and harmonious picture instead of a motley assemblage of individual contributions has the elements of popularity in it which make for success. And then they are distinctly educational from an artistic standpoint—something much needed by the people generally and also by the florists themselves.

We noticed, a few days ago, in the window of a prominent flower store
"If the blind lead the blind" in a certain city a spray of the tiny blossoms of the pompon "Baby"

chrysanthemum in a little vase and, alongside of it, a specimen bloom of one of the largest market varieties—the former labelled "The chrysanthemum of our grandmothers" and the latter marked "The chrysanthemum of today." The florist who displayed them would have the public believe that the difference between the two represented the line of development since our grandmothers' days and he probably believed it himself, in ignorance that the one represents fully as modern a development as the other and comes from a distinct ancestry. The term "our grandmothers' days" in somewhat indefinite. Some of us have grandmothers still alive and healthy; others have to trace back many years to find when their grandmother lived. But, at least, it is a fact that about fifty years ago they were having chrysanthemum shows in London where blooms grown four or five to a plant were shown, from four to six inches in diameter, and many new sorts were being constantly raised and imported to Great Britain and to America. We know of one writer who, in describing some of the chrysanthemum novelties of 1862, remarked that "very little if any improvement has been made in the past ten years." Our florist friend should revise his chronology.

Another instance of willingness
An assumption without foundation to distort history in order to cite sensational comparisons may be seen in the window of a florist who is displaying an absurd composition of pompon

chrysanthemums packed tightly in a conical bunch, the different colors arranged in rings alternately with carnations and inscribed "The style of 1870." Our memory goes back beyond 1870 and we recall something of the kind built of "everlastings" and "princess pine" by the country people, and exposed on the Christmas stands at the market and that is as near as our friend comes to facts as to the 1870 style of floral work. The truth is that there were in Boston and elsewhere in 1870 floral artists—and a few of them are still alive—who have few rivals in the whole line of present-day florists; who could take a pile of Bonsilene, Safrano, Malmaison or Marechal Niel roses, with heliotrope, jasmine or similar material and choice ferns and in a few minutes tie them into bouquets of such lightness, symmetry and grace as would make the eyes of their successors of the present day stick out in wonder. And the people who bought flowers in 1870 knew a good thing when they saw it as well as do those of 1909. It is incontrovertibly true that in attaining the beautiful floral effects which are at the disposal of the public today the grower has done the lion's share. Beyond making use of the abundance of improved material which the producer has provided for him we do not see that the average floral artist of the present time shows any particular advancement over his predecessor. We admit that they are very often brilliant business men, shrewd buyers and clever traders but we should like to see some of the young men in the retail trade get out and rub up against one another in friendly emulation and rivalry at the flower shows; study artistic effect in form and color combinations and contrasts; educate themselves in art as is being done by those engaged in professions artistically far below that of the florist. The barouche load of floral monstrosities so often seen in the van of a funeral procession sufficiently shows what the florist business of today is unfortunately compelled to answer for.

Allamanda Williamsii

Editor HORTICULTURE.

This useful Allamanda mentioned in Mr. Stewart's interesting article in your last issue was raised by Samuel Sarple, head gardener at Dallam Tower in Westmoreland, England. I have several times seen the original plant and believe it is still in existence. *A. Williamsii* is not a hybrid but a seedling from *A. Hendersonii*. Mr. Sarple's stock was acquired by the one-time well-known Upper Holloway firm of B. S. Williams & Son and introduced as stated by Mr. Stewart in 1891.

W. H. Craig

North Easton, Mass.

Epidendrum decipiens

The subject of the illustration is a handsome *Epidendrum* from Columbia, the flowers of which resemble the well-known *Epidendrum radicans*. The sepals and petals are orange scarlet and the lip bright orange, beautifully marked with carmine.

The plant was described by Lindley as long ago as 1853, but is still rarely seen in cultivation. It is altogether a better plant than *E. radicans*, the flowers being of a better color and the whole plant of a more compact and neater habit. It grows about three feet tall including the flowers, never roots along the stem like *E. radicans* and is a very free grower and bloomer. It propagates itself quite freely from the nodes along the flowerstems if these are left on long enough.

The plant from which the photograph was taken was collected by Mr. Carillo of the firm of Carillo & Baldwin and is now in the collection of Mrs. B. B. Tuttle of Naugatuck, Conn.

M. J. Cope

Naugatuck, Conn.

Next week the Thanksgiving Turkey has the right of way on our regular publication day. We go to press Wednesday, remember, and all communications—advertisements or reading matter—must consequently reach us one day earlier than the usual limit, for appearance in next week's paper.

THE EXHIBITIONS

DOBBS FERRY SHOW.

The 9th annual chrysanthemum exhibition of the Dobbs Ferry, N. Y. Horticultural Association, was held in the Village Hall, Dobbs Ferry, on Nov. 5 and 6. The number of exhibits and the general quality of the exhibition excelled any of this society's previous shows.

Because of lack of accommodation, the society limits competition to the villages of Hastings, Dobbs Ferry and Irvington. This may appear narrow, but anyone attending these exhibitions would readily see that this provision is necessary, as every available corner of the building was packed.

This society is very much to be commended on its large heartedness and public spirit. The gardeners work hard and compete freely in a spirit of friendly rivalry, for comparatively small prizes which are donated by the various trades people and residents. The hall is given gratuitously by the village authorities for the occasion and the gate receipts are turned over wholly to the Dobbs Ferry Hospital. On the last evening of the show, the flowers and vegetables are all sold, first by private sales and then what is left at 10 o'clock, is disposed of by auction. Considerably over \$200 was realized by this means.

The individual blooms were not as large as those seen at a number of other exhibitions, but the competition was keener, and many close decisions had to be given by the judges. From the standpoint of groups and tables of plants, the showing was much more creditable than at most other places. On the second day the table decorations and centrepieces were a very attractive feature.

Considerable excitement prevailed over the gold medal offered by Lord & Burnham Co., for the best 12 blooms of chrysanthemums in 4 varieties, 3 of each. The lots were very evenly matched, but John Brunger, gardener to Mr. I. N. Seligman, won out with a nice even lot of fresh flowers. For the Thorburn prize for best collection of vegetables, the tussle finally simmered down between Robt. Boreham and Jos. Dunbar. Mr. Boreham winning out. The judges were Jas. Stuart and Thos. Aitchinson of Mamaroneck, and Jos. Mooney, Hastings.

We should like to publish the complete list of awards but lack the room. As a summary we might say that in the list of first prizes Thomas Lee's name appears once, Henry Kastberg five times, Robert Boreham twice, John Brunger four times, John Goff six times, Wm. Hutchings twice, D. MacRae once, W. Howe three times, H. Kelling six times, M. Flanagan once, C. Wilson once, H. Heath three times, John Holgerson, Thos. Johnstone, J. Thomas, J. Bradley and F. Bradley, once each.

PASADENA FLOWER SHOW.

The second annual flower show of the Pasadena Gardeners' Association was far and away ahead of that of last year in every respect. Among the florists exhibiting were Howard & Smith, who put up a handsome booth. One of the most interesting exhibits was the botanical display of P. D. Barnhart, containing 107 varieties of tropical flowers, shrubs and fruits from nearly every country on the face of the globe, duly classified and labeled to attract the attention of visitors.

CHRYSANTHEMUM SHOW AT GARFIELD PARK, CHICAGO.

(See Cover Illustration.)

A two weeks' chrysanthemum show is on at the Garfield Park conservatories and Manager J. Sells and his assistants are kept busy till 10 p. m. each day showing visitors about and answering their questions. Mr. Sells, who has spent 35 years in the West Side Park System, says, they would like to see these special fall exhibitions more generally patronized by the public. 6,000 chrysanthemums are in bloom now, comprising fully 100 varieties.

These exhibits, one at this time, one at the holidays and one at Easter are a source of much pleasure and education to the public. In addition to the chrysanthemums, the house of economic plants just now shows lemons in fruit, olive trees, Japan plums in bloom and many other interesting trees. The big domed palm house has also two large banana trees in fruit. The orchid house is showing a good variety of these fantastic blooms.

Mr. Sells is to be congratulated on his success this year, particularly considering the unfavorable conditions under which he has labored. The new roof to the large dome is completed and the other work has been temporarily patched up to wait until spring. The repairs on the conservatories will cost in the neighborhood of \$75,000.

MILWAUKEE FLOWER SHOW.

From Nov. 11 to 14 the Milwaukee Florists' Club gave their first large flower show in the auditorium. The effect was that of a summer garden and winding walks, bordered with sod and multitudes of flowers produced an effect that pleased and fascinated the thousands of spectators. The long galleries around the arena were festooned with wild smilax and from the ceiling were hung huge baskets in which were placed electric lamps. A novelty was a forest of oaks, maples, etc., which were placed in front of the stage making a good contrast for the vases of cut flowers arranged in front of the boxes. The usual eccentricities in the way of green roses, grafted chrysanthemum plants, etc., and a cotton plant in bloom, attracted a wondering crowd. The opening night, despite a rain storm, was largely attended. During the four days musical programs were rendered each afternoon and evening by the First Regiment band of Chicago.

Special features were an exhibit by Milwaukee Park Board and a model back-yard by the Milwaukee Florists' Club. This club has for president C. Dallwig, vice-president G. Rusch, secretary E. Oestreicher, treasurer J. G. Heitman and with their various committees have made a great success of their flower show. Special premiums were offered by Kroeschell Bros., A. Deitsch Co., J. Moninger Co., Poehlmann Bros. Co. and Peter Reinberg of Chicago, Morehead Mfg. Co., Detroit, and others, in addition to those offered by the Milwaukee firms.

SHOW AT ALBANY, N. Y.

The first annual flower show given under the auspices of the Albany Florists' Club and the Hospital Corps, Second Battalion, Tenth Regiment, opening at the State Armory, Albany, N. Y., Thursday afternoon, November 11, and continuing until Sunday evening, was a grand success. The immense drill room was transformed into a garden of beauty. The Second Battalion Band rendered many selections at the evening sessions.

Large bay trees and palms from the executive mansion conservatory were attractively arranged on either side of a bower of evergreens which covered the entrance. Many decorated booths placed on each side of the hall by a number of the florists of the city, added much attractiveness. Groups of palms covered the center on either side of which were numerous tables of flowers and flowering plants.

Trained chrysanthemum plants from Thos. K. Talbot, gardener for Mrs. Dean Sage; fruit display by W. E. Drislane Co.; chrysanthemum blooms from Ed. Jenkins and A. J. Loveless, Lenox, Mass., were among the notable exhibits.

F. A. Danker took first prize on a beautiful display of orchids, on brides' bouquet, decorated mantel and table decoration. Fred Goldring was first on large vase of 50 chrysanthemums and on 12 pots of grand Easter lilies. Louis Menand was first with a fine collection of evergreens in pots. Henkes Bros. also had a splendid group of boxwoods, etc. The Rosery won first for bridesmaids' bouquet, second for mantel decoration and for table decoration and first for basket of chrysanthemums. The mantel decoration by W. E. King was also very handsomely arranged. The show was under the direction of F. A. Danker, chairman; E. F. Meany, secretary; and Louis Menand, Sr., treasurer.

WORCESTER COUNTY (MASS.) EXHIBITION.

The exhibition on November 10-11 inst. was an excellent one. Of the local florists, there were represented H. F. A. Lange, E. W. Breed of Clinton, L. C. Midgley, H. F. Littlefield and C. D. Mackie. There were large displays of chrysanthemums, roses, carnations and palms. Among the gardeners Messrs. Wm. McAllister and G. De Boer of Whitinsville and Mr. Russell of Upton were creditably represented.

NOTES.

The annual flower show at R. F. Gloede's conservatories, Evanston, Ill., last week, attracted thousands of visitors.

Detroit, Mich.—Breitmeyer's floral establishment held their annual exhibition of chrysanthemums and other flowers Nov. 11, 12 and 13.

The Georgia-Carolina Fair at Augusta, Ga., had a very creditable horticultural department in which P. J. Berckmans Company, Boatwright Floral Co. and Balk's Nursery were represented by interesting displays.

ST. LOUIS HORTICULTURAL SOCIETY.

Last week's show at the Coliseum was the best effort of this society since its organization. Exhibits were fine and attendance better than usual. The Park and Water Works Departments helped to fill the hall with fine displays. A large Japanese pagoda by F. C. Weber attracted much attention. Ostertag's fisherman specialty, described in another column, was also very effective. F. H. Weber had a beautiful table of orchids surrounded by fine decorative plants. Other important displays were by Sanders' Nursery, Theo. Miller, C. Young & Sons Co., Koenig Floral Co. and Ellison Floral Co. During the week Chas. Knopf staged his new carnation admiration, A. C. Brown staged Sangamo and his new seedling Clara Mae. J. A. Peterson showed plants of his new begonia *Glory of Cincinnati*. F. R. Pierson sent his new *Nephrolepis* and H. A. Dreer *Acanthus montanus*. Special mention should be made of J. F. Ammann's Ivory and John Steidle's White Killarney.

Names of first prize winners included Wm. Schray & Sons Co., J. A. Peterson, Koenig Floral Co., Vaughan's Seed Store, C. Young & Sons, E. G. Hill Co., W. J. & M. S. Vesey, H. J. Weber & Sons Nursery, Chicago Carnation Co., J. F. Ammann, Poehlmann Bros. Co., John Steidle, Theo. Miller, Sanders' Nurseries, F. H. Lemon and A. C. Brown. F. R. Pierson Co. were awarded a bronze medal for *Nephrolepis superbissima*. Peter Reinberg won the Hess & Culbertson loving cup for 100 Am. Beauties, W. J. & M. S. Vesey the Mermod, Jaccard & King cup for 100 chrysanthemums with variety Robinson. The Shaw gold medal was not awarded. The prize for seedling carnations not yet disseminated went to Chicago Carnation Co.'s Conquest and Sangamo. The best 25 white carnations was Miss Sara Hill by W. J. & M. S. Vesey, the best 25 pink, May day by J. F. Ammann, and the best 25 red, O. P. Bassett, by Ammann.

On Wednesday night the society tendered a banquet to the visiting florists and the ladies were entertained by a theatre party by the St. Louis ladies. On Thursday the St. Louis Florist Club entertained the visitors at their meeting and at lunch at the New Knickerbocker Cafe, after which all were taken to the flower show in a big touring car.

The show was in charge of Otto G. Koenig and Fred Meinhardt and they did their work well. The judges were I. C. Bertermann of Indianapolis, J. T. Temple of Davenport, Ia., and R. F. Tesson. There was a large number of visitors.

THE ST. LOUIS SHOW AS A LADY SAW IT.

Mr. Editor:—We have just returned from the St. Louis Flower show, and thinking that you might like to know something about it from a visitor's point of view, I am taking the liberty of sending you these rambling comments, hoping that they may prove of interest to you, and to the readers of HORTICULTURE. We arrived early Tuesday morning, and going almost directly to the Coliseum, found it even then in festive array, the flag decora-

tions of the recent horse show having been left up, and they added quite considerably to the gala appearance of the auditorium, which is very fine indeed for exhibition and show purposes, and the light is excellent; indeed, you are hardly aware that there is a roof overhead, as it does not seem to exclude a single ray of light.

The floor of the auditorium was laid out in a handsome geometric design, the several figures being outlined with sod, and the space within covered with tanbark, forming a very pretty background for the groups of plants and vases of flowers.

The central figure was a huge circular basin encircled with a border of crotons, Pandanus Veitchii, ferns, etc., and a fine fountain in the center, the exhibit of the Water Works department.

The Park department contributed two large groups of foliage plants, and the Missouri Botanical Garden a group of "Bible Plants," and, speaking of this group, while making a call on Mr. Gurney, at Tower Grove, the dear old gentleman gave us a very interesting account of how he gathered this collection of plants, which took something like sixteen years to complete, and told of their wonderful significance, giving one instance, that of the almond tree, the "flower of hastening," and proving by chapter and verse that wherever mentioned in the Bible, the idea of "haste" was connected with the reference to the Almond.

The display of roses was very fine, at least, they looked good to me; there were some very fine white and pink Killarneys, sent by Poehlmann Bros. Peter Reinberg won a beautiful silver cup for the best 100 Beauties and W. J. & M. S. Vesey the silver cup offered for the best 100 chrysanthemums.

Among the exhibitors from outside St. Louis I noticed the following: E. G. Hill Co., Fred. H. Lemon Co., and The Chas. Knopf Co., of Richmond, Ind.; W. J. & M. S. Vesey, Ft. Wayne; J. A. Peterson, Cincinnati; Chicago Carnation Co., Joliet, Ill.; H. A. Dreer, Phila., Pa.; Peter Reinberg and Poehlmann Bros., Chicago, Ill.; J. F. Ammann, Edwardsville, Ill.; and A. C. Brown, of Springfield, Ill., who has on exhibition one new carnation, "Sangamo"; also, D. S. Brown, of Kirkwood, Mo., has a table of cut orchids, cattleyas, cyripediums, etc.

There were several booths showing table and mantel decorations, which were after the same old stereotyped style, a mass of flowers, suggesting nothing, but, just simply a mass of flowers. Why do our good people persist in making a "hodge-podge" of what might, and ought to be, a beautiful picture? The Schisler-Corneli Seed Co. and the St. Louis Seed Co. each had a booth tastefully decorated with autumn leaves and greenery, and fine displays of seeds, bulbs, etc. F. C. Weber showed a very pretty Japanese booth of bamboo, decorated with Japanese lanterns and foliage plants, and this booth was to have been used on Wednesday afternoon, for the serving of tea, at which the Japanese ladies accompanying the visiting Commission, were to have assisted, but unfortunately, the Baroness was taken ill on the car and had to be taken back to her hotel, and of course her ladies could not leave her. The most unique

of all the booths was gotten up as a fisherman's tent, of poles covered with autumn branches and decorated with all sorts of "finny" things, nets and rods, dried specimens of fish, and a big hornet's nest. There were eight covers laid, and the place cards were paper plates, each having a colored caricature of some member of the St. Francis Hunting & Fishing Club of St. Louis. In the center of the table was a deep pool, a fountain, and live fish and frogs sporting in the water; ferns, bulrushes, lycopodiums and other green, and tiny electric lights, making a very pretty and attractive scene. The chairs were rustic, and each had a fisherman's duck coat hanging over the back; a clever idea cleverly carried out and reflecting much credit on the exhibitors, the Ostertag Bros. Another novel feature was a fruit and flower design, entitled "Fall," the work of Theodore Miller, which received one of the special prizes, and it was a most artistic piece both in conception and execution. On a tall easel was a large, broad plaque of dull bronze-yellow plush, and in the center a large cluster of apples, pears and California grapes, some of the latter trailing down one side of the easel, which latter was decorated with two fine sprays of yellow chrysanthemums, ferns and autumn leaves, tied with pale bronzy-yellow ribbon; it was a most harmonious combination of color and a "picture" at the same time. It brought to mind the beautiful and artistic arrangements of flowers that I saw in Hamburg and other European cities some two years ago, and which I wish might become popular here. In addition to the flowers, there was a fine display of fruits, apples, peaches, etc., which looked most tempting, especially when that "all gone" feeling had me in its grip.

Among the visitors, I noticed Pres. Valentine, who stopped for a day on his way home from Chicago; also, W. N. Rudd, S. S. Skidelsky, Geo. Asmus, W. W. Coles, Mr. and Mrs. Chas. Maynard, Mr. and Mrs. Geo. A. Kuhl, Mr. Karens, and T. Mellstrom, of St. Albans, Eng. Mr. Jo. Hill, who staged the exhibits for the E. G. Hill Co. and the Fred. H. Lemon Co., was accompanied by his wife and Mr. and Mrs. Gaar, Mrs. Hill's father and mother; Judge and Mrs. Vesey and Miss Margaret Vesey were also among the exhibitors, and received as usual, a fair share of the honors.

The St. Louis ladies of the L. S. A. F. entertained with a matinee party on Wednesday afternoon, and in the evening, Mrs. Fred. Meinhardt gave a very pretty dinner at the Missouri Athletic Club for the visiting ladies. At the same time and place, the St. Louis Florists' Club entertained with a "stag" dinner for the visiting florists, and on Thursday afternoon there was a meeting of the Club, and a "smoker."

The weather was ideal until Thursday evening, when there was a regular "down-pour" of rain, which caused a very considerable falling-off in the attendance. A very pleasant feature was the serving of light refreshments in the interests of several charities, the Neighborhood House, the Home of the Friendless, and others, and there were concerts both afternoons and evenings, all of which served to make it seem more like a pleasant social

gathering than just a mere "show."

We left for home on Friday morning, so I do not know anything about the financial success of the show, and can only hope that it will be all that could be desired.

H. C. P.

RHODE ISLAND HORTICULTURAL SOCIETY.

The annual chrysanthemum show of this Society was held at Providence, November 2 and 3. The attendance was unusually good. One of the features of the exhibition was a display of Japanese evergreen planting and miniature fancy bedding by William Appleton. It attracted much attention. John A. Macrae was one of the largest exhibitors. Warwick Greenhouses, Farquhar Macrae and others were also represented.

HYMN OF THANKSGIVING.

(The Cavalier.)

We thank Thee that the sun and rains
Have brought the harvest to our fields,
That we have guerdon for our pains,
With health and hope that plenty yields.

We thank Thee for the touch of love
That has upheld us on our road;
Has pointed to far heights above,
And led to paths before untrod.

And, while we thank Thee for the past,
With bended knee and hymn of praise,
Grant differing hand clasp hand at last,
That peace, not discord, crown our days.

AN IPSWICH GARDEN.

The cut at the head of this article represents the flower garden on the beautiful estate of George E. Barnard, of Ipswich, Mass. The site was formerly useless marsh and worthless old pasture, filled with brush. An elevation of about forty-five feet, finely wooded with oaks, maples, chestnut, spruce and pines, forms a beautiful feature of the landscape, fronted by a pond-like sheet of water formed by a bend in the Ipswich river. Sloping to water's edge is a fine piece of lawn adorned with numerous flower beds.

This flower garden at the time of filling in was well drained and covered over with loam and a few years' work brought it to a high state of cultiva-

tion. The walk shown in the picture is three hundred feet long, with several cross walks. The walks are edged with yellow Snap-dragons and White Peonies, and on the left is a lily pond and rockery planted with rhododendrons, azaleas, lilies and other suitable plants.

The balance of the estate, greenhouses, rose garden, etc., is in keeping with the flower garden. The owner and Mr. Critchly, the gardener, have well demonstrated what can be accomplished by patience, skill and money well spent. The Garden Committee of the Massachusetts Horticultural Society recently visited the estate and were much impressed with its beauty.

NEWS OF THE CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The November meeting of this organization at Horticultural Hall was attended by a goodly number, including quite a few ladies, and all were well repaid in the very interesting address made by Miss Hetzer who had been announced as the lecturer of the evening. Miss Hetzer's subject was a recent European tour, via the Mediterranean, Italy, Germany, France, Great Britain and Ireland, and her notes by the way, horticulturally and otherwise, were pertinent and sprightly. Nature's exuberance and man's enforced economies in land and material throughout portions of Europe, the grandeur of the German forests, Alpine scenery and flora, the gardening of Versailles, the floral riches of Hampton Court, the scarcity of insects but abundance of mildew and the luxuriant foliage characteristic of English summer scenery were all entertainingly portrayed and the lecturer was rewarded with a rising vote of thanks. Miss Hetzer is at the School of Horticulture at Groton, Mass.

On the exhibition stage there were a number of interesting displays. Backer & Co., showed two seedling carnations—a vase of each—one a very handsome white, known as 96 C, and the other named Red Prince, brilliant scarlet. H. F. Woods showed a sport from Timothy Eaton chrysanthemum, softly flushed with pale pink and of much more pleasing form than the parent, carrying fewer petals. W. N. Craig had several of his pretty seedling single chrysanthemums. Wm. Thatcher showed a plant of Adiantum polyphyllum—a lovely species. H. Eichholz of Waynesboro, Pa., sent flowers of a pink sport from carnation Enchantress

which he has named Washington; nothing alarming. There were several other vases of carnations and roses from local members.

Various routine reports and other matters were duly disposed of. An invitation to visit George E. Buxton and August Gaedeke at their respective establishments in Nashua, N. H., on December 11 was gleefully accepted. In accordance with request of Chair-F R. Pierson a committee consisting of Messrs. F. Welch, D. Finlayson and Thos Roland was appointed to represent the Club at a preliminary session to be held in Boston in connection with the S. A. F. Flower Show project. January 27 has been selected as the date for the annual banquet of the club.

The life membership amendment was defeated. It was announced that Mr. E. H. Wilson would give a stereopticon lecture on plant collecting and the flora of Western China at the December meeting.

Officers were nominated as follows: President Wm. Downs, J. W. Duncan; vice-president, W. J. Kennedy, Peter Miller; treasurer, Ed. Hatch; secretary, W. N. Craig; executive committee, W. E. Fischer, J. Heurlein, Ralph Curtis, C. J. Harvey, Thos. Pegler, H. A. Stevens, J. P. A. Guérineau, C. E. Holbrow, H. E. Fiske, G. W. Butterworth, Peter Fisher.

AMERICAN CARNATION SOCIETY.

Miami Floral Co., Dayton, O., registers new carnation Miami Queen (Mrs. Lawson × G. H. Crane). Color cerise pink, size 3 to 4 inches. Habit compact, no surplus grass. Strong healthy grower. Blooms early and continues all the season. Calyx strong and does not burst.

A. F. J. BAUR, Sec.

HORTICULTURAL SOCIETY OF NEW YORK.

The regular monthly meeting of this society took place in the Academy Room at the American Museum of Natural History on Wednesday, November 10th, 1909, at 4 p. m. In the absence of the president, Mr. Wood, Patrick O'Mara acted as chairman during the business portion of the meeting, Mr. Scutwick capably filling the chair when Mr. O'Mara was called away by a business engagement. Seven new members were elected to the society, this making a total of twenty-one new members since the opening meeting in October. The society desires all interested in horticulture, whether professionals or amateurs, to help the cause along by uniting themselves with the society. The annual dues are only \$5.00, and if we can increase the membership sufficiently a great deal can be accomplished for horticulture here.

The exhibition just closed was a pronounced success. This opened on the evening of the 3rd with a private view to members of the society, the Museum, and affiliated organizations, and was open free to the public on Thursday, Friday and Saturday from 9 a. m. until 10 p. m. On Sunday it was open from 1 to 5. Over 30,000 people visited the exhibition, over 11,000 of these on Sunday afternoon. It is desired next fall to give an exhibition larger than the one just closed, and to carry this through successfully it is necessary to increase considerably the membership of the society. The society has at its disposal in the American Museum of Natural History unexcelled facilities for holding exhibitions of the largest

order, and only an insufficiently large membership holds back the society. Let all those interested put their shoulder to the wheel and see what can be accomplished.

At the conclusion of the business meeting an interesting paper was read by W. H. Waite, one of the most successful growers of the chrysanthemum. Considerable discussion followed and many points of interest were brought out. Responding to questions, Mr. Waite described the method employed in creating the large bush plants which he had shown at the late exhibition. Answering other inquiries, he went into detail describing soils necessary for growing the chrysanthemum, and other features of successful culture. The flowers used by Mr. Waite in illustrating the chrysanthemum types were passed around for examination, creating much interest, and a hearty vote of thanks was extended to him for his admirable paper. Thanks were also extended to Mr. Southwick for a display of chrysanthemums made by him.

The secretary exhibited a series of photographs of the exhibition. These were of groups and individual plants, all prize winners.

FLORISTS' AND GARDENERS' CLUB OF R. I.

Robert Johnston was the unanimous choice for president of the Florists' and Gardeners' Club of Rhode Island at the annual meeting of the organization. The other officers elected were: Vice-president, E. A. Appleton; secretary, William E. Chappell; treasurer, William Hill; executive committee—James Hockey, Cornelius Hartstra and Harry Clark; librarian, James Dillon.

The meeting was called to order at 8 o'clock, with former President James Hockey in the chair. After the reports of the various officers had been made adjournment was taken for refreshments. The rest of the evening was given over to a discussion of the best way to arouse more enthusiasm in the club and of acting more in conjunction with the Rhode Island Horticultural Society. Nearly all of the members took an active part in the debate, but no really satisfactory solution of the problems was reached.

It was voted to hold the annual supper of the club on Monday evening, Jan. 17, 1910. A committee consisting of E. A. Appleton, Alexander Macrae and Harry Clark, was appointed to make arrangements.

NASSAU COUNTY HORTICULTURAL SOCIETY.
